Quick Guide to Student Funding, 2018-2019

Students fund their education in Health Behavior through a combination of sources, including loans; fellowships and awards; research, teaching, and graduate assistantships; and outside funding. This guide provides information about tuition-related attendance costs and departmental funding opportunities.

For information about other UNC-Chapel Hill funding sources, consult:
- The Graduate School (https://gradschool.unc.edu/funding/)
- Gillings School of Global Public Health (https://sph.unc.edu/students/tuition-and-fees/)

Tuition-related costs for Health Behavior students

Tuition at the non-resident (out-of-state) and resident (in-state) rates for the Gillings School of Global Public Health (see https://cashier.unc.edu/files/2017/07/17_18YR.pdf). Please note that these rates are subject to change.

- MPH students pay the GRADUATES – MPH rate for the fall and spring semesters and for 1 credit in Summer Session I or II between years 1 and 2.
- Doctoral students (MSPH-to-PhD and PhD tracks) pay the GRADUATES – Other Degree rate for the fall and spring semesters and, as applicable, for the summer sessions. (See the Health Behavior Doctoral Program Handbook for summer enrollment information).

UNC fees (see https://cashier.unc.edu/fees/student-fees/)
- UNC fees cover Board of Governor-approved Services such as Campus Health Services, Student Legal Services, and Safety and Security Services.
- Students not enrolled in one or both of the summer sessions but pre-registered for the fall semester who wish to receive care during the summer at Campus Health Services must pay the summer Campus Health Fee; the 2017 fee was $61.50 per summer session.

Health Behavior fees (separate from UNC fees)
- MPH students pay a one-time Field Fee of $600 that helps support the field work (Practicum and Capstone) students complete during training. For administrative purposes, this fee is tagged onto HBEH 746 (Capstone I) and collected in the fall semester of year 2.
- PhD and MSPH-to-PhD students pay a one-time Orientation and Graduation Fee of $250 in the fall semester of year 1. The fee helps support the cost of professional development activities, events, and resources over the course of their training.
Health insurance (see: https://campushealth.unc.edu/charges-insurance/mandatory-student-health-insurance)

- Health insurance is mandatory; students are required to enroll in the University’s Student Health Insurance Plan or provide a completed, verified, and approved waiver (hard waiver) showing other insurance coverage for each semester they do not enroll in the student plan.
- Students enrolled under Student Blue, standard student plan, are billed for half a year at a time. Fall payment covers the premium from August 1st through December 31st. Spring payment covers the premium from January 1st through July 31st. The insurance rate for the 2017-2018 academic year was $1,270.00/semester; we do not anticipate significant changes to this cost.
- Students on the RA/TA plan (GSHIP) will have their premium paid monthly by the sponsoring department. Coverage is only available during the period for which the student is employed. Graduating students will have insurance terminated on the last day of the month they graduate in (December or May), but qualify for short-term enrollment in an alternative plan through BCBS or the health insurance marketplace.
- The minimum annual compensation level for GSHIP coverage is $5,700. If students will not meet this minimum during the academic year, they are not eligible for GSHIP. This policy primarily affects students hired on a half-time or other part-time basis if not working for the full year.
- Students on the RA/TA plan must submit a hard waiver to verify enrollment in the GSHIP plan at http://studentbluenc.com/#/uncch or they will be changed $1,270.00 per semester on their University account.

What funding does Health Behavior have for students?

Who’s eligible and how are awards allocated?

Tuition Remission (TR) awards pay the difference between non-resident and resident tuition at the Academic Affairs rate (see https://cashier.unc.edu/tuition-fees/) for out-of-state students. The Department receives a variable number of TRs from the Graduate School each year for allocating to qualifying students. Tuition remissions:

- Must be paired with a research assistantship (RA) or teaching assistantship (TA) that pays the minimum service stipend (paid monthly) set annually by the Graduate School, in-state tuition (at the Academic Affairs rate), and health insurance.
- May be divided between two RA/TA sources with pro-rated payments of the stipend, in-state tuition, and health insurance (a half-time TR pays half the stipend, half of in-state tuition, and full health insurance; if two sources are paired, health insurance is prorated).
- Half-time TRs are available only to MPH students, not doctoral students.
- Are not available for summer sessions.
- Are allocated to out-of-state recipients of HB MPH and doctoral recruitment scholarships; international students with a qualifying RA/TA; selected out-of-state, first year doctoral students with a qualifying RA/TA; and selected out-of-state, first and second year MPH students with a qualifying RA/TA.

**MPH students with a qualifying RA must apply for a TR via a departmental process.**

Teaching Assistantships (TAs) are service awards that accompany an appointment as a teaching assistant for a departmental course. Teaching assistantships:

- Require 16 hours/week of service for MPH students and 18 hours/week of service for doctoral students per semester (17 weeks).
- Pay a monthly stipend at the Graduate School minimum stipend rate, in-state tuition (at the Academic Affairs rate), and health insurance (students fees are not included).
Half-time TA awards require half the service requirement and pay half the stipend, half of in-state tuition, and full health insurance (subject to meeting the insurance eligibility requirement of a minimum of $5,700 compensation for the year).

- Offered for fall, spring, and summer departmental courses (summer, as applicable).
- Doctoral students (excluding first year MSPH-to-PhD students and, with some exceptions, first semester PhD students) and second year MPH students are eligible depending on specific course criteria.
- Eligible students may apply for fall, spring, and summer TAs via a departmental process.
- Selections are made by the Department in consultation with course instructors.

**Research Assistantships (RAs)** are service awards for appointment as a research assistant on a faculty or departmental project. Research assistantships:

- Require 16 hours/week service for MPH students and 18 hours/week service for doctoral students per semester (17 weeks).
- Pay a monthly stipend at the Graduate School minimum stipend rate, in-state tuition (at the Academic Affairs rate), and health insurance (student fees are not included).

Half-time RA awards require half the service requirement and pay half the stipend, half of in-state tuition, and full health insurance (subject to meeting the insurance eligibility requirement of a minimum of $5,700 compensation for the year).

- Doctoral and MPH students are eligible depending on specific project requirements.
- Selection is made by the faculty member offering the RA.

**Graduate Assistantships (GAs)** are hourly paid assistantships on a faculty or departmental project with variable requirements for number of hours and hourly wage. GAs:

- Are not eligible for tuition remission or in-state tuition.
- Do not usually include student health insurance.
- Are open to doctoral and MPH students depending on specific project requirements.
- Selection is made by the faculty member offering the GA or faculty/staff supervising the position.

**School-Based Tuition (SBT) Awards** are tuition awards beginning at $5,000 that are allocated to MPH students, which come from tuition receipts to the School.

- In order to enhance recruitment of high priority applicants and to increase diversity of the incoming class, 60% the Department’s SBT allocation is used to recruit admitted applicants selected by the MPH Admissions Committee.
- Both incoming and continuing students MPH students are eligible to apply for Graduate Assistant positions funded through the remaining 40% of the Departments SBT allocation. The solicitation for this process occurs early in the Fall semester.

**Health Behavior Recruitment Awards** are used to cover training costs. Sources of funding include fellowships and awards funded by the Graduate School, Gillings School of Global Public Health (SPH), and the department as funds are available, such as the Dorothy Dunn, Hochbaum, Gillings Merit, and Alumni Annual Fund awards.

- Recruitment awards vary in what they pay, from full tuition, stipend, and health insurance for the first one or two semesters to monetary awards that may be applied to tuition and other expenses.

- Recruitment awards typically have a service requirement (i.e., 16 hours/week for MPH students or 18 hours/week for doctoral students on a faculty or departmental project).

7/31/2018
All incoming admitted students are eligible depending on specific award criteria.
Applicants do not apply for fellowships; award recipients are selected by the Department based on materials in the application for admission.

**Health Behavior Recognition Awards** are monetary awards, allotted as funds are available, in recognition of student accomplishments, such as the Kathy Kerr Memorial Scholarship (2nd year MPH), Lucy S. Morgan Award (1st year MPH), Harriett Hylton Barr Memorial Award, and Lansky Family Endowed Scholarship.

- Awards vary in the amounts paid.
- For the Kathy Kerr Memorial Award and the Lucy S. Morgan Award, students are nominated and voted on by students, faculty, and community preceptors via a departmental process.
- For other awards, selection is made by the Department according to fund stipulations.

**Health Behavior Travel Awards** are awarded each semester to help support travel for students presenting a paper or a poster at either a public health or specialty conference.

- All Health Behavior students are eligible.
- Students apply for awards in fall and spring via a departmental process.
- The Department makes the selection.
