GRANTS AND FUNDING

ONGOING RESEARCH SUPPORT

UWSC9047 (Skinner) 05/17/16 – 04/30/20
 University of Washington (U01 sub)
Cardiovascular Health Study

The two main goals of this grant application are: 1) to transform CHS into a research resource for the cardiovascular health of older adults; and 2) to deploy innovative approaches to assure the productive use of this infrastructure.

Role: Principal Investigator

DCRI #6595 (Skinner) 12/11/15 – 12/31/17
 Pfizer
AFIB Kidney Disease

The main goals of this study are: 1) Describe the contemporary population of patients with both atrial fibrillation and chronic kidney disease in the United States with respect to demographics, comorbidities, and stroke and bleeding risk factors; 2) Describe stroke prophylaxis treatment patterns among patients with CKD and AF by estimated stroke risk, bleeding risk, and severity of CKD; 3) Evaluate rates of stroke and major bleeding among patients with CKD and AF overall and by CKD severity.

Role: Principal Investigator

1UC2-OD023375-01 (Smith) 09/21/16 – 08/31/23
 NIH
Core Elements and Scientific Focus Areas Coordination Component

The Duke Clinical Research Institute (DCRI) proposes to serve as the ECHO Coordinating Center (ECHO CC) to provide the organizational framework for the management, direction, and overall coordination of all common ECHO activities. To facilitate innovative, rigorous study protocols tailored to the scientific hypotheses; implement protocols across a network of pediatric cohorts; and provide study support to ensure high quality study operations and timely completion, the DCRI will establish the ECHO CC Core Elements and Scientific Focus Area Coordination Component (SFA Component).

Role: Co-Investigator

1U2C-OD023375-01 (Benjamin – Core 003) 09/21/16 – 08/31/23
 NIH
Echo Opportunities and Infrastructure Fund Component

The Duke Clinical Research Institute (DCRI) proposes to serve as the ECHO Coordinating Center (ECHO CC) to provide the organizational framework for the management, direction, and overall coordination of all common ECHO activities. In order to provide infrastructure and tools to support a solicitation, review and award process; support development of research protocols; provide study support to ensure high quality study operations and timely completion, the DCRI will establish the ECHO CC Opportunities and Infrastructure Fund Component (OIF Component).

Role: Co-investigator

PENDING RESEARCH SUPPORT

R21 (Skinner) 07/01/17 – 06/30/2019
 NIDA

Prevention of prescription drug abuse and misuse among older adults: Characterizing adverse medical outcomes and risky opioid prescription patterns to enable better evaluation of policies and practice

The long-term goal of our team is to develop an evidence base for prescribing recommendations and opioid policies that ensure safe opioid use and improve health outcomes for older adults.

Role: Principal Investigator

RFA-HL-17-016 (Bosworth) 09/01/17 – 08/31/22
NIH

Dissemination and Implementation Science in Cardiovascular Outcomes (DISCO)

Pass the Popcorn: Children's perceptions of 'obesogenic' culture in movies.

This project builds a trans-disciplinary research team to investigate basic processes behind movies' and other cultural factors' effects on attitudes and behaviors related to obesity. The team will develop a trans-disciplinary conceptual model, research methods, and measurement strategies to assess what children observe in children's movies about eating and activity behaviors, obesity, and stigma about weight status. As co-investigator, my primary role is to facilitate development of the trans-disciplinary team through group model building processes and to participate on the team as a health services researcher.

To Eat It or Not to Eat It, Why is the question: How do adolescents perceive "Healthy Food"?
Efforts to tackle the growing epidemic of obesity nearly always focus on the need for individuals to maintain a diet of "healthy" foods. The goal of this project is to examine the perceptions of adolescents about which foods they believe are "healthy" and "unhealthy," with a particular focus on foods for which marketing or common beliefs may not reflect the food's actual nutritional content. This will allow better messaging to adolescents when encouraging healthy diets.
