

Curriculum Vitae Cass T. Miller

Department of Environmental Sciences and Engineering
CB 7431, 166 Rosenau Hall
School of Public Health
University of North Carolina
Chapel Hill, North Carolina 27599-7431

Telephone: (919) 966-2643
FAX: (919) 966-7911
e-mail: casey_miller@unc.edu
<http://www.sph.unc.edu/envr/>

Education

University of Toledo, B.S. Civil Engineering, 1977
University of Toledo, M.S. Civil Engineering, 1979
University of Michigan, M.S. Environmental Engineering, 1981
University of Michigan, Ph.D. Environmental Engineering, 1984

Professional Experience

1985–Present
Department of Environmental Sciences and Engineering
University of North Carolina
Chapel Hill, North Carolina

Teaching and research activities are focused on theoretical, computational, and experimental aspects of single-phase and multiphase fluid flow, and contaminant transport and reaction phenomena in natural and engineered systems, especially porous medium systems.

- 1985–1991, 1991–1995, 1995–2011, 2012–Present
Assistant Professor, Associate Professor, Professor, Okun Distinguished Professor of Environmental Sciences and Engineering
- 1999–2005
Chair
- 1998–1999
Director of the Environmental Modeling Program Area
- 1992–1999
Director of the Center for Multiphase Research

2012–Present
Affiliate Member
Carolina Center for Interdisciplinary Applied Mathematics (CCIAM)
Department of Mathematics

University of North Carolina
Chapel Hill, North Carolina

2017–Present
Adjunct Professor
Department of Applied Physical Sciences
University of North Carolina
Chapel Hill, North Carolina

1973–1977, 1977–1980, 1980–1985
Technician, Staff Engineer, Senior Engineer
L.M. Miller & Associates
Consulting Engineers and Geologists
Ann Arbor, Michigan

Hydrogeological investigations, groundwater resource evaluations, mathematical modeling studies, sanitary landfill evaluation and design, groundwater pollution evaluation and remediation, geophysical surveys, and combined groundwater and surface-water management.

1982–1984
Research Associate
Environmental Engineering
University of Michigan
Ann Arbor, Michigan

Professional Registration

Registered Professional Engineer Michigan, Number: 27613
Registered Professional Engineer Ohio, Number: E-46661

Awards and Honors

WR Kenan Jr Senior Faculty Research and Scholarly Leave, University of North Carolina (2018-2019)
Kenan Research and Scholarly Leave, University of North Carolina (2008-2009)
Fellow of the American Geophysical Union (2002)
Delta Omega Honorary Public Health Society, Theta Chapter (2001)
Junior Faculty Development Award, University of North Carolina (1987)
Chi Epsilon Honorary Civil Engineering Fraternity (1984)
University of Michigan Engineering College Graduate Student Scholarship Award (1983, 1984)

Editorial and Scientific Leadership Positions

Academic Research Community Alliance, Founder and Director (2023–)

Advances in Water Resources, Elsevier Science, Editor (1997–2015)

Advances in Water Resources, Elsevier Science, Editorial Board (1994–1997)

Bi-Annual International Conferences on Computational Methods in Water Resources, Organizing Committee (2010–2018)

XV International Conference on Computational Methods in Water Resources, Conference Organizer and Proceedings Editor (2004)

Environmental Science & Technology, American Chemical Society, Associate Editor (1992–1996)

Ground Water, National Ground Water Association, Editorial Board (1990–1992)

United States Environmental Protection Agency, Scientific Advisory Board, Hydraulic Fracturing Research Advisory Panel (2013–2016)

Recent Collaborators

D. Adalsteinsson (Univ. NC), M.D. Aitken (Univ. NC), D.M. Anderson (George Mason Univ.), R.T. Armstrong (Univ. New South Wales), I. Battiato (Stanford Univ.), S. Berg (Shell Global Solutions, Rijswijk), M.A. Berrill (Oak Ridge National Laboratory), O. Coronell (Univ. NC), C.N. Dawson (Univ. Texas), T. Dingemans (Univ. NC), M.W. Farthing (US Army ERDC), J.K. Fisher (Redbud Labs), M.G. Forest (Univ. NC), W.G. Gray (Univ. NC), B. Griffith (Univ. NC), S.C. Hauswirth (California State Univ., Northridge), R. Helmig (Univ. of Stuttgart), T.Y. Hou (Cal Tech), J. Huang (Univ. NC), P.T. Imhoff (Univ. Delaware), C.E. Kees (US Army ERDC), C.T. Kelley (NC State Univ.), J.E. McClure (Virginia Tech), R.M. McLaughlin (Univ. NC), J.F. Prins (Univ. NC), L.J. Pyrak-Nolte (Purdue), I. Rybak (University of Stuttgart), S. Schlüter (Helmholtz-Centre for Environmental Research), B.A. Schrefler (Universita 'degli Studi di Padova, Italy), R. Spero (Redbud Labs), F.J. Valdés-Parada (Universidad Autónoma Metropolitana-Iztapalapa), D. Wildenschild (Oregon State Univ.), and B.D. Wood (Oregon State Univ.).

Professional Societies

American Geophysical Union, Member of Groundwater Committee (1989–1993)

Society for Industrial and Applied Mathematics, Member of Geosciences Activity Group

Professional Service

1. Academic Press, Estuarine, Coastal and Shelf Science
Peer Reviewer (1989)
2. Academic Press, Journal of Computational Physics
Peer Reviewer (2000)

3. American Association for the Advancement of Science, Science
Peer Reviewer (2003)
4. American Chemical Society and American Institute of Chemical Engineers, Biotechnology Progress
Peer Reviewer (1992)
5. American Chemical Society, Environmental Science & Technology
Peer Reviewer (1987–Present)
Associate Editor (1992–1996)
6. American Chemical Society, Industrial & Engineering Chemistry Research
Peer Reviewer (1998, 2019)
7. American Chemical Society, Petroleum Research Fund
Peer Reviewer (2000–2016, 2019)
8. American Geophysical Union
Peer Reviewer Water Resources Research (1988–Present)
Peer Reviewer Geophysical Research Letters (2019)
Member of Groundwater Committee (1989–1993)
9. American Scientist
Book Reviews (1990, 1992, 1995)
10. American Society of Agronomy, Journal of Environmental Quality
Peer Reviewer (1987, 1997)
11. Army Research Office
Peer Reviewer (1992–1999)
12. Association of Ground Water Scientists and Engineers, Ground Water
Peer Reviewer (1988–1992, 2004)
Editorial Board (1990–1992)
13. Australian Research Council
Federation Fellowship Peer Reviewer (2004)
14. Baltzer, Computational Geosciences
Peer Reviewer (2001)
15. Cambridge University Press, Journal of Fluid Mechanics
Peer Reviewer (2001, 2016, 2018–2022)
16. Elsevier, Advances in Water Resources
Peer Reviewer (1991)
Editorial Board (1994–1997)
Co-Editor (1997–2015)

17. Elsevier, Computers & Geosciences
Peer Reviewer (2004, 2021)
18. Elsevier, Environmental Modelling & Software
Peer Reviewer (1999)
19. Elsevier, International Journal of Multiphase Flow
Peer Reviewer (1999)
20. Elsevier, International Journal of Thermal Sciences
Peer Reviewer (2002)
21. Elsevier, Journal of Colloid and Interface Science
Peer Reviewer (2000–2001, 2003)
22. Elsevier, Journal of Contaminant Hydrology
Peer Reviewer (1985, 1993, 1998–2004)
23. Elsevier, Journal of Hydrology
Peer Reviewer (1992)
24. Elsevier, Powder Technology
Peer Reviewer (1999)
25. European Physical Society, Europhysics Letters
Peer Reviewer (2002)
26. Graduate Women in Science
Graduate Student Fellowship Reviewer (2017)
27. International Association on Water Pollution Research and Control, Water Research
Peer Reviewer (1987–1990)
28. John Wiley and Sons, Inc., International Journal for Numerical Methods in Engineering
Peer Reviewer (2000, 2003)
29. John Wiley and Sons, Inc., Numerical Methods for Partial Differential Equations
Peer Reviewer (1997)
30. Mary Ann Liebert, Inc. Publishers
Peer Reviewer (2004)
31. National Academy of Sciences
Peer Reviewer Proceedings of the National Academy of Sciences (2019–2020)
32. National Computational Science Alliance
Peer Reviewer (1998)
33. National Institute of Environmental Health Sciences
Proposal Review Committee (2004, 2007)
Environmental Health Perspectives, Peer Reviewer (2005)

34. National Science Foundation
Peer Reviewer (1992–Present)
Panel Member (1993)
35. Natural Environmental Research Council, United Kingdom
Proposal Reviewer (1999)
36. Nature Research, Scientific Reports
Peer Reviewer (2020–2021)
37. New York Center for Hazardous Waste Management
Peer Reviewer (1990)
38. North Carolina Albemarle-Pamlico Estuarine Study
Peer Reviewer (1991)
39. North Carolina Biotechnology Center
Peer Reviewer (1986)
40. North Carolina State University, Raleigh
Dissertation Reviewer (1993, 1997, 2000, 2007, 2012)
41. North Carolina Supercomputing Center
Allocation Committee Member (1995–2002)
42. Pergamon, Chemical Engineering Science
Peer Reviewer (2002)
43. Promotion Reviewer
University of Notre Dame (2017, 2022)
Ohio State University (2018)
Gettysburg College (2018)
Stanford University (2020, 2023)
44. Revista Mexicana de Ingeniería Química
Peer Reviewer (2019)
45. Sage Publishing
Peer Reviewer Hispanic Health Care International (2019)
46. Simula Research Laboratory, Lysaker, Norway
Program Planning Review (2004)
47. Society for Industrial and Applied Mathematics
Journal on Applied Mathematics, Peer Reviewer (2008–2009)
48. Soil Science Society of America, Soil Science Society of America Journal
Peer Reviewer (1997)

49. South Carolina Hazardous Waste Management Research Fund
Peer Reviewer (1991)
50. Springer Science Publishers, Computational Geosciences
Peer Reviewer (2020)
51. Springer Science Publishers, Meccanica
Peer Reviewer (2005)
52. Springer Science Publishers, Transport in Porous Media
Peer Reviewer (2020)
53. Swiss National Science Foundation
Peer Reviewer (2014)
54. United Arab Emirates Universities
Proposal Reviewer (2023)
55. The Universities Council on Water Resources
Peer Reviewer (1987–1992)
56. United States Department of Agriculture
Peer Reviewer (2003)
57. United States Department of Energy
Review of Subsurface Science Research Program, Multiphase Flow Panel Chair (1991)
Vadose Zone Roadmapping Working Group Member (2000–2001)
Engineering Management Science Program Review Panel (2002)
Peer Reviewer for Office of Basic Energy Sciences (2003–2005)
Multiscale Mathematics Workshop, Environmental and Geosciences Co-Leader (2004)
Office of Basic Energy Sciences, Graduate Fellowship Proposal Reviews (2010–2012)
Office of Basic Energy Sciences, Early Career Awards (2012–2016)
INCITE Program, Panel Member (2011, 2012)
Office of Basic Energy Sciences (2014)
Exascale project proposal review (2016)
58. U.S. Civilian Research and Development Foundation
Peer Reviewer Cooperative Grants Program (2003)
59. University of Pittsburgh, Pittsburgh, Pennsylvania
Bachelors Honors Thesis Reviewer (2006)
60. University of Oslo, Oslo, Norway
Dissertation Reviewer (1996)
61. University of Stuttgart, Stuttgart, Germany
Habilitation Reviewer (2010)

62. University of Western Australia, Perth, Australia
Dissertation Reviewer (1999)
63. Water Environment Federation, Water Environment Research Journal
Peer Reviewer (1989–1991)
Research Committee (1986–1992)
64. Water Resources Research Institute of North Carolina
Technical Committee Member (1986–1989, 1992–1995)
In-Service Training Program Contributor (1986)
Peer Reviewer (1986–1996)
65. Wiley-Blackwell
Peer Reviewer, Studies in Applied Mathematics (2020)

University of North Carolina Service

Department of Environmental Sciences and Engineering

- Triangle Conference on Environmental Technology—Conducted Workshop “Monitoring and Modeling of Groundwater Contamination” (1986)
- Developed and Directed Short Course “Groundwater Quality Management” (1988)
- Computer Committee (1986–1996)
- Shop Committee (1988–1995)
- Space Committee (1989–1990)
- Water Resources Engineering, Hydrologist Search Committee (1989–1990)
- Strategic Planning and Development Committee (1990–1992)
- Water Resources Engineering, Surface Chemist Search Committee (1995)
- Environmental Management and Policy, Search Committee (1996)
- Department Chair (1999–2005)
- Environmental Chemistry and Hydrology, Search Committee (2007–2008)
- Ad Hoc Promotion Review Committee Chair (2016, 2017)
- Awards Committee Chair (2017–2021)
- Ad Hoc PhD Competencies Committee (2018)
- Post-Tenure Review Committee (2022)

- Strategic Planning Task Force (2023–Present)

Department of Applied Physical Sciences

- Graduate Studies Committee (2017–2018)

School of Public Health

- Department of Epidemiology Chair Review Committee, Chair (2000–2001)
- Web Steering Committee (2000–2001)
- Strategic Planning Committee, Chair (2001)
- Associate Dean for External Affairs Search Committee (2002)

Marine Sciences Program

- Large-Scale Numerical Modeler Search Committee (1989–1992)
- Appointment and Promotion Committees (1995–1996, 1998–1999, 2001)

University Committees

- University Faculty Council
Alternate Member (1986–1988, 1990)
- University Research Council
Chairman Physical Sciences and Mathematics Review Committee (1994–1995)
- Science Advisory Committee, Division of Basic and Applied Sciences (1998–2000)
- Ad Hoc Committee on Research Administration (1999)
- Environmental Sciences Building Committee, Chair (2001–2003)
- Inside Carolina, Environmental Programs Committee (2002)
- Postdoctoral Advisory Committee (2002–2003)
- Tuition Remission Task Force (2002–2003)
- High-Performance Computing and Communications Advisory Committee (2002–2003)
- University Uses Working Group for Carolina North (2002–2003)
- Tuition Task Force (2004)
- Applied Physical Sciences User Group Committee (2017–2019)
- Provost Committee on Academic Publishing (2022–2024)
- Graduate School Fellowship Review Committees (2023–2024)

Research Grants and Contracts

1. Methodology for Assessment of Contamination of the Unsaturated Zone by Leaking Underground Storage Tanks. Sponsored by: Water Resources Research Institute of North Carolina (7/85–6/87). Co-Principal Investigator with F.A. DiGiano. Amount: \$70,169.
2. The Transport and Fate of Organic Contaminants in Ground Water Systems. Sponsored by: National Science Foundation (9/85–2/88). Principal Investigator. Amount: \$41,521.
3. Mathematical Model for Assessing Multiphase Organic Contaminant Transport in Ground Water. Sponsored by: University of North Carolina at Chapel Hill University Research Council (11/85–10/87). Principal Investigator. Amount: \$1,500.
4. Modeling Organic Contaminant Sorption Impacts on Aquifer Restoration. Sponsored by: Water Resources Research Institute of North Carolina (6/86–5/87). Principal Investigator. Amount: \$37,587.
5. Characterization of the Adaptive Abilities of Groundwater Microbial Communities. Sponsored by: U.S. Environmental Protection Agency, R. S. Kerr Laboratory (10/86–7/87). Principal Investigator. Amount: \$104,000.
6. Development of an Improved Methodology for Assessing the Movement of Gasoline Origin Contaminants in Ground Water Systems. Sponsored by: University of North Carolina at Chapel Hill Foundation R. J. Reynolds Fund—Jr. Faculty Development Award (1/87–12/87). Principal Investigator. Amount: \$3,000.
7. Effect of Vapor-Phase Mass Transfer on Aquifer Restoration. Sponsored by: Water Resources Research Institute of North Carolina (6/87–5/89). Principal Investigator. Amount: \$73,707.
8. Development of a Variable, Dual-Energy Attenuation Method for Measuring Fluid Saturation in Multiphase Systems. Sponsored by: Biomedical Research Support Funds, School of Public Health, University of North Carolina at Chapel Hill (6/87–5/88). Principal Investigator. Amount: \$7,257.
9. Investigation of Multi-Component Sorption and Desorption Rates in Saturated Ground Water Systems. Sponsored by: United States Geological Survey and the Water Resources Research Institute of North Carolina (8/87–10/90). Principal Investigator. Amount: \$321,314.
10. Investigation of Aquifer Response to Purge-Well Rehabilitation. Sponsored by: U.S. Environmental Protection Agency, R. S. Kerr Laboratory (10/87–9/89). Principal Investigator. Amount: \$101,400.
11. The Impact of Interphase Mass-Transfer Rate and Equilibrium for Multiphase Groundwater Systems. Sponsored by: Army Research Office (11/87–2/91). Principal Investigator. Amount: \$306,739.

12. Groundwater Quality Management—Continuing Education. Sponsored by: Grumman Grant, University of North Carolina at Chapel Hill (1/88–12/88). Principal Investigator. Amount: \$4,900.
13. Development of a Modified Elutriate Test to Predict Release of Contaminants from Sediment Material at the Point of Dredging. Sponsored by: United States Army Engineer Waterways Experiment Station (8/88–2/90). Co-Principal Investigator with F.A. DiGiano. Amount: \$161,901.
14. Movement and Dissipation of Toxicants and Water in Natural Soil Environments. Sponsored by: United States Geological Survey and the Water Resources Research Institute of North Carolina (6/89–5/92). Principal Investigator. Amount: \$95,590 (UNC Share) from \$349,788 (Total Project).
15. Investigation of a Cosolvent Strategy for Groundwater Quality Restoration. Sponsored by: Biomedical Research Support Funds, School of Public Health, University of North Carolina at Chapel Hill (6/89–4/90). Principal Investigator. Amount: \$8,450.
16. An Investigation of Waste Burial Areas. Sponsored by: Health and Safety Office, University of North Carolina at Chapel Hill (11/89–5/91). Principal Investigator. Amount: \$33,500.
17. Computer Simulation of Push-Pull Systems. Sponsored by: National Institutes of Health (9/90–8/92). Co-Principal Investigator with M.R. Flynn. Amount: \$157,940.
18. An Evaluation of Scale Effects in Multiphase Porous Media Systems. Sponsored by: University of North Carolina at Chapel Hill University Research Council (11/90–10/92). Principal Investigator. Amount: \$2,000.
19. RCRA Facility Investigation for Waste Drum and Landfill Areas. Sponsored by: Health and Safety Office, University of North Carolina at Chapel Hill (10/90–9/91). Principal Investigator. Amount: \$26,350.
20. Investigation of Scale and Heterogeneity Effects on Flow and Transport in Multiphase Systems. Sponsored by: United States Army Research Office (5/91–4/94). Principal Investigator. Amount: \$435,000.
21. Simulation of Multiphase Flow and Transport Phenomena in Subsurface Systems. Sponsored by: North Carolina Supercomputing Center (7/91–6/92). Principal Investigator. Amount: 200 hours of Cray Y-MP time.
22. Computer Simulation of Push-Pull Systems. Sponsored by: North Carolina Supercomputing Center (7/91–6/92). Co-Principal Investigator with M.R. Flynn. Amount: 100 hours of Cray Y-MP time.
23. An Evaluation of Enhanced Aquifer Remediation Strategies for Subsurface Restoration. Sponsored by: Water Resources Research Institute of North Carolina (7/91–12/92). Principal Investigator. Amount: \$39,902.

24. The Role of Biosurfactants in Biodegradation of Hydrophobic Pollutants by Indigenous Microorganisms in Soil. Sponsored by: United States Geological Survey and the Water Resources Research Institute of North Carolina (8/91–7/94). Co-Principal Investigator with M.D. Aitken. Amount: \$348,631.
25. Supercomputer Simulation of Pump-and-Treat Methods for Aquifer Restoration. Sponsored by: U.S. Environmental Protection Agency, R. S. Kerr Laboratory (10/91–8/93). Principal Investigator. Amount: \$100,000.
26. Supercomputer Simulation of Pump-and-Treat Methods for Aquifer Restoration. Sponsored by: Cray Research Environmental and Computational Science Program through the North Carolina Supercomputing Center. (1/92–12/92). Principal Investigator. Amount: \$7,000 and 80 hours of Cray Y-MP time.
27. An Investigation of Flow and Transport Phenomena in Multicomponent, Multiphase Subsurface Systems. Sponsored by: National Institute of Environmental Health Sciences (4/92–3/95). Principal Investigator. Amount: \$618,315.
28. Stochastic Analysis of Flow and Transport Phenomena in Subsurface Systems Using a Space Transformation Method. Sponsored by: National Institute of Environmental Health Sciences (4/92–3/95). Co-Principal Investigator with G. Christakos. Amount: \$507,465.
29. An Investigation of Fluid Flow and Contaminant Transport Processes in Heterogeneous Multiphase Systems. Sponsored by: Army Research Office (7/92–6/97). Principal Investigator. Amount: \$2,200,856.
30. Supercomputer Simulation of Aquifer Remediation. Sponsored by: North Carolina Supercomputing Center (1/93–12/93). Principal Investigator. Amount: 450 hours of Cray Y-MP time.
31. Supercomputer Simulation of Pump-and-Treat Methods for Aquifer Restoration. Sponsored by: Cray Research Environmental and Computational Science Program through the North Carolina Supercomputing Center. (1/93–12/93). Principal Investigator. Amount: \$7,000 and 100 hours of Cray Y-MP time.
32. Supercomputer Simulation of Fixed and Adaptive Solutions to the Richards' Equation. Sponsored by: North Carolina Supercomputing Center (2/93–2/94). Co-Principal Investigator with R.W. Skaggs, North Carolina State University. Amount: 25 hours of Cray Y-MP time.
33. Modeling Enhanced Remediation Methods for Multiphase Subsurface Systems. Sponsored by: Hoechst Celanese Corporation (3/93–6/95). Principal Investigator. Amount: \$52,800.
34. Simulation of Flow and Transport Phenomena in Heterogeneous Multiphase Systems. Sponsored by: National Science Foundation, Pittsburgh Supercomputing Center (12/93–1/95). Principal Investigator. Amount: 200 hours of Cray C90 time.

35. Simulation of Flow and Transport Phenomena in Heterogeneous Multiphase Multicomponent Systems. Sponsored by: Cray Research Environmental and Computational Science Program through the North Carolina Supercomputing Center (1/94–3/96). Principal Investigator. Amount: \$15,000 and 200 hours of Cray Y-MP time.
36. Simulating Flow and Transport Phenomena in Heterogeneous Multiphase Systems. Sponsored by: North Carolina Supercomputer Center (7/94–6/96). Principal Investigator. Amount: 450 hours Cray Y-MP time.
37. An Investigation of Multiphase Mass Transfer Phenomena. Sponsored by: National Institute of Environmental Health Sciences (4/95–3/00). Principal Investigator. Amount: \$1,085,110.
38. Stochastic Analysis of Flow and Transport Phenomena. Sponsored by: National Institute of Environmental Health Sciences (4/95–3/00). Co-Principal Investigator with G. Christakos. Amount: \$1,052,890.
39. Superfund Center Outreach. Sponsored by: National Institute of Environmental Health Sciences (4/95–3/00). Principal Investigator. Amount: \$221,360.
40. An Investigation of Fluid Flow and Contaminant Transport Processes in Heterogeneous Multiphase Systems—AASERT Supplemental Request for Student Support. Sponsored by: United States Army Research Office (5/95–5/98). Principal Investigator. Amount: \$100,000.
41. Equipment to Support Research on Mass Transfer Phenomena in Multiphase Systems. Sponsored by: Department of Defense, DURIP (8/95–7/96). Principal Investigator. Amount: \$380,662.
42. Simulating Flow and Transport Phenomena in Heterogeneous Multiphase Systems. Sponsored by: U.S. Army Engineer Waterways Experiment Center through MCNC (10/95–9/98). Principal Investigator. Amount: \$233,262 (UNC Share).
43. Development and Application of Models for Multiphase Porous Media Systems. Sponsored by: North Carolina Supercomputer Center (7/96–2/98). Principal Investigator. Amount: 980 hours Cray T916 time, and 5,000 hours of Cray T3D/T3E time.
44. Modeling Subsurface Transport Phenomena. Sponsored by: North Carolina Supercomputer Center (7/96–2/98). Principal Investigator. Amount: 900 hours Cray T916 time; and 3,000 hours of Cray T3E time.
45. Simulation of Multiphase Flow and Multicomponent Transport Phenomena in Heterogeneous Porous Media Systems. Sponsored by: Cray Research Environmental and Computational Science Program through the North Carolina Supercomputing Center (1/97–12/97). Principal Investigator. Amount: \$8,000, and 100 hours of Cray T916 time.

46. Simulation of Biodegradation and Multicomponent Transport Phenomena in Heterogeneous Porous Media Systems. Sponsored by: Cray Research Environmental and Computational Science Program through the North Carolina Supercomputing Center (1/98–12/98). Principal Investigator. Amount: \$8,000; 100 hours of Cray T916 time, and 1,000 hours of Cray T3E time.
47. Modeling Subsurface Transport Phenomena. Sponsored by: North Carolina Supercomputer Center (2/98–8/99). Principal Investigator. Amount: 900 hours Cray T916 time, and 6,000 hours of Cray T3E time.
48. Technology Transfer of Basic Research on Multiphase Subsurface Fate and Transport. Sponsored by: Army Research Office (4/98–1/99). Principal Investigator. Amount: \$60,000.
49. The Role of Chemotaxis in the Biodegradation of Naphthalene in Porous Media. Sponsored by: National Science Foundation (9/98–8/00). Co-Principal Investigator with M.D. Aitken. Amount: \$215,000.
50. DAE/MOL Approach for Simulating Multiphase Flow. Sponsored by: Cray Research Environmental and Computational Science Program through the North Carolina Supercomputing Center (1/99–12/99). Principal Investigator. Amount: \$8,000; 100 hours of Cray T916 time, and 1,000 hours of Cray T3E time.
51. Atomic Force Microscopy Presents New Opportunities for Environmental Research. Sponsored by: Department of Defense, DURIP (3/99–2/00). Co-Principal Investigator with S.T. Martin. Amount: \$147,000.
52. Closure of Thermodynamically Constrained Models of Multiphase Flow. Sponsored by: University of North Carolina at Chapel Hill University Research Council (4/99–3/01). Principal Investigator. Amount: \$2,600.
53. Collaborative Research: Closure of Thermodynamically Constrained Models for Multiphase Systems. Sponsored by: National Science Foundation (9/99–8/02). Principal Investigator, Collaborator: W.G. Gray, University of Notre Dame. Amount: \$183,312 from total award of \$300,000.
54. Supercomputing Support for Investigations of Multiphase Flow and Transport Phenomena in Porous Medium Systems. Sponsored by: North Carolina Supercomputer Center (11/99–10/00). Principal Investigator. Amount: 60,000 hours IBM SP time, and 10,000 hours of SGI Origin 2000 time.
55. An Object Oriented Model for Nitrogenous Pollutants. Sponsored by: U.S. Environmental Protection Agency (3/00–3/03). Co-Principal Investigator. Amount: \$345,533.
56. Environmental Exposure and Effect of Hazardous Chemicals. Sponsored by: National Institute of Environmental Health Sciences (4/00–3/06). Component Project and Core Principal Investigator (J.A. Swenberg, Principal Investigator). Total Award Amount: \$17,800,017.

57. Modeling Multiscale, Multiphase Porous Medium Systems. Sponsored by: North Carolina Supercomputer Center (11/00–10/01). Principal Investigator. Amount: 240,000 hours IBM SP time, 9,000 hours of SGI Origin 2000 time, and 1225 hours of Cray T916 time.
58. Flow and Transport in Porous Media. Sponsored by: Army Research Office (5/01–4/02). Principal Investigator. Amount: 200,000 hours of IBM SP3 time.
59. A Distributed, High Performance Computing System for the Applied Sciences. Sponsored by: National Science Foundation (8/01–7/04). Co-Principal Investigator. Amount: \$598,173.
60. Bacterial Chemotaxis to Naphthalene Desorbing from a Nonaqueous-Phase Liquid. Sponsored by: National Science Foundation (9/01–8/04). Investigator (M.D. Aitken, Principal Investigator). Amount: \$386,072.
61. ITR/AP: Collaborative Research: Sampling Methods for Optimization and Control of Subsurface Contamination. Sponsored by: National Science Foundation (10/01–9/04). Principal Investigator for UNC, Collaborators: J.E. Dennis, Rice University; and C.T. Kelley, North Carolina State University. Amount: \$166,667 from total award of \$500,000.
62. Supercomputing Support for Modeling Multiphase Flow and Transport in Porous Medium Systems. Sponsored by: North Carolina Supercomputer Center (11/01–10/02). Principal Investigator. Amount: 377,000 hours IBM SP3 time, 7,400 hours of SGI Origin 2000 time, and 25 hours of Cray T916 time.
63. Environmental Modeling Research at the University of North Carolina at Chapel Hill. Sponsored by: U.S. Department of Energy (4/02–4/05). Principal Investigator. Amount: \$969,000.
64. Modeling Multiphase Transport Phenomena from the Pore to the Field Scale. Sponsored by: North Carolina Supercomputer Center (11/02–10/03). Principal Investigator. Amount: 285,000 hours IBM SP3 time, and 1,400 hours of SGI Origin 2000 time.
65. CMG: Multiphase Porous Medium Dynamics: Pore to Field Scale. Sponsored by: National Science Foundation (8/03–7/08). Principal Investigator. Amount: \$662,000.
66. DNAPL Source Remediation Using Brine Barriers. Sponsored by: National Institute of Environmental Health Sciences (4/4–3/6). Component Project Principal Investigator (J.A. Swenberg, Research Center Principal Investigator). Total Award Amount: \$509,549.
67. Collaborative Research: Upscaled Mass Transfer Coefficients for Modeling Dissolution of Nonaqueous Phase Liquids in Homogeneous and Heterogeneous Porous Media in the Field. Sponsored by: National Science Foundation (1/05–12/08). Principal Investigator. Amount: \$196,494.

68. Environmental Exposure and Effect of Hazardous Chemicals. Sponsored by: National Institute of Environmental Health Sciences (4/06–3/10). Component Project and Core Principal Investigator (J.A. Swenberg, Principal Investigator). Total Award Amount: \$12,103,713.
69. Promoting North Carolina’s Economic Development Through Strategic Water Resource Management. Sponsored by: University of North Carolina Research Competitiveness Fund (1/08–12/08). Co-Principal Investigator (G.W Characklis, Principal Investigator). Total Award Amount: \$245,650.
70. Environmental Exposure and Effect of Hazardous Chemicals, Supplement to Project 6. Sponsored by: National Institute of Environmental Health Sciences (9/09–8/11). Component Project Principal Investigator (J.A. Swenberg, Principal Investigator). Total Award Amount: \$221,994.
71. SISGR—Multiscale Modeling of Multiphase Flow, Transport, and Reactions in Porous Medium Systems, Sponsored by: U.S. Department of Energy (9/15/09–9/14/12). Principal Investigator. Total Award Amount: \$600,000.
72. Collaborative Research: CDI-Type II—Revolutionary Advances in Modeling Transport Phenomena in Porous Medium Systems. Sponsored by: National Science Foundation (12/1/09–09/30/15). Principal Investigator. Total Award Amount: \$1,700,000 (UNC Award Amount: \$1,100,000).
73. Multiscale Modeling of Multiphase Flow, Transport, and Reactions in Porous Medium Systems. Sponsored by: U.S. Department of Energy (9/15/12–9/14/16). Principal Investigator. Total Award Amount: \$623,474.
74. CC-NIE Network Infrastructure: Enabling Data-Driven Research. Sponsored by: National Science Foundation (12/1/12–11/30/14). Co-Principal Investigator (Jay Aikat, Principal Investigator). Total Award Amount: \$499,529.
75. Advancing Models for Multiphase Flow and Transport in Porous Medium Systems. Sponsored by: U.S. Department of Energy (1/1/14–12/31/16). Co-Principal Investigator (James E. McClure, Principal Investigator). Total Award Amount: 180 million core hours of computational time on Cray XK7 Titan at Oak Ridge National Laboratory.
76. Thermodynamically Constrained Averaging Theory for Multiscale Systems. Sponsored by: Army Research Office (6/6/14–8/31/18). Principal Investigator. Total Award Amount: \$693,794.
77. Advancing Mechanistic Understanding of Two-Fluid-Phase Flow in Porous Medium Systems. Sponsored by : National Science Foundation (4/1/16–3/31/19). Principal Investigator. Total Award Amount: \$460,762.
78. Elucidating Physicochemical Processes Affecting Transport Phenomena Resulting from Hydraulic Fracturing of Natural Gas Reservoirs. Sponsored by : National Science Foundation (9/1/16–8/31/19). Principal Investigator. Total Award Amount: \$340,000.

79. Advancing Models for Multiphase Flow and Transport in Porous Medium Systems. Sponsored by: U.S. Department of Energy (1/1/17–12/31/18). Co-Principal Investigator (James E. McClure, Principal Investigator). Total Award Amount 215 million core hours of computational time on Cray XK7 Titan at Oak Ridge National Laboratory.
80. Equipment to Support the Validation of Multiscale Mathematical Models of Multiphase Transport Phenomena. Sponsored by: Army Research Office (5/30/18–5/29/19). Principal Investigator. Total Award Amount: \$240,039.
81. Sustainable Access to Safe Water: Graphene-Polymer Nanocomposite Membranes for Water Purification. Sponsored by: Creativity Hubs Program, Office of the Vice Chancellor for Research, University of North Carolina at Chapel Hill. (7/1/18–6/30/20). Co-Principal Investigator (Theo J. Dingemans, Principal Investigator). Total Award Amount: \$500,000.
82. Closing, Evaluating, and Validating Multiphase Flow Models in Porous Medium Systems. Sponsored by: U.S. Department of Energy (1/1/19–12/31/21). Principal Investigator. Total Award Amount: 771,000 Summit node hours, Oak Ridge National Laboratory, IBM AC922; and 620,000 Titan node hours, Oak Ridge National Laboratory, Cray XK7.
83. Formulation, Closure, Evaluation, and Validation of Multiscale, Multiphase Models. Sponsored by: Army Research Office (8/15/19–1/14/23). Principal Investigator. Total Award Amount: \$627,378.
84. Molecular Dynamics Simulations of Water and Salt Transport Through Crosslinked Aromatic Polyamide Reverse Osmosis Membranes, Sponsored by: National Science Foundation (2/6/20–2/5/21). Principal Investigator. Total Award Amount: SDSC Comet GPU Nodes 2,500 GPU hours; and TACC/Dell/Intel/Knights Landing, Skylake System (Stampede2) 1,600 node hours; estimated value provided by sponsor: \$1,122.
85. The UNC Chapel Hill Superfund Research Program (UNC-SRP), Sponsored by: National Institute of Health (2/20/20–1/31/25). Co-Investigator Projects 4 and 5 (Rebecca Fry, Principal Investigator). Total Award Amount: \$12,240,332.
86. Enhanced MDx: A Computational Model to Optimize Pre-Analytical Pathogen Isolation from Whole Blood, Sponsored by: Small Business Technology Transfer Program, Phase I and Phase II Award, National Institute of General Medical Sciences (9/10/20–5/31/24). Principal Investigator. Total Award Amount: \$2,283,649.
87. Molecular Dynamics Simulations of Water and Solute Transport Through Crosslinked Aromatic Polyamide Reverse Osmosis Membranes, Sponsored by: National Science Foundation (10/1/20–12/31/21). Principal Investigator. Total Award Amount: PSC Bridges-2 2,212,000 Core-hours, and SDSC Dell Cluster Expanse 2,212,000 Core-hours; estimated value provided by sponsor: \$36,478.

88. Molecular Dynamics Simulations of Water and Solute Transport Through Crosslinked Aromatic Polyamide Reverse Osmosis Membranes, Sponsored by: National Science Foundation (1/1/22–6/30/23). Principal Investigator. Total Award Amount: PSC Bridges-2 4,761,986 Core-hours, and SDSC Dell Cluster Expense 4,761,986 Core-hours; estimated value provided by sponsor: \$78,530.64.
89. Molecular Dynamics Simulations of Water and Solute Transport Through Crosslinked Aromatic Polyamide Reverse Osmosis Membranes, Sponsored by: ACCESS Program, National Science Foundation (7/1/23–12/31/24). Principal Investigator. Total Award Amount: PSC Bridges-2 4,932,430 Core-hours, and SDSC Dell Cluster Expense 4,932,430 Core-hours; estimated value provided by sponsor: \$83,532.15.

Post-Doctoral Associates

1. Paul T. Imhoff (1992–1996)
Education: Ph.D. Civil Engineering, Princeton University (1992);
Nature of Collaboration: analysis of aqueous-gas phase mass transfer in porous media, experimental investigations of finger formation in multiphase porous media systems, stability analysis for finger formation, and experimental investigations of enhanced remediation methods.
2. Itaru Okuda (1993–1995)
Education: Ph.D. Soil and Water Science, University of Florida, Gainesville (1993);
Nature of Collaboration: experimental and theoretical analysis of cosolvent, thermal, and surfactant methods of enhanced remediation.
3. Simon Gleyzer (1993–1998)
Education: Ph.D. Civil Engineering, Ufa, Institute of Oil, Russia (1991);
Nature of Collaboration: mathematical model formulation and experimental investigation of cosolvent, thermal, and surfactant methods of enhanced remediation.
4. Joseph A. Pedit (1994–2010)
Education: Ph.D. Environmental Sciences and Engineering, University of North Carolina at Chapel Hill (1994);
Nature of Collaboration: experimental and mathematical modeling aspects of sorption/desorption processes, modeling of advanced oxidation processes, modeling chemotaxis in porous medium systems, pesticide transport and fate, and experimental aspects of multiphase systems.
5. Clinton S. Willson (1996–1998)
Education: Ph.D. Civil Engineering, University of Texas, Austin, Texas (1996);
Nature of Collaboration: experimental and mathematical modeling aspects of enhanced remediation of DNAPL-contaminated systems.
6. Markus Hilpert (1997–2002)
Education: Ph.D. Engineering, University of Karlsruhe, Germany (1997);

Nature of Collaboration: mobilization of residual NAPLs using sound waves, and pore-scale modeling of multiphase systems.

7. Marylene Moutier (1998–1999)
Education: Dr. Ing. Soil Physics, Catholic University of Louvain, Louvain-la-Neuve, Belgium (1996);
Nature of Collaboration: density-enhanced mobilization of DNAPLs, and colloidal transport and reaction phenomenon.
8. Christopher E. Kees (2001–2002)
Education: Ph.D. Environmental Sciences and Engineering, University of North Carolina at Chapel Hill (2001);
Nature of Collaboration: adaptive temporal integration, domain decomposition preconditioning, multiphase flow and transport simulation, hydrologic modeling.
9. Matthew W. Farthing (2002–2004)
Education: Ph.D. Environmental Sciences and Engineering, University of North Carolina at Chapel Hill (2002);
Nature of Collaboration: problem solving environments, higher-order time integration, locally conservative finite element methods, adaptive numerical methods.
10. Joseph F. Kanney (2002–2003)
Education: Ph.D. Environmental Sciences and Engineering, University of North Carolina at Chapel Hill (2002);
Nature of Collaboration: problem solving environments, split-operator approaches, geochemical modeling.
11. Chongxun Pan (2003–2006)
Education: Ph.D. Environmental Sciences and Engineering, University of North Carolina at Chapel Hill (2003);
Nature of Collaboration: pore-scale modeling, multiphase porous medium physics, problem solving environments.
12. Sarah E. Gasda (2007–2011, co-advised along with W.G. Gray)
Education: Ph.D. Princeton University (2007);
Nature of Collaboration: development of adaptive integration methods, error estimation and control for split-operator methods, and NAPL dissolution fingering in heterogeneous systems.
13. Amber S. Jackson (2011)
Education: Ph.D. Mathematics, University of North Carolina at Chapel Hill (2011);
Nature of Collaboration: development of the thermodynamically constrained averaging theory.
14. James E. McClure (2011–2012)
Education: Ph.D. Environmental Sciences and Engineering, University of North Carolina at Chapel Hill (2011);
Nature of Collaboration: pore-scale modeling, multiphase porous medium physics.

15. Roham Bakhtyar (2012–2014)
Education: Iran University of Science and Technology and Ecole Polytechnique Fédérale de Lausanne, Switzerland (2009);
Nature of Collaboration: modeling sediment transport processes.
16. Hauswirth, Scott C. (2014–2016)
Education: Ph.D. Environmental Sciences and Engineering, University of North Carolina at Chapel Hill (2014);
Nature of Collaboration: transport phenomena during hydraulic fracturing, carbon sequestration, and environmental remediation.
17. Dye, Amanda L. (2015–2016)
Education: Ph.D. Environmental Sciences and Engineering, University of North Carolina at Chapel Hill (2015);
Nature of Collaboration: experimental and modeling of multiphase flow in porous media.
18. Vadala-Roth, Benjamin L. (2020–2022)
Education: Ph.D. Mathematics, University of North Carolina at Chapel Hill (2020);
Nature of Collaboration: modeling of shallow water systems.
19. Weigand, Timothy M. (2020–2023)
Education: Ph.D. Environmental Sciences and Engineering, University of North Carolina at Chapel Hill (2020);
Nature of Collaboration: molecular- and continuum-scale modeling of flow and transport phenomena in porous materials.
20. Pamela B. Schultz (2011–2020, 2023–)
Education: Ph.D. Environmental Sciences and Engineering, University of North Carolina at Chapel Hill (2011);
Nature of Collaboration: modeling non-dilute systems using the thermodynamically constrained averaging theory, physicochemical mechanisms and risk assessment of hydraulic fracturing, modeling microfluidic devices.
