Appendix B: Ring of Knowledge

Ring of Knowledge

Area Name	Category	Problem	Solution	Outcomes	Lessons Learned
Southwest	NB Assessment	Pediatrician Buy-in Newborn assessment in M/B rooms	PSA- Find <u>champions</u> Do-Test-Report; Prenatal education for mothers; Policy-close NBN behavior modeled by PNPs (easy win)	Moms/Parents report on positive experience; Pediatricians with Knowledge RE: BF; Increase continuity of care; Increase BF duration	Helpful when things are consumer driven; Insecurity-change; Improves pt. care overall; Old dogs learn new tricks; find champions in all the right places.
NYC Health & Hospital Corporation	Return on Investment/cost effectiveness of BFHI	Financial restraint Breastfeeding is not viewed as a priority due to low financial outcome	Education of healthcare leaders/admin on best practices & centers of excellence	Competitive in recruiting patients to increase financial gain due to hospital's reputation on excellences.	Increase a communication & transparencies of hospital's activities e.g. center of excellence in best practices will promote increase support to breastfeeding.
Oregon	Building Capacity for change	Healthcare Leaders & Admin are not coordinating together; Funding: there is no funding, no understanding, interest or engagement with funders to support the work.	Reconvene-OEBIN to continue to build capacity to make change toward baby friendly increase BF initiation & duration; Convene funders to cultivate understanding, interest, engagement & support for the work.	Regional OEBIN groups & statewide articulation through BCO; Support for OEBIN, training, site visits, T/A, coordination, communication etc.; Reduced duplication of efforts. Higher quality implementation.	Sustained ongoing effort to continue momentum & moving forward toward positive change; Sustainability is SO important to insuring forward movement and momentum & positive intended outcomes. You need funding to cultivate <u>more</u> funding.
Pennsylvania-Philadelphia		Engaging healthcare leaders	Reach out individually; relationship building; Summit Nov. 2011; Health Commissioner sent out pre-in violation letters; Joint commission & CDC; BFUSA	All 6 hospitals engaged; Multi Hospital Task Force, meets quarterly; 5 of 6 on pathway; WIC grant; 3 align in 2014	Relationship building; Don't be afraid to take risks; think outside the box; collaboration is key.
Los Angeles	Technical Assistance	Hospitals need TA to achieve Baby-Friendly: a) confusion about BFUSA requirements; b) Staff training occurring before "Development" (planning); c) first 5 LA (tobacco tax) grants-provided \$ w/o TA & additional requirements beyond BFUSA	Use CPPW & CTG \$ to provide TA- <ul style="list-style-type: none"> Individualized to hospitals Site visits Cohort group TA based on 4-D Phase Use CTG & First 5 LA \$ for <u>ALL</u> hospitals to have Regional collaborative learning/network/sharing Mock surveys	<ul style="list-style-type: none"> 3 DHS county hospitals achieved Baby Friendly designation. Stronger partnership with Coalition & County Health Dept. 17 hospitals applied for TA – no \$ to hospital Hospitals participate in Regional Consortium & Summits (2008, 2010, 2012) We expect lots of Baby-Friendly designations!!! 	<ul style="list-style-type: none"> Individualized TA is essential. Hospitals are willing to share in Regional mtgs. Doctors are still a problem CNO & Directors of Mat Care turnover shows change. TA is most successful when the Director of Maternity Care is engaged.
Illinois (1 st in state (1998) BFHI)	Technical Assistance	Other Hospitals looked to us to provide assistance with becoming BFHI Leaders	Offered In-services & seminars to Hospital Staffs on The Ten Steps	Assisted 4 Hospitals. All became CERTIFIED as BFHI	It is achievable with the Desire & Early Buy In from ADMIN. 1 st in Illinois; 1 st in MO Pekin St. Mary's –Decatur (Little Company of many in Chicago

Ring of Knowledge

Area Name	Category	Problem	Solution	Outcomes	Lessons Learned
Lactation Improvement Network of Kentucky	Technical Assistance	Bottom of the Barrel Breastfeeding Rates; No 10 step program	<ul style="list-style-type: none"> • Convened BF Summit by WIC • Started State Coalition strategic • Developed state plan to increase BF Rates in KY • Goal #1, number of hospitals • Increase skin to skin • Collaborated w/U of L to develop statewide training on birth KC 	<ul style="list-style-type: none"> • 100% Hospitals trained • 90% ish implemented • Data collected • All hospitals who have implemented have seen significant increases in BF rates (Manchester 01 – 70% increase in 3 mos. • Facebook birth pics of moms in KC 	<ul style="list-style-type: none"> • Hospitals thought they were already doing it but they weren't doing in @ birth-received training to do it right. • Private & Public partnership necessary for success. • Hospitals did a good job of sharing • Hospitals asking for more follow-up training • Enjoyed getting together in non-competitive atmosphere. • Need to figure next steps • Do another step or do all 5 or 10 steps • Leave the baby alone.
North Carolina (SE)	Technical Assistance	<ul style="list-style-type: none"> • Technical Assistance • Incomplete application when no TA requested and MC does not participate in the informational webinars 	<ul style="list-style-type: none"> • Adjust application & webinar as needed • Post review call • Include review of all 10 steps • Connect with resources • (other hospitals in state experts, WIC Regional Lactation Training Centers) 	<ul style="list-style-type: none"> • More complete applications with extensive validation material • Connecting with WIC & training centers (outside resource) • Building informal collaborative network for hospitals. 	<ul style="list-style-type: none"> • Investment ends up saving time and effort • On-on-one generates more conversation, uncovers more information, and results in TA that is specific, measurable & achievable.
USBC	Infant Formula Marketing	<ul style="list-style-type: none"> • Inconsistent policies and perspectives on relationship of national organization & State BF coalitions to infant feeding industry. 	<ul style="list-style-type: none"> • Assessment of current policies & practices • Convene national stakeholder meeting & focus group • Facilitate discussion • Aim: balance • Sustainability for BF work • Holding industry accountable for compliance w/the code 	<ul style="list-style-type: none"> • A successful meeting of a difficult conversation • Safe space for differing perspectives • Identification of alignment & agreements on how to move forward together • Guidance document next steps 	<ul style="list-style-type: none"> • We could convene a difficult conversation • Practiced diplomacy • We can agree to disagree on some things & still find common ground • Can apply these skills to other areas & topics & other audiences.
Connecticut	Infant Formula Marketing	<ul style="list-style-type: none"> • Formula • Discharge bags still being given in CT 	<ul style="list-style-type: none"> • Adopted a “ban the bag in CT” as an overarching goal of the CT 10 Step Collaborative in order to promote an “all in” approach 	<ul style="list-style-type: none"> • Currently 70% Formula Bag Free in CT as self -reported by CT. 10 step collaborative members 	<ol style="list-style-type: none"> 1) It wasn't that <u>hard</u>. You <u>can</u> just tell the company to stop sending them....Really! 2) We were farther along than we expected when we started data. Many hospitals were already discontinuing the practice. 29 corporate compliance issues. 3) Bag free hospitals were able to help mentor others to Ban the Bag
