TEACHING ACTIVITIES

MHCH/PUBH 256, (Currently 756) Addressing Health Inequalities in the United States

This course was developed by Dr Hogan in 2002 and taught for the first time in spring of 2003. This course was designed to help clinicians and other public health professionals develop and strengthen knowledge, skills, and ability to conduct needs assessment, critical appraisal and measurement of the distribution, causes and consequences of health inequalities, to evaluate or design intervention with respect to clinical practice, allocation of resources, health, medical care and/or social policy, and to design appropriate etiologic, health services or clinical research, targeted toward understanding, reducing and ultimately eliminating health disparities of various types and across varying populations in need.
