A NOTE TO STUDENTS:

The *Internship Training Manual* explains what is **expected** of you before, during, and after your internship experience. This manual will also assist you in outlining your learning objectives and focusing your efforts to identify the best internship experience for your expected career path.

The technical details of the experience are covered in this guide. If you read this manual in its entirety, you should find that most of your internship questions will be answered. To be successful in securing an optimal placement, start early, maintain frequent contact with your faculty advisor and the career services coordinator, and keep your eyes and ears open. Treat this experience like a class and schedule time every week to work on your search. There are many resources at your disposal: faculty advisor, career services coordinator, program director, professional development director, other faculty, seniors and second-year master's students, alumni, mentors, and sometimes even parents, relatives, and family friends.

Some questions you may want to ask yourself as you begin to identify potential internship sites and make a final selection are:

- **INTEREST:** In what am I most interested? Do I want a management oriented or a policy oriented placement? Am I most interested in a specific content area (aging, managed care, mental health) or a specific functional area (financial management, law, marketing)?
- **SETTING:** What kind of organizational setting will best meet my needs: local organization (public health, community mental health), hospital, HMO, group practice, state-level organization, national organization, federal government, international organization?
- **LEARNING NEEDS:** Do I want a placement where I can practice skills I already have, or one where I can learn skills I do not have? What are these skill areas?
- **GEOGRAPHIC LOCATION:** Do I want to be in or near Chapel Hill, or in my hometown...or somewhere else?
- **STIPEND:** Do I need to have a stipend? If yes, what is the minimum I can afford to accept?

INTERNSHIP TRAINING MANUAL

INTRODUCTION

High quality professional education is a shared responsibility of professional schools and partners. This is particularly true when training requires the acquisition of operational skills through mentored experiences in settings outside the classroom.

The internship is an important component of both undergraduate and master's programs in the Department of Health Policy and Management and is required of all students. Even those students who bring considerable experience with them benefit from a well-planned and supervised internship.

A fruitful internship experience does not happen by chance, but is carefully planned. It requires active commitment to the concept of an internship on the part of students, faculty, preceptors, and internship organizations, so that effective mechanisms for collaborative efforts can be maintained.

The purpose of this manual is to provide students, faculty, preceptors, and others with a reference on policies, guidelines, and procedures pertaining to the Department's internship program.

I. POLICIES

A. Definition and Purpose. An internship is defined as a planned and supervised learning experience gained through first-hand observations and operational responsibilities in a health services or other health-related organization. While specific activities during internship vary from one placement to another, all internships should enable students:

- to participate in learning experiences that are not normally available in the classroom, but are essential for sound training in health policy and administration
- to test the validity and applicability of classroom learning to practice, thus helping students develop their own professional skills
- to develop operational skills, gain experience, and enhance professional self-confidence as healthcare managers or policy analysts
- to make a service contribution during the course of the internship that will not only be useful to the organization, but also will enhance the student's management and analytic skills and self-confidence
- to develop an agenda for subsequent learning

B. Requirement. A full-time internship experience in a department-approved health services or other health-related organization is required of all students:

MHA and MSPH Degrees. Students must submit an approved internship plan and successfully complete at least **twelve weeks (40 hrs./wk.)** under the joint supervision of the faculty advisor and an approved preceptor. At the end of the internship, the student must submit a report and an evaluation of the internship, and give a short oral presentation to the incoming students, on an internship panel.

MPH Degree. Students must submit an approved internship plan and successfully complete at least **six weeks (40 hrs./wk.)** under the joint supervision of the faculty advisor and an approved preceptor. At the end of the internship, the student must submit a report and an evaluation of the internship.

C. Design and Schedule. An internship is an integral part of a student's total program of study. Completing twelve weeks of a supervised block internship during the summer months typically fulfills this major requirement.

In the exceptional case, a situation may arise where the student's learning objectives are best met in a "concurrent" internship during the academic semesters. This option is not intended as a convenience for those who do not wish to spend the summer in an internship, but must be a response to a compelling reason that makes the concurrent placement a better choice. The option is designed on an individual basis by the faculty advisor and the student, and must be presented to, and approved by, the appropriate program director, and the department chair or associate chair; documentation of the proposal and the approval will be kept in the student's official file. **The design must include a minimum of 480 hours of work in the field (i.e., the equivalent of 40 hours/week for 12 weeks) for MSPH and MHA students, or 240 hours in the field (i.e., the equivalent of 40 hours/week for 6 weeks) for MPH students.** All policies and procedures pertaining to the summer internship, except those

pertaining to schedule, apply equally to concurrent internship. If concurrent internship is approved, the student registers for the internship (HPM 704) in the appropriate semesters.

A well-planned beneficial internship experience requires participation in a series of activities. These activities begin early in the first year of study, continue during the summer and the fall of the second year, and include orientation, site identification and selection, planning, placement, and evaluation. The schedule for typical activities for a well-planned summer internship includes the following:

First Year Master's/ MPH: Fall Semester. The first mandatory internship orientation to the purposes, policies, and procedures of an internship takes place during the student's first semester (usually in October). Students are required to attend the internship orientation and internship panel, to hold discussions with faculty and with students who have completed internships, to review information in this manual and the department's internship files, and to participate in any scheduled field visits to organizations (*BSPH* students only). Students should rely primarily on their faculty advisors and the career services coordinator for becoming acquainted with the internship program. However, the academic program director, the professional development director, and other HPM faculty can provide helpful guidance in specific areas.

The Career Services Office (CSO) internship files, located in the Career Services Resource Area, contain descriptive material about past and potential placements, student activity reports, project reports, and other pertinent materials. These files contain invaluable information that provides insights into placements at specific locations and gives the student a point of contact inside a specific organization of interest.

After attending the internship orientation and the internship panel, the student should schedule an appointment with his/her faculty advisor. Faculty advisor and student interaction should be directed toward achieving the following:

- identifying the student's learning objectives based on an assessment of abilities, previous experience, and career interests
- identifying available placement opportunities and selecting the one that is most suitable and feasible for the student

The career services coordinator is available to help make exploratory contacts at potential internship sites.

First Year Master's/MPH: Spring Semester. Early in the spring semester (in January), the career services coordinator will conduct a second mandatory internship orientation session. Specific internship questions will be addressed and a general assessment of the class's progress in finding an internship will be discussed.

During the spring semester, students should work with their faculty advisors to:

- make a final decision on the site for internship placement
- prepare a written internship plan, with appropriate consultation with the field preceptor
- obtain approval of the internship plan by the field preceptor, faculty advisor, and academic program director, with plan filed in the CSO no later than **April 15, 2011**
- distribute copies of the final signed internship plan to preceptor and advisor

Junior/First Year Master's /MPH: Summer. After reporting to the internship organization on the arranged date, the student will carry out appropriate training activities on a full-time (40 hours/week) basis for the specified length of time, as indicated in the individual internship plan.

Students may not take courses other than internship for credit during the block internship period unless studies are approved by the faculty advisor and arrangements are made with the preceptor.

Students should initiate a substantive contact with their advisor and should arrange at least one contact between their academic advisor and preceptor. These contacts may be made via phone, email, or in person and should be made sometime between the second and third week of the internship. It is the student's responsibility to facilitate these contacts.

Senior/Second Year Master's: Fall Semester. Returning students will need to complete the following in order to meet their internship requirement:

- **Twelve-Week Final Report** (six-week report for MPH students) is to be submitted to the Career Services Office (with a copy to preceptor) no later than **September 9, 2011**. (MPH students will have a different summer due date, set by the CSO).
- **Student Evaluation Form** will be emailed to each student at the end of his/her summer internship. This evaluation should be completed by the student and submitted to the Career Services Office attached to the final report on **September 9, 2011**.
- Participation on an **Internship Panel** which will be held early in the fall semester of the second year (MHA and MSPH students only). **All returning masters' students are required to attend and to make a brief presentation on their summer experience.**

D. Stipend. The department recognizes the need for adequate financial support for students during internship and encourages them to seek stipends from internship organizations. However, internship placement decisions should be made principally on the quality of the experience and secondarily on the availability of stipends. When queried by potential placement sites, we encourage them to pay a stipend.

E. Administration. Internships involves active collaboration among the student, faculty advisor, field preceptor, program director, professional development director, and career services coordinator. These responsibilities are as follows:

1. Role of students. Students are the primary beneficiaries of an internship and their role must be as *active* as those of the academic program directors, faculty advisor, and preceptors. Students are expected to:

- develop an understanding of the department's philosophy, policies, standards, and procedures with regard to an internship
- gain a proper appreciation of the potential of various field settings and organizations for meeting individual learning goals through field visits, reading of field reports of students in previous years, and discussions with second-year students, the career services coordinator, and faculty

- work actively with the faculty advisor to select an area of interest to develop during the internship, select the internship placement site, and develop an appropriate internship plan (and supplements, when indicated)
- maintain active communication with the faculty advisor for guidance and monitoring of internship activities
- provide all appropriate documents to the Career Services Office in a timely manner
- conduct themselves as responsible and mature professionals during the internship, complying with the organization's code of conduct, and meeting all obligations and responsibilities according to schedule

2. Role of preceptors. Preceptors are key participants in an internship. The quality of their commitment, interest, and efforts has tremendous influence on the outcome of an internship.

Preceptorship of an internship implies a dual set of responsibilities. First, preceptors are similar to clinical or laboratory instructors, ensuring a meaningful learning experience for the student with the commitment, zeal, and enthusiasm of a good teacher. The preceptor is also a responsible official in the organization who ensures that students fully comply with its policies and standards. Preceptors should:

- develop an understanding of the department's philosophy, policies, standards, and procedures pertaining to an internship
- participate in the preparation of the student's internship plan
- take a proactive posture in all matters pertaining to an internship, including providing the Career Services Office with up-to-date information on their organization for inclusion in the internship resource files and facilitating possible long-term internship arrangements with the department
- make the student feel welcome to the organization, facilitate the student's orientation, assign appropriate tasks, and provide suitable and regular time for supervisory discussion with the student
- certify completion of internship by the student and return an evaluation of the student's performance, as well as the department's internship process, to the Career Services Office

Willing and interested preceptors may serve as future liaisons between the department and their organization.

3. Role of faculty advisors. Faculty advisors are responsible for participating in the planning and supervision of the internship of their advisees. Advisors should:

- help each advisee to identify learning objectives that are best met through an internship
- increase their knowledge of internship opportunities available for students and subsequently help each advisee to gain a proper appreciation of learning opportunities available in different settings
- guide the student's preparation of the internship plan, in consultation with the preceptor and the Career Services Office

- refer students, when appropriate, to other members of the faculty for advice
- recommend new preceptors to the Career Services Office
- respond in a timely manner to any issues that need faculty advisor attention
- contact the program director and the CSO with particular problems that may arise
- contact their advisees' preceptors at least once during the summer to check in with them and thank them for their participation

4. Role of academic program directors. The academic program directors are responsible for reviewing and approving completed internship plans and assigning final internship grades in conjunction with the professional development director. They may also:

- monitor internship activities to ensure high standards
- intervene when appropriate in situations that may arise during the placement

5. Role of professional development director. The professional development director is responsible for guidance in the general oversight of the internship program, including preceptor development and overall quality of the internship experience. In this role, the director will:

- arrange for appropriate activities for faculty, students, and preceptors to ensure high-quality internships, possibly to include a professional development conference
- undertake appropriate developmental activities to expand opportunities for high-quality internship placements
- assure the maintenance of an appropriate database of past internship experiences as a resource for students in the department

6. Role of career services coordinator. The career services coordinator is responsible for facilitating and coordinating internship activities and for serving as a resource to the academic program directors, faculty advisors, students, preceptors, and professional development director. To this end, the career services coordinator will:

- serve as a general resource and consultant to the students and to the faculty in all matters of an internship, with special attention to organizations in Area Health Education Center (AHEC) areas
- assist with logistics of the internship placement process
- make initial contacts at new organizations for students
- make periodic reports to the department associate chair, program directors, and professional development director on all matters related to internship activities in the department
- collect and organize the student's written work for the internship and deliver it to the program directors and the professional development director for grading

II. GUIDELINES AND STANDARDS

A. Identification of an Internship Site and Preceptor. Each faculty advisor works with his/her advisee and the CSO to ensure suitable internship placements. The Career Services Office maintains extensive descriptive information on potential internship placements, along with many other reference materials.

1. An organization chosen for an internship should:

- be an established organization providing one or more health or health-related services
- consider participation in an internship a professional obligation
- have one or more ongoing programs that could provide the student with needed learning opportunities
- have an opportunity for the student to gain important operational experience
- have competent staff who are interested in ensuring that the student learns as much as possible while in the organization
- provide necessary materials support to the student, such as a desk, supplies, travel, secretarial support, and the like, in order to facilitate the completion of any tasks the student is assigned as part of an internship

2. A professional chosen as a field preceptor should:

- hold a responsible position within the organization
- recognize the preceptor's role as an opportunity to teach
- be professionally qualified to meet the needs of the student
- participate in the development of the internship plan
- have the ability to assign duties, provide necessary resources to the student, and facilitate communication with others as appropriate
- be able to devote sufficient time to internship activities, including planning, supervision, and evaluation
- be amenable to working and interacting with the faculty advisor

A student who wishes to do an internship in an organization in which she/he is currently working, or has previously worked, must:

1. hold a different position than that currently/previously held and/or be assigned different tasks than those currently/previously assigned; **and**
2. report to a different supervisor than currently/previously responsible.

In unusual circumstances, and on an exception basis, it may be appropriate for the student's internship to comprise a major research project and for a faculty member to serve as the student's preceptor. *In*

such cases, the director of the student's degree program and the department chair or associate chair must review and approve the placement.

B. Registration. A student must be registered while serving an internship. Registration and billing for internship is done in accordance with UNC Chapel Hill's Summer School schedule. Registration for internship credit is required for each degree program as follows:

MSPH and MHA Students: Register in March for two credits for **HPM 704** (Summer Session 1 and Summer Session 2). In addition to paying tuition, **students will also pay a Field Training internship fee of \$450.** Students will initially receive a grade of "S" for this course, which will be changed to a permanent letter grade at the successful completion and evaluation of internship.

MPH Students: Register in March for **one** credits for **HPM 704** (Summer Session I), and pay the **internship fee.** In addition to paying tuition, **students will also pay the Field Training internship fee of \$450.** Students will initially receive a grade of "S" for this course, which will be changed to a permanent letter grade at the successful completion and evaluation of internship.

C. Fee. The Field Training internship fee, approved by the university, contributes to the support of the Career Services Office and to faculty and student activities pertaining to internships, professional development, and job placement.

The internship fee is \$450 for graduate students. The total cost for the internship (tuition plus internship fee) depends on whether the student is an in-state or out-of-state student for tuition purposes, is an undergraduate or master's student, and the number of credit hours to be earned. Students will also be required to pay any additional fees the University sets.

D. Written Materials. Each student, faculty advisor, and preceptor is required to prepare appropriate documentation pertaining to various phases of internship and to file these with the Career Services Office. These documents are as follows:

- **Internship Plan.** A detailed internship plan must be submitted to the Career Services Office prior to starting the internship. This plan is an agreement among the student, preceptor, and the department that ensures that each party agrees to all objectives of the internship. All involved parties must sign the plan before an internship can start (preceptor, student, faculty advisor, and program director). Students should also submit a copy of their internship plan to **both** their field preceptor and their academic advisor. The deadline for submission is **April 15, 2011.**
- **Internship Report.** The final internship report should be 3-4 pages in length. It should include a brief statement of activities performed by the student and should address whether all of the internship plan learning objectives were completed and if not, why not. Identification of any issues that need the faculty advisor's attention should also be included. Copies of project reports and/or other examples of the student's internship work should be included if available and non-confidential. The deadline for submission is no later than **September 9, 2011.** MPH students will have an earlier deadline set by the CSO and communicated to them via email.
- **Student's Evaluation of Internship.** All students will be sent a student evaluation form by email. **Students should turn it in attached to their internship report.** Those who do not receive the form should request a copy from the CSO. This evaluation helps the department evaluate the internship process and make changes if necessary. This evaluation is due no later than **September 9, 2011.**

- **Preceptor's Evaluation.** Preceptors will receive an evaluation form from the Career Services Office at the culmination (or shortly before) of the internship period. Preceptors are asked to complete the evaluation of the student and the internship process and return it to the CSO. This evaluation will be strongly considered when assigning the student's permanent internship grade.

E. Grade. Grades are assigned for the block field experience (HPM 301 for undergraduate students) by the professional development director and the respective program directors after the completion of the training period. Internship is a formal degree requirement; therefore, performance is evaluated with the same rigor as for classroom activities. In determining the grade for each course, the student's participation in the following areas is taken into account:

- internship orientation
- determining learning needs
- placement arrangements
- preparation and submission of internship plan
- preparation of internship reports, according to deadlines
- performance during internship
- follow-up activities

F. Grading Procedures. For clarity and to avoid misunderstandings, the following criteria for grading have been established:

1. Student has met with faculty advisor during the fall semester to discuss internship. *Failure to meet this criterion results in a 1/3-point reduction (e.g., from A to A- or H to H-).*
2. Signed internship plan was submitted to the CSO by **April 15**; this deadline can be extended at the discretion of the program director for circumstances beyond a student's control. *Failure to meet this criterion results in a 1/3-point reduction (e.g., from A to A- or H to H-). If the internship plan is more than two weeks late, a second 1/3-point will be deducted (e.g., from A- to B+ or H- to P+).*
3. One advisor/preceptor contact initiated by the student and completed between the second and third week of the internship. *Failure to meet this criterion results in a 1/3-point reduction (e.g., from A to A- or H to H-).*
4. Completed internship report and student evaluation submitted to the CSO by **September 9** (MPH students have a different date established by the CSO). *Failure to meet this criterion results in a 1/3-point reduction (e.g., from A to A- or H to H-).*
5. Preceptor's evaluation of the student. Five-point performance scales are used in the evaluation. Based on past experience, the following metric is used:
 - a. Average score on quantitative scales greater than or equal to 4 = full credit
 - b. Average score on quantitative scales greater than or equal to 3 and less than 4 = one-third grade deducted

- c. Average score on quantitative scales greater than or equal to 2 and less than 3 = two-thirds grade deducted
- d. Average score on quantitative scales less than 2 = 1 full grade deducted.

We often find rating bias in preceptor evaluations. It is recognized that extraordinary circumstances outside the student's control may sometimes account for poor ratings on a internship evaluation. Where average scores fall in the "C," "D," or "F" category, discussion with the preceptor and the student by the program director, faculty advisor, and/or the professional development director is recommended to resolve issues related to student performance.

- 6. Presentation of the internship experience during an internship panel.

This panel will be structured and conducted by the director of residential programs and the professional development director. All students will be required to participate in one 20-30 minute panel discussion in which they will be asked to provide a brief summary of their experience and respond to audience questions. Failure to participate will result in a one-third point deduction from the internship grade. This requirement is intended to put closure on the internship experience, as well as to allow first-year students to benefit from the experiences of second-year students.

- 7. An internship in a health agency is an important and required component of an undergraduate's degree program here in the Department of Health Policy and Management. A fruitful internship experience does not happen by chance, but is carefully planned.

In assessing these activities and determining a grade, the professional development director, along with the appropriate academic director, will consider the formal evaluation of the student's performance by the preceptor, the student's periodic reports, and whether deadlines were met.

At the discretion of the program director, a student who misses multiple criteria and/or deadlines as indicated in this manual may receive a grade of L/D or F for the internship (an undergraduate who receives a D or an F and a graduate student who receives an F will not be considered to have completed their internship requirement).

APPENDIX I

SAMPLE INTERNSHIP PLAN

The following is a sample outline of the internship plan required of all juniors and first-year master's students (including MPH students). Students should prepare their own internship plan, *using this sample as a guideline*, in coordination with both their faculty advisor and the field preceptor. Once the internship plan has been pre-approved by the academic advisor, the plan should be faxed to the preceptor, allowing the preceptor to be the first person to sign and /or make final changes to the document. The preceptor-signed plan is then returned to the student for signature, and then forwarded by the student to their advisor and program director for signature. **Students are responsible for obtaining all required signatures, and then submitting the finalized plan – reflecting all changes and signatures – to the Career Services Office prior to the start of the internship.**

Brief Description of Project (200 words):

HPM Core Competencies

Listed below are 24 core competencies that the HPM department has identified as important to the overall educational process. Please read through the list and **select no more than four competencies** that you feel you would like develop or hone throughout your internship. Preceptors and advisors should be consulted during the selection process to ensure that the most appropriate competencies are selected. For more information on these competencies please see the Competencies Description booklet.

STATEMENT OF LEARNING OBJECTIVES

Job Competencies and Skills Development:

Career Exploration:

Environmental Exploration (Is this the type of organization/environment you want to be in long-term?):

Professional and Personal Development:

Technical Assistance and Service:

Other: (Anything not covered above.)

DESCRIPTION OF PROPOSED FIELD ACTIVITIES and PRODUCTS

PROPOSED PATTERNS OF INTERACTION and CONTACT

- **Student and field preceptor** - Daily contact between student and field preceptor will be maintained throughout the internship. If the need arises, weekly meetings can also be scheduled.

- **Student and faculty advisor** - Student will initiate contact with advisor. Student will arrange contact between advisor and field preceptor between 2nd and 3rd weeks of internship. Student will also maintain email contact (and phone contact if necessary) with advisor for monitoring purposes.
- **Student and career services coordinator** - Student will update career services coordinator of internship status. Career services coordinator will keep track of the quality of the internship experience.
- **Faculty advisor and field preceptor** - Student will initiate contact between faculty advisor and preceptor between 2nd and 3rd weeks of internship. Contact between faculty advisor and preceptor will be maintained as needed throughout the internship.

EXPECTED OUTCOMES/PRODUCTS OF FIELD ACTIVITIES

Students should keep and submit copies of products of field activities (i.e., spreadsheets, presentation slides, written reports, etc.) if these products are non-confidential and the preceptor has approved this submission. The best use of these materials, however, may be as an “exhibit” of your skills and professional experience when you are interviewing for a full-time position. Consider compiling copies of the products of your field activities in a binder or folder for this purpose.

PLAN APPROVED, in the following order, BY:

1. Faculty Advisor /Date	(Signed)
2. Field Preceptor/Date	(E-mail)
3. Academic Program Director/Date	(Signed)

ADDENDUM

At the conclusion of the practicum, students will be asked to identify the discipline-specific (health policy and management) and cross-cutting ASPH competencies addressed during their placement. These competencies are listed below. During the placement, students should periodically review the list and check off those competencies that have been achieved.

I. Health Policy and Management Competencies (Association of Schools of Public Health)

<input type="checkbox"/>	Identify the main components and issues of the organization, financing and delivery of health services and public health systems in the US.
<input type="checkbox"/>	Describe the legal and ethical bases for public health and health services.
<input type="checkbox"/>	Explain methods of ensuring community health safety and preparedness.
<input type="checkbox"/>	Discuss the policy process for improving the health status of populations.
<input type="checkbox"/>	Apply the principles of program planning, development, budgeting, management and evaluation in organizational and community initiatives.
<input type="checkbox"/>	Apply principals of strategic planning and marketing to public health.
<input type="checkbox"/>	Apply quality and performance improvement concepts to address organizational performance issues.
<input type="checkbox"/>	Apply "systems thinking" for resolving organizational problems.
<input type="checkbox"/>	Communicate health policy and management issues using appropriate channels and technologies.
<input type="checkbox"/>	Demonstrate leadership skills for building partnerships.

II. Cross-cutting Competencies (Association of Schools of Public Health):

Communication and Informatics

<input type="checkbox"/>	Demonstrate effective written and oral health communication skills appropriately adapted to professional and lay audiences with varying knowledge and skills in interpreting health information.
<input type="checkbox"/>	Use information technology tools effectively in core public health functions such as retrieval of institutional and online public health data and dissemination of public health information.
<input type="checkbox"/>	Engage in collective information sharing, discussion and problem solving.

Diversity and Cultural Competency

<input type="checkbox"/>	Demonstrate awareness of and sensitivity to the varied perspectives, norms and values of others based on individual and ethnic/cultural differences (e.g., age, disability, gender, race, religion, sexual orientation, region and social class).
<input type="checkbox"/>	Show effective and productive skills in working with diverse individuals including co-workers, partners, stakeholders, and/or clients.
<input type="checkbox"/>	Develop, implement, and/or contribute to effective public health programming and conduct research that integrates: (1) knowledge levels of health access among individuals and within communities, and (2) culturally-appropriate methods for conducting practice or research.

Leadership

<input type="checkbox"/>	Demonstrate basic team building, negotiation, and conflict management skills.
<input type="checkbox"/>	Create a climate of trust, transparency, mutual cooperation, continuous learning, and openness for suggestion and input with co-workers, partners, other stakeholders, and/or clients.
<input type="checkbox"/>	Exercise productive organizational, time-management and administrative skills.
<input type="checkbox"/>	Develop knowledge of one's individual strengths and challenges, as well as mechanisms for continued personal and professional development.

Professionalism and Ethics

<input type="checkbox"/>	Review, integrate, and apply ethical and/or legal principles in both personal and professional interactions, as well as public health practice and/or research.
<input type="checkbox"/>	Apply evidence-based concepts in public health decision-making.
<input type="checkbox"/>	Appreciate the need for lifelong learning in the field of public health.
<input type="checkbox"/>	Consider the effect of public health decisions on social justice and equity.

Program Planning

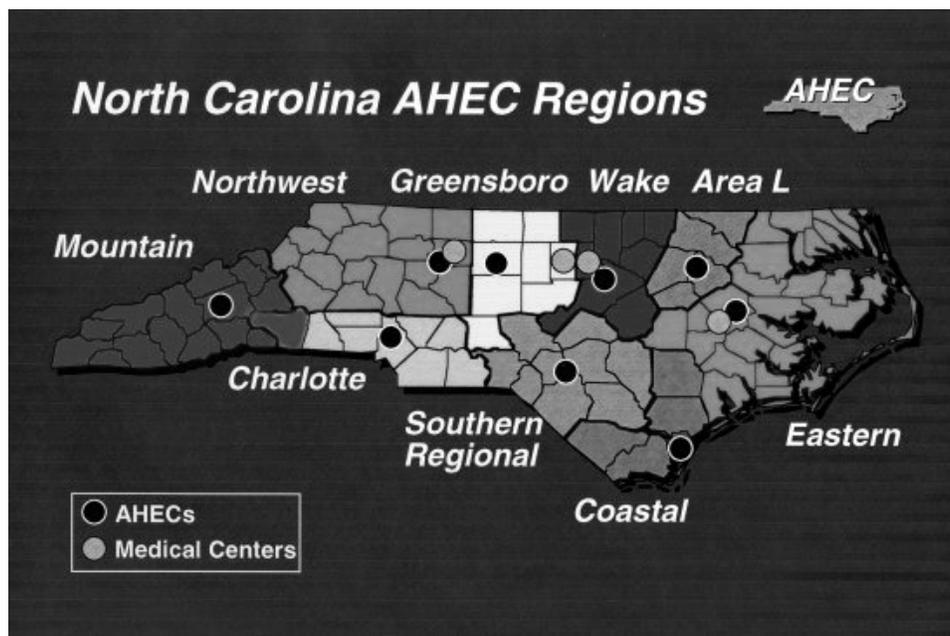

<input type="checkbox"/>	Discuss social, behavioral, environmental, and biological factors that contribute to specific individual and community health outcomes.
<input type="checkbox"/>	Identify needed resources for public health programs or research.

Systems Thinking

<input type="checkbox"/>	Identify characteristics of a system.
<input type="checkbox"/>	Respond to identified public health needs within their appropriate contextual setting.

APPENDIX 2

THE NORTH CAROLINA AHEC PROGRAM

BACKGROUND. The North Carolina Area Health Education Centers (AHEC) Program is a unique partnership between the university's Division of Health Affairs and the community, and has been designed to improve the practice environment for health care personnel throughout North Carolina. Its primary goal is to improve the geographic distribution of well-trained health care personnel, with an emphasis upon professionals and support personnel trained to meet the primary health needs of citizens in rural counties of the state.

Under the leadership of the dean and the faculty of the School of Medicine at the University of North Carolina at Chapel Hill, the AHEC Program has been developed in cooperation with the other health sciences schools of the university (Dentistry, Nursing, Pharmacy, and Public Health), the Duke University School of Medicine, the Bowman Gray School of Medicine, and the East Carolina University School of Medicine. Also included in this partnership are community hospitals and practicing professionals throughout the state.

The program includes nine regional centers, each of which is functioning to meet the objectives of the program. Each AHEC center is a community hospital, or a legally incorporated foundation representing one or more hospitals, which agrees to accept the responsibility of health manpower development programs in a several-county area. These programs span the continuum of education for a variety of health professionals in a manner that reflects regional needs while focusing on primary care. Each AHEC has a director and a cadre of university faculty.

To carry out our responsibilities and to take advantage of the challenges and learning opportunities in the AHEC areas, we place special emphasis on our commitment to serve all regions of North Carolina. This includes encouraging and supporting faculty in responding to requests for improving the administration of community-based programs, developing and implementing programs for the continuing education of community health practitioners, and assigning high priority to placement of students in AHEC areas for internship.

INTERNSHIP IN AN AHEC AREA. Essentially, field placement through the AHEC network is no different from internship anywhere else in the state. Students have a wide selection of training sites, covering the full range of healthcare delivery experiences. Specific advantages may include a high degree of community receptiveness, the potential for interdisciplinary cooperation with students from other schools in the university's Division of Health Affairs, the financial support of both the university and the local community for some costs of the internship experience, and the availability of coordinators who can facilitate placement in local communities.

FIELD TRAINING RESPONSIBILITIES

	Student	Preceptor	Faculty Advisor	Program Director	Professional Development Director	Career Services Coordinator
<p><u>PRIOR TO FIELD PLACEMENT</u></p> <p>Determine learning objectives and secure field placement <i>Nov.-Mar.</i></p> <p>Field training plan must be submitted to CSO <i>April 15</i> (Preceptor, Student, Faculty Advisor, and Academic Program Director must sign field training plans)</p> <p>Copies should be given to both preceptor and advisor</p>	<p style="text-align: center;">1</p> <p>Student meets with faculty advisor and CSO</p> <p style="text-align: center;">1</p> <p>Prepares under guidance and direction of advisor and preceptor</p> <p>One Copy of the signed plan must be submitted to the career services coordinator</p>	<p style="text-align: center;">2</p> <p>Meets with student to explain agency's mission and operations</p> <p style="text-align: center;">2</p> <p>Provides guidance and input concerning activities</p>	<p style="text-align: center;">2</p> <p>Advises student and contacts preceptors in new agencies</p> <p style="text-align: center;">2</p> <p>Directs preparation; provides guidance and input concerning learning objectives and activities</p>	<p style="text-align: center;">3</p> <p style="text-align: center;">3</p> <p>Reviews plans for completeness and detail and approves</p>	<p style="text-align: center;">2</p> <p>Provides guidance, referrals, as requested</p> <p style="text-align: center;">3</p>	<p style="text-align: center;">2</p> <p>Available as a resource consultant</p> <p style="text-align: center;">2</p> <p>Collects and maintains all field training plans; monitors quality</p>
<p><u>DURING FIELD PLACEMENT</u></p> <p>Telephone, email, or in-person contact 2-3 weeks into field training</p>	<p style="text-align: center;">1</p> <p>Mandatory facilitation of contact: Student should initiate contact with advisor as well as facilitate contact between advisor and preceptor</p>	<p style="text-align: center;">2</p> <p>Communicates with advisor</p>	<p style="text-align: center;">2</p> <p>Speaks with student and communicates with preceptor. Is available for consultation with student and/or preceptor during the internship.</p>	<p style="text-align: center;">3</p>	<p style="text-align: center;">3</p>	<p style="text-align: center;">3</p>
