

*The Gillings School Career Networking Event* is a unique opportunity for students and alumni to connect with talent-seeking companies. This event is meant to be less formal than a career fair, permitting more time for one-on-one and small-group/round table conversations with employers regarding available job opportunities and career guidance.

Employers will provide a brief description of their company and career options, and then facilitate a Q&A session. You will have the opportunity to interact with only one employer per 30 minute round table session and then join us for the open reception where you can mingle with all participating employers.

***Gillings School Career Networking Event  
Friday, February 10, 2017  
Michael Hooker Research Center Lower Atrium***

1:00-1:30pm: Round Table Information Session #1

2:00-3:00pm: Open Networking Reception with hors d'oeuvres

To REGISTER for this event, click [HERE](#).

**Employers that will be participating include:**

**Mina Shehee, NC Division of Public Health, Occupational and Environmental Epidemiology Branch:** Occupational and Environmental Epidemiology (OEE) is the branch of public health that deals with environmental and occupational conditions and hazards that may pose a risk to human health. OEE identifies and quantifies exposures to environmental and occupational contaminants; conducts risk assessments and risk communication; provides medical evaluation and surveillance for adverse health effects; and provides health-based guidance on levels of exposure to such contaminants.

**John Nicholson, Knowledge Management Director, John Snow, Inc:** John Snow, Inc., and its nonprofit affiliate JSI Research & Training Institute, Inc., are public health research and consulting firms dedicated to improving the health of individuals and communities throughout the world. JSI builds local capacity to address critical health problems, collaborating with local partners to assist countries, governments, communities, families, and individuals to develop their skills and identify solutions that meet their public health needs. Through management assistance, research and evaluation, education, and training, JSI works to enable agencies and health professionals to provide appropriate services in an effective and compassionate manner.

**Allison Arnold, Associate Director, Statistical Programming & Ryan Thompson, Statistical Scientist, QuintilesIMS:** Quintiles and IMSHealth have merged together to form the new QuintilesIMS. Each wanting to bring something new to customers, we deliver integrated information and technology solutions to drive healthcare forward. QuintilesIMS has approximately 50,000 employees conducting operations in more than 100 countries, dedicated to helping our clients improve their clinical, scientific and commercial results. As a global leader in protecting individual patient privacy, QuintilesIMS uses healthcare data to deliver critical, real-world disease and treatment insights.

**Lisa Wilson, Human Resources Manager, Raftelis Financial Consultants, Inc.:** Raftelis Financial Consultants, Inc. is a leader in the fields of utility finance, management, operations, and data services. We provide solutions that help utilities function as sustainable organizations while providing the public with clean water at an affordable price.
