The introductory telenovela focuses on two immigrant families, a family that recently arrived in a Southern town and a well-established family that has been in the community for many years. “We wanted to introduce some of the perspective of Latino immigrants,” says Dr. Deborah Bender, a fourth member of the team and a clinical professor of health policy and administration in the UNC School of Public Health. “We felt it would be really important for beginning students in particular to understand in a more global way where these folks are coming from.”

Cultural misunderstandings can interfere with provider-patient understanding, she points out. “In some cultures from Latin America, instead of making eye contact, they are showing great respect.” Dr. Elizabeth Tolman, visiting assistant professor of Romance Languages at UNC and a language consultant on the Salud project, says, “Since I know Spanish, I know they don’t always translate all the information. They don’t translate every word you say, just what they understand. In other words, there is some information that gets lost.”

The intermediate level ¡A su salud! course was funded by the Office of the Provost at UNC and by a grant from the U.S. Department of Education’s Fund for the Improvement of Postsecondary Education (FIPSE). The Office of the President of UNC, the North Carolina GlaxoSmithKline Foundation, Blue Cross and Blue Shield of North Carolina and The Aetna Foundation are funding the introductory program. ¡A su salud! is a project of the Office of Distance Education and E-Learning Policy at the William and Ida Friday Center for Continuing Education. The introductory ¡A su salud! will be offered at UNC and partner institutions by spring 2008 and distributed nationally soon after. For more information on the project, contact Claire Lorch at clorch@email.unc.edu or (919) 962-4011.

By Kathleen Kearns

Laura Wadford, a professional make-up artist, prepares actress Dr. May Farnsworth for the camera. Farnsworth acted as an “extra” in the production, but her starring role was that of linguist. She was on the set to ensure that actors spoke clearly and used dialect appropriately.

“Dr. Milton Rosenau, Founding Dean, UNC School of Public Health”

Dr. Milton Rosenau, Founding Dean, UNC School of Public Health
Dr. Milton Rosenau, the UNC School of Public Health’s first dean, believed that every person deserved sufficient education and resources to “meet the needs of his body and the demands of his health.”

From its inception, the UNC School of Public Health followed his lead in working diligently to improve the public’s health through cutting-edge research, innovative program development, and high-quality public health education and health services delivery. Faculty and students worked with communities around the world, especially African-American communities throughout the U.S. South, whose quality of life was compromised by poverty, disease and limited educational opportunities.

The School’s community and human rights focus in the United States set it apart from more clinically-oriented public health schools at Harvard and Johns Hopkins universities. From the start, the School at UNC had an independent, reform-minded spirit, resulting in an unprecedented number of women faculty members and students, groundbreaking development of multiracial teams working with North Carolina communities as early as the 1940s, and social activism beginning in the ’60s.

The School’s early history, according to UNC Kenan Professor Emeritus Dr. John Hatch, was driven by “decent people, in the right place at the same time, all trying to do the right thing.” Their work has set the pace for research, teaching and practice being done now to reduce health disparities. Here, we look briefly at two examples of the School’s commitment—Dr. Lucy Morgan’s pioneering collaboration in the 1940s with the North Carolina College for Negroes (now North Carolina Central University) and the establishment of the Minority Student Caucus in 1976. Along with the timeline below, we highlight the roots of the School’s commitment to overcoming racial and ethnic disparities in health and education.

**Dr. Lucy Morgan:** “A revolutionary, in the best sense of the word”

By all accounts, Dr. Lucy Shields Morgan was a powerhouse. As the founding chair of the UNC School of Public Health’s Department of Public Health Education—the first of its kind in the country—she was both pioneering and revolutionary.

**History in the Making:**
A selected timeline of our School’s work in overturning health disparities

Timeline compiled by Linda Kastleman
Morgan’s father was president of the University of Tennessee and director of the Tennessee Valley Authority (TVA). Harcourt Morgan valued the TVA’s ability to make the lives of ordinary citizens more efficient and comfortable so that the larger community could thrive. “Man’s greatest need in the distraction of the age,” he noted, “is to see the unity that runs through diversity. No two people are alike, yet we are all brothers.”

Having adopted her father’s ideology, Morgan earned her doctorate from Yale in 1938 and founded a community health program in Hartford, Conn., which included African-Americans among its administrators and served as a model for similar programs around the country. In 1941, she joined the U.S. Public Health Service and was sent to Fort Bragg, N.C., to study the rise of prostitution at the military base. Almost as soon as she arrived in North Carolina, she was invited by Dean Rosenau to develop a curriculum in Public Health Education at Chapel Hill, Morgan’s new School of Public Health.

At that time, Dr. James Shepard, president of the North Carolina College for Negroes (NCC) in Durham, N.C., had been negotiating with the General Education Board to create graduate-level training in public health for African-American students. His vision was to establish a master’s degree program in health education at NCC. Morgan was asked to explore the feasibility of developing such a program, and she quickly determined that a need existed.

NCC faculty, however, had not yet been trained in public health education. Given the still-segregated campus at UNC at Chapel Hill, Morgan led her faculty to NCC’s campus in Durham to teach master’s level courses in public health education. Morgan often held joint classes for NCC and UNC students in her home.

Her strategy for field work was radical in the segregated South. Pairing white and African-American students, she sent two-person teams into rural communities where health education and health services were most needed. “They had to be introduced to each other,” she recounted in Robert Korstad’s *Dreaming of a Time*, a history of the School’s first 50 years. “They had never done that before. At that time, [whites] were not supposed to eat with Blacks, so we always had refreshments at the meetings. We had open houses when people came in from the field, Black and white together. Then it got bitter for awhile, and we used to pull down the shades sometimes when we had meetings in Chapel Hill.”

Morgan’s contribution to the health education program was incalculable. African-American graduates of the program became faculty—both at NCC (including Dr. Howard Fitts, who chaired NCC’s Department of Health Education and later served on the Durham County Board of Health) and at UNC (including Dr. Howard Barnhill, who also served in the N.C. General Assembly). Morgan helped grow the health education department into the largest of its kind at a school of public health in the country, and oversaw, during the 1950s and 60s, the training of almost half the country’s health educators.

UNC President Emeritus William C. Friday, whose wife, Ida, studied with Morgan in the master of public health education program and later taught there, called Morgan a “pioneering integrationist with a depth of soul that was instructive and remarkable; a revolutionary, in the best sense of that word.”

---

1970s

1964–68

South African native Dr. Guy Steuart joins the UNC School of Public Health as chair of the Department of Health Education (later called the Department of Health Behavior and Health Education). In his work with colleagues in South Africa, Steuart developed the Action-Oriented Community Diagnosis methodology, which uses an interdisciplinary approach to gain a nuanced understanding of the dynamics, resources and problems of communities and how they affect the living conditions and health of individuals who live in them. This methodology is now taught at the UNC School of Public Health and is often used in working with poor or vulnerable communities (see page 57).

1968

Dr. Edward V. Ellis

1971

Dr. Guy Steuart

1971

After Black students express concern, Dr. Fred Mayes, the School’s third dean, appoints William T. “Bill” Small to the position of coordinator of minority affairs at the School with a charge to increase the School’s minority student enrollment. Within the next year, the number of minority students increases from 20 to 49.

1971

The Black Student Caucus of the UNC School of Public Health is organized.

1971–86

Dr. Sagar Jain

1972–82

Dr. Bernard Greenberg

1974

Dr. John W. Hatch

1974

John W. Hatch, an African-American, receives his Doctor of Public Health from UNC and joins the faculty of the School’s Department of Health Behavior and Health Education. He later becomes Kenan Professor of Health Behavior and Health Education. His work and the department’s emphasis on community organizing results in projects aimed at improving the health of minorities.

Overcoming disparities: highlights from our past

This decade is characterized by an exponential increase in the number of minority faculty and students at the School. Two departments are chaired by minorities.

Former First Lady Eleanor Roosevelt, an untiring advocate of the public’s health and safety, addresses Dr. Lucy Morgan’s health education class in 1950. A friend of the Morgan family, Roosevelt visited the campus at Morgan’s invitation.
Public health as a movement: Minority Student Caucus evolves from grassroots efforts

In his laboratory work, UNC School of Public Health Epidemiology Professor and South African expatriate Dr. John Cassel found that disruption of “society” in a community of rats caused disorientation, stress and illness. He observed similar patterns in his work providing medical care to the poor in South Africa. People in difficult situations, Cassel found, coped better if they could depend on others to understand and support them. He further posited that even when one could not intervene with money or services to improve the well-being of a community, one could at least work to create a more psychologically supportive environment.

Such revelations were applicable in the late 1960s on the Chapel Hill campus. Black students, new to campus and in an environment of upheaval, faced the stresses of isolation and of faculty and programs that did not always understand or meet their needs. Many minority students working toward master’s degrees had been in the work force for years before returning to school. They wanted more opportunities to discuss career goals and challenges specific to minority public health professionals.

African-American graduate students began meeting informally in the early ’70s for support and to exchange ideas. Dr. John Hatch, an African-American, was among this group. Hatch came to UNC in 1971 as a doctoral student teaching at the School of Public Health. Ultimately, he became a Kenan Professor in the School’s Department of Health Behavior and Health Education, retiring in 1995.

In 1973, Dr. Mayeux, the School’s third dean, appointed William T. “Bill” Small, himself African-American, to restart the annual Minority Health Conference. From its humble beginnings in 1977, the conference has grown to include more than 400 participants each year.

In 1976, graduate students Eugenia Eng, a Chinese American, Victoria Washington, an African-American, and Cherry Beasley, a Lumbee Indian, advocated that the Caucus be inclusive of students from all racial and ethnic groups, so that their unique strengths, needs and concerns could be addressed. That year, by unanimous vote of the membership, the Black Student Caucus became the Minority Student Caucus of the School of Public Health.

In 1977, the Caucus organized its first annual Minority Health Conference—a day-long event highlighting health disparities (see page 42).
issues of concern for people of color. Designed to attract students interested in minority health to the School, the event featured Keynote Speaker Floyd McKissick, a lawyer and civil rights activist in North Carolina.

The Conference—now in its 28th year—has become an important educational event, attracting more than 400 public health practitioners, human services professionals, research staff, students and faculty from all over the country each year (see page 43).

In 1999, Dean William Roper permanently named the conference’s keynote lecture for Small, recognizing his essential role in recruiting and mentoring minority students to the School for more than a quarter of a century.

The Minority Student Caucus continues to be a strong force at the School, uniting students and serving as a vehicle for bringing the concerns of minority students to the forefront. The Caucus also works with the School’s administration on Project Reach to link to the Historically Black Colleges and Universities, especially in North Carolina, and to institutions serving other minority groups.

2000

Dr. Barbara K. Rimer and beyond...

2006

Dr. Jessie Satia, assistant professor in the UNC School of Public Health’s Departments of Nutrition and Epidemiology, has accepted the challenge of bringing more minority students, faculty and staff to the School.

In appointing Satia to the position of special assistant to the dean for diversity last January, Dean Barbara K. Rimer noted, “When diversity is everyone’s business, sadly, it often is nobody’s job. In creating this role, I wanted to make it somebody’s business and, by doing so, help us all. Dr. Satia is the perfect choice. We wanted her to return to UNC, after spending two years in industry. She’s an impeccable scientist and teacher and a charismatic person who will be able to motivate others to join her journey.”

Satia continues the School’s tradition of encouraging minority students and faculty to come to Carolina. From the outset, School leaders have recognized the need for the faculty, staff and student body to reflect the diversity of the N.C. and U.S. populations. Now, Satia, assistant professor in the UNC School of Public Health’s Departments of Nutrition and Epidemiology, has accepted the challenge of bringing more minority students, faculty and staff to the School.

Carolina’s School of Public Health appoints special assistant to the dean for diversity & continues tradition of cultivating diversity

Dr. Jessie Satia was born in the state of Washington but grew up in Cameroon.

“I am quite literally an ‘African-American,’ having lived in both places,” she says.

Now, Satia, assistant professor in the UNC School of Public Health’s Departments of Nutrition and Epidemiology, has accepted the challenge of bringing more minority students, faculty and staff to the School.

In appointing Satia to the position of special assistant to the dean for diversity last January, Dean Barbara K. Rimer noted, “When diversity is everyone’s business, sadly, it often is nobody’s job. In creating this role, I wanted to make it somebody’s business and, by doing so, help us all. Dr. Satia is the perfect choice. We wanted her to return to UNC, after spending two years in industry. She’s an impeccable scientist and teacher and a charismatic person who will be able to motivate others to join her journey.”

Satia continues the School’s tradition of encouraging minority students and faculty to come to Carolina. From the outset, School leaders have recognized the need for the faculty, staff and student body to reflect the diversity of the N.C. and U.S. populations.

During Small’s 28-year tenure, he continued to enhance the diversity of the School population.

Satia brings a unique perspective to her role. Her parents, both of whom have doctoral degrees, are from Cameroon. Her mother, who has a Ph.D. in educational psychology, and her father, a fisheries expert, were studying at the University of Washington—Seattle, when she was born.

“When my parents finished school and worked for a while—I was about four years old at the time—they decided they wanted to return to Africa and give back to their homeland,” Satia says.
