

Approved Core Course Substitutes

Eligible students may be able to take an approved substitute for SPHG 711 and/or SPHG 712 in specific circumstances as described below:

For SPHG 711 Analysis (2 credits)

Approved substitute for SPHG 711 MUST be taken no later than the same semester or the semester immediately following enrollment in SPHG 712 Methods and Measures and SPHG 713 Understanding Public Health Issues.

- PUBH 741: Quantitative methods for health care professionals (4 credits)
Eligible students: MPH students entering Fall 2018 in Health Care and Prevention; MPH students entering Fall 2019 and after in Population Health for Clinicians concentration

For SPHG 712 Methods and Measures (2 credits)

Approved substitute for SPHG 712 MUST be taken no later than the same semester as SPHG 713 Understanding Public Health Issues.

- PUBH 760: Clinical measurement and evaluation (3 credits)
Eligible students: MPH students entering Fall 2018 in Health Care and Prevention; MPH students entering Fall 2019 and after in Population Health for Clinicians concentration

Please note that the MPH core is an intentional series of interconnected courses where all students are trained and work collaboratively at solving public health problems at the intersection of multiple disciplines. Inquiries must be made with your academic coordinator prior to enrolling in the substitute course and it is important to note that very few such petitions are approved.
