NEW COURSE ANNOUNCEMENT

Environmental Crisis Management (ENVR 989)

Summer Session I 2018 3 Credit Hours
Instructors: Nigel Stuart MBA, Dr. Vizuete, Dr. Woods

Natural disasters and armed conflict can lead to humanitarian and environmental crises. This course presents the issues that public health and environmental engineer professionals would face when confronting these disasters.

- Co-taught by working professional with international experience in crisis management
- Week long immersive real-time simulations of humanitarian and environmental emergencies caused by hurricanes, earthquakes, and armed conflict
- Work in interdisciplinary teams to find practical solutions to address public health and environmental problems caused by disasters
