

ELIZABETH GLASER PEDIATRIC AIDS FOUNDATION

JUNE 29, 2015

GODFREY B. WOELK

Summary of Professional Experience

Godfrey Woelk is Director, Global Implementation Research at the Elizabeth Glaser Pediatric AIDS Foundation. In this position, he leads and provides technical and management oversight, and strategic thinking for the global implementation research activities of the Foundation. He leads implementation science studies in Zimbabwe and Tanzania, and is the research lead for a multi-country three-arm community-based randomized trial. Prior to joining the Foundation, Dr. Woelk was a senior research epidemiologist at Research Triangle Institute (RTI) International in the international health program within the statistics and epidemiology unit for three years where he served as project investigator/project director (PI/PD) for large, international epidemiological research and surveillance projects in the area of infectious diseases. These included being PI for the NIH-funded IeDEA (International Epidemiologic Databases to Evaluate AIDS) project Central Africa, PD for the CDC-funded Research Technical Assistance for Public Health Evaluation in Tanzania, and Senior Technical Advisor for a CDC-funded project on Building Health Data Dissemination and Information Use Systems in Zimbabwe.

Prior to joining RTI, Dr. Woelk carried out teaching and research for 20 years at the University of Zimbabwe Medical School, where he became Professor of Epidemiology and Chair of the Department of Community Medicine. Dr. Woelk taught epidemiology and health systems research at graduate and undergraduate levels across the various programs in the medical school of public health, medicine, nursing science, pharmacy, occupational and physical therapy, and medical laboratory sciences. He undertook research in HIV prevention and care, maternal health, hypertensive diseases of pregnancy, child health and policy studies. In particular, he was the Zimbabwe co-PI for the CPOL (Community Popular Opinion Leader) study; a large multi-country NIMH-funded community-based trial, and a co-investigator on the Project ACCEPT community-based HIV voluntary testing and counseling multi-country study. Dr. Woelk was PI for an Alliance for Health Policy and Systems Research/WHO/EC-funded multi-country study on barriers and facilitators affecting the implementation of findings from randomized control trials into health care policy and practice in low and middle-income countries, and the co-PI for a NIAAA-funded randomized trial of HIV prevention in Harare beer-halls.

Education

PhD, Epidemiology, University of Washington, Seattle, WA, 1996.
MCOMMH, Community Health, University of Liverpool, United Kingdom, 1981.
BSc, Sociology, University of Rhodesia, Harare, Zimbabwe, 1976.

Selected Project Experience

HIVCORE: HIV Operations Research and Evaluation (Project SEARCH) (2011 – 2016) - Technical Advisor. The goal of this USAID Task Order is to measurably improve PEPFAR II treatment, care and support, and PMTCT programs through a program of operations research and focused evaluations, which integrates capacity building and research utilization, and extracts broader lessons learned to build the global evidence base.

Project ACCLAIM: Advancing community level action to improve MCH/PMTCT (2012 – 2016) – Technical Lead for Research. The goal of this CIDA-funded multi-country project (Uganda, Swaziland and Zimbabwe) is to increase community demand for, uptake of, and retention in Maternal and Child Health/Prevention of Mother-To-Child Transmission of HIV (MCH/PTCMT) services.

Accelerating Elimination of Paediatric HIV/AIDS in Zimbabwe (2010 – 2015) – Technical lead for Research. The goal of this CIFF-funded program is to accelerate the elimination of pediatric HIV/AIDS in Zimbabwe through provision of appropriate support and operational research to better inform program implementation.

Building Health Data Dissemination and Information Use Systems in the Republic of Zimbabwe Under the President's Emergency Plan for AIDS Relief (PEPFAR) (2010-2011) – Senior Technical Advisor. The purpose of this CDC-funded program is to develop public health resources in-country to analyze health data for programmatic and policy development, improvement and development of methods and systems for information dissemination.

Research Technical Assistance for Public Health Evaluation in the Republic of Tanzania (2009-2011) - Project Director. The overall goal of this CDC-funded project is to support PEPFAR's public health evaluation (PHE) initiatives of the US government and Government of Tanzania in achieving high quality and timely outputs.

International Databases to Evaluate AIDS (IeDEA) (2006 to 2011)—Principal Investigator. The overall objectives of this NIH/NIAID-funded project are to establish regional data centers for the compilation of data to address research questions in HIV/AIDS that are not possible to answer with currently existing individual cohorts, to increase the generalizability of study results through the use of data from different settings and populations, and to allow regions to more accurately define and monitor the HIV epidemic within their perimeters.

Community Based HIV VCT: Zimbabwe (2003 to 2008)—Co-Investigator. This NIH/NIMH-funded project tests whether increasing the accessibility of voluntary testing and counseling for HIV will result in a reduction in stigma, an increase in the proportion of the population coming for testing, and a reduction in the incidence of HIV.

Zimbabwe Community Intervention to Reduce HIV/STD Risk (1999 to 2008)—Co-Principal Investigator. This NIH/NIMH-funded project was part of a multisite, multi-population, efficacy trial to adapt, implement, and evaluate the public opinion leader, community-level intervention model among young people 16 to 30 years of age in rural areas of Zimbabwe.

Planning the Framework Program in Global Health for Zimbabwe (2005 to 2007)—Principal Investigator. This NIH/Foragarty Institute planning grant prepared for the development of a Framework Program for Global Health grant application through the development of preliminary curricula and the

undertaking of pilot activities, the building of collaborations and needed resources, and the fostering of institutional support for a Global Health Program.

Prophylaxis Treatment for HIV Seropositive Women, Their Partners, and Their Infants (2002 to 2007)—*Co-Investigator*. This project assessed the effect of prophylaxis treatment with co-trimoxazole on HIV-seropositive women, their partners, and their infants.

Alcohol, Risky Sexual Behavior, and HIV/AIDS in Zimbabwe (2004 to 2007)—*Co-Investigator*. This WHO-funded study investigated how individual and community factors influence the concurrence of alcohol use and sexual behavior, as well as HIV infection and disease progression, in rural Zimbabwe.

Barriers and Facilitators Affecting the Implementation of Findings from Randomized Control Trials into Health Care Policy and Practice in Low- and Middle-Income Countries (LMICs) (2004 to 2006)—*Principal Investigator*. This project funded by AHSPR/WHO/EC explored the process of knowledge translation in LMICs in Mozambique, South Africa, and Zimbabwe by describing the factors affecting the use in national policy development of findings from randomized controlled trials. It also explored how actors in the policy process understand the notion of “evidence” for decision making. The project involved two case studies: the use of magnesium sulphate in the treatment of eclampsia and severe preeclampsia, and the use of bed nets and indoor residual household spraying for malaria control. These case studies represent two different types of interventions: public health or community based in the case of malaria control and hospital or clinically based for the treatment of eclampsia. In-depth interviews were carried out with policy makers and researchers in the three countries.

A Randomized Trial of HIV Prevention in Harare Beerhalls (2002 to 2007)—*Co-Principal Investigator*. This NIH/NIAAA grant studied the efficacy of a beerhall-based HIV behavioral prevention intervention for men in low-income areas of Harare, Zimbabwe.

Regai Dzive Shiri Project (2002 to 2007)—*Co-Principal Investigator*. This was a community randomized trial of a multicomponent HIV-prevention intervention for young people in rural Zimbabwe. The aim of the trial was to implement and rigorously evaluate this community-based adolescent HIV and sexually transmitted infection (STI) prevention program involving young people and their parents, professional peer educators, rural health clinics, and the wider community. This trial was funded by the NIH/NIMH.

University of Washington Multidisciplinary International Research Training Program (1994 to 2000)—*Co-Investigator/Site Director*. This was an exchange program involving students and faculty from the United States and Zimbabwe.

Community-Based Training for Medical Students (1989 to 1990)—*Departmental Director*. This project, funded by the Kellogg Foundation, involved the community-based training of medical students, service activities by members of the Department of Community Medicine in the town where the project was conducted, and research.

Professional Experience

- 2011 to date Elizabeth Glaser Pediatric AIDS Foundation
- Director: Global Implementation Research, Elizabeth Glaser Pediatric AIDS Foundation. Responsible for leading and providing technical and management oversight, and strategic thinking for the global implementation research activities of the Foundation.
- 2009 to date University of North Carolina at Chapel Hill
- Adjunct Associate Professor: University of North Carolina at Chapel Hill, Gillings School of Public Health, Department of Health Behavior and Health Education.
- 2007 to 2011 RTI International, Research Triangle Park, NC.
- Senior Research Epidemiologist-International Health. Serves as project investigator/project director for large, international epidemiological research and surveillance projects in the area of infectious diseases. Provides project leadership; monitors overall process and quality of studies and activities; leads grant development, cooperative agreements, and contract proposals; and mentors staff.
- 1988 to 2007 Department of Community Medicine, University of Zimbabwe, Harare, Zimbabwe.
- Professor (2006 to 2007). Provided academic leadership in teaching, research, and university service. Taught at both the undergraduate and the graduate level, including medical students in their first 4 years of training, pharmacy and nursing students, laboratory science students, occupational and physical therapy students, and Master of Public Health, Master of Medicine, and other master's degree students in the health sciences.
- Chair (2003 to 2006). Served in role of administrative leadership in the Department of Community Medicine; worked with funding agencies and other organizations and departments; and represented the department in the various university committees.
- Associate Professor (2000 to 2005). Provided academic leadership in teaching, research, and university service.
- Senior Lecturer (1997 to 1999). Provided leadership in teaching, research, and university service.
- Lecturer (1988 to 1996). Performed teaching, research, and university service duties.

- 1982 to 1988 Research and Development Unit, Harare City Health Department, Harare, Zimbabwe.
- Head. Oversaw the Research and Development Unit, including health services research projects, health service development activities, and staff.
- 1977 to 1982 Harare City Health Department, Harare, Zimbabwe.
- Community Worker/Medico-social Worker. Carried out a community needs assessment in a small urban community, developed community services focusing on the neediest citizens in collaboration with the community, and provided social services for hospitalized infectious disease patients.

Honors and Awards

BioMed Central (Open Access Journal) 4th Annual Research Awards; Medicine Prize: Health Research Policy and Systems, 2009, 7:31, for the article:
Woelk G, Daniels K, Cliff J, Lewin S, Sevene E, Fernandes B, Mariano A, Matinhure S, Oxman AD, Lavis JN, Stalsby Lundborg C. Translating research into policy: lessons learned from eclampsia treatment and malaria control in three southern African countries. (2009). *Health Research and Policy Systems*. Dec 30;7(1):3.1

RTI International Career Author Award, May 2008
 Rockefeller Dissertation Internship Award, 1993–1994
 Kellogg International Study Grant Fellowship, 1992–1993
 Clinical Epidemiology Fellowship (withdrew to attend the University of Washington), 1990
 Kellogg International Leadership Fellowship, 1990–1991
 British Council Fellowship, 1981

Professional Associations

Steering Committee Member, EQUINET (www.equinet africa.org), 1997 to 2008
 President, Social Science and Medicine Africa Network (SOMA-Net), 1997 to 2007
 Member, PRACTIHC (www.practihc.org), 2003 to 2005
 Vice President, Zimbabwe Public Health Association (ZPHA), 1996 to 1998
 Inaugural Vice Chairman, East, Central, and Southern African Public Health Association, 1995 to 1997
 Founding President, ZPHA, 1990 to 1991

Professional Service

Referee, *Biomed Central*, ad hoc
 Referee, *Health Policy and Planning*, ad hoc
 Referee, *Sexually Transmitted Diseases*, 2006 to 2007
 External Examiner, Master of Public Health Programme, Makerere University (Uganda), 1997, 2004–2007
 Board Chair of Intercountry People’s Aid, (IPA), a Zimbabwe NGO serving the social, health, and educational needs of people in informal settlements in Harare, 2005–2006
 Board member of the Southern African AIDS Information Dissemination Service, (SAFAIDS), a regional NGO, 2004–2007

Editorial Board, *AIDS and Behavior*, 2004 to 2006
Member, Medical Research Council of Zimbabwe, 2002 to 2004
Member, Master of Public Health Coordinating Committee, 1994 to 2002

Seminars and Courses Taught

Advanced Epidemiology (Analysis of Epidemiological Data), Makerere University (Uganda), March 1998
Research Methods, Introductory Epidemiology, Analysis of Epidemiological Data, University of Zimbabwe, 1995 to 2006

Computer Skills

SPSS/PC, EPIINFO, EGRET, SAS, Word, Excel, PowerPoint

Languages

English, some Shona

Country Experience

Zimbabwe, Tanzania, Botswana, Uganda, Kenya, Swaziland, Mozambique, South Africa, Zambia

Consultancies

Lead consultant for UNFPA/Government of Zimbabwe, development of the Strategy and Implementation Plan for Safe Medical Male Circumcision Scale up to Support Comprehensive HIV Prevention in Zimbabwe. April – June 2010.

Team Leader for consultancy: DFID Health Resource Centre/HLSP mid-term review of DFID-funded Addressing the Burden from AIDS (ABBA) Research Programme Consortium. June – August 2008.

Lead consultant for ACTIONAID on a regional (Lesotho, Swaziland, South Africa and Zimbabwe) study on the cost of home-based care for persons living with AIDS, focusing on opportunity and hidden costs. (May-July 2006).

Mid-term evaluation of the TANESA (Tanzania Essential Strategies against AIDS) Project, facilitating Local Governments' and Civil Society Organisations response to HIV/AIDS, Tanzania, February 2005.

UNICEF Consultant on the situation of Orphans and Vulnerable Children in Zimbabwe. April- November, 2000.

WHO Temporary Advisor (Consultant) for the Health Systems Research Consultation on HIV/AIDS for 13 countries in East and Southern Africa, 19-22 June, 2000, Pretoria, South Africa.

WHO Temporary Advisor (Consultant) for the revision of the manuals on Health Systems Research, November 1998 in Arusha Tanzania, and August, 2-7 1999, Harare.

WHO Temporary Advisor (Consultant) on the Development of a Multi-country Study on Exemption Mechanisms, July 12-16, 1999.

WHO Temporary Advisor (Consultant) for Training in Health Systems Research Proposal Development in Eritrea June 21-July 4, 1999.

Undertook a Country Assessment of Zimbabwe as part of the potential development of South-South activities, March 1998. For the Partners in Population and Development/Zimbabwe National Family Planning Council/United Nations Fund for Population Activities.

Prepared an issues paper on: *The Health Context of the AIDS Epidemic in Zimbabwe*, as part of the process to develop a national strategy for the prevention/care and control of HIV/AIDS in Zimbabwe, October, 1997. For the National AIDS Coordination Programme/UNAIDS.

Prepared a programme proposal on South-South activities for Zimbabwe in reproductive health and family planning, August 1997. For the Zimbabwe National Family Planning Council/United Nations Fund for Population Activities.

As part of a team, developed an HIV/AIDS policy for Zimbabwe, 1996-99. For the National AIDS Coordination Programme/Southern African AIDS Information Dissemination Service.

Consultant to the Southern African AIDS Information Dissemination Service (SAfAIDS). 1996-1999.

Developed a manual on community management for extension workers, November 1994. For the Institute of Water and Sanitation.

As part of a team, developed an evaluation methodology for District Integrated Rural Water Supply and Sanitation Projects in Zimbabwe August 1990 - January 1991. For the Institute of Water and Sanitation.

Carried out a study of the acceptance and acceptability of Intra-Uterine Contraceptive Device (IUCD) in Zimbabwe, for the Zimbabwe National Family Planning Council/Ministry of Health funded by the World Bank through the Family Health Project, September 1989 - September 1990.

Undertook a participatory process evaluation of the Supplementary Food Production Programme for the Zimbabwe Ministry of Health(Nutrition Unit)/Swedish International Development Agency, November 1988 - May 1989.

WHO Temporary Advisor (Consultant) Facilitator at a District Level workshop on Health Systems Research, in Francistown, Botswana, May 30 - June 12, 1988, and again September 13 - 30, 1989.

Facilitated at a Sub-Regional Applied Health Sciences Research Methodology Workshop held in Mbabane, Swaziland November 16 - December 6, 1986. International Development Research Centre (Canada)
