Health Risks of a Changing Climate

Kristie L. Ebi, PhD, MPH
Rohm & Haas Endowed Professor in Public Health Sciences
Director, Center for Health and the Global Environment (CHanGE)
University of Washington, Seattle

Dr. Ebi has been conducting research and practice on the health risks of climate variability and change for 20 years, including on extreme events, thermal stress, foodborne safety and security, and vector borne diseases. She focuses on understanding sources of vulnerability, estimating current and future health risks of climate change, and designing adaptation policies and measures to reduce the risks of climate change in multi-stressor environments. Dr. Ebi has supported multiple countries in Central America, Europe, Africa, Asia, and the Pacific in assessing their vulnerability and implementing adaptation measures. She also co-chairs the International Committee On New Integrated Climate change assessment Scenarios (ICONICS), facilitating development of new climate change scenarios. Dr. Ebi’s scientific training includes an M.S. in toxicology and a Ph.D. and a Masters of Public Health in epidemiology, and two years of postgraduate research at the London School of Hygiene and Tropical Medicine. She has edited four books on aspects of climate change and has more than 200 publications.
