1. Education

"Success is to be measured not so much by the position one has reached in life as by the obstacles which have been overcome while trying to succeed." - Booker T. Washington

A. Degree Programs

- 1985 – 1992 **DrPH**
Johns Hopkins University
Specialization: Public Health Sociology, and
Health Issues of Children, Families and People of Color
- 1982 - 1983 **MSW** - Children and Families,
MPH - Behavioral Science
University of California, Berkeley
- 1976 - 1980 **BA** - Behavioral Psychology
California State University at Northridge
- 1974 - 1976 **AA** - Liberal Arts
Santa Monica City College

B. Post Degree Training and Certification

- 2016 **GSU Centers for Teaching and technology**
Teaching and Developing Online Courses
- 2015 **ASPPH – Council on Linkages**
Revised Core competencies for Public Health Professionals
- 2015 **Quality Matters**
Certified On-Site Assessor

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

- 2012 **Certified Site Visitor**
Council on Education for Public Health (CEPH)
Silver Spring, MD
- 2004 **Certified Evaluation/Performance Review Consultant**
Office of Program Review, Health Services and Resources Administration (HRSA)
U.S. Department of Health and Human Services
- 1997- present **Collaborative Institutional Training Initiative (CITI Program)** – Biomedical/Human
Subjects Research Certification
- 1995-1995 **Faculty Leadership Fellow**
University of Oklahoma Health Sciences Center
University of Oklahoma at Oklahoma City
- 1992 - 1992 **Post Doctorate Fellow**
University of North Carolina at Chapel Hill
Psychosocial Research Division, School of Social Work
- 1983 **Certified Hemoglobinopathy Counselor/Educator**
Children’s Hospital of Northern California
State of California, Department of Health, Division of Maternal and Child Health

2. Academic and Other Professional Leadership and Experience

A. Academic Leadership, Experience and Appointments:

A1. Current Academic Leadership, Experience and Appointments:

- 2013- present **Professor and (Dual) Chair**
Department of Community Health Behavior and Education (2013 – present)
Department of Health Policy and Management (2016-2017)
Department of Environmental Health Sciences (2014-2016)
Karl E. Peace Distinguished Chair of Public Health
Jiann-Ping HSU College of Public Health
Georgia Southern University
- 2013- present **Member, Graduate Faculty (Full)**
Graduate School
Georgia Southern University

A2. Other Current Academic Experience and Appointments:

- 2006 – present **Adjunct Professor of Maternal and Child Health**
Maternal and Child Health
School of Public Health
Univ. of North Carolina, Chapel Hill

A3. Past Academic Experience, Leadership and Appointments:

- 2017 **Visiting Professor for Public Health and Education (Invited)**
Faculty of Medicine
University of Kelaniya Teaching Programme
Ragama, Sri Lanka
- 2011 **Visiting Lecturer (Invited)**
Faculty of Medicine
Universidad Peruana Cayetano Heredia

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

- Lima, Peru
- 2010 – 2013 **Director**, UNCG Center for Social, Community and Health Research and Evaluation
Research and Economic Development
University of North Carolina at Greensboro
- 2006 – 2013 (Full) **Professor of Public Health Research and Practice** (Tenured-Primary)
Department of Public Health Education
School of Health and Human Performance
University of North Carolina at Greensboro
- 2006 – 2013 **Member, Graduate Faculty (Full)**
Graduate School
University of North Carolina at Greensboro
- 2007 – 2008 **Director of Graduate Studies and Academic Programs Manager**
Department of Public Health Education
School of Health and Human Performance
University of North Carolina at Greensboro
- 2007 **Professor in Residence (Invited)**
Guys and St. Thomas Hospital
Kings College London
London, UK
- 2006 – 2012 **Adjunct Professor of Public Health Practice**
Division of Maternal and Child Health
School of Public Health
University of Alabama at Birmingham
- 2006 **Visiting Lecturer (Invited)**
Faculty of Medicine
Makeree University
Kampala, Uganda
- 2005 **Visiting Lecturer (Invited)**
Faculty of Medicine
National Pirogou Memorial University
Vinnytsa, Ukraine
- 1999 – 2006 **Associate Professor of Public Health Practice** (Tenured-Primary)
Department of Maternal and Child Health
School of Public Health
University of Alabama at Birmingham
- 1997- 2006 **Assistant Professor** (Secondary)
Department of Pediatrics, Division of Hematology/Oncology
School of Medicine
University of Alabama at Birmingham
- 1999- 2006 **Associate Professor** (Secondary)
School of Social Work
University of Alabama at Tuscaloosa
- 1997- 2006 **Scholar**
Lister Hill Center for Health Policy
University of Alabama at Birmingham

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

1996-1999 **Assistant Professor** (Tenure Track)
Department of Maternal and Child Health
School of Public Health
University of Alabama at Birmingham

1992-1996 **Assistant Professor (Tenure Track)**
Maternal and Child Health
School of Public Health
U of North Carolina, Chapel Hill

A4. Other Past Academic Experience, Leadership and Appointments:

20017 – 2011 **Director and PI, Principal Evaluator**
Sickle Cell Treatment and Demonstration Program (SCDTDP) – National Coordinating Center (NCC-RTI)
US DHHS/HRSA – Maternal and Child Health Bureau

2002 – 2011 **Director and PI**
National Coordinating and Evaluation Center (NCEC); Sickle Cell Community Programs
US DHHS/HRSA – Maternal and Child Health Bureau

2004 – 2006 **ASPH Public Health Practice Co-Coordinator**
School of Public Health
University of Alabama at Birmingham

2004 – 2006 **Associate Director for Research and Evaluation**
Center for Health Promotion
University of Alabama at Birmingham

2001-2004 **Affirmative Action Officer/ Chair, Diversity and Affirmative Action Advisory Committee**
School of Public Health
University of Alabama at Birmingham

1999 – 2000 **Chair, Masters Degree/Dept. Curriculum Program**
Department of Maternal and Child Health
School of Public Health
University of Alabama at Birmingham

1997- 2006 **Co-Director, Public Health Social Work Program**
Department of Maternal and Child Health/School of Social Work
University of Alabama at Tuscaloosa and University of Alabama at Birmingham

1997- 2006 **Director, Division of Social, Health Services and Community-based Research**
UAB Comprehensive Sickle Cell Center
School of Medicine
University of Alabama at Birmingham

1995-1996 **Associate Director, Division of Policy and Ethics**
Duke/UNC Comprehensive Sickle Cell Program
Duke University Medical Center

1994-1996 **Faculty - Community Based Public Health Initiative**
Center for Public Health Practice
School of Public Health
University of North Carolina, Chapel Hill

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

- 1993 – 1994 **Exchange Faculty**, North Carolina Department of Environment, Health, and Natural Resources
– Division of Maternal and Child Health, funded by a grant from the Health Research Services
Administration of NIH..
- 1993-1996 **Faculty Associate/Scientist**
Center for Public Health Practice
School of Public Health
University of North Carolina, Chapel Hill
- 1992-1996 **Co-Director**, Public Health
Social Work Program
Maternal and Child Health/ School of Social Work
University of North Carolina, Chapel Hill
- 1987-1988 **Guest Lecturer** - Children's Hospital Medical Center of Northern California Pediatric
Rehabilitation Staff Training Program Social Work and Adjunct Medical Staff Core Lectures
- 1987-1991 **Guest Lecturer** - Socio-cultural Aspects of Single-Gene Counseling and Barriers to Care. State
of California Hemoglobinopathy Educators and Counselor Training Course Northern California
Program Lecture series.
- 1987 **Course Administrator and Head Teaching Assistant**
"Social and Behavioral Aspects of Public Health" Johns Hopkins University School of Hygiene
and Public Health, Department of Behavioral Sciences and Health Education Spring, Summer
and Fall 1987.
- 1987 **Lab Instructor** - "Introduction to Computing" Johns Hopkins University School of Hygiene and
Public Health, Department of Biostatistics, Summer 1987.
- 1986 **Teaching Assistant** - "Social and Behavioral Aspects of Public Health"
Johns Hopkins University School of Hygiene and Public Health Department of Behavioral
Sciences and Health Education. Summer and Fall 1986.

A5. Academic Honors and Awards

- 1980-1982 Graduate Minority Fellow
University of California, Berkeley
- 1981-1982 William Hinkley Scholarship
University of California, Berkeley
- 1981-1982 Dean Liaison for the Graduate School of Social Welfare Student Body
University of California, Berkeley
- 1981-1982 Chairperson Graduate School of Social Welfare Black Caucus
University of California, Berkeley
- 1981-1982 Chairperson Graduate School of Social Welfare Third World Caucus
University of California, Berkeley
- 1986-1988 Fellow, Biomedical Research and Study Fellowship
Johns Hopkins University, School of Hygiene and Public Health
- 1986-1987 Co-Chair, Third World Student Association
Johns Hopkins University, School of Hygiene and Public Health
- 1985-1987 Student Representative Minority Concerns Committee
Johns Hopkins University, School of Hygiene and Public Health
- 1992-1992 NIMH Award for Support of Participation in a Short Course on Mental Health Services Research,
African American Research Center
University of Michigan, Ann Arbor Michigan July 1-3, 1992
- 2000 Award in recognition of outstanding contributions to developing 'The Public Health Professional of
the Future', University of Alabama Birmingham, School of Public Health.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

- 2006 Faculty Award for Outstanding Public Health Service
University of Alabama Birmingham, School of Public Health.
- 2009 Phillips Memorial Lecture Teaching Award
Meharry Medical College, Hemoglobiopathy Program.
- 2017 Insley-Evans Public Health Social Worker of the Year
American Public Health Association

B. Professional Experience:

B1. Professional Practice (Prior to Academia)

- 1988-1991 Children's Hospital Medical Center
1983-1985 747 52nd Street
Oakland, California 94609
Pediatric Sickle Cell Social Worker:
Coordination of supportive inpatient, outpatient and community-based clinical social services for children from birth to age 18 suffering from sickle cell disease, Thalassemia and related illnesses, provide Psychosocial counseling to children and their families, provide consultation to physicians and hospital personnel on psychosocial problems of the patient and work with educational and other community resources as an advocate for the child. Provide field-work supervision for social welfare and public health graduate students. Co-facilitate Sickle Cell Parent Support Group. Develop and Participate in Core Research.
- 1987-1988 Children's Hospital Medical Center
747 52nd Street
Oakland, California 94609
Pediatric Rehabilitation Social Worker:
Coordination of supportive inpatient and outpatient clinical social services for children from birth to age 18 who have suffered from trauma requiring long term rehabilitation, provide psychosocial counseling to children and their families, provide consultation to physicians, hospital personnel, other rehabilitation facilities, legal agencies and insurance companies on psychosocial problems of the patient and work with educational and community resources as an advocate for the child.
- 1983-1985 Children's Hospital Medical Center
747 52nd Street
Oakland, California 94609
Clinical Social Worker - Trauma
Provide crisis counseling assessment and resource referral to children, and families of children who have been physically and sexually abused, provide consultation to physicians and hospital personnel in patient crisis situations.
- 1982-1983 Bonita House, Inc.
1410 Bonita Street
Berkeley, California 94706
Clinical Counselor:
Provide short and long term counseling in a "half-way house" setting to adult with histories of chronic psychiatric illnesses. Coordinate and supervise the vocational rehabilitation program of the facility.
- 1981-1982 Highland General Hospital

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

1411 East 31st Street
Oakland, California 94602

Medical Social Work Intern:

Discharge planning with acute and chronic patients in a high-risk setting, provide psychosocial counseling to patients and their families provide consultation to physicians and hospital personnel on psychosocial problems of the patient, contact community resources as an advocate of the patient, assist patients in completing applications for resources, aid to victims of violent crime, SSI, etc., conduct in-service and orientation training to new hospital personnel, also on call two days a week in the Emergency Room, providing crisis intervention services.

1980-1981
Whittier Elementary School
6328 East 17th Street
Oakland, California 94606

School Psychologist/Social Worker Intern:

Providing individual, family and group therapy for elementary school-aged youth (8-11 years.) in an indigent high-risk population, keeping detailed records of these sessions, working with the school's personnel on an advisory basis, conducting a "therapeutic classroom" for children with a combination of learning and psychosocial problems, writing a proposal to secure funds for a community-oriented cross-age tutorial program.

1980-1980
Rancho San Antonio
21000 Plummer Street
Chatsworth, California 91311

Relief Counselor for Juvenile Delinquents:

Implementing the daily program of the agency, doing "on the spot" trouble-shooting and counseling with boys 13-18 years of age in a "milieu" treatment environment, conducting twice weekly therapy groups of ten boys, conducting weekend outings, keeping daily case records for each boy, attending all agency meetings.

1978-1980
1981-1981
Hathaway Home for Children
8955 Gold Creek Road
Pacioma, California 91331

Assistant Supervisor for Child Care Workers

Supervising and coordinating the duties of the living units child care staff, insuring the needs of the children in the living unit were being met, "trouble-shooting" in potentially volatile situations and assisting the child care staff in coping with them, keeping daily records of each of the boys, (ages 11 to 15) activities and behavior, working with the Cottage therapist around the psychosocial aspects of the child's treatment, attending all living unit meetings.

1977-1978
San Fernando Valley Boys Club
13421 Van Nuys Boulevard
Pacioma, California 91331

Counselor of Police-Referred Delinquents:

Conducting individual and family counseling with male and female youths (ages 13 to 17) from a high-risk community with substance abuse and gang related difficulties, co-leading teen rap groups, attending all staff meetings, in-service training and case conferences.

1974-1978
Venice Community Church
522 Venice Boulevard
Venice, California 91291

Outreach Counselor for Community Youth:

Assisted with coordinating the agency's three programs for the youths (6 to 15) in a high-risk poor community, with other volunteers, doing a bi-annual needs and impact assessment of the

program. Worked in recruiting community volunteers and resource agencies to aid in the needs of the program.

B2. Expertise And Areas Of Interest

- Public Health/Multi-Disciplinary Practice
- Public Health/Academic leadership
- Community-based and Community-Oriented program evaluation and research
- Culturally Competent Research and Evaluation
- Multi-site/Multi-Method Evaluation
- Social and Economic Determinants of Wellness and Health Inequities
- Health practice, research, program evaluation, and policy issues of persons with chronic conditions (and their families), special emphasis on women, teens and children, provider agencies and communities
- Issues of access to, and utilization of, health care for the poor, people of color and persons living in rural areas.
- Development, design and conduct of population health data tools and surveys
- Social and Community Aspects of HIV/AIDS Research (Domestic/International).
- Public Health Genetics
- Public Health Social Work
- Prevention and Implementation Research and Evaluation
- Building, Assessing and Utilizing Practice-based evidence
- International and Domestic Professional/Provider Education and Training – **Special Areas:** Quantitative/Qualitative Research methods and Techniques, Participatory and Community-based Research and Evaluation, Research and Service Grant Writing and Implementation and Data development, Analysis and Utilization, Ethical Issues, Health Program Planning and Evaluation, and Policy Development

B3. Public Health Practice Expert Advisories and Panels Based on Recognized Scholarship and Expertise

The body of work to follow is based on the utilization of my acquired knowledge, skills and competencies and my commitment to the promotion of and engagement in Academic Public Health Practice. The overarching approach that defines this and other work to follow is based on the adoption of the definition of Academic Public Health Practice of the Association of Schools of Public Health (ASPH) that seeks to bring together the two worlds of the pragmatic needs of the practitioner and the academic quest to advance knowledge and understanding. Thus, Academic Public Health Practice is “the strategic, organized and interdisciplinary application of knowledge, skills and competencies necessary to perform essential public health services and other activities to improve the population’s health.” (*Demonstrating Excellence in Academic Public Health Practice, ASPH 1999- I am a co-author*)

Title/Agency/Program: Division of Healthy Start and Perinatal Services (DHSPS)

Consulting/Technical Assistance Period: 09/09 & 16/2015

Funding Agency: JSI via DHSPS funding

Role: Evaluation Consultation and Technical Assistance

Description of Activities: Provide evaluation consultation and training to the local Healthy Start teams in the Mid-West and Southern United States in the areas of community-based outreach, strategic planning, assessment procedures and overall data analysis and dissemination. **Special expertise provided** in the areas of community-based evaluation methods (quantitative and qualitative methods), community outreach and development, lay and professional education and training, grant development, report development and information dissemination.

Name: Union General Hospital (UGH) Community Health Needs Assessment Project (Union County Georgia)

Role/Area of Expertise: Senior Evaluation Consultant/Co-PI: Content expertise in development and implementation of community-based assessment, mixed methods program development and evaluation.

Dates: 7/2014 – 12/2014

Summary of work: As Co-PI work closely with UGH and its designees in the conduct of primary (surveys, focus groups) and secondary (reports, online data) data collection, data analyses and report development/ completion, as well as ongoing project phone, interim and final report meetings. Resources for this project was utilized to complete a community-driven assessment for the purposes of identifying and prioritizing needs and assets, as well as facilitation of community discussions regarding these priorities and resources, as well as effective and efficient means of addressing relevant issues.

Name: Community Focused Eliminating Health Disparities Initiative (CFEHDI) (North Carolina Department of Health and Human Services, Division of Public Health, Office of Minority Health and Health Disparities (OMHHD))

Role/Area of Expertise: Senior Consultant; Content expertise on Social and economic determinants of health and health disparities at the state and local community level, community-based/participatory evaluation, multi-level, multi-site grant development and oversight, cultural competence, practice-based evidence in service to person with Heart Disease, Stroke, Diabetes, Obesity, Asthma, HIV/AIDS/STDs and Cancer.

Dates: 9/2011 – 07/2012

Summary of work: In the areas above, provide expert advice and work to the NC OMHHD and its partners in faith-based and community-based organizations, hospitals, Community Care North Carolina (CCNC) and Health Net networks, and local health departments (LHD) in the conduct of their collaboratively work to ensure implementation of an evidence based medical home model to close the gap in the health status of African Americans, Hispanics/Latinos, and American Indians in seven chronic disease focus areas - Heart Disease, Stroke, Diabetes, Obesity, Asthma, HIV/AIDS/STDs and Cancer. The CFEHDI is an implementation of a new comprehensive public health approach to reducing and eliminating health disparities that addresses access to care, chronic disease prevention and management, healthy lifestyles and cultural sensitivity among health care providers. In addition to disease management education, its partnering grantees address another barrier to accessing quality health care for minority populations is cultural competence among health care providers through additional training provided to staff from local health departments, CCNC networks and hospitals on cultural competence utilizing a curriculum developed by the NC DHHS/OMHHD.

Name: Program for Transition of Child to Adult Sickle Cell Care (Virginia Commonwealth University [VCU])

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Role/Area of Expertise: Senior Consultant; Children with Genetic and other Disorders and their families; Diverse populations research; Health services research; Program development, Program evaluation involving qualitative and quantitative measurement; Psychometric tool development, measurement and analyses; Strategic Planning and problem-solving.

Dates: 5/2011 – 02/2012

Summary of Work: Provide expert advice and work with VCU to design, pilot test and implement a measurement tool and system that will allow for an understanding of the transition process of child and adolescents with hemoglobinopathies from pediatric to adult care. The primary purpose of the transition program is to improve overall health, quality of life, adjustment, attainment of medical transition, independent living skills and plans for adulthood among adolescents with sickle cell disease. The Research purpose is to analyze and interpret scores of sickle cell disease knowledge and skills (tier 1 and Tier 2 questionnaires) and transition readiness such as transition knowledge, skills, attitudes, and confidence (TIP assessment), using patient-reported evaluation data (completed Tier 1, Tier 2, and TIP assessments) submitted to the Virginia Department of Health by four state-funded Pediatric Centers of Excellence, as well as willing adult sickle cell programs, as they provide resources to transition children from pediatric to adult Sickle Cell care in Virginia. The project is designed to test five core hypotheses linked to the study.

Name: Registry and Surveillance System for Hemoglobinopathies (**RUSH**) Steering Committee (NIH-NHLBI/CDC)

Role/Area of Expertise: Member/Public Health and population-based studies consultant, applied genetics/hemoglobinopathies, Ethical/social/cultural competency, Diverse populations research, health services research, Social and Economic Determinants of Wellness and Health Disparities

Dates: 12/2008 – 08/31/2014

Summary of Work: This was a peer reviewed appointment by the RUSH federal leadership team. Provide advice and work with the RUSH Steering Committee to provide **Public Health Genetics, Health Services research**, applied research aspects of working with persons with inherited blood disorders and large scale data base development and implementation expertise. The purpose of the RUSH effort is to work with states, local entities and international partners to develop, implement and maintain: 1) a surveillance system; and 2) bio-data registry for persons with sickle cell and thalassemic disorders.

Name: Genetic Alliance - Screening for Heritable Disorders in Children: Efficacy from a Family/Consumer Perspective (HRSA/MCHB project)

Role/Area of Expertise: Senior Consultant; Children with Genetic and other Disorders and their families; Diverse populations research; Health services research; Community engagement, Program development, Program evaluation involving qualitative and quantitative measurement, Report development and Information problem-solving

Dates: 6/2008 – 09/2012

Summary of work: Provide expert advice and work with the Genetic Alliance (a HRSA/MCHB funded National Advocacy Organization) to: a) Design, pilot test and implement a measurement tool and system that will allow for an understanding of the impact of false positive diagnosis and of identification of carrier status on individuals, families and the system; b) Intermittently problem solve challenges that arise during the course of the project. This work involves: 1) reviewing drafts of survey instrument, and 2) helping to plan and participate in a meeting focused on questions of carrier identification; b) Help with finding people to interview using the study instrument. This would involve taking study instruments through the consultant's IRB, and identifying collaborators to arrange for the recruitment of participants to complete the survey; c) Make recommendations about modifications to the current data system that will help to minimize harms and maximize its value and participate in the analysis of project data.

Name: North Carolina Council on Sickle Cell Syndrome (NCCSCS)

Role/Area of Expertise: Member/Public Health Consultant, Public Health Practice; research and evaluation on sickle cell disease, newborn screening, adolescent and adult care, and community-based agencies programs and institutions within the state, Social and Economic Determinants of Wellness and Health Disparities

Dates: 11/2007 - 2013

Summary of work: This was a peer reviewed appointment by the NC Governor and NCCSCS leadership. As the **Public Health Practice Expert, Health Services research Expert** and a **Clinical Practice Expert** based on **selection by the NCCSCS and State Sickle Cell Disease Program leadership and staff**, provide expert advice and work with the NCCSCS to: a) Provide input on issues related to health

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

services and research issues affecting the state's SCD population; b) Conduct a critical review of any policy and health services documents the NCCSCS develops; c) Participate in joint evaluation and research efforts; and d) When possible jointly publish peer-reviewed articles and related materials.

Name: National Center for Cultural Competence (NCCC) (HRSA/MCHB - Tawara Goode, MPH, Director)

Role/Area of Expertise: Senior Advisor/Consultant, Public Health Practice; research and evaluation on the measurement and application of diversity and culturally and linguistic competence in agencies programs and institutions at the local state and national levels, Social and Economic Determinants of Wellness and Health Disparities

Dates: 11/2004 – 08/31/2014

Summary of work: As an **Measure and Evaluation of Diversity, Health Disparities and Cultural Competence Expert**, based on **selection by the HRSA/MCHB, NCCC leadership and staff**, provide expert advice and work with the NCCC to: a) Conduct critical reviews of national data sets for issues related to cultural and linguistic competence and diverse populations; b) Conduct a critical review of any product the NCCC develops; c) Participate in joint presentations at conferences; d) Provide TA via conference calls or onsite for Title V CSHCN programs; e) Mentor students, faculty and consumers; and f) When possible jointly publish peer-reviewed articles and related materials.

Name: Secretary's Advisory Committee on Genetics, Health, and Society (SACGHS-NIH/DHHS)

Role/Area of Expertise: Member, Applied genetics and genomics - social, ethical and practice issues and methods, Social and Economic Determinants of Wellness and Health Disparities

Dates: 8/2004 – 9/2010

Summary of work: **This was a peer reviewed appointment.** As the **Public Health Practice Expert** to provide expert advice and make recommendations to the committee and the Secretary of DHHS in the exploring and addressing requests from DHHS and other government and private agencies on non-medical applications of the advances in human genetics in areas such as education, employment, discrimination, the use and misuse of genetic information, the societal implications of new medical applications, gaps in new research and data collection, and policy effecting insurance, health, disability and long-term care practices. Part of the SACGHS-NIH/DHHS work includes service on the: 1) Large Population Study Committee; 2) Education Task Force and **Chair** of Public Health Providers Workgroup; 3) Priority Setting Workgroup – **Chair** Cluster on Public Health Applications of Genomics Research; 4) Workgroup on Gene Patents and Licensing Practices and Their Impact on Patient Access to Genetic Tests; and 5) Evaluation Task Force

Name: Advisory Committee on Heritable Disorders and Genetic Diseases in Newborns and Children (ACHDGDNC - MCHB/HRSA/DHHS)

Role/Area of Expertise: Member, Applied genetics and genomics - social, ethical and practice issues and methods, cultural and linguistic competency, newborn screening for genetic disorders

Dates: 8/2004 – 3/2009

Summary of work: **This was a peer reviewed appointment.** As the **Public Health Practice Expert** to provide expert advice, provide guidance and make recommendations to the committee and the Secretary of DHHS in the exploring and addressing requests from DHHS and other government and private agencies on the most effective means to screen for heritable disorders. Part of ACHDGDNC - MCHB/HRSA/DHH work includes service on the: 1) Represent the Secretary's Advisory Committee on Genetics, Health, and Society as a liaison; and 2) ACHDGDNC – Long-term Follow-up and Treatment Subcommittee.

Name: Institute for Child Health Policy, Division of Policy and Programs U of Florida (John Reiss, PhD., Director)

Role/Area of Expertise: Public Health Practice Advisor; research and Evaluation on Adolescents with Special Health care needs

Dates: 6/2001 – 6/2006

Summary of work: As an **Children and Adolescent with Special Health (CSHCN) Care Needs Expert**, based on selection by the division director, work with ad hoc advisory committees to review planned projects on prevention, transition to adult care and related issues of adolescents with special health care needs; assist as-needed with development of methodology sections of planned research and evaluation efforts; participate in professional training.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Name: National Technical Advisory Panel for the Healthy Start Evaluation, HRSA-MCHB,

Role/Area of Expertise: Member, Evaluation, Practitioner and Measurement Expert

Dates: 8/2000-05/31/2013

Summary of work: This was a peer reviewed appointment As the **Community-based Evaluation Expert** to serve on a panel of policy, program and evaluation experts to advise the Federal Healthy Start Evaluation effort. Major role on the project includes review of the proposed and final national evaluation design and provide ongoing advice on strategy, implementation and measurement issues for the community-based implementation of the evaluation.

Name: Sickle Cell Disease Advisory Committee, Division of Blood Disease and Resources, National Heart, Lung and Blood Institute, NIH

Role/Area of Expertise: Member, Clinical Care; Social and Community-based Research; Public Health practice

Dates: 4/2000 to 5/2008

Summary of work: This was a peer reviewed appointment. As the **Public Health Practice Expert** and a **Clinical Practice Expert** to serve on a panel of basic and clinical research, policy and federal agency experts to provide expert advice and make recommendations to the National Heart, Lung and Blood Institute's Sickle Cell Branch on a broad range of scientific and policy issues in such areas as basic science and clinical trials research, federal legislation, consumer and other stakeholder issues and new and continuing programs like the 10 Centers of Excellence and proposals for new research and clinical networks.

Name: National Advisory Committee on Cultural Competency Curricular Modules, DHHS, Office of Minority Health,

Role/Area of Expertise: Evaluation and Measurement Expert; Diversity and Health Care Access Research

Dates: 2/2000-9/2004

Summary of work: This was a peer reviewed appointment. As an **Expert in Health Disparities and Cultural Competence Research and Practice**, served on a panel of experts to provide guidance throughout the project. Based on the three main areas of the CLAS Standards experts in the field were asked to work with the American Institutes for Research (Carlos Rodriguez, PI) to provide input and feedback on Culturally Competent Care, Language Access Services, and Organizational Supports modules for use by Primary Care and Family Medicine Practitioners. The advisor process involves intermittent manuscript (hard copies and electronic) and module review, face-to-face meetings, leadership in a series of Consensus-Building Meetings and the development of the content of the *Cultural Competency Curriculum Modules* for physicians.

Name: Minority Health Advisory Council, Alabama Department of Public Health, State of Alabama

Role/Area of Expertise: Evaluation Advisor, Professional Development and Teaching; Epidemiological Data systems linked to the community; Program Evaluation; Social and Economic Determinants of Wellness and Health Disparities

Dates: 11/99 – 8/2006

Summary of work: As the **Community-based Evaluation Expert** Selected to serve on committee which is advisory to the Minority Health Director; led the effort to develop the RFA (Innovative Models/Programs Address Health Disparities of Racial and Ethnic Minority Populations in Alabama) for data system creation within community-based programs; Researched and provided guidance on assessment issues specific to health disparities in Alabama; serve as the Research Scientist on the Committee

Name: Community Development Committee, Alabama Southern Rural Access Program - Robert Wood Johnson Funded Program of the Partnership between West Alabama Health and the Alabama Department of Public Health

Role/Area of Expertise: Evaluation Advisor, Community-based Practice; Community-based Evaluation Methodology

Dates: 8/98 – 8/2004

Summary of work: Selected by the executive Committee of the Alabama Southern Rural Access Program as a **Community-based Evaluation Expert** to provide as-needed expertise and advice to the overall program and their grantees on program development, Professional training and evaluation of their efforts.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Name: Alabama State Children's Rehabilitation Services (CRS)- Program Evaluation Consultation and Technical Assistance for the projects: a) Alabama Interactive Community-Based model for Children with Traumatic Brain Injury (TBI); and b) Adolescent with Special health Care Needs Transition Services project

Role/Area of Expertise: Evaluation, Content and Practice Expert

Dates: 4/98-8/2006

Summary of Work: As a **Children and Adolescent with Special Health (CSHCN) Care Needs Expert** and previous work with the development of the Healthy People 2010 CSHCN policy and guidelines, particularly transition to adult care, provided guidance on development of goals and objectives specific to Alabama.

Name: Medical and Research Advisory Committee (MARAC), Sickle Cell Disease Association of America (SCDAA)

Role/Area of Expertise: Senior Practice Advisor, Program and Policy Development, Social Research, Clinical Care

Dates: 8/93 – 9/2012

Summary of work: This was a peer reviewed appointment. As the **Public Health Practice Expert** and a **Clinical Practice Expert** to work with a panel of medical experts to develop materials and advise SCDAA on matter of research and public education. The MARAC was designed to served as the science and research advisory committee to the SCDAA which is the national organization for over 70 community-based programs serving persons with sickle cell disease.

Name: Committee on Educating Public Health Professionals for the 21st Century (**Institute of Medicine/ National Research Council**)

Role/Area of Expertise: Content and Practice Expert, Public Health Leadership, Community-based Public Health Practice and Research/Evaluation

Dates: 8/2002-11/2002

Summary of work: This was a peer reviewed appointment. As a **Public Health Practice Expert** was asked to serve on a panel of expert external reviewer, in the review of the Institute's draft report by the Committee on Educating Public Health Professionals for the 21st Century. This study is a companion study to the Committee on Assuring the Health of the Public in the 21st Century. The objective of the study is to assess the past and current state of education and training (theory) for public health professionals and contrast it to future practice needs envisioned by the Committee on Assuring the Health of the Public in the 21st Century. The committee's findings will be used to develop a framework for how, over the next five to ten years, education, training, and research in schools of public health can be strengthened to meet the needs of future public health professionals to improve population-level health.

Name: Race, Ethnicity and Health: A Reader, Johns Hopkins University Press, Thomas A. Laviest, PhD. (editor), Development and editorial committee

Role/Area of Expertise: Content Expert, Multi-Cultural Health Care Research and Practice; Graduate-level Teaching

Dates: 2/2001 – 5/2002

Summary of work: As an **Expert in Health Disparities and Cultural Competence Research and Practice**, by selection of the editor (after a review of the qualifications), served as an editor and provided review of the proposed literature in regards to its level of scholarship, timeliness, quality, relevancy and applicability to graduate-level education.

Name: Technical Expert Panel, Project on Measuring Cultural Competence in Health Care Delivery Settings, Office of Minority Health, HRSA

Role/Area of Expertise: Evaluation and Measurement Expert; Diversity and Health Care Research

Dates: 2/2001 – 9/2002

Summary of work: This was a peer reviewed appointment As an **Expert in Health Disparities and Cultural Competence Research and Practice** was asked to serve on a panel of experts to provide guidance and input into a set of methodologies to identify, define and measure indicators of culturally competent service delivery and systems of care.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Name: Maternal and Child Health Bureau, Division of Services for Children with Special Needs - Healthy People 2010 Transition Workgroup

Role/Area of Expertise: Content and Public Health Practice Expert, Research and Evaluation on Adolescents with Special Health care needs

Dates: 9/99 – 12/2000

Summary of work: This was a peer reviewed appointment. As a **recognized Adolescent with Special Health (ASHCN) Care Needs Expert** participated in the research and development of the guidelines for the Healthy People 2010 CSHCN goals and objectives with a specific focus on goals 6 – Transition to adult care. The outcome of this work is part of larger document published (hard copy and online) by the MCHB/HRSA/DHHS Healthy People 2010 Guidelines and policy.

Name: Public Health Social Work Standards Committee, Association of State and Territorial Public Social Workers.

Role/Area of Expertise: Content Expert, Public Health Social Work Academics and Practice

Dates: 8/99 – 9/2001

Summary of work: As a **Public Health Social Work Academic and Practice Expert** and as part of the Association of State and Territorial Public health Social Workers (ASTPHSW) and based on previous work in North Carolina, assisted with the facilitation participatory process of researching, writing, getting feedback and finalizing Public Health Social Work Standards for the United States.

Name: Bureau of Primary Care, Health Resources and Services Administration (HRSA) - Healthy Schools, Health Communities (HSHC) Project Evaluation – Panel on Logistics and Strategy

Role/Area of Expertise: Evaluation and Practice Expert, Adolescent Program Development and Evaluation

Dates: 10/96 - 1/98

Summary of work: This was a peer reviewed appointment. As a **Community-based Evaluation Expert** and **Academic Public Health Practice Expert** task was to review current goals, objectives and progress of the Healthy Schools, Health Communities (HSHC) Project Evaluation. Advise and make recommendation to HRSA and the project staff on strategies and methodology for improved data gathering, school negotiation, data collection and assessment.

Name: Planning and Development/Standards and Practice State of North Carolina, Department of Health and Natural Resources, Committee on the Future of Public Health Social Work

Role/Area of Expertise: Content Expert, Public Health Social Work Practice

Dates: 10/92 - 10/93

Summary of work: As the **Public Health Social Work Academic and Practice Expert**, function as part of the State of North Carolina, Department of Environment, Health, and Natural Resources, Co-Led the participatory process of researching, writing, getting feedback and finalizing Public Health Social Work Standards for North Carolina.

Name: Behavioral and Social Science Research/Writing Committee, Cooperative Study of Sickle Cell Disease, National Sickle Cell Disease Program, Division of Blood Diseases and Resources, National Heart, Lung and Blood Institute, National Institutes of Health

Role/Area of Expertise: Content Expert, Adolescent with Chronic Condition; Clinical Practice within sickle cell disease

Dates: 9/88-9/96

Summary of work: This was a peer reviewed appointment. As the **Adolescent with Special Health (ASHCN) Care Needs Expert**, participated in the review and writing of two technical reports and a peer-review publication on children and adolescents with sickle cell disease using data from the Cooperative study.

Name: Scientific Advisor, Governor's Council on Sickle Cell Syndrome and Related Hemoglobinopathies, State of North Carolina

Role/Area of Expertise: Content Expert, Clinical Practice; Psychological and Social Research; Community-based Evaluation; Professional Training

Dates: 5/94-10/96

Summary of work: As the **Public Health Social Work Academic and Practice Expert** and a **Clinical Practice Expert**, advised and worked with council to revise existing guidelines for participation in research, for training of state-level and community staffs and developed template for development, implementation and evaluation of a state-level data system to be used by state and community programs.

B3. Public Health Practice and Technical Assistance Activities

Tell meI forget
Show me....I remember
Involve me....I understand
Engage me....I own

Chinese Proverb (modified)

Name: Saving Orphans Through Healthcare and Outreach (SOHO) - Swaziland

Funding Agency: SOHO

Consulting/Technical Assistance period: 11/2011 – 6/2017

Role on Project: Senior Consultant; Content expertise on systems integration between private donor and local government agencies, social and economic determinants of health and health disparities at the state and local community level, community-based/participatory evaluation, multi-level, multi-site grant development and oversight, cultural competence.

Project description: In the areas above, provide expert advice and work to the multidisciplinary board, partners, organization collaborators and volunteers in the conduct of their work in the service of improving the quality of life and life expectancy of child-headed households in communities deeply affected by HIV/AIDS. Provide direction for the capacity building, coordination, improvement in service delivery, assistance with applying for and obtaining funding (local, national and global), development and implementation of a model for monitoring and assessing its multiple social and health service programs (mostly in rural areas) that include medical care, food programs, parenting support, and educational resources.

Title: Community Impact Transformation Research Support (Choices) for Strategic Planning and Evaluation

Funding Agency: United Way of Greater Greensboro (UWGG)

Consulting/Technical Assistance period: 8/2011 – 6/2012

Role on Project: Lead Evaluation Consultant – multi-program evaluation on the implementation of development process for the outcome-based goals and objectives (Quantitative and Qualitative Methods)

Project description: Utilizing the priorities set forth in the UWGG Voices Needs and asset assessment (2009-2011). Choices human services study, the UNCG team provided consultation, protocol development, and Monitoring and Evaluation services to support UWGG Staff and the Funding Objective Review Committees in their transformation of focus area committees to impact councils. The UNCG team assisted in 1) guiding and facilitating a strategic planning process to finalize funding objectives; 2) aligning funding objectives with measurements; 3) assessing current programs and initiatives against proposed prioritized funding objectives; and 4) developing input for the Community Impact Report for baseline results. This work consists of strategic planning support for the three funding review Committees and UWGG staff, and developing the initial Monitoring and Evaluation plan.

Title: Middle Tennessee Sickle Cell Network for Coordinated Care and Education (MTSCCCE)

Funding Agency: Vanderbilt University/NIH

Consulting/Technical Assistance period: 2/2011 – 6/2012

Role on Project: Lead and assessed Strategic Planning and Development process for network's pediatric and adult medical Home effort.

Project description: The Middle Tennessee Sickle Cell Network for Coordinated Care and Education was established and tasked with providing coordinated, evidence-based medical care for children and adults with sickle cell disease (SCD) in Middle Tennessee and is a partnership between Vanderbilt University Medical Center, Meharry Medical College and Matthew Walker Comprehensive Health Center Network (FQHC). The Strategic Framework of the program encompassed two primary strategies to carry out its overarching goal and to build the program's foundation for implementation: 1) the establishment of a community-academic partnership, using the Community-Academic Partnership Model as a guide, and 2) the establishment of a comprehensive Medical Home, using components and principles from the Medical Home Model and the Chronic Care Model (CCM) as an integrated guide. The strategic planning process encompassed multiple tasks: a) It began with an effort at obtaining a solid understanding of the guiding principles as they are described in the evidence-based practices for the Medical Home, the Chronic Care Model (CCM), and the Community-Academic Partnership Model, as these are the components that will guide and ground the strategic framework for this effort; b) Next it involved engagement in efforts to define and describe (with strategic planning participants and community feedback) which guiding

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

principles and model components that will be adopted from these best practices that can/will be used by the program to guide its efforts; and c) it incorporated what was adopted by linking each component's guiding principles to assessment efforts (process-outcome-monitoring, such as, is the program working as plan, what are the outcomes of the client/family-centered efforts, what is the pattern of access to the care network [increase, decrease, by whom]?).

Title: Arkansas Legislative Task Force On Sickle Cell Disease

Funding Agency: State of Arkansas

Consulting/Technical Assistance period: 5/2011-6/2011

Role on Project: External Program Advisor - Strategic Planning and Development

Project Description: Arkansas Legislative Task Force On Sickle Cell Disease engaged in a two process to develop recommendation for the development and implementation of a statewide adult care clinical network for persons with Sickle cell Disease. In August of 2010 the Taskforce submitted it recommendations to the Arkansas State legislature and in January of 2011 were given the mandate to close out their work by conducting a series of meetings and discussions with the Arkansas sickle cell community and an outside expert. The advisor reviewed the work of the Taskforce to date and over a one month period engaged its representatives (face-to-face and by phone) in a process that involved review of the recommendations and development of a draft strategic plan to move forward.

Title: Office of Adolescent Pregnancy Programs Collaboration Toolkit Work

Funding Agency: John Snow, Inc (JSI)/DHHS/Office of Populations Affairs (OPA)/Office of Adolescent Pregnancy Programs (OAPP)

Role on Project: Content and Methods Expert – Community-based Service Program, Assessment Tool development, CBO Teaching and Training, Practice-based Toolkit Development

Consulting/Technical Assistance period: 7/2011 - 9/2011

Project Description: JSI was contracted by the DHHS/Office of Populations Affairs (OPA)/Office of Adolescent Pregnancy Programs (OAPP) to develop a Pregnancy Programs Collaboration Toolkit for its grantees. The : Content and Methods Expert Consultant was contracted to: 1) review and provide comment on content of drafts of the Collaboration Toolkit; 2) develop content specific vignettes that provide real-world examples to illustrate the processes and outcomes discussed in the Collaboration Toolkit; 2) develop and provide scoring and assessment instructions for the tools included in the Collaboration Toolkit; 3) re-write/ integrate/write sections focusing on "knowing your audience" regarding how the target audience listens and learns.

Title: RTI International – Adolescent Family Life Project

Funding Agency: DHHS- Office of Adolescent Pregnancy

Consulting/Technical Assistance period: 2/2010 – 12/2010

Role on project: Manuscript Editor/Reviewer – expertise in manuscript development and writing and content expertise in the development, implementation and evaluation of adolescent prevention programs in the area of risky sexual behavior.

Project description: Reviewing grantee-developed manuscripts; provide feedback on the overall potential for publication; provide written feedback on the strengths and areas for improvement in the manuscript

Title: Southeast Regional Genetics Group (SERGG)

Funding Agency: HRSA MCHB

Consulting/Technical Assistance period: 3/2008 – present

Role on project: Senior Evaluation Consultant – multi-site, multi-state, multi-program evaluation on the implementation of outcome-based goals and objectives

Project Description: Goals of SERGG are: To address the inequities in genetic service and resources in the region and to expand existing regional capabilities and resources and to develop new regional systems to address these gaps; and to improve the existing regional communication infrastructure and to facilitate information sharing among providers of genetic services and consumers and to establish collaborative partnerships with other professional organizations. SERGG will meet its goals by engaging in regional efforts: a) To enhance and promote the quality of genetic services in the Southeastern Region which includes the states of Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Puerto Rico, and the Virgin Islands; b) To provide a forum for exchange of information among professionals who provide genetic services and the consumers of these services in the southeastern region of the United States; c) To receive and administer funds for coordinating genetic services and for

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

furthering education about the delivery of genetic services; d) To interact with other regional and national genetic organizations; and e) To arrange and promote proficiency testing and quality control in genetic services.

Title: Screening for Heritable Disorders in Children: Efficacy from a Family/Consumer Perspective

Funding Agency: Maternal and Child Health Bureau to Genetic Alliance - Sharon Terry, President/CEO

Consulting/Technical Assistance Period: 08/2007 – 7/2012

Role on project: Senior Evaluation Consultant research and evaluation on the measurement and application of consumer information

Project Description: For the project **Screening for Heritable Disorders in Children: Efficacy from a Family/Consumer Perspective**, provide expert advice and work with the Genetic Alliance to: a) Help in the design of questions that will understand the impact of false positive diagnosis and of identification of carrier status on individuals, families and the system. This would involve: 1) reviewing drafts of survey instrument, and 2) helping to plan and participate in a meeting focused on questions of carrier identification; b) Help with finding people to interview using the study instrument. This would involve taking study instruments through the consultant's IRB, and identifying collaborators to arrange for the recruitment of participants to complete the survey; c) Make recommendations about modifications to the current data system that will help to minimize harms and maximize its value and participate in the analysis of project data. **Special expertise provided** in the areas of community engagement, program development, program evaluation involving qualitative and quantitative measurement, report development and information problem-solving.

Title: Hartford Medical Outreach Model/HOME Pilot Project

Funding Agency: Local funding to Connecticut Children's Medical Center (CCMC)

Consulting/Technical Assistance Period: 08/2007 – 1/2010

Role/Area of Expertise: Senior Evaluation Consultant evaluation on the measurement of the program process and the client utilization data; technical advisor on socio-cultural aspects of client outreach and engagement.

Project Description: a. Undertake a review of CCMC HOME Project's programs, activities, and data sources; b. Implement a Monitoring and Evaluation (M&E) effort for the CCMC HOME Project; c. Refined or Final draft of the monitoring and evaluation (M & E) framework for the current CCMC HOME Project and overall programs and services based on the obtained information; and d. Fully execute a Monitoring and Evaluation (M&E) effort cover year 2 of the CCMC HOME Project. **Special expertise provided** in the areas of community engagement, program development, program evaluation involving qualitative and quantitative measurement, cultural competence, report development and information problem-solving.

Title: AIDS International Training and Research Program (AITRP) (Vanderbilt/ University of Alabama at Birmingham) (PI: Sten Vermund, MD, PhD (Vanderbilt University) UAB Program Director: Sibylle Kristensen, DrPH, MSPH, MPH)

Funding Agency: NIH/Fogarty

Consulting/Technical Assistance Period: 8/2005 – 9/2008

Role/Area of Expertise: Professional Development and Teaching; Qualitative Research Methods; Epidemiological Data systems linked to the community; Program Evaluation; Public Health Practice issues and Methods; cultural and linguistic competency

Project Description: The Vanderbilt University/University of Alabama at Birmingham (VUMC-UAB) The AITRP contributes research training to build both institutional and individual biomedical and behavioral research capacities focused on HIV-related research in both prevention and care. The UAB-AITRP operates under a subcontract agreement with Vanderbilt University. Since 1998, we have built strong partnerships with our international collaborators to train international scientists and key research support staff to conduct independent research and training in their home countries, as well as perform at an internationally credible level in collaborations with both local and foreign scientists in 3 main target countries, Zambia, China and Pakistan and with 3 developmental awards in India, Russia/Ukraine and Bangladesh. The training program that we will migrate to our international training partners includes a number of interdisciplinary topics, including a strong emphasis on nursing training and research. **Special expertise provided involved** traveling to Ukraine and India to provide teaching/training, mentoring faculty and researchers and research participation in the areas of expertise listed above.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title: International Training and Research in Environmental and Occupational Health (ITREOH) – University of Alabama at Birmingham (PI: Nalini Sathiakumar, MD, DrPH)

Funding Agency: NIH/Fogarty

Consulting/Technical Assistance Period: 6/2005 – 5/2010

Role/Area of Expertise: **Researcher and Faculty** – Professional Development and Teaching; Program /Community-based Evaluation; Mixed-Methods Research; Public Health Practice issues and Methods; cultural and linguistic competency

Project Description: The overall purpose of this initiative is to strengthen and sustain, through collaborative research and training, the ability of Pakistani, Sri Lankan, Indian and Malaysian scientists to contribute to environmental and occupational-related health research. This is done through a program that involves; a) training that prepares scientists to address issues pertaining to environmental and occupational health hazards; b) faculty, staff and scientist participation in practice-based research that addresses global problems in environmental and occupational health; c) mentoring faculty and researchers; and d) design and implementation of a joint South Asia Master in Public Health (MPH) Program. **Special expertise provided involved/involves** traveling to Pakistan, Malaysia and Sri Lanka and participation as a faculty member in all three areas and **development and implementation** of the **Program Monitoring and Evaluation Course for the MPH program**.

Title: Parent Project Muscular Dystrophy – Duchene Muscular Dystrophy Campaign

Funding Agency: CDC

Consulting/Technical Assistance Period: start 12/2005 and intermittent thereafter ending 1/2011

Role on Project: Technical Expert – Community Engagement, Evaluation: Measurement and Assessment of Engagement and Partnership Campaign

Project Description: Provide as needed advice and expertise to a project designed to educate families and providers and to engage these groups in a campaign to assure access and utilization of appropriate medical services for children with Duchene Muscular Dystrophy. Pat Furlong and Sarah Durham, PIs (New York). **Special expertise provided** in the areas of community engagement, program development, program evaluation involving qualitative and quantitative measurement, report development and information problem-solving.

Title: Doctoral program University of North Carolina at Greensboro – Department of Public Health Education

Funding Agency: State of North Carolina

Consulting/Technical Assistance Period: start 5/2004 – 7/2006

Role on Project: Technical Expert – Public Health Practice, Instructional Program development for Community-based Research and Evaluation; Graduate (Doctoral-Level) Academic program Development and Implementation

Project Description: Provide advice and expertise to Dr. Daniel Bibeau and Vincent Francisco on the development of an innovative program designed to prepare individuals for careers in universities, private research institutions, or public health agencies. A primary innovation in this doctoral program was/is the foundational focus on the integration of traditional doctoral level graduate training with scholarship and practice methodologies that will prepare graduate to take a strategic role in addressing the public health research-public health practice divide through (1) the translation of practice-based problems to relevant research questions, and (2) the translation of research into practice. The specifically involves: a) An emphasis on preparing doctoral students for careers in academia, where they will train new generations of applied prevention researchers for academic settings; b) An emphasis on researching and preventing health disparities based on race, ethnicity, gender, age, and social class; c) The use of a socio-ecological perspective for understanding the health of populations and broad determinants of health; d) A recognition that interventions designed to prevent the health problems of populations must focus on behavioral and contextual factors in people's lives; e) An emphasis on researching and preventing health problems that contribute significantly to the overall health status of the citizens of North Carolina and the United States; and f) A commitment by faculty to work in partnership with professionals, agencies, and community members to address the priorities emerging out of public health practice and the experiences of communities.

Title: Ethnic Differences in Pain Responses

Funding Agency: NIH/NINDS

Consulting/Technical Assistance Period: 9/2003-8/2004

Role on Project: Technical Expert – Measurement and Assessment of Ethnicity and Culture

Project Description: Provide as needed advice and expertise to a project designed to investigate the ethnic differences in responses to experimentally-induced pain, and to explore the biological, psychological and sociocultural factors contributing to these differences. Roger Filligan, PhD., University of Florida, PI. **Special expertise provided** in the areas of community Conceptual Development, Culturally Competent Qualitative and Quantitative measurement, primary and secondary data collection methods and analyses, review and summary write-up of the recent cultural competency literature, report development and information problem-solving.

Title: Communities in Charge: Financing and Delivering Health Care to the Uninsured

Funding Agency: Robert Wood Johnson Foundation

Consulting/Technical Assistance Period: 5/2003-4/2006

Role on Project: Technical Expert – Practice-based Measurement and Assessment

Project Description: Provide as needed advice and expertise to Coordinated Health System of Jefferson County (Alabama) in the development, implementation and formative evaluation of this first time health-based initiative for poor and uninsured persons. The purpose of the project is to “mold the current fragmented systems for the poor and uninsured into a seamless continuum of care that promotes primary and preventive care, chronic disease management, and appropriate specialty and inpatient services.” The process evaluation work is a modification of the collaborative/ participatory approach that is based on the methods of the Integrated Model of community-based Evaluation (IMCBE) originated by the evaluator. The modification with include a cost trend analyses (primary and specialty care) component, a longitudinal analyses of eligible enrolled and un-enrolled clients, qualitative analyses of the collaborative process between partners (current and new) and the development of a trend analyses the management of selected chronic conditions. **Special expertise provided** in the areas of community outreach, planning and negotiation, Cost Analyses, Conceptual Development, Culturally Competent Qualitative and Quantitative measurement, tool development, collaborative/participatory evaluation, primary and secondary data collection methods and analyses, review and summary write-up of the recent evaluation literature and implementation, report development and information problem-solving.

Title/Agency/Program: Institute of Medicine, National Academies of Science

Consulting/Technical Assistance Period: 2002-2003

Role: Reviewer and Technical Expert

Description of Activities: Provided review and technical expertise for the drafts and final version for the book ‘Who will keep the public Healthy? Educating Public Health Professionals for the 21st Century’. The purpose of the independent review was to provide candid and critical comments that would assists the institution in making its published report as sound as possible, and to ensure that the report meets institutional standards for objectivity, evidence, and responsiveness to the study charge.

Title/Agency/Program: Sickle Cell Disease Association of the Piedmont’s Home Health project

Consulting/Technical Assistance Period: 1/94-2/2005

Role: Evaluation Consultation and Technical Assistance

Description of Activities: This is a longitudinal study of the health services experiences of a cohort of adults and children with sickle cell disease in five counties in the Piedmont of North Carolina. Duties include: 1) assisting with the development of the design of the study; and 2) assisting with the ongoing data analysis and report writing for funders. **Special expertise provided** in the areas of community-based evaluation methods (quantitative and qualitative methods), community outreach and development, social research, data collection and assessment methods specific to persons with chronic conditions, health program evaluation, grant development, report development and information dissemination.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title: *Salud Para Todos* (Health for All) – Evaluation Component

Funding Agency: Substance Abuse and Mental Health Services Administration, National Institutes, DHHS

Consulting/Technical Assistance Period: 10/20-01-9/2002

Role on Project: Technical Expert – Data analyst and Protocol preparation

Funding Period: 10/20-01-9/2002

Project Description: Assist project with the analyses and integration of project data. The project is a collaborative effort between the Greater Birmingham Latino Community Organization, Centro de Salud, and the Central Alabama Alliance for Latino Health (wrote the background and project methodology). The project is a first time health-based needs, assets and capacity assessment of the Latino community and providers in the Greater Birmingham area. The process evaluation, analytical work and protocol development is a collaborative/ participatory approach that is based on the methods of the Integrated Model of community-based Evaluation (IMCBE) originated by the evaluator that includes a “Building Capacity to Build Capacity” component and the development of a GeoSocioGram of general health, human HIV and substance abuse preventive services. **Special expertise provided** in the areas of community outreach, planning and negotiation, Conceptual Development, Culturally Competent Qualitative and Quantitative measurement, tool development, collaborative/ participatory evaluation, primary and secondary data collection methods and analyses, review and summary write-up of the recent evaluation literature and implementation, report development and information problem-solving.

Title/Agency/Program: SSDI/CISS/Healthy Child Care Alabama Project, ADPH Bureau of Family Health Services

Consulting/Technical Assistance Period: 3/99-8/2002

Funding Agency: HRSA, Bureau of Maternal and Child Health

Role: Evaluation Consultation and Technical Assistance (Program /Community-based Evaluation; Mixed-Methods Research; Intervention Research and Methods; Public Health Practice issues and Methods; Social and Economic Determinants of Wellness and Health Disparities)

Description of Activities: a) Provide didactic workshops and individual consultations for Nurse Consultants and Community Providers on collaboration and evaluation of child service programs in community settings; b) Assist in development of the evaluation components and strategy for this CISS grant; c) conduct on-going community-based organization, planning and evaluation activities. **Special expertise provided** in the areas of community-based evaluation methods (quantitative and qualitative methods), culturally competent assessment methods, health program evaluation, lay and professional training, grant development, report development and information dissemination.

Title: HRSA Project: Developing Indicators And Measurement Of Cultural Competence For Direct Service Delivery

Funding Agency: Health Services Resources Administration (HRSA) Office of Minority Health

Consulting/Technical Assistance Period: 11/2000-9/2001

Role on Project: Technical Expert – Practice-based Measurement and Assessment

Project Description: Assisted the Lewin Group (HRSA contractor) to: 1) develop a conceptual model of cultural competency for primary care settings; 2) identify indicators and measures that can be used to assess cultural competency; 3) test the practical application of these measures in best-practice settings; and 4) assist with final report writing and program /legislative policy recommendations. **Special expertise provided** in the areas of Conceptual Development, Culturally Competent Qualitative and Quantitative (psychometric) Measurement and Indicators item and tool development, data collection and analyses methods, review and summary write-up of the recent research literature, legislation and best practices, development of practice-based policies and implementation, report development and information problem-solving.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title: NCDOH Project: Assessing the Health Related Needs of Youth with Chronic Health Conditions and Disabilities

Funding Agency: Office of Disability and Health, State of North Carolina Department of Health

Consulting/Technical Assistance Period: 3/2000-10/2000

Role on Project: Technical Consultant – Qualitative Data and Assessment (Program /Community-based Evaluation; Mixed-Methods Research; Qualitative Research and Methods; Public Health Practice issues and Methods

Project Description: Wrote the background literature paper for the final project report; needs assessment data collection tool; analyzed and synthesized the findings from the state-wide adolescent focus groups; assist with final report writing and program /legislative policy recommendations. **Special expertise provided** in the areas of Qualitative data collection methods and assessment (focus groups), review and summary write-up of the recent research literature, legislation and best practices, development of practice-based policies, report development and information problem-solving.

Title: Halifax and Warren Counties (North Carolina) Smart Start Initiatives – Needs Assessment

Funding Agency: State of North Carolina Department of Human Services

Consulting/Technical Assistance Period: 1/2000-1/2001

Role on Project: Technical Consultant – Data and Assessment

Project Description: Assisted with writing the needs assessment data collection tool; assisted with strategic planning for the local community data collection; performed the data analysis; assist with final report writing. **Special expertise provided** in the areas of community data collection methods, culturally competent assessment methods, social research (quantitative and qualitative methods), data collection and assessment methods specific to poor and minority populations, and data gathering, report development and information problem-solving.

Title/Agency/Program: Robert Wood Johnson Foundation – Evaluation Unit

Consulting/Technical Assistance Period: 1/2000-3/2001

Funding Agency: Robert Wood Johnson Foundation

Role: Evaluation Consultation

Description of Activities: Assisting the Foundation in reviewing and mapping out appropriate evaluation strategies for applicants for funded activities. **Special expertise provided** in the areas of community-based evaluation methods, culturally competent assessment methods, social research (quantitative and qualitative methods), strategic planning, data collection and assessment methods specific to persons with chronic conditions, and data gathering, report development and information problem-solving.

Title/Agency/Program: Center for Policy and Program Affairs – Family Voices Organization Evaluation

Consulting/Technical Assistance Period: 1/2000-12/2000

Funding Agency: Institute for Child Health Policy, University of South Florida

Role: Evaluation Consultation

Description of Activities: Assisting the Institute in planning and mapping out appropriate evaluation strategies for the Family Voices Organization's funded and unfunded activities. **Special expertise provided** in the areas of community-based evaluation methods, culturally competent assessment methods, social research (quantitative and qualitative methods), data collection and assessment methods specific to persons with chronic conditions, and data gathering, report development and information problem-solving.

Title/Agency/Program: National Decisions for Health Network Evaluation Workgroup

Consulting/Technical Assistance Period: 1/2000-6/2001

Funding Agency: Alabama Cooperative Extension Community Health, Auburn through the U.S. Department of Agriculture

Role: Evaluation Consultation

Description of Activities: Assisting the National workgroup with the development of a manual and training materials for community-based evaluation; develop and conduct two interactive workshops on community-based health program evaluation; provide ongoing problem-solving and strategic planning in the areas of community education outreach and assessment. **Special expertise provided** in the areas of community-based evaluation methods (quantitative and qualitative methods), culturally competent assessment methods, health program evaluation, in-service training, data gathering, problem-solving, report development and information dissemination.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title/Agency/Program: Partners for Healthy Community

Consulting/Technical Assistance Period: 2/2000-3/2001

Funding Agency: Jefferson County Department of Public Health, Alabama

Role: Evaluation Consultation

Description of Activities: Assisting the health department to plan and map out appropriate evaluation strategies for its community education outreach activities; providing introductory and on-going in-service training in the areas of outreach, program monitoring and assessment and the fundamental principles and methods of community evaluation. **Special expertise provided** in the areas of community-based evaluation methods, community outreach and development, culturally competent assessment methods, health program evaluation, lay and professional training, grant development, report development and information dissemination.

Title/Agency/Program: Adolescent Transition Program: Networking New England

Consulting/Technical Assistance Period: 8/9-1/2000

Funding Agency: Brigham and Women's Hospital, Boston

Role: Evaluation Consultation and Technical Assistance

Description of Activities: Assisting members of the transition research team with efforts of problem solving, strategic planning, key of key findings and dissemination of current and emerging information on transition to adult care for adolescents with sickle cell disease. **Special expertise provided** in the areas of health program evaluation (quantitative and qualitative methods), professional education and training, report development and information dissemination.

Title/Agency/Program: Women's Fund of Greater Birmingham through a grant to the UAB Center for Urban Affairs

Consulting/Technical Assistance Period: 3/98-12/99

Funding Agency: Women's Fund of Greater Birmingham

Role: Evaluation Consultation and Technical Assistance:

Description of Activities: Assist the development of the research protocol and some qualitative and quantitative data review and analysis for a project aimed at assessing the capacity of this philanthropic agency to a) research and understand the existing need and potential for the successful development of women entrepreneurs from low income areas; and b) to provide resources necessary for initiating and nurturing this development. **Special expertise provided** in the areas of community-based evaluation methods, report development and information dissemination.

Title/Agency/Program: Hale Empowerment and Revitalization Organization (H.E.R.O.) - Hale County Alabama

Consulting/Technical Assistance Period: 3/97 - 4/98

Funding Agency: Alabama Department of Public Health

Role: Community-based Program Evaluation Consultation and Development Assistance

Description of Activities: 1) Assisted in development of the evaluation components and strategy for the county Rural Outreach and Family resource Center (FRC) grants application and re-application; 2) on-going community-based organization, planning and evaluation activities. **Special expertise provided** in the areas of community-based evaluation methods and information dissemination.

Title/Agency/Program: Birmingham Healthy Start

Consulting/Technical Assistance Period: 12/96-9/97 and 4/98 - 5/98

Funding Agency: Jefferson County Department of Public Health from the Maternal and Child Health Bureau, Health Services Administration

Role: Community-based Program Evaluation Consultation and Technical Assistance

Description of Activities: Provide consultation to the local evaluation team in the areas of community-based outreach, strategic planning, assessment procedures and overall data analysis and dissemination. **Special expertise provided** in the areas of community-based evaluation methods (quantitative and qualitative methods), community outreach and development, lay and professional education and training, grant development, report development and information dissemination.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title/Agency/Program: Alabama Department of Public Health, Bureau of Family Health Services - Community-based Family Planning Program

Consulting/Technical Assistance Period: 3/97 - 5/97

Funding Agency: Alabama Department of Public Health

Role: Technical Evaluation Consultant

Description of Activities: Review and refinement of, and technical assistance with, development of the evaluation protocol for the community outreach mini-grants. **Special expertise provided** in the areas of community-based evaluation methods, lay and professional education and training, report development and information dissemination.

Title/Agency/Program: District 8, Florida Department of Health and Rehabilitative Services, Division of Community Health

Consulting/Technical Assistance Period: 7/95-9/95

Funding Agency: Health Services Research Agency, Title X Program

Role: Technical Consultant

Description of Activities: Technical assistance involving review and decision making for district wide family planning data development project and protocol for evaluation of this data project. **Special expertise provided** in the areas of community outreach and development, professional education and training.

Title/Agency/Program: Alabama, Statewide Family Planning Program, Bureau of Family Health Services

Consulting/Technical Assistance Period: 6/95-8/95

Funding Agency: Alabama Department of Public Health

Role: Technical Evaluation Consultant

Description of Activities: Development, implementation and analysis of: 1)state level family planning education materials to be used by the contract agencies and personnel focusing on the targeted population of persons of childbearing age especially adolescents; and 2) technical assistance protocols for community outreach and education. **Special expertise provided** in the areas of community-based evaluation methods, report development and information dissemination.

Title/Agency/Program: North Carolina, Women's Preventive Health Branch, Division of Maternal and Child Health, DEHNR

Consulting/Technical Assistance Period: 5/95-8/95

Funding Agency: North Carolina Department of Public Health

Role: Technical Evaluation Consultant

Description of Activities: Development, implementation and analysis of: 1) technical assistance protocols for community outreach and education; and 2) needs assessment of primary and secondary accountability data for the purposes of meeting federal guidelines, program review and planning. **Special expertise provided** in the areas of community-based evaluation methods, community outreach and development, lay and professional education and training.

Title/Agency/Program: North Carolina Family Ties - Family and Community Based Needs and Resource Project. Department of Human Resources, Division of Family Development.

Consulting/Technical Assistance Period: 11/94-8/95

Funding Agency: North Carolina Department of Public Health

Role: Evaluation Consultation and Technical Assistance

Description of Activities: Technical assistance involving review, planning and decision making for multi-county data development project and protocol for evaluation and analysis of collected data. **Special expertise provided** in the areas of community-based evaluation methods.

Title/Agency/Program: : Maternal and Child Health Training Project, University of South Carolina (site). Requester: Maternal and Child Health Bureau, U. S. Department of Health and Human Services.

Consulting/Technical Assistance Period: 9/94-8/95

Funding Agency: Maternal and Child Health Bureau

Role: Program Development Technical Consultant

Description of Activities: Review of current program, assess potential for future development, assist with the development of two courses and serve as consultant to the program's oversight committee. **Special expertise provided** in the areas of professional education and training in the area of public health social work and curriculum development.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title/Agency/Program: Cumberland County Partnership for Children

Consulting/Technical Assistance Period: 9/94-12/94

Funding Agency: State of North Carolina, Department of Human Services

Role: Technical Consultant

Description of Activities: Development of a community health care outreach proposal. **Special expertise provided** in the areas of grant development and information dissemination.

Title/Agency/Program: B.R.I.D.G.E.S. Community Resource Center Evaluation Project

Consulting/Technical Assistance Period: 7/94-6/96

Funding Agency: Cumberland County Partnership for Children

Role: Evaluation Consultant Consultation and Development Assistance

Description of Activities: Development, implementation and analysis of program evaluation procedures. **Special expertise provided** in the areas of community-based evaluation methods (quantitative and qualitative methods), community outreach and development.

Title/Agency/Program: South Carolina Multidisciplinary Community-Based Family Planning Project. State of South Carolina, Department of Health and Environmental Control, Bureau of Maternal and Child Health, Office of Maternal and Family Health.

Consulting/Technical Assistance Period: 3/94-11/97

Funding Agency: State of South Carolina Department of Health Environmental Control

Role: Technical Evaluation Consultation and Technical Assistance

Description of Activities: Development, implementation and analysis of: 1) provision of initial and ongoing training of state and region level staff on methods of working with local communities on the establishment and maintenance of family planning intervention program; 2) state level family planning education materials to be used by the contract agencies and personnel focusing on the targeted population of persons of childbearing age especially adolescents; and 3) technical assistance protocols for community outreach and education. **Special expertise provided** in the areas of state level health program evaluation, community outreach, culturally competent assessment methods, community education and development, lay and professional education and training, and social research, data collection and assessment methods specific to populations of at-risk youth.

Title/Agency/Program: State of North Carolina, Sickle Cell Syndrome Program. Projects: Single Gene Educator/Counselor Training and Certification Program and Program Services Monitoring Program.

Consulting/Technical Assistance Period: 10/92-9/94

Funding Agency: North Carolina Department of Public Health

Role: Planning Consultant, Evaluator and Data Analyst

Description of Activities: Provided technical assistance with the planning and evaluation of this single gene counselor education and training program. **Special expertise provided** in the areas of lay and professional education and training, and testing methods specific to genetic professionals.

Title/Agency/Program: State of South Carolina, Department of Health and Environmental Control (DHEC).

Projects: Continuing Education and Training of Public Health Social Workers Statewide Assessment of the Professional Roles and Needs of Public Health Social Workers and Trouble Shooting for State Consultants.

Consulting/Technical Assistance Period: 12/93-8/94

Funding Agency: State of South Carolina, Department of Health and Environmental Control

Role: Program Planning and Development Technical Consultant

Description of Activities: Consulting/training, program development, planning and evaluation, and problem-solving for several DHEC projects. **Special expertise provided** in the areas of lay and professional education and training, and testing methods specific to diverse public health professionals at the state and regional levels, and strategic planning for local program development, implementation and assessment.

Title/Agency/Program: Triad Sickle Cell Anemia Foundation, Inc. Outreach and Training Program for Adolescents and Young Adults

Consulting/Technical Assistance Period: 3/92-4/95

Funding Agency: Various Foundations

Role: Planning and Evaluation Consultant

Description of Activities: Provided technical assistance with the agency's needs assessment and program development for the youth outreach and training program.. **Special expertise provided** in the areas of lay and professional education and training, and testing methods specific to genetic professionals.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title/Agency/Program: Children's Hospital Oakland, Child Protection Treatment Services Project (CPTSP).

Consulting/Technical Assistance Period: 5/91-12/92

Funding Agency: County of Alameda, California

Role: Program Evaluation Consultation and Technical Assistance

Description of Activities: Provided technical assistance with the development of the evaluation plan and its implementation for CPTSP project. **Special expertise provided** in the areas of lay and professional education and training, and testing methods specific to pediatric medical social work professionals.

Title/Agency/Program: State of California, Newborn Screening Program, San Francisco Bay Area Region, Elliot Vichinsky, M.D., P.I., Grant #89-97232

Consulting/Technical Assistance Period: 9/89-6/91

Funding Agency: State of California Department of Health

Role: Social Work Consultant

Description of Activities: Provided consultation on the development and implementation of the social work component of State of California Newborn Screening Program. **Special expertise provided** in the areas of lay and professional education and training, and testing methods specific to genetic professionals.

Title/Agency/Program: Foster Placement of Medically Fragile Children Project (MFCP).
Bette Isabelle, LCSW, P.I. Children's Hospital Oakland, California. Project funded in part by the San Francisco Foundation and the Northern California Grantmakers AIDS Task Force

Consulting/Technical Assistance Period: 9/89-6/91

Funding Agency: Children's Hospital Oakland

Role: Evaluation Analyst (TA)

Description of Activities: Provide technical assistance with the development and formative evaluation of the MFCP project. **Special expertise provided** in the areas of state level health program evaluation, and social research, data collection and assessment methods specific to populations of vulnerable youth.

Title/Agency/Program: Population Communication Services, Baltimore, MD Nov 1985 -Sept 1987.

Consulting/Technical Assistance Period: 8/87-10/87

Funding Agency: USAID

Role: Data Programmer/Analyst NTA/Enugu Project

Description of Activities: Assisted program investigators with the programming and analyses of project data.

3. Scholarly Research and Evaluation Activities

3A. Publications and Technical Reports

A1. Publications

1997

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Telfair, J., B.R.I.D.G.E.S. Early Childhood Family Service Center: Family Resource Program Evaluation Report, 1996-1997. Technical report prepared for the Cumberland County B.R.I.D.G.E.S. Early Childhood Service Center, North Carolina, June 1997.

Telfair, J., Cumberland County Partnership for Children (Smart Start) Evaluation Report, 1996-1997. Technical report prepared for the Cumberland County Partnership for Children , North Carolina, August 1997.

Telfair, J., Sickle Cell Disease Association of the Piedmont (SCDAP) Home Health Project Evaluation Report, 1995-1997. Technical report prepared for the Sickle Cell Disease Association of the Piedmont, Five County Piedmont Area, North Carolina, August 1997.

Telfair, J., Collaborative Adolescent Pregnancy Prevention Project (CAPPP) Mid-Year Evaluation Report. Technical report prepared for the Highpoint YWCA/Sickle Cell Disease Association of the Piedmont, Guilford County North Carolina, December 1997.

1996

Telfair, J., B.R.I.D.G.E.S. Early Childhood Family Service Center: Family Resource Program Evaluation Report, 1995-1996. Technical report prepared for the Cumberland County B.R.I.D.G.E.S. Early Childhood Service Center, North Carolina, June 1996.

Telfair, J., Cumberland County Partnership for Children (Smart Start) Evaluation Report, 1995-1996. Technical report prepared for the Cumberland County Partnership for Children , North Carolina, August 1996.

Telfair, J., Sickle Cell Disease National Registry Data Project. Technical proposal prepared for the Sickle Cell Association of America (SCDAA) a national, not-for-profit organization headquartered in Culver City, California, September 1996.

1995

Telfair, J., B.R.I.D.G.E.S. Early Childhood Family Service Center: Family Resource Program Evaluation Report, 1994-1995. Technical report prepared for the Cumberland County B.R.I.D.G.E.S. Early Childhood Service Center, North Carolina, June 1995.

A3. Research Presentations and Published Abstracts

1. Invited Presentations

- 11/2014 Telfair, J “Cross Cultural Differences in Women’s Health: An Overview” – **Invited Presentation, Maya Angelou International Women’s Health Summit 2014 – A Global Priority**, Winston-Salem, North Carolina, November 21, 2014.
- 05/2014 Telfair, J. “Transition: A Public Health Perspective – From Clinic to Home and Community” – **Invited Presentation, NY Methodist Hospital Sickle Cell Disease Annual Conference**, Brooklyn, NY, May 30, 2014
- 4/2014 Telfair, J “National Swaziland Service Improvement Project for Children and Families” – **Invited Presentation, Healthcare Research Symposium**, Georgia Southern University, Statesboro, GA, April 16, 2014
- 4/2013 Telfair, J “Public Health Research and Evaluation Demonstrating a Practice - based Approach” – **Invited Presentation, Visiting Scientist Seminar**, Jiann-Ping Hsu College of Public Health, Georgia Southern University, Statesboro, GA, April 25, 2013
- 6/2011 Telfair, J “Health Care Transition – Youth and Adolescents with Chronic health Conditions” – **Invited presentation, Grand Rounds**, Children’s Hospital of the King’s Daughter and Eastern Virginia Medical School, Norfolk, Virginia June 1, 2011
- 6/2011 Telfair, J “transition for Adolescents and Adults with Sickle Cell Disease: Key Challenges and Concerns” – **Invited presentation, Residents’ Noon Conference**,

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Children's Hospital of the King's Daughter and Eastern Virginia Medical School,
Norfolk, Virginia June 1, 2011

- 6/2011 Telfair, J “Medical Home for CSHCN: Implications for Community Providers” – **Invited presentation**, Tidewater Pediatrics Society, Norfolk, Virginia, May 31, 2011
- 12/2010 Telfair, J “Fostering Collaboration Along the Continuum” – **Invited presentation**, Annual Grantee Meeting, field’ DHHS/OPH/Office of Adolescent Pregnancy Programs (OAPP), San Antonio, Texas, December 15, 2010
- 7/2010 Telfair, J. “Considerations for Transition in Sickle Cell Disease”, – **Invited Presentation**, 1st Global Congress on Sickle Cell Disease **Accra International Conference Centre** Accra, Ghana July 22, 2010
- 6/2010 Telfair, J. “Community-based Participatory research and Societal Issues” – Invited Presentation, Framing the Research Agenda for Sickle Cell Trait, NIH- National Heart, Lung, and Blood Institute, June 3, 2010
- 9/2009 **Telfair, J.** “Transition for Adolescents with Sickle Cell Disease and Other Conditions: Considerations from Existing Evidence”, Phillips Memorial Lecture – **Grand Rounds Invited Presentation**, Meharry Medical College, Nashville, Tennessee, September 9, 2009
- 9/2009 **Telfair, J.** “Primary Care for Persons with Sickle Cell Disease: HRSA SCD Treatment Demonstration Program (SCDTDP)”, Hematology Fellows Lecture, **Invited Presentation**, Vanderbilt University Medical School, Nashville, Tennessee, September 8, 2009
- 5/2009 **Telfair, J.** “Sickle Cell Disease: National Public Health Perspective”, **Invited Presentation**, Grand Masters Prince Hall Mason, Inc. Meeting Los Angeles, California May 15, 2009.
- 11/2008 **Telfair, J.** “Assessing the State of Genetics Education and Training for Public Health Professionals: An Investigation by the Secretary's Advisory Committee on Genetics, Health and Society (SACGHS)”. **Invited presentation**, 136th Annual Meeting of the American Public Health Association, San Diego, California, October 26, 2008.
- 08/2008 **Telfair, J.** “HRSA National Newborn Screening Initiative: Overview and Lessons Learned “**invited presentation**, University of Colorado 2nd Annual Sickle Cell Conference, Denver, Colorado, August 31, 2008
- 4/2008 Telfair, J. “What Lies Ahead in Public health On The Local And National Level: The Challenge For North Carolina”, **invited presentation**, 2008 North Carolina Public Health Social Workers Conference, Chapel Hill, North Carolina April 22, 2008.
- 2/2008 Telfair, J. “The Role of the National Coordinating and Evaluation Center (NCEC) in Health Care Delivery”. **invited presentation**, 2nd Annual Sickle Cell Disease Research and Educational Symposium, Fort Lauderdale, Florida. February 20, 2008
- 06/2007 **Telfair, J.** “HRSA Newborn Screening Initiative and National Coordinating and Evaluation Center: Overview” **invited presentation**, Society for Pediatric Hematology Sickle Cell Disease Summit, Washington, District of Columbia. June
- 05/2007 **Telfair, J.**, Ross, S., & Williams, C. “Development of a Minimum Database for Select Newborn Screening Follow-up Programs in the U.S.” **invited presentation**, Sickle Cell Disease Association of America, Registry Data Meeting, Rockville, Maryland, May 16, 2008

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

- 05/2007 **Telfair, J.** “Social and Community-Based Issues of Working with Persons with Sickle Cell Disease” **invited presentation**, University of Connecticut Sickle Cell Awareness Symposium, Hartford, Connecticut, May 11, 2007
- 11/2006 **Telfair, J.** “Integration of MCH Core Competencies and ASPH MCH Core Competencies”, **invited presentation**, 134st Annual Meeting of the American Public Health Association, Boston, MA, November 05, 2006.
- 11/2006 **Telfair, J.** “Overview of ASPH MCH Core Competencies – Diversity and Culture Committee”, **invited presentation**, 134st Annual Meeting of the American Public Health Association, Boston, MA, November 04, 2006.
- 9/2006 **Telfair, J.** “Transition to Adult care for Adolescents with Sickle Cell Disease: Basic Issues and results of National Study 1” **invited research paper**, North Carolina Sickle Cell Syndrome Program, Raleigh, North Carolina, September 8, 2006.
- 4/2006 **Telfair, J.**, Ross, SI, & Williams, CT, “Development of A Minimum Database for Select Newborn Screening Follow-up Programs in the United States” 29th Annual Sickle Cell Disease Meeting, NIH, Memphis, Tennessee, April 11, 2006. (**Abstract:** Conference Proceedings).
- 4/2006 **Telfair, J.** & Clay, O.J., “Relationship between adjustment and self-efficacy in adolescents with sickle cell disease: Assessment of a disease-specific instrument”, **invited research paper**, 29th Annual Sickle Cell Disease Meeting, NIH, Memphis, Tennessee, April 10, 2006. (**Abstract:** Conference Proceedings).
- 4/2006 Ngo-Metzger, Q. and **Telfair, J.**, “Cultural Competency and Quality of Care: Obtaining the Patient’s Perspective”, invited research paper, Cultural Competency: Understanding the Present and Setting Future Directions, The Commonwealth Fund, New York, New York, April 7, 2006.
- 4/2005 **Telfair, J.** “Multi-site Study of Parental/Caretaker Perspectives on Transition of Adolescents with SCD to Adult Care”, **invited research paper**, 28th Annual Sickle Cell Disease Meeting, NIH, Cincinnati, Ohio, April 13, 2005. (**Abstract:** Conference Proceedings).
- 4/2005 **Telfair, J.** “SCDAA/MCHB SCD Newborn screening follow-up program national coordinating and evaluation center: Evaluation effort for the first three years”, **invited paper**, 28th Annual Sickle Cell Disease Meeting, NIH, Cincinnati, Ohio, April 12, 2005. (**Abstract:** Conference Proceedings).
- 4/2005 **Telfair, J.** “Scope of the current problem: Gaps in prevention and care”, **invited background paper**, Workgroup on Sickle Cell Disease treatment Act, HRSA/MCHB, Rockville, MD, April 4, 2005
- 6/2004 **Telfair, J.** “US Experience of Sickle Cell Disease in Adolescence”, **invited key note research paper**, Sickle Cell Disease & Thalassemia Case Study Conference, University College of London, UK, June 18, 2004.
- 4/2004 **Telfair, J.** “Transition To Adult Care For Adolescents With Sickle Cell Disease: Results Of A National Survey” **research paper**, 27th Annual meeting of the National Sickle Cell Program, Los Angeles, CA, April 19, 2004. (**Abstract:** Conference Proceedings).
- 11/2003 **Telfair, J.** “Sickle Cell Disease: Transitioning From Pediatric to Adult Care Systems”, **research paper**, Akron General Medical Center, Dr. Herbert E. Croft Visiting Professorship, Akron, Ohio, November 5, 2003.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

- 4/2003 **Telfair, J.**, “Social and community-based issues of working with persons with sickle cell disease and their families”, **research paper**, Institute for African American Health, Inc., Florida A & M University, Tallahassee, Florida, April 4, 2003.
- 6/2002 **Telfair, J.**, “US Experience of Sickle Cell Disease in Adolescence”, **invited research paper**, National Symposium on Sickle Cell Disease & Thalassemia, University College of London, UK, June 28, 2002.
- 6/2002 **Telfair, J.** “Transition of adolescents to adult care: select findings from the national sickle cell disease study”, **research paper**, Workshop on Adults with SCD: Meeting Unmet Needs, NIH, Bethesda, MD, June 13, 2002. (**Abstract**: Conference Proceedings).
- 6/2002 **Telfair, J.** “Economic and social barriers faced by persons with SCD”, **research paper**, Workshop on Adults with SCD: Meeting Unmet Needs, NIH, Bethesda, MD, June 13, 2002. (**Abstract**: Conference Proceedings).
- 4/2001 Hall, D., **Telfair, J.**, Gailliard, T., Brunson, C., & Jackson, S., “The Transition Experience”, **research paper**, 25th Annual meeting of the National Sickle Cell Program, New York, NY, April 16, 2001. (**Abstract**: Conference Proceedings).
- 01/2001 **Telfair, J.** “Basics of Evaluating Programs in Community Settings” **technical presentation**, presented at Tuesday Topic Lecture Series, UAB School of Public Health, Birmingham, Alabama January 30, 2001.
- 5/2000 **Telfair, J.** “Alabama Sickle Cell Disease (SCD) Client Registry Project: Current Findings”, **research paper**, 2000 Alabama Sickle Cell Disease Association of America Conference, Mobile, Alabama, June 9, 2000.
- 5/2000 **Telfair, J.** “Moving On?: Transition of Adolescents with Chronic Conditions to Adult Care and Life”, **research paper**, Grand Rounds Rhode Island Children’s Hospital/ Brown Medical School, May 3, 2000
- 5/2000 **Telfair, J.** “Transition of Adolescents with Sickle Cell Disease to Adult Care and Life”, **research paper**, Research Forum, Yale Medical School, May 3, 2000

3C. Extramural Research and Evaluation Support/Funding Received

1. Current Funded Projects

Title: NIH U24 entitled Data Coordinating Center for Sickle Cell Disease Implementation Consortium (SCDIC)

Funding Agency: NHLBI/RTI as a subcontract

Total Amount: \$65,117 (3 years)

Percent effort on Project: 8 % FTE

Funding Period: 7/1/2016 – 6/30/19

Role on project: Consultant/Content Expert/ Chair Person of the Needs Assessment Subcommittee

Project Description: The RTI competition for the NIH U24 entitled Data Coordinating Center for Sickle Cell Disease Implementation Consortium (SCDIC): Using Implementation Science to Optimize care of Adolescents and Adults with Sickle Cell Disease, Solicitation No. RFA-HL-16-011 for a proposed period of performance anticipated to be ten (10) years. As consultant and content expert Dr. Telfair will provide expert advice in a) effective strategies for engaging community stakeholders and patient advocacy groups in the research design; b) effective strategies to recruit and enroll registry participants; c) understanding health disparities and barriers to care; d) inform patient and caregiver outcomes; and e) participation in SCDIC Steering Committee meetings and activities.

Title: Prenatal and Early Childhood Biomass Smoke Exposure and Child Neurodevelopment (R01)

Funding Agency: DHHS/NIH/NIEHS

Total Amount: \$360,000 yr/5 years

Percent effort on Project: 5% (year 1), 10% subsequent years.

Funding Period: 9/2013 – 8/2018

Role on Project: Co-I, Principal Evaluator (PI, N. Sathiakumar)

Project Description: The current research is an expansion of an ongoing R21 study in Sri Lanka funded the National institutes of Environmental Health Sciences entitled “Prenatal Exposure to Solid Fuel Smoke and Birth Outcomes in Sri Lanka” (UAB IRB protocol number F100622014). In the R21 study we have currently enrolled 719 pregnant mothers. The study is now closed to enrollment. Mothers were entered in their first three months of pregnancy and followed until delivery. The healthy newborns are followed until 6 months of age. We are conducting assessments of exposure to pollutants from solid fuel smoke (particulate matter less than 2.5µm (PM2.5) and carbon monoxide (CO)) in each trimester of pregnancy and studying whether the exposure will have detrimental effects on infant brain development at birth and at 6 months. The purpose of this study is to prevent or reduce adverse brain development which may be caused by exposure to the use of solid fuels. The objective of this research study is to examine whether exposure to pollutants from the burning of solid fuel (wood, dried crops etc.) for cooking during pregnancy and early childhood (from birth to three years) has a detrimental effect on child brain development. As Co-I with primary responsibility for leading and conducting the monitoring evaluation effort for the research

Title: SouthEast Regional Genetics Collaborative– Regional Genetics Newborn Screening Collaborative (SERG/SERC)

Funding Agency: Health Resources and Services Administration (HRSA) – Maternal Child Health Bureau (MCHB)/Genetic Services Branch (GSB)

Total Amount: \$250,000 (total to UNCG)/5 Years

Percent Effort on Project: 20%

Funding Period: 6/12 – 5/17

Role on Project: Co-PI/Director Process Monitoring and Outcome Evaluation (M&E) Framework Core

Project Description: The SouthEast Regional Genetics Collaborative (SERG) proposes to build, implement and assess an eight states and two territories effort to assist the HRSA/MCHB/GSB to ensure that individuals with heritable disorders and their families have access to quality care and appropriate genetic expertise and information in the context of a Medical Home that provides accessible, family-centered, continuous, comprehensive, coordinated, compassionate, and culturally effective care, with the following objectives: a) To strengthen communication and collaboration among public health, individuals, families, primary care providers, and genetic medicine and other Subspecialty Providers; and b) to quantitatively and qualitatively evaluate outcomes of projects undertaken to accomplish their goals. Over four years SERG proposes to accomplish this work through efforts linked to

five core goals. These are: 1) **Priority Area 1: Continuation and Expansion of Medical Home and Transitioning Core by 1.1.** Region 3 will serve as the regional coordinator to improve the process of newborn screening and follow-up by identifying and developing innovative approaches to strengthen the linkages between newborn screening programs, families, and child health care providers; and to increase the number of child health care providers that can provide a medical home in order to improve access to, coordinate, and ensure continuity of health care; **and 1.2.** Identify, develop, and implement a regional transitioning model/plan that incorporates the needs of those with heritable disorders recognizing the importance of continuity of care and a medical home during the transition from pediatric to adult health care and during pregnancy; and identify, network with, and educate patients with heritable disorders in the region to ensure current and accurate knowledge about regional genetic services to improve their quality of health and access to appropriate health care; 2) **Priority Area 2: Newborn Screening Long-Term Follow-Up and Access to Quality Healthcare Services Core by 2.1.** Region 3 will serve as a NBS LTFU developmental coordinator to: (a) identify follow-up strategies from available sources of data (current and existing), (b) integrate disease-specific management tactics into an evidence-based inventory, and (c) improve linkages between public health-based NBS programs and care in the LTFU settings that is largely outside of the public health systems; **and 2.2.** Develop and implement a comprehensive LTFU information system that incorporates evidence-based practices to: (a) serve as a resource for practitioners and families with TMS-diagnosed disorders in SERC, (b) enhance patient access to genetic services, and (c) improve patient-oriented long-term clinical outcomes; 3) **Priority Area 3: Advance Information Technology Core by 3.1.** Develop and implement a regional advanced informatics core and expand telecommunication infrastructure to facilitate information sharing among providers of genetic services, other health care professionals, and consumers; and develop regional telemedicine care systems that will increase access to healthcare for children and adults with genetic conditions; 4) **Priority Area 4: Implementation of a Workforce Capacity Core by 4.1.** Examine workforce needs across key sectors of the genetics services system (e.g. laboratory services, genetic counseling services, clinical services, etc.); 4.2. Evaluate models aimed at improving workforce capacity across the genetic services system; 4.3. Where needed, develop educational materials aimed at proving the knowledge of those in genetic services system; 4.4. Identify and implement methods of (a) increasing the number of qualified genetic services personnel and (b) improve their training; and 5) **Priority Area 5: Process Monitoring and Outcome Evaluation (M&E) Framework Core** - A monitoring and evaluation (M&E) framework will be implemented in order to assess performance, process and outcomes of the SERG/SERC. Specifically the framework will integrate life course theory, evaluation approaches and models to constitute predominantly performance monitoring, and process evaluation. Outcome evaluation will be minimalistic and core-specific in nature.

2. Previous Funded Projects

Title: Rural Community Health System Planning Grant

Funded Agency: Georgia Department of Community Health

Percent effort on Project: 3% per year

Funding Period: 01-2015 – 07-31-2016

Role on Project: Evaluation/Project Management Consultant **PI: William Mase, PhD**

Description of Project: The research team at Georgia Southern University has been tasked by the Georgia Department of Community Health to (1) assist four non-profit rural hospitals and communities in conducting an evaluation of their current and projected financial position; (2) identify health care access and other needs critical for the stabilization of their local rural community hospital; (3) develop a work plan and model for establishing and/or maintaining local health care delivery systems, and (4) help communities adopt an implementation strategy to meet their needs. As part of achieving these objectives, the team will work with identified hospitals to develop and implement a financial sustainability strategic plan. Four rural community hospitals and associated communities have been identified by the Georgia Department of Community Health and will serve as the healthcare systems and communities for the initiative

Title: Community Care Network - IHAP

Funding Agency: Cone Health Foundation (NC) to the UNCG Center for New North Carolinians (CNCC)

Total Amount: \$10,000 (total to UNCG)/per Year for 3 years to the UNCG-CSCHRE

Percent Effort on Project: 05%

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Funding Period: 9/12 – 08/15 (Telfair current role –external advisor as of August 2013)

Role on Project: UNCG - CSCHRE will conduct the Process Monitoring and Outcome Evaluation – Since 8/2013 I transitioned to a consultant on the project H. Sienkiewicz served as project lead till its conclusion.

Project Description: The Center for New North Carolinians (CNNC) will participate with the Guilford Community Care Network (GCCN) (henceforth IHAP partners) to implement a long term plan for providing immigrant and refugee populations with equitable and quality access to care. The intervention plan consists of four main components to be delivered in a culturally appropriate manner by key CNNC staff and trained lay health navigators: 1) Community outreach initiatives; 2) Educational activities; 3) Interpretation services; 4) Case Management. A multi-conceptual, mixed-design monitoring and evaluation (M&E) framework that involves program process monitoring and outcome evaluation will be used to assess IHAP's effort, goals, and objectives and build practice-based evidence for the program's overall approach to outreach, training, and technical assistance support. IHAP will target two populations in year one: Latinos and Montagnards and will include a range of involvement ranging from intensive case management to information dissemination. In years two and three the target populations will be increased to include Burmese and Bhutanese these are the two major refugee populations now being resettled in greater Greensboro, NC, The IHAP evaluation plan is conceptually driven by three integrated approaches: Chen's fidelity-driven process evaluation, the Integrated Model for Community-Based Evaluation (IMCBE) (Telfair & Mulvihill, 2000), and the Expert-Linkage Culturally Competent Evaluation Planning and Implementation model (ELM).

Title: Wilkes County/Wilkes Regional Medical Center County Community Health Assessment 2012-2013 - Wilkes County Regional Collaborative

Funding Agency: Jointly Wilkes regional Medical Center and Wilkes County health Department.

Total Amount: \$20,000 (total to UNCG)/1 Year

Percent Effort on Project: 05%

Funding Period: 9/12 – 12/13

Role on Project: Co-PI/Director Process Monitoring and Outcome Evaluation (M&E) Framework Core

Project Description: The Wilkes County Health Department (WCHD), its health partner Wilkes Regional Medical Center (WRMC) and other community and local government stakeholders have engaged the UNCG Center for Social Community and Health Research and Evaluation (CSCHRE) for the purpose of providing evaluation and data analyses technical assistance in order to complete its 2012-2013 Community Health Assessment. The overarching goal of this community-partnered assessment project is to learn more about the health and quality of life in Wilkes County, while identifying the strengths and challenges in the community. Building upon previous assessment cycles WCHD will carry out this comprehensive community health assessment of the health of residents of Wilkes County and WRMC service areas. The UNCG CSCHRE Technical Assistance and assessment will allow partners to address data issues specific to: 1. Providing an evidenced-based profile of the health status of residents of Wilkes County; 2. Meet the state and federal reporting requirements of the CHA/CHNA primary partners WCHD and WRMC; and 3. Concerns expressed by WCHD CHA Advisory Committee, Private and Government stakeholders and county residents.

Title: Guilford County Community Health Assessment 2012-2013 - Guilford County Regional Collaborative

Funding Agency: Cone Health System

Total Amount: \$97,720 (total funding to UNCG)/ 1 Year

Percent Effort on Project: 25%, plus staff for the DEC

Funding Period: 6/12-12/13/ 1 year

Role on Project: Principal Investigator/Lead Project evaluator

Project Description: This project is a collaborative of the Guilford Assessment Collaborative (GAC) among local hospital-based (HBO) and community-based organizations (CBO), the Guilford County Department of Public Health (GCDPH), and the University of North Carolina at Greensboro (UNCG) Center for Social, Community and Health research and Evaluation (CSCHRE). The collaborative will engage community members, local citizens and representatives from other entities residing in GC in considering community health data, needs and assets, identify priority health focus areas, and propose recommendations for developing action plans that address community health concerns. This effort is intended to fulfill requirements at the state and national levels for such actions by the GCDPH and HBOs, respectively. The UNCG team will lead the primary and secondary data assessment and reporting.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Building upon previous assessment cycles the GAC will carry out a comprehensive community health assessment of the health of residents of Guilford County and HBO service areas in neighboring counties. Elements of the assessment will include, but not be limited to: a) Collection and analysis of a wide range of primary and secondary data, including socio-demographic, public health surveillance, behavioral, healthcare and social surveillance primary data; b) Engagement with the community, including community residents, community organizations, local government, schools and other sectors of the community – including intermittent input by advisory committee into assessment process and final closeout dissemination; c) Description of unmet health needs and gaps; d) Identification of priority health issues; and e) Development of evidence-based recommendations to address priority health issues.

Title: Registry and Surveillance System for Hemoglobinopathies (RuSH) - Establishment and use of the North Carolina SCD and Thalassemia Client Surveillance Program (NC_SCDTCSP) – UNCG

Component: Data and Evaluation Core (DEC)

Funding Agency: NC DOH from the CDC/NHLBI

Total Amount: \$221,168 (total funding to UNCG)

Percent Effort on Project: 20%, plus staff for the DEC

Funding Period: 6/2009-2/2013 (3 Years)

Role on Project: Co-Principal Investigator/Project evaluator (PI, Ms. Belinda Pettiford, NC Division of Public Health)

Project Description: While past efforts on the part of researchers and professionals have led to more effective treatments of the complications associated with SCD, little is known about the social epidemiology of SCD and Thalassemia (that is, critical and accessible data on the physical, psychological and social aspects of these hemoglobinopathies). Questions about access, differential outcomes, and use of health and social services of persons with SCD and Thalassemia, remain largely unanswered. Consequently, there are many unknown issues about the lives of persons with SCD and Thalassemia outside of the treatment setting. Key questions illuminating the proportion of persons experiencing the challenges and successes of day-to-day functioning, such as physical challenges effecting work or school attendance and other activities, or the ability to access or use key health care and social services, need to be answered. **To begin to** add new knowledge to our understanding of the lives of persons with SCD and Thalassemia, and to provide a state-level socio-epidemiological counterpart to previous clinical data efforts (such as the Cooperative Study of Sickle Cell Disease – **CSSCD**), the state of North Carolina in collaboration with its partners and the CDC proposes to establish, maintain and use a comprehensive population-based data surveillance system for persons with SCD and Thalassemia in North Carolina.

Title: Guilford Genomic Medicine Initiative: Implementing MeTree[®]

Funding agency: Department of Defense grant to Moses Cone Medical Center

Total Amount: \$1,000,000/per year

Percent Effort on Project: 20% per year

Funding Period: 06/01/2007 – 05/31/2012

Role on Project: Principal Evaluator (PE)

Project Description: The overall goal of the Guilford Genomic Medicine Initiative (GGMI) is to identify the specific challenges in “re-structuring” (is this still true?) an existing medical system to integrate genomic medicine, and create solutions that can be used by other medical systems, such as the extensive military medical care system. To accomplish this goal, GGMI includes the development of a large-scale genomic medicine education initiative targeted at the community, providers, and patients, and a clinical systems model to implement strategies to facilitate the integration of genomic medicine into several pilot practices. This IRB protocol relates to the development of a computer-based tool that is at the core of the clinical systems model. One of the main components of genomic medicine is risk assessment. As part of a previous IRB protocol, we created and assessed a self-administered family history and genetic risk assessment software tool called MeTree[®] (*Statement of work: Project 2: Tasks 1*). This software tool 1) collects a baseline family history to generate a pedigree; 2) evaluates genetic risk specifically of four diseases - breast, ovarian, and colon cancer and thrombosis (using personal and family medical history

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

information in an algorithm); and 3) generates risk-based reports for patients and providers to guide health care management decisions. In partnership with Duke University Medical Center, the UNCG Center for Biomedical, Genetics and Health Research and Moses Cone Medical Center, the PE guides the project assessment process and provides technical assistance, and monitor the progress of the community collaborative efforts with providers.

Title: Sickle Cell Disease Treatment Demonstration Program (SCDTDP)- National Coordinating Center (NCC-RTI)

Funding agency: Department of Health and Human Services/HRSA/MCHB

Total Amount: \$850,000 per year/4 years

Percent Effort on Project: 20% per year

Funding Period: 06/01/2007 – 02/28/2011

Role on Project: **Principal Investigator/Program Director** (Sub-Contract to Research Triangle International (RTI))/ **Qualitative Researcher** (10/2010 – 2/28/2011)

Project Description: The goal of the SCDTDP is to develop and establish infrastructure and partnerships to enhance the prevention and treatment of Sickle Cell Disease (SCD) and to eliminate health disparities for individuals with SCD. Additionally, to prevent mortality from and morbidity of SCD. The objectives of the project are to: a) Improve and expand patient and provider education; b) Improve the continuity and coordination of service delivery for individuals with SC; c) Provide coordinated, comprehensive, culturally accessible and family-centered care for individuals with SCD; and d) Improve genetic counseling and testing; and d) Provide state of the art treatment, patient and family support and health promotion for individuals with SCD. Four grantee ‘networks’ have been funded (AL, OH, IL, NC) to carry out the work of the program (SCDTDP). The networks are comprised of Federally-qualified health centers (FQHCs), sickle cell disease centers, university health centers, and community based sickle cell disease support organizations. The NCC-RTI, its partners and consultants are funded to (1) [as part of its evaluative function] collect, coordinate, monitor, analyze and distribute data, best practices and findings regarding the activities of the demonstration program, (2) identify a model protocol for the prevention and treatment of complication of Sickle Cell Disease, (3) identify educational materials regarding the prevention and treatment of complications of Sickle Cell Disease, and (4) prepare a final report on the efficacy of the demonstration program. The PI/ Project Director (PD provides overall direction for the project consistent with HRSA’s objectives, the authorizing legislation, and the recommendations of the Oversight Committee (OSC) and other stakeholders. In addition, PD provides guidance for the technical activities of the National Coordinating Center (NCC-RTI) (including use of the PD’s evaluation, community outreach and partnership and inherited blood disorders research expertise) and maintain regular communication with the Grantees, HRSA, RTI and its partners, Chair the Grantee meetings, and communicate recommendations from the Executive Committee (EC) to HRSA. The PD assists in assessing the capabilities of the Grantees, provide technical assistance, and monitor the progress of the Networks. Qualitative work is conducted during close-out 10/2010 – 2/2011.

Title: National Coordinating and Evaluation Center (NCEC): Sickle Cell Disease (SCD) Community Programs (1 U93 MC 00217-01)

Funding Agency: MCHB/HRSA/DHHS

Total Amount: \$800,000/per year for SCDA

Percent Effort on Project: 35%

Funding Period: 09/2002 – 5/31/2011 (3 year cycles starting in 2005)

Role on Project: **PI/Project Director and Principal Evaluator**

Update: A competitive application was submitted on 01/15/2011 for a 4-year period @\$800,000 per year. UNCG-CSCHRE will become the lead agency receiving 100% of the funding.

Project Description: Co-wrote the project proposal and wrote the project methodology. Based on principles of community-based program and assessment and using a team specifically trained to ‘fit’ the parameters of the NCEC: The major goals of this project are to serve as the national center for the coordination, monitoring and evaluation 15 funded community-based SCD projects who provide educational and counseling support to patients and families of infants positively screened for SCD or carriers of abnormal hemoglobins. The efforts of these first projects will serve as model for programs that will be funded in later stages of the initiative. Secondly, the purpose of this grant is to provide consultation and technical assistance to the community-based SCD organizations, consumer groups, state agencies, newborn screening programs, SCD treatment and research centers, and other agencies promoting newborn screening and other SCD-related education programs associated with the care of

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

children, adolescents, and adults with SCD for health care workers, patients, and patient support groups in the community. A third goal is to link multiple service sites through a uniform set of databases for pilot-testing and implementation in order to enhance outreach, follow-up care, management and treatment with the aim of reducing early mortality and morbidity for those infants identified with a hemoglobinopathy. As PI/Project Director advocate for standard screening practices, support the efficacy of counseling provision for families; and work to establish a nationwide comprehensive SCD outreach program , standardized assessment tools and linked database all to begin in year one and to be implemented and sustained in subsequent grant periods.

Title: Juvenile Justice/Behavioral Health Partnership - 180 Turning Lives Around Initiative

Funding agency: North Carolina Department of Juvenile Justice

Total Amount: \$20,856/per year (actual)

Percent Effort on Project: 15% per year

Funding Period: 11/01/2008 – 05/31/2010

Role on Project: **Principal Evaluator (PE)**

Project Description: The 180 Initiative is a collaborative partnership between NC Division of Mental Health/Developmental Disabilities, and Substance Abuse Service and the NC Department of Juvenile Justice and Delinquency Prevention with management by the UNCG-Center for Youth, Family, and Community Partnerships. The overall Aim of the 180 Initiative is to implement an organized and coordinated initiative that provides a continuum of care for individuals in the juvenile justice system and their families across North Carolina. Objective 1. The **180** Initiative will provide various services in designated judicial districts to facilitate implementation and serve as a link to the Division of Mental Health/Developmental Disabilities/Substance Abuse Services (DMH/DD/SAS). Objective 2. The Division and DJJDP will develop an infrastructure to support the delivery of evidence based practices and services through the **180** Initiative. The Service Philosophy of the **180** Initiative is to deliver effective clinical care and support services by maintaining the integrity of family and community life for juvenile-justice involved youth by facilitating respectful and effective family/youth-agency partnerships, family involvement, and reintegration into the community. Under s subcontract with the UNCG-Center for Youth, Family, and Community Partnerships and the evaluation team, the PE guides the project data development, implementation and assessment process and provides technical assistance, and monitor the progress of the collaborative partner efforts with providers.

Title: Carolina Health and Transition (CHAT) Project (*Evaluation Sub-Contract*)

Funding Agency: North Carolina Department of Health (NC DOH)

Total Amount: \$60,000 (actual two-year total)

Percent Effort on Project: 15% per year inclusive of Associate Evaluator

Funding Period: 03/01/2008 – 12/30/2009

Role on Project: **Principal Evaluator (PD)** – Monique Winslow, PhD)

Project Description: The goal of the Carolina Health and Transition (CHAT) Project is to develop a comprehensive statewide system to support the successful transition of North Carolina youth with special health care needs (YSHCN) from pediatric to adult health care within a medical home. Working local communities with a diverse array of providers, youth, families and other stakeholders, CHAT through its grantees targets barriers in the availability of, and access to quality health care services by broadening awareness and teaching specific skills for YSHCN, their families and medical providers. Activities build upon and link with other statewide initiatives designed to improve health care opportunities and practices for all children, by including issues specific to transition in medical care for YSHCN. The evaluation effort for CHAT involves the following four tasks and related objectives: **Task 1-** To undertake a review of NC DOH CHAT project's programmatic, contractual activities (inclusive of objectives and performance measures) and data sources and the **Objective of Task 1** is to document and summarize the current status of NC DOH CHAT project's general and project specific programmatic efforts, contractual activities, monitoring efforts, data collection and data documentation materials (inclusive of paper and electronic) and programmatic and contractual analyses procedures and results/outputs; **Task 2** – To develop a linked data collection system and procedures for monitoring and evaluating NC DOH CHAT project and overall programmatic and contractual efforts and the **Objective** of Task 2 is to design, pilot test and finalize a linked data collection system and procedures for monitoring and evaluating NC DOH CHAT project and overall programmatic and contractual efforts. This is a collaborative effort with NC DOH CHAT staff, contractual partners, members of the CHAT Monitoring and Evaluation Advisory Committee (CHAT MEAC) and relevant advisors from the Transition Working Group (TWG); **Task 3** –

To develop and provide means to disseminate the results of the NC DOH CHAT monitoring and evaluation (M & E) efforts during the contractual period and end of contractual period (Year 2 and end of Year 2) and the **Objectives of Task 3 are to** develop and implement a structured report on the results of the monitoring and evaluation (M & E) efforts during the contractual period and end of contractual period (Year 2 and end of Year 2) and to develop and present CHAT results for primary and secondary dissemination at national meetings which will include out of state travel and accommodations; and **Task 4 - To** provide practical and data technical assistance to the NC DOH CHAT project grantees and the NC DOH and the **Objective** of Task 4 is to develop and implement technical assistance efforts that is responsive to emerging requirement of the NC DOH CHAT project, project grantees and NC DOH.

Title: *Association of Maternal and Child Health Programs Leadership Project (Evaluation Sub-Contract)*

Funding Agency: Department of Health and Human Services/MCH (2 U01MC00001-06-00)

Total Amount: \$70,000/per year (actual)

Percent Effort on Project: 10% per year

Funding Period: 06/01/2006 – 05/31/2009

Role on Project: Principal Evaluator (PI – Peter Sybinski, PhD; Replaced by Michael Frasier in 2008)

Project Description: The five goals of this cooperative agreement are to: 1) strengthen the capacity of state Title V programs to improve the health outcomes and eliminate health disparities for the nation's women, children, youth, children with special health care needs, and families across the life span; 2) strengthen the AMCHP organizational network for MCH systems; 3) promote a collaborative national agenda for MCH; 4) address existing and emerging MCH issues; and 5) strengthen MCH leadership at national, state and territorial levels. The goals of the assessment plan are: 1) Assure quality programs and products for its members; 2) Help achieve its new 5-year strategic plan; 3) Meet deliverable requirements under the new, 5-year cooperative agreement from MCHB; and 4) Improve the performance and administration of the organization. Based on a Participatory Research and Evaluation (PRE) approach, the assessment implementation methodology will involve the development of a cooperative working partnership between the AMCHP staff and advisors and the assessment team. Both performance monitoring and process evaluation methods will be used to assess key indicators and outcomes linked to both the project's goals and the assessment tasks.

Title: *Sowing the Seeds of Health (Sembrando las Semillas de la Salud)*

Funding Agency: Department of Health and Human Services/NCI (1R25CA106870-01A1)

Total Amount: \$750,000 per year/5 years

Percent Effort on Project: 10% per year

Funding Period: 06/01/2005 – 05/31/2010

Role on Project: Co-Investigator and Evaluator (PI – Isabel Scarinci, PhD)

Project Description: The Sowing the Seeds of Health is an educational program to promote cervical cancer screening and awareness regarding the importance of breast cancer early detection among Latina immigrants of reproductive age, and it is based on the following foundation: (a) extensive formative evaluation through which members of the target audience were involved in all steps of program development; (b) it can be delivered by lay individuals; (c) it is theory-based; (d) it is connected to affordable and accessible health care services; and (e) it uses Latina immigrants' interest in family planning as a catalyst to promote cervical screening and awareness regarding the importance of breast cancer early detection within this population, thereby making it unique. The overall goal of this proposal is to reduce the incidence of breast and cervical cancer in Latinas immigrants via community health advisors or "promotoras." We will first conduct a formative evaluation phase to adapt and refine a pilot-tested, theory-based, culturally relevant educational program to promote cervical screening and early detection of breast cancer among Latina immigrants of reproductive age which is "packaged" as a family planning program. We will then identify, recruit, and train 10 "promotoras" in the Birmingham area. These "promotoras" will implement the developed educational program among 200 Latina immigrants between the ages of 19 and 42. Immediate as well as annual outcomes of the proposed educational program will be carefully and extensively evaluated. Finally, based on a "hub and spoke" approach, we will disseminate the tested educational program to other counties within the state of Alabama. The rationale for this proposal is that further development and evaluation of such an educational program will increase cervical cancer screening rates and awareness regarding the importance of breast cancer early detection among Latina immigrants.

Title: Magic City Stroke Prevention Project (MCSPP)

Funding Agency: Department of Health and Human Services/NHLBI/Office of Minority Health

Total Amount: \$2,4000,000/4 years (actual)

Percent Effort on Project: 15% per year

Funding Period: 08/30/2004 – 8/31/2008

Role on Project: Principal Investigator and Director

Project Description: The grant will support a new initiative aimed at reducing the excessively high rates of stroke, stroke disabilities and stroke deaths that disproportionately occur in the southeastern region of the United States. The SBEI represents a collaborative effort among all HHS agencies and is part of the Closing the Health Gap Initiative, which seeks to reduce racial and ethnic disparities in healthcare. The SBEI consists of four core interventions including development and implementation of a community-wide awareness and education campaign, a communications network that informs individuals of the availability of free blood pressure screening activities, a component for health professionals that emphasizes improvement of blood pressure control rates for persons with hypertension, and a component for health systems and health plans that emphasizes improvement of blood pressure control rates for persons with hypertension. Through the use of a methodology that integrates community partnerships, sound social theory, community practice and community-based evaluation, the Magic City Stroke Prevention Group will work with public and private organizations to develop and implement programs aimed at achieving the outcomes of preventing and controlling hypertension and lowering the stroke rate in Central Alabama. Specific tasks are to provide the leadership and oversee all project activities, work closely with DHHS, work closely with project collaborating partners, lead the data and evaluation efforts, lead the project's Steering Committee, and work with project staff and partners on writing and publications.

Title: Center for Health Promotion

Funding Agency: Centers for Disease Control and Prevention

Total Amount: \$4,357,475/5 years (actual)

Percent Effort on Project: 33% year1; 35% years 2-3; 30% year 4; 40% year 5 (original budget)

Funding Period: 09/30/2004 – 9/30/2009

Role on Project: Co-Investigator/Associate Director of Research and Evaluation (Center) and Co-PI Core Research Project (Max Michael, MD, PI)

Project Description: The UAB Center for Health Promotion (Center) is both a Centers for Disease Control and Prevention (CDC) Prevention Research Center (PRC) and a designated UAB University Wide Interdisciplinary Research Center. The Center's long-standing mission is "to bridge the gap between public health science and practice in risk reduction across the life span among African Americans and other under-served communities and to determine the benefits of sustained efforts to build community capacity and to reduce risk factors within under-served communities." This mission guides all of the Center's activities and has led to the Center's focus on community-based prevention and research activities, efforts to reduce health disparities in the Black Belt Region of Alabama and a commitment to culturally competence evaluation. Specific tasks in the Center is to oversee all research activities, including the Special Interest Research Projects (SIPs), Other Collaborative projects, serving as Co-PI and Community and qualitative data research specialist on the Center's Flying Sparks core research project, to serve on the Center's Executive Committee, Co-Direct the Center' Evaluation Unit and lead the Center's Writing and Publications committee

Title: *NIAID International Centers of Excellence in Research (ICER) Program*

Funding Agency: National Institute of Allergy and Infectious Diseases/ Fogarty International Center

Total amount: \$6,048 (my per year funded portion), **Award No:** 5 U2R TW006246-04

Percent Effort on Project: 5% per year

Funding Period: May 1, 2003- April 30, 2008

Role on project: Investigator/Mentor/Trainer (PI - Eric Chamot, PhD)

Project Description: This is a clinical training program designed as a collaborative effort between in-country investigators and staff at the NIAID International Centers of Excellence in Research (ICER) Program, the University of Alabama at Birmingham (UAB), the Fogarty International Center (FIC), staff and collaborating investigators from the National Institute of Allergy and Infectious Diseases (NIAID), and ICER site collaborators in or near Bamako, Mali; Chennai, India; and Kampala, Uganda. The purpose of this initiative is to strengthen and sustain, through collaborative training and research, the ability of

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

NIAID-funded scientists, physicians, nurses, and public health practitioners to contribute to clinical research. This training program will prepare NIAID-funded field researchers and key staff to address all the key issues pertaining to the conduct and management of international clinical infectious disease (ID) research in the context of international collaboration. In addition, it will prepare them to participate fully in research addressing global problems in ID prevention and control, emphasizing local research target areas. The training program is multidisciplinary and will include clinical research design, epidemiology, health behavior, biostatistics, mixed methods (quantitative and qualitative), health policy, clinical trial regulatory mechanisms, research ethics, data management, field management, clinical management, outreach and retention, quality assurance in clinical and laboratory matters, and key principles in observational, treatment and prevention research. This training curriculum will aim at building the ICER sites into regional centers of excellence in clinical research by providing training components that focus on capacity building for clinical research.

Title: Behavioral Sciences Core, Center for AIDS research (CFAR) University of Alabama at Birmingham

Funding Agency: National Center for AIDS Research /NIH

Total Amount: \$55,918/5 years (actual)

Percent Effort on Project: 10%/year

Funding Period: 3/1/2003 – 4/30/2007

Role on Project: Co-Investigator Behavioral Sciences Core/ (PI, Michael Saag, PhD/Leslie Clark, PhD (Center))

Project Description: Co-wrote the community research, consultation and qualitative project methodology. The overall mission of the Behavioral Sciences Core (BSC) of the UAB CFAR is to make a substantial contribution to interdisciplinary HIV-Related research – whether initiated by behavioral, clinical, basic science, epidemiology, or other faculty – and assure a value-added contribution to CRAF through integration of behavioral expertise in the fullest range possible of CFAR activities. The BSC's specific aims are as follows: (1) developing the capacity of behavioral sciences faculty throughout UAB to conceptualize and implement HIV-related behavioral research projects including those that are community-, clinically-, and internally-based; (2) developing the capacity of non-behavioral sciences faculty, particularly those associated with the UAB CFAR, in the range of behavioral variables, measures, and interventions that may be incorporated into a comprehensive HIV research program; and (3) facilitating linkages between the CFAR and other centers of behavioral expertise within the UAB community. Specific tasks on the project include advising BSC and CFAR members on the recruitment and retention of representative community-based samples into medical treatment, clinical, vaccine and prevention trials, and evaluation of these community efforts, as well as developing workshops and roundtables in these domains to develop capacity and enhance linkages between the behavioral and non-behavioral investigators.

Title: ASU-UAB Partnerships for the Reduction of Reproductive (REAP) Health Disparities in Minority Teens and Young Adults in Alabama (1 R24 MD00151-01)

Funding Agency: National Center for Minority Health Disparities (NCMHD)/NIH (EXPORT Resource-Related Research Project)

Total Amount: \$293,918/3 years

Percent Effort on Project: 10%

Funding Period: 10/1/2002 – 9/30/2005

Role on Project: Co-Investigator/Director Mentoring Core (PI, Myung-Hi Kim Oh, MD)

Project Description: Co-wrote the project proposal and wrote the project methodology. The project is a collaborative effort between Alabama State University (ASU)(an HBCU) and the University of Alabama at Birmingham (UAB). The overall goal of the proposed REAP project, ASU-UAB EXPORT Project, is to advance the Mission and Vision of the NCMHD of reducing and ultimately eliminating minority health disparities in America. The REAP Project employs an interdisciplinary approach to address a significant and well-documented need among ethnic minority groups, reproductive health and health disparities in Alabama. The Mentoring Core will aim to provide a structured pipeline of opportunity for junior faculty and fellow trainees at ASU and UAB to further develop and sustain the growing ASU-UAB partnership through joint pilot research and/or visiting scientist appointments. The ultimate goal of the Mentoring Core is to PREPARE culturally competent health scientists capable of independently contributing to the

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

elimination of the nation's minority health disparities. The anticipated outputs of this project will include an application for an EXPORT Center Grant (P-20 OR P-60) of the NCMHD, NIH in 2005.

Title: Healthy 2010 Alabama: Development and Evaluation

Funding Agency: Children's Rehabilitative Services /HRSA Maternal and Child Health Bureau to the Alabama Department of Rehabilitative Services

Total Amount: \$42,5000/ongoing

Percent Effort on Project: 10%

Funding Period: 7/2002 – 8/2006

Role on Project: Co-PI (PI Beverly Mulvihill, Ph.D.)

Project Description: Co-wrote the proposal and methodology section. The project is a collaborative effort between the Children's Rehabilitative Services (CRS) and the Department of MCH, UAB SOPH. Based on Key principles of strategic planning developed by Ginter and Duncan and implementation evaluation, the purpose of the project is assist CRS with the implementation and assessment efforts of the six goals of HP 2010 for Children with Special Health care Needs (CSHCN) in Alabama. The UAB team's role is to: 1) develop and implement the training of CRS central and field staff and workgroup leaders for the purpose of providing input for the 2010 implementation strategy; 2) to develop and implement the assessment of the work of the workgroups; and 3) collaborate on the consolidation, utilization and dissemination of information and relevant findings from the workgroup assessments. The UAB team will work with key CRS staff to prepare all project data reports.

Title: Alabama's Children's Health Program (CHIP) Evaluation

Funding Agency: Alabama Department of Public Health

Total Amount: \$363,769

Percent Effort on Project: 15% (years 1-3), 20% (currently)

Funding Period: 5/99-6/2005

Role on Project: Co-Principal Investigator and Principal Evaluator

Project Description: Assisted with the writing of the proposal. The purpose of the evaluation is to assess the effect of the program on reducing the disparity in the access and utilization of health and medical services for children in low income and working poor families. Subsequent funding for the years 2000 to 2002 is pending.

Title: Couples HIV counseling in two African Capitals

Funding Agency: National Institute of Mental Health (R01 Grant)

Total Amount: \$2,000,000/5 year project

Percent Effort on Project: 20%

Funding Period: 8/2002-9/2004

Role on Project: Co-Investigator (PI Susan Allen, MD)

Project Description: Co-wrote the research grant with the UAB Center for AIDS Research. The purpose of the grant is to link activities in two capital cities in Africa (Kigali, Rwanda and Lusaka, Zambia) in order to develop, implement and assess the effectiveness of a community voluntary couples testing (HIV) program. **Special expertise provided** in the areas of Community Development, Culturally Competent Qualitative and Quantitative (psychometric), measurement and Indicators item and tool development, community-based collaborative/participatory research, evaluation, and education primary and secondary data collection methods and analyses, problem-solving, review and summary write-up of the research.

Title: Alabama Comprehensive Health Services Profile Project (ACHSPP)

Funding Agency: Alabama Department of Public Health

Total Amount: \$80,000/year

Percent Effort on Project: 5%

Funding Period: 10/2001 – 9/2003

Role on Project: PI/Project Director and Principal Evaluator

Project Description: Co-wrote the project proposal and wrote the project methodology. Based on principles of database development and using a team specifically trained to 'fit' the parameters of the ACHSPP: a) worked with the ACHSPP staff, community and technical advisory committee and

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

health care specialists to identify and document reproductive and sexual health, medical, dental and allied health practitioners (group), programs and services for persons in Alabama; b) worked with the project team to develop, maintain and update the ACCESS and website services and program database file; and c) in collaboration with ACHSPP staff, and community and technical advisory committee, developed and implemented the protocol for data analysis, review, written product production and use by person accessing the project database and use for technical reports and academic publications.

Title: Evaluation Consultation (Technical Assistance) SPRANS Genetics Grantees

Funding Agency: Health Resources and Services Administration, Maternal and Child Health Bureau, Division of Services to Children with Special Health Needs

Total Amount: \$108,450 total for 2 years

Percent Effort on Project: 10%

Funding Period: 7/2000 – 6/2002

Role on Project: Evaluation Consultant

Project Description: Assisted with the writing evaluation consultation statement of work. Based on the Integrated Model of Community-based Evaluation (IMCBE): a) conduct intermittent evaluation capacity building phone and site visits with ten grantees and staff of the HRSA/MCHB Division of Services to Children with Special Health Needs – Genetics Disease Branch; b) review and provide feedback on the design and implementation processes and intermittent outcomes evaluation of the grantees; c) assisted grantees in the re-development of their objectives to make them specific, measurable, attainable, relevant and time anchored; d) assisted grantees in the development of common, content and site specific indicators, and measures; e) provided assistance to HRSA/MCHB Division of Services to Children with Special Health Needs – Genetics Disease Branch staff and 10 community project grantees on issues and situations specific to community evaluation outreach, collaboration, negotiation and program development and sustainment; and f) provided assistance to HRSA/MCHB Division of Services to Children with Special Health Needs – Genetics Disease Branch staff with professional and protocol development.

Title: Birmingham Health Care Homeless Project – Evaluation Component

Funding Agency: Substance Abuse and Mental Health Services Administration (SAMHSA)

Total Amount: \$225,000 per year (\$22,607/site budget)

Percent Effort on Project: 5 % per year

Funding Period: 3/2000 - 11/2000

Role on Project: Principal Evaluator

Project Description: Assisted with re-writing evaluation component. Based on the Integrated Model of Community-based Evaluation (IMCBE): a) using the project's measurable objectives, the SAMHSA logic model indicators, and in collaboration staff, developed the quantitative and qualitative measures, data collection instruments and protocols; b) in collaboration with staff, developed and implemented the protocol for data analysis, review, written product production and use by the project; and c) "Building Capacity to Build Capacity" by providing introductory and on-going in-service training on the fundamental principles and methods of community evaluation.

Title: Children's Rehabilitative Services Traumatic Brain Injury Program- Evaluation Component

Funding Agency: HRSA Maternal and Child Health Bureau to the Alabama Department of Rehabilitative Services

Total Amount: \$3,500/ongoing

Percent Effort on Project: 4%

Funding Period: 2/2000 – 12/2001

Role on Project: Evaluation Analyst

Project Description: Assisted with the development, implementation and formative evaluation of the outreach, case coordination service collaboration, and training components of this multi-year project aimed at the prevention of poor quality of life outcomes. Conducted the review and analyses of all standardized and project specific instruments and the resulting qualitative and quantitative data. Prepared all project data reports.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title: Evaluation of the Alabama Community-based Outreach and Education Initiatives
Funding Agency: Bureau of Family Health Services (BFHS) of the Alabama Department of Public Health (ADPH)

Total Amount: \$150,000

Percent Effort on Project: 10%

Funding Period: 1/2000 - 6/2001

Role on Project: Principal Evaluator

Project Description: Wrote evaluation grant. Based on the Integrated Model of Community-based Evaluation (IMCBE): a) conduct intermittent evaluation capacity building workshops for BFHS staff and grantees; b) design and implemented process and intermittent outcomes evaluation; c) assisted grantees in the re-development of their objectives to make them specific, measurable, attainable, relevant and time anchored; d) assisted grantees in the development of common, content and site specific indicators, and measures; e) collaborated, coordinated and implemented with BFHS staff and grantees the projects' protocols, instrument and methods to collect state-level and project specific data; f) developed and implemented the protocol for data analysis, review and use by the BFHS staff and Community projects; and g) provided assistance to BFHS staff and community projects on issues and situations specific to community outreach, collaboration, negotiation and program development and sustainment.

Title: Northern Health Clinic Teen Outreach - Evaluation Component

Funding Agency: Jefferson County Department of Public

Total Amount: \$3,000/ongoing

Percent Effort on Project: 4%

Funding Period: 10/99 - 8/2000

Role on Project: Evaluation Consultant

Project Description: Assisted with the development, implementation and formative evaluation of the outreach, education and behavior change intervention component of this multi-year project aimed at the prevention of subsequent pregnancies and births of teen mothers Northern Birmingham Area of Alabama.

Title: Housing Program Plus Development Project .

Funding Agency: Fannie Mae Foundation to Betty Bock and Robert Corely, PIs, of the UAB Center for Urban Affairs.

Total Amount: \$2,727,977 total cost of the project over a three year period

Percent Effort on Project: 5% on project with evaluation support of 15%

Funding Period: 9/98-12/2000

Role on Project: Co-Investigator and Principal (Community-based) Evaluator

Project Description: Assisted with writing the grant. The evaluation component is a collaborative/participatory approach that is based on the methods of the Integrated Model of community-based Evaluation (IMCBE) originated by the evaluator that includes a resident and neighborhood asset assessment and building component.

Title: Birmingham Healthy Start Community Outreach component – Program and Community-based Evaluation Component

Funding Agency: Jefferson County Department of Public through a grant from the Federal Maternal and Child Health Bureau

Total Amount: \$140,000(funding-to-date)/ongoing

Percent Effort on Project: 8%

Funding Period: 6/98 - 8/2001

Role on Project: Co-Investigator and Community-based Evaluator

Project Description: Wrote community-based evaluation grant. Collaboratively developed, implemented and formatively evaluating the community outreach and networking component of this multi-year project aimed at the reduction of infant mortality negative maternal outcomes in the Greater Birmingham Area of Alabama.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title: Implementation and Use of the Alabama Sickle Cell Disease Registry (Research Project 7)

Funding Agency: National Heart, Lung & Blood Institute (P60 Grant # 1P60HL58418-01)

Total Amount: \$300,000/5 year for research project 7

Percent Effort on Project: 10%

Funding Period: 4/98-3/2001

Role on Project: Principal Investigator (Project 7) (Tim Townes, PhD Center PI)

Project Description: Wrote the research grant. This social epidemiological research is using a collaborative/participatory approach that is based on the methods of the Integrated Model of community-based Evaluation (IMCBE).

Title: Hale County Empowerment and Revitalization Organization (H.E.R.O.), Inc. - Rural Health Outreach Project

Funding Agency: U.S. Office of Rural Health

Total Amount: \$500,000 total cost of the project over a three year period to HERO

Percent Effort on Project: 10%

Funding Period: 10/97-9/2000

Role on Project: Co-Investigator and Principal Evaluator

Project Description: Assisted with writing the grant. Collaboratively developed, implemented and formatively evaluating this first time health-based outreach and targeted service delivery project. The evaluation is a collaborative/ participatory approach that is based on the methods of the Integrated Model of community-based Evaluation (IMCBE) originated by the evaluator that includes a "Building Capacity to Build Capacity" component.

Title: YWCA of High Point/Sickle Cell Disease Association of the Piedmont (High Point and Greensboro, North Carolina) Collaborative Adolescent Pregnancy Prevention Project (CAPPP) - Evaluation

Funding Agency: North Carolina Department of Health

Total Amount: \$100,000 per year total project cost / 5 year project

Percent Effort on Project: 5%

Funding Period: 8/97 - 8/02

Role on Project: Co-Investigator and Principal Evaluator

Project Description: Wrote evaluation grant. Collaboratively developed, implemented and formatively evaluating the CAPPP community-based outreach and participatory efforts aimed at primary pregnancy prevention, abstinence, resistance and decision-making skill building and empowerment of adolescents.

Title: Evaluation of the Alabama Community-based Perinatal Initiatives

Funding Agency: Bureau of Family Health Services (BFHS) of the Alabama Department of Public Health (ADPH)

Total Amount: \$85,000

Percent Effort on Project: 10%

Funding Period: 8/97 - 8/2000

Role on Project: Evaluator

Project Description: Wrote evaluation grant. Based on the Integrated Model of Community-based Evaluation (IMCBE): a) develop, based on state-level Perinatal measurable objectives and core principles of the BFHS, indicators, measures, data collection instruments and protocols; b) review and come to an agreement with funded projects on project specific measurable objectives, indicators and measures and methods to collect state-level and project specific data; and c) develop and implement a protocol for data analysis, review and use by the BFHS and Community Perinatal support and medication/transportation projects.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title: Bureau of Family Health Services (BFHS) of the Alabama Department of Public Health (ADPH) Community-based Health Initiatives (CBI) – Evaluation Component
Funding Agency: Funded as a separate part of the State Systems Development Initiative (SSDI) contract to the UAB Department of Maternal and Child Health

Total Amount: \$105,000

Percent Effort on Project: 10%

Funding Period: 8/97 - 8/2000

Role on Project: Evaluator

Project Description: Wrote evaluation grant. Based on the Integrated Model of Community-based Evaluation (IMCBE): a) develop, based on state-level CBI measurable objectives and core principles of the BFHS, indicators, measures, data collection instruments and protocols; b) review and come to an agreement with funded projects on project specific measurable objectives, indicators and measures and methods to collect state-level and project specific data; c) develop and implement a protocol for data analysis, review and use by the BFHS and CBI projects; and d) “Building Capacity to Build Capacity” by providing introductory and on-going in-service training to grant recipients, regional and state-level administrators on the fundamental principles and methods of community evaluation.

Title: Population approach to linking social/health services and clinical management issues of sickle cell disease (SCD).

Funding Agency: University of Alabama at Birmingham’s Lister Hill Center for Health Policy

Total Amount: \$14,021

Percent Effort on Project:

Funding Period: 6/97 - 8/98

Role on Project: Principal Investigator

Project Description: Assisted with writing the research grant. Small grant aimed at: a) developing a social epidemiological profile of persons with SCD in North Carolina; b) developing and refining a multi-conceptual ecological model linking bioclinical and disease management, health and human services and community-based contextual domain; and c) to utilize differing statistical methodologies in the demonstration of key components of the multi-conceptual model.

Title: Medical Center of Delaware Adolescent Maternity Service (AMS) Pregnancy Intervention Project - Evaluation

Funding Agency: Christiana Care of Delaware

Total Amount: \$74,692 / 2-year project

Percent Effort on Project: 10%

Funding Period: 4/96-11/99

Role on Project: Principal Investigator and Principal Evaluator

Project Description: Wrote evaluation grant. Developed, implemented and currently formatively evaluating the AMS’s community-based outreach and participatory efforts aimed at secondary pregnancy reduction, reduction of post-natal complications and life-skill empowerment of adolescents.

Title: Evaluation of the Cumberland County Partnership for Children (CCPFC) Smart Start Initiative - Evaluation

Funding Agency: State of North Carolina Department of Human Services

Total Amount: . \$190,274

Percent Effort on Project: 10%

Funding Period: 12/95-9/2002

Role on Project: Principal Investigator and Principal Evaluator

Project Description: Assisted with writing the evaluation grant. Developed, implemented and currently formatively evaluating the efforts of the CCPFC to locally implement the statewide, community-oriented initiative aimed at empowering families to build on strengths and increase the overall well-being of children. The evaluation is a collaborative/ participatory approach that is based on the methods of the Integrated Model of community-based Evaluation (IMCBE) originated by the evaluator. The project also includes a “Building Capacity to Build Capacity” component that involves the provision of introductory and on-going training with grant recipients on the fundamental principles and methods of community evaluation

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title: North Carolina Regional Research Center on Head Start Quality

Funding Agency: Administration on Children, Youth and Families, Department of Health and Human Services

Total Amount: \$2,390,697

Percent Effort on Project: 10%

Funding Period: 10/95-7/96

Role on Project: Co-Investigator

Project Description: Assisted with writing the research grant. Lead community and family program evaluation component, assist with health evaluation section and the research team with the development and implementation of measures suitable for documenting quality in these domains of service delivery.

Title: Division of Policy and Ethics, Duke/UNC Comprehensive Sickle Cell Center

Funding Agency: National Heart, Lung and Blood Institute, NIH

Total Amount: \$ 75,000

Percent Effort on Project: 10%

Funding Period: 5/95-9/96

Role on Project: Co-Principal Investigator and Associate Director

Project Description: Assisted with writing the grant. Assist with management of business and service activities; development, implementation and analysis of health services and community based research of issues impacting persons with Sickle Cell Disease.

Title: North Carolina Smart Start Family Ties Project - Evaluation

Funding Agency: The State of North Carolina, Department of Human Resources, Division of Family Development

Total Amount: \$42,277.00

Percent Effort on Project: 20%

Funding Period: 11/94-8/95

Role on Project: Principal Investigator and Principal Evaluator

Project Description: Wrote evaluation grant. Development, implementation and analysis of needs and assets assessment procedures, materials and data. Participate in community level decision making. Collaborate with state level and local (county) agency personnel in the utilization and dissemination of information from project.

Title: Training Program in Maternal and Child Health

Funding Agency: Bureau of MCH

Total Amount: \$1,552,205

Percent Effort on Project: 14%

Funding Period: 7/94-9/96

Role on Project: Investigator

Project Description: Assisted with writing the grant. Provide academic and practical skill training to students enrolled in the Department of Maternal and Child Health, University of North Carolina at Chapel Hill.

Title: Bridges Community Resource Center - Evaluation

Funding Agency: Cumberland County (North Carolina) Schools

Total Amount: \$50,000

Percent Effort on Project: 5 %.

Funding Period: 7/94-9/2002

Role on Project: Principal Investigator and Evaluator

Project Description: Wrote evaluation grant. Development, implementation and analysis of program services data. The evaluation is a collaborative/participatory approach that is based on the methods of the Integrated Model of community-based Evaluation (IMCBE) originated by the evaluator

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title: North Carolina Smart Start House Calls Project - Evaluation

Funding Agency: The State of North Carolina, Department of Human Resources, Division of Family Development.

Total Amount: \$24,012.00

Percent Effort on Project: 20%

Funding Period: 3/94-6/94

Role on Project: Principal Investigator and Evaluator

Project Description: Wrote evaluation grant. Development, implementation and analysis of needs assessment procedures and data. Participate in community level decision making. Collaborate with state level and agency personnel and utilization and dissemination of information from project.

Title: Epidemiological Analysis of Client and Program Characteristics for the North Carolina State Sickle Cell Syndrome Program

Funding Agency: Junior Faculty Development Award from the University of North Carolina at Chapel Hill

Total Amount: \$3,000

Percent Effort on Project: 5%

Funding Period: 1/94-12/94

Role on Project: Principal Investigator

Project Description: Wrote research grant. Development, implementation and analysis of cross-sectional study of characteristics of clients using North Carolina Sickle Cell Syndrome Services in 1993.

Title: Smart Start Inclusion Project, Principal Investigator Virginia Buysse, Frank Porter Graham Child Development Center

Funding Agency: State of North Carolina Department of Human Services

Total Amount: Funds shared with Smart Start Project

Percent Effort on Project: 10%

Funding Period: 12/93-9/96

Role on Project: Co-Investigator

Project Description: Assisted with writing of the analysis grant. Developed and assisted with the writing of the measurement procedures for the family, provider, and community resource/service components. Overall analysis of the project with special emphasis on family, provider, and community resource/service issues.

Title: Parental Caregiving with Infants Sero-Positive for HIV, Principal Investigator Margaret Miles, UNC-CH School of Nursing

Funding Agency: U.S. Department of Health and Human Services

Total Amount: \$1,163,426

Percent Effort on Project: 10%

Funding Period: 6/93-5/96

Role on Project: Investigator

Project Description: Assisted with writing of the grant. Developed and assisted with the writing of the measurement procedures for the family and community resource components. Overall analysis of the project with special emphasis on family and community resource issues.

Title: Pilot Study for the Development of a Program of Transition for Individuals with Sickle Cell Disease

Funding Agency: Comprehensive Sickle Cell Program and the School of Public Health's Center for Minority Health at the University of North Carolina at Chapel Hill.

Total Amount: \$3,000

Percent Effort on Project: 5%

Funding Period: 9/92-6/94

Role on Project: Principal Investigator

Project Description: Wrote research grant. The primary aim of the study was the development, piloting and analyzing a set of new instruments designed to assess perceptions about transition to adult care of adolescents and adults with sickle cell disease, their parental caretakers and national cohort of providers.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Title: Evaluation of North Carolina's Smart Start Program

Funding Agency: State of North Carolina, Department of Human Resources, Division of Family Development

Total Amount: \$600,000

Percent Effort on Project: 10%

Funding Period: 7/93- 9/96

Role on Project: Co-Investigator

Project Description: Assisted with the writing of the research grant. Developed and assisted with the writing of measurement procedures for the medical, family, and community resource/service components. Overall analysis of the project with special emphasis on medical, family, and community resource/service issues.

Title: Parental Care-giving with HIV Infectious Infants

Funding Agency: NIMH

Total Amount: \$1,163,426

Percent Effort on Project: 9%

Funding Period: 6/93-5/96

Role on Project: Investigator

Project Description: Assisted with the writing of the research grant. Develop and write conceptual and measurement procedures for the family and community resource components. Overall analysis of the project with special emphasis on qualitative methods and issues of family and community resources.

Title: National Study of Existing Mutual Assistance Groups for Adolescents with Sickle Cell Disease and Impact of Mutual Assistance Groups on the Psychosocial Functioning of Adolescents with Sickle Cell Disease

Funding Agency: Duke University Comprehensive Sickle Cell Center, at the University of North Carolina, Chapel Hill

Total Amount: \$100,000

Percent Effort on Project: 50%

Funding Period: 7/91-6/92

Role on Project: Co-Principal Investigator

Project Description: Wrote the research grant. Supplemental Project to the Parent Grant -- The Impact of Self-Help Groups on Adults with Sickle Cell Anemia, NIH Grant# 5P60 HL28391-08---303-6639, Kermit Nash, Ph.D., P.I.

Title: Psychological Effects on Symptom Perception (Barbara Curbow Ph.D, PI)

Funding Agency: Johns Hopkins University, School of Hygiene and Public Health, Department of Environmental Health Sciences

Total Amount: \$250,000

Percent Effort on Project: 10%

Funding Period: 1/87-8/87

Role on Project: Research Assistant

Project Description: Programming/Data Analysis various projects

Title: Impact of Hospital Discharge Planning on Patient Outcomes (Donald Steinwachs Ph.D. P.I) 5-R18 HS 05410

Funding Agency: National Center for Health Services Research

Total Amount: \$350,000

Percent Effort on Project: 10%

Funding Period: 5/86-9/86

Role on Project: Research Assistant

Project Description: Programming/Data Analysis various projects

3. **Other Funded Practice-based Research**

Title: Multi-Site Pilot Study of Transition to Adult care for Adolescents with Sickle Cell Disease

Funding Agency: Internal funds from University of Alabama at Birmingham to the UAB Comprehensive Sickle Cell Center

Total Amount: \$3,000

Percent Effort on Project: 5%

Funding Period: 1/98 to 5/04

Role on Project: Principal Investigator

Project Description: Wrote the research grant. Building on previous pilot (1994) research, this national study was designed to implement and analyze a set of data collection tools designed to assess adolescent, young adults with sickle cell disease and their parental caretaker perceptions regarding and readiness for transition to adult care and life.

Title: Care utilization and Costs for Medicaid Covered Children with Sickle Cell Disease (SCD): A ten year review of Alabama's Claims

Funding Agency: Internal funds from University of Alabama at Birmingham to the UAB Comprehensive Sickle Cell Center

Total Amount: \$3,500

Percent Effort on Project: 5%

Funding Period: 1/98 to 2/04

Role on Project: Co-Principal Investigator (Janet Bronstein, PhD, PI)

Project Description: The goal of this project is to document the average care costs of care and the distribution of costs of care, by type of service provided, across the population of children ages 0 to 18 years who are diagnosed with SCD.

4. **Pending Research/Evaluation**

Title: Taking Transition Best Practice to Scale: Implementing Transition Practice and Programs (R13)

Funding Agency: Agency for Health Care Research and Quality (AHRQ)

Total Amount: \$100,000 per/year 3/years planned

Percent effort on Project: 5% (planned)

Funding Period: (planned).

Role on Project: Co-I, Content Expert

Project description: The project is a collaborative effort with Virginia Commonwealth University School of Medicine, Memorial Healthcare of Florida, University of Miami, and the University of North Carolina at Greensboro. The Potential Aims of the planned project are (as a working conference effort): a) To review existing knowledge and current practices related to the scale-up and spread of best practice in the transition from adolescent to adult healthcare; b) To identify key challenges and gaps in current research, policy, and practice related to scale-up and spread in the transition from adolescent to adult healthcare; c) To launch specific activities to operationalize this agenda, creating a plan of action to prioritize research, policy, and practice activity; d) To develop and disseminate a detailed agenda outlining critical research, policy, and practice initiatives on these topics; and e) To identify a model for transitioning programs to begin using.

3D. **Other Scholarly Research and Evaluation**1. **Methodologies**a. **Integrated Model of Community-based Evaluation (IMCBE)** (1997, Updated 2011).

Purpose: Community projects and settings pose difficult and unique challenges in designing and implementing sound evaluations. There is a lack of conceptual and practical fit between the needs of service providers and those hired to conduct evaluations. The approach that forms the foundation of the ***Integrated Model of Community-based Evaluation (IMCBE)*** is designed to address and provide a functional framework to provide this fit.

Update: In the updated reconceptualization of the IMCBE [*Integrated Model Approach to Program Evaluation (IMAP Evaluation)*] we have come to recognize that several prominent evaluation theorists and practitioners have advocated this need to understand the underlying mechanisms that inform program developers, analysts, evaluators and stakeholders of the linkage between inputs, activities and outputs: (a) address shortcomings in the IMCBE based on current recommendations and evaluation practice (broadening its focus), (b) provide a streamlined road map that will address foundational principles, prerequisites and characteristics of a comprehensive evaluation, (c) emphasize mechanism-based analysis and construction of practice-based evidence, and (d) foster development of outcome-oriented and utilization-focused findings at the **individual, programmatic, community/local, state, national and international levels.**

Rationale and Knowledge base: Based on knowledge gained and lessons learned from more than 15 years of community-based and participatory evaluation training and experience, the IMCBE is a conceptually sound evaluation methodology that allows for a bridging of social scientific rigor with an understanding of the elements essential for addressing community members' and agencies' needs for meaningful outcomes that allow them to determine the efficiency and effectiveness of their efforts. Developed in 1997 this approach to evaluating programs located in community settings is based on the integration of principles of community development, competence, outreach and capacity building and participatory and collaborative approaches to evaluation that emphasize involving those being evaluated in the evaluation process. The model illustrates the prerequisites, characteristics, foundational principles and implementation phases viewed as necessary to successfully conduct a true community-based evaluation that maintains the scientific rigor to make the results meaningful to the program administrators and participants as well as present and future sources of funding. The emphasis in this approach is on mutual respect leading to an understanding of the elements that are essential to satisfying the community members' needs for meaningful outcomes and federal, state, and local funding agencies' needs to determine the efficiency and effectiveness of the way in which their dollars are being put to use. The updated conceptualization of the model

Documentation: A full discussion of the IMCBE can be found in **Telfair, J. & Mulvihill, B.A.** (2000) Bridging Science and Practice: The Integrated Model of Community-Based Evaluation. Journal of Community Practice, 7(3): 37-65. **In progress**, (Telfair, Dave and Brown 2011) *Integrated Model Approach to Program Evaluation (IMAP Evaluation) Mapping Program Evaluation – Reconceptualization and expansion of an existing community-based evaluation model (paper and book).*

Use: The IMCBE conceptual approach has been successfully implemented since the inception of the summer of 2002 (by Telfair and others). The IMCBE/IMAP is modeled primarily to enhance and foster ongoing communication between evaluators, stakeholders and partnering agencies. This framework allows the evaluators, stakeholders and grantee agencies to: (a) make necessary and ongoing modifications to program protocols as needed; (b) determine and develop process and outcome measures; (c) operationalize process and outcome measures; (d) implement IMCBE Monitoring and Evaluation (M&E) framework; and (e) establish communication and regular flow of information from evaluators to program staff to stakeholders and vice versa. In addition, this M&E framework lends itself to documenting: (i) challenges associated with development and implementation of a culturally competent service delivery protocol for diverse agencies, programs and services at the National, State, Local and International levels; (ii) lessons learned from programmatic and contractual efforts; and (iii) revisions and resolutions of challenges. The IMCBE M&E framework is a formative, mixed-method approach that involves triangulated assessment and evaluation of qualitative and quantitative indicators of proposed goals and objectives of agencies, programs and services. The components of the framework included: (1) Performance Monitoring - involved documentation of proposed activities, targeted outcomes and its linkages to corresponding goals and objectives of each network and overall program in a systematic manner. This component provided opportunities to identify issues related to the agency-specific and

cross-site planned activities, troubleshoot, and revise and/or modify programmatic efforts to best fit the linked goals and objectives. (2) Outcome Evaluation - involves assessment of all outcome-related components of the individual agencies, programs and services. This includes assessment and evaluation of qualitative and quantitative statistical indicators associated with individual sites and comparative studies. (See **IMAP Evaluation model at the end of CV**)

The approach of the IMCBE/IMAP forms the foundation for several funded Public Health Practice efforts including work with the Maternal and Child Health Bureau, the states of North Carolina and Alabama, the Couples HIV counseling in two African Capitals NIH R01 (**Susan Allen**, PI) and the recently completed Sickle Cell Disease National Coordinating and Evaluation Center and the Stroke Belt Elimination Initiative (Magic City Stroke Prevention Project) (**J. Telfair**, PI on both projects). In 2011 the model was updated and is pending use in collaborative projects with the University of Maryland, Piedmont health Services (CBO) and the pending new competitions for HRSA and CDC.

2. Infrastructure Development

A. The Center for Social, Community and Health Research and Evaluation (CSCHRE) **Director:** **Joseph Telfair**

The Center for Social, Community and Health Research and Evaluation (CSCHRE) at UNCG will build a foundation of support for and engagement in projects related to public health genetics/genomics and the translation and community-based application of a broad range of health and social research. The rationale for the proposed Center for Social, Community and Health Research and Evaluation (CSCHRE) stems from the recognition that there is an increasing awareness of and demand for community-based social and public health practice, research and policy on children, adolescents, families, adults and service systems. This increased recognition and demand is aimed at and allows for building the capacity of service providers, researchers, teachers, and communities to ensure the health and well-being of those served. The CSCHRE's mission is realized through a myriad of multi-disciplinary and multi-level activities (discussed below) **linked to the CSCHRE initial Scope of Work (SOW) and tasks and opportunities that emerge**. The mission of the CSCHRE: *To stimulate, develop, participate in, and conduct public health practice, genetics and genomics education, evaluation and research in the context of tertiary care, community, and other settings within five areas: 1) health education and promotion service delivery; 2) consultation and technical assistance; 3) education, training and dissemination; 4) population-based assessment, monitoring and evaluative research; and 5) health disparities in persons at risk for or with genetic and other disorders.*

A major strength of the CSCHRE is its focus on applied evaluation and research in health and human services and the incorporation of academic and community-based personnel in its education, service, and evaluation activities. This strength fits nicely with the foci of several of UNCG's Centers, Schools and Program and UNCG's mission as a research university where collaborative scholarship and creative activity enhance quality of life across the lifespan.

3. Assessment Tools

By permission of the author all assessment tools have been in use whole or in part in the U S and other countries since their development.

a. The Sickle Cell Transfer Questionnaire (SCTQ) (1994, modified 1996)

Purpose: The *Sickle Cell Transfer Questionnaire (SCTQ)* has four versions, all designed to elicit provider (P-SCTQ), adolescent (A-SCTQ), young adult (YA-SCTQ) and parent/primary caregiver (PA-SCTQ) -expressed concerns about or demonstration of transition behaviors, expectations of transition, and opinions regarding the need for a systematic transition. The SCTQ is designed for use in research and clinical setting and can be used both cross-sectionally and longitudinally for baseline and outcome assessments.

Development and Methods: The questionnaires is based on observational experiences of adolescents, young adults, parents/primary caregivers, pediatric and adult clinicians, and interviews with multidisciplinary providers serving adolescents and young adults with Sickle Cell Disease (respectively), and literature findings regarding issues faced by the Sickle Cell Disease (SCD) other adolescent and young adult populations with chronic conditions. The first draft of the SCTQ was written by clients and a

team of multidisciplinary providers who were representative of the potential study groups. The draft consisted of 4 sections: 1) demographics, 2) transfer criteria/expectations, 3) transfer concerns, and 4) transfer experiences.

Results and Outcomes: Based on investigators' collective expertise, an open-ended questionnaire format was thought to be the most consistent with the utilization-focused, participatory approach of the overall survey. Three Delphi rounds of review were conducted with the first draft of the SCTQ by a working team of multi-disciplinary providers. Based on the Delphi results, responses were used to generate limited checklists and open-ended questions. After the last Delphi round, a pilot draft was developed and tested, resulting in the finalized version which was put into use in 1996.

Documentation: Research for the four versions of the SCTQ are found in the initial publication **Telfair, J., Myers, J., and Drezner, S. (1994).** Transfer As a Component of the Transition of Adolescents with Sickle Cell Disease to Adult Care: Adolescent, Adult and Parent Perspectives. Journal of Adolescent Health. 15(11): 558-565 and subsequent publications by Telfair and his colleagues in 1998 and 2004.

Use: Since it was finalized date for the SCTQ adolescent, parent/primary caregiver and young adult versions have been collected in collaboration with the members of the Multi-Site Study of Transition of Adolescents and Young Adults with Sickle Cell Disease Collaborative Group (current n = 27 sites and growing) and is currently used (in its original for or modified) by an ever growing group of community service providers and researchers interested in the issue of transition to adult care for young persons with SCD and other chronic conditions. To date interest and use of the instrument in practice-based research is ongoing.

b. **The Sickle Cell Self-Care Agency in Adults - Chronic Illness Assessment Interview for Sickle Cell Disease (CIAI-SCD) (2001)**

Purpose: *Chronic Illness Assessment Interview for Sickle Cell Disease (CIAI-SCD)*, is an instrument based on a model of self-care for adult patients with chronic medical conditions (Connelly, E.C. Self-Care and the Chronically Ill Patient. *Nursing Clinics of North America*, 1987 22:621-629). Self-care refers to the process by which patients take an active role in their health care and management of their condition. The CIAI-SCD assesses an individual's perceptions of general health and psychological well-being, which are assumed to be the underlying factors necessary for successful self-care in the context of a chronic illness.

Development and Methods: The CIAI-SCD was administered to 104 adults with Sickle Cell Disease. Factor analysis identified three factors that reflected the psychological constructs of health satisfaction, health-related anxiety, and health-related social support. Preliminary evidence for the internal consistency, test-retest reliability, content validity, construct validity, and convergent validity of the CIAI-SCD was obtained.

Results and Outcomes: The test-retest reliability analyses show adequate stability of this instrument, measured with a time interval of approximately six months, with test-retest correlations ranging from .45 to .55. Further evidence for the reliability of two of the subscales was provided by the observed levels of internal consistency. The estimated alpha for the three sub scales Cronbach's alpha was calculated for each of the three CIAI-SCD subscales. This resulted in an alpha of .86 for the health satisfaction subscale, .80 for the health anxiety subscale, and .66 for the health support subscale. The latter subscale consisted of only three items. Because internal consistency estimates are dependent on the number of scale items, the Spearman-Brown prophecy formula was applied to the health support subscale to determine the number of additional items necessary to elevate alpha to .80 (Nunnally & Bernstein, 1994), which indicates a good level of reliability. Results indicated that the addition of three items to the subscale (for a total of 6 items) would yield an estimate for Cronbach's alpha of exactly .80. An analysis of the inter-scale correlations indicated that each subscale was marginally related to the other two, though none of the relationships achieved statistical significance. The health satisfaction and health anxiety subscales tended to be negatively related ($r = -.18$, $p < .08$), while small positive correlations between health anxiety and health support ($r = .17$, $p < .09$), as well as between health satisfaction and health support ($r = .19$, $p < .06$), were observed. Eighty-four of the original 104 (adults) participants (82%) were assessed a second time, six months after the first assessment. The 6-month test-retest reliability for each subscale was as follows: $r = .55$ for the health satisfaction subscale ($p < .001$), $r = .48$ for the health anxiety subscale ($p < .001$), and $r = .45$ for the health support subscale ($p < .001$). After further refinement and validation, the CIAI-SCD has proven to be a useful tool for assessing factors related to self-care skills among adults with sickle cell disease.

Documentation: Research for this scale is presented in Lenoci, J., Telfair, J., Cecil, H. and Edwards, R.R.,(2002). Development and Testing of a Tool to Assess Self-Care Agency in Adults with Sickle Cell Disease. Western Journal of Nursing Research. 24(3): 228-245.

Use: The CIAI-SCD is has been reviewed for potential use by a number of agency and individuals. For example, it has been used by the Sickle Cell Disease Association of the Piedmont (North Carolina), in the successfully defended dissertation (PhD nursing University of South Carolina) of Corettea Jenerette, PhD, RN, AOCN currently at the Yale University School of Nursing where she plans to use it in a recently applied for study of health disparities in person with SCD; it has recently been requested for use by Maxine Adegbola at the University of Texas at Arlington in her study 'Caring management of vulnerable populations, specific interest sickle cell disease' . To date interest and use of the instrument in practice-based research is ongoing.

c. **Sickle Cell Disease Self-Efficacy Scale (SCSES) (1999)**

Purpose: Self-efficacy (SE), a component of social learning theory developed by Bandura, 1977), and refers to personal judgments concerning one's capacity to perform specific actions which result in specific outcomes. In particular, self-efficacy focuses on individuals' convictions that they can exercise control over their motivations, behaviors, and social environments. Typically, self-efficacy is conceptualized in a situation-specific manner rather than as a personality trait, indicating that efficacy beliefs may vary widely across environments and situations. Support for the potential utility of self-efficacy as a mediator of SCD coping is provided by research in the area of adjustment to chronic illness. Thus, Self-efficacy was believed to be of importance for SCD to date, however, only one study has investigated the role of self-efficacy in psychosocial adjustment to SCD (Thompson et al., 1998), and this is the only tool specifically designed to measure SE in persons with SCD.

Development and Methods: The psychometric properties of the 9-item scale measuring disease-specific perceptions of self-efficacy were investigated in a community-based sample of adults (N=83) with sickle cell disease (SCD). The *Sickle Cell Self-Efficacy Scale (SCSES)* was comprised of nine questions relating to participants' perceptions of their ability to function on a day-to-day basis and to manage SCD symptomatology (e.g., episodes of pain). On a five point Likert scale response choices range from "not at all sure (1)" to "very sure (5)". As the items comprising the SCSES were relatively few (nine), queried efficacy beliefs in rather general terms, and were based on responses from fewer than 100 study participants, we elected not to factor-analyze the scale. Thus, total scores were obtained by summing responses to all nine items, with higher scores indicating greater self-efficacy.

Results and Outcomes: Results of the initial psychometric testing of the SCSES demonstrated a Chronbach Alpha of .89 and on re-test the Alpha was .84. Thus, the SCSES demonstrated good test and re-test internal consistency, discriminant validity, and convergent and predictive validity, both with previously validated measures of related constructs as well as with reported SCD symptomatology, in that levels of SCD-specific efficacy beliefs related negatively to levels of SCD symptomatology and scores on the SCSES related positively to measures of self-esteem, mastery, and internal locus of control. The SCSES psychometric properties for the Overall, the instrument appears reliable and valid for assessing clients' self-efficacy for engaging successfully in day-to-day activities despite having SCD.

Documentation: Research for this scale is presented in two paper demonstrating its initial test and re-test capabilities. These are Edwards, R. R., Telfair, J., Cecil, H., and Lenoci, J., (2000). Reliability and validity of a Self-Efficacy Instrument Specific to Sickle Cell Disease. Behaviour Research and Therapy 38(2000): 951-963. and Edwards, R., Telfair, J., Cecil, H. and Lenoci, J., (2001) Self-efficacy as a Predictor of Adult Adjustment to Sickle Cell Disease: One-Year Outcomes. Psychosomatic Medicine 63(5): 850-858.

Use: Overall, the SCSES demonstrated good reliability and validity, and therefore appears suitable for use with adult SCD populations. Moreover, it is to be the first available disease-specific efficacy measure utilized with a sickle cell population. This relatively brief instrument could be easily administered in a community health-care setting. Given the intimate ties between self-efficacy and behavior established in a number of studies across diverse populations, as well as the availability of interventions that have been demonstrated to enhance self-efficacy, identification of at-risk individuals low in self-efficacy may provide opportunities to reduce adverse SCD impact. Assessment of efficacy beliefs in this population might lead to interventions targeted toward those individuals who are at high risk for poor symptom management and decreased psychosocial adjustment as a consequence of low self-efficacy. As part of the Self-care agency and Sickle Cell Transfer Questionnaires, the SCSES is in use by a number of agencies and researchers and is under consideration for use by scientist in training and community-based

agency personnel who wish to study and/or develop interventions for addressing the psychological aspects of SCD. To date interest and use of the instrument in practice-based research is ongoing.

d. Program Questionnaire (PQ) (1994, modified 1996)

Purpose: Federal and local legislation and advocacy efforts have led to a growing effort to assure that services to women, children, adolescents, and families adhere to the four Maternal and Child Health core principles for an ideal system of care: family-centered, community-based, coordinated, and culturally competent (MCHB, Integrated Services Application Guidance, 1998). A critical goal for these efforts is the adoption by service providers of these core service principles and related practices. Despite these endeavors, little importance has been placed on the measurement of these four core principles as part of the assessment or evaluation of MCH service programs. The latter is critical if policy-makers, funders, administrators, and service providers are to determine the extent to which programs actually adhere to, practice, and effectively implement these four core principles of care. The *Program Questionnaire (PQ)* was designed to assess the multi-faceted nature of program functioning specific to service activities, principles of practice with clients and their families (family centered-care), collaboration with other agencies, attention to the diverse cultures of the clients they serve and perceptions of the communities in which services are provided. Its use is for programs and agencies serving women, children, adolescents and their families. It was believed that in order to capture program functioning it was vital that measures of these parameters are captured comprehensively from the point of view of the program staff member as a self-assessment not of themselves, but that of their program. This instrument not only allows for a general assessment of program/service specific to the core principles; but for the identification of areas that need to be further addressed or targeted and allow service providers to assess areas where they need to grow or are growing or need to be further assessed. The ability to make analytic comparisons and linkages with key indicators of the core principles of MCH is of critical importance.

Development and Methods: Items and scales for the PQ came from adaptation of existing tools (used with permission), items recommended in the literature and by a group of service providers in two Delphi and one pilot round of assessment in 1994 and revision of the PQ in 1996. Specifics of the Variables and Measures of the PQ comprise four concepts and six assessment components: 1) **Family Centered Activities** based on the practice principles guiding the overall program and specific staff was measured using the modified (for this project) *Family-Centered Program Rating Scale - Provider's Version (FCPRS-P)* developed by the Beach Center on families with disabilities (Murphy, Lee, Turbiville, Turnbull and Summers, 1991). It consists of 59 statements about program features (only 23 of the questions are used as part of the current evaluation). 2) **Agency Collaboration** principles and practices was measured using the *Visionary Focus (VF)* and *People and Relationships (PR)* subscales of the *Collaborative Practices Inventory (CPI)* developed by Elder (1994) of the Carlson Learning Company. 3) **Program Specific Cultural Competence (PSCC)** was measured using a modified version of the Cultural Service Delivery Assessment Questionnaire developed by the National MCH Resource Center on Cultural Competency [Evans, 1994]). As part of its use here the PSCC (tentatively) is made up of an Overall (Total Competence [TC]) and five subscales - Service Access (SA), Service Outreach (SO), Staff Training (ST), Service/Program Adaptation (SPA), and Staff Integration and Involvement (SII). 4) **Community Involvement, Awareness, Empowerment and Child Service, Quality of Life** was measured using the *Community Perception Questionnaire (CPQ)* developed specifically for this tool. The CPQ is a 15 item, Likert 5 + 5 format ("Never" to "Very Often" and "Strongly Disagree" to "Strongly Agree") designed to assess the program staff member's perception of the extent to which individuals in the communities they serve are involved, are aware of problems and other issues, feel empowerment and understand the quality of life of services for children. 5) qualitative questions soliciting the program staff's perception of: a) what the program does to make it user friendly for families and b) what the program could do to be more helpful and welcoming to families. 6) Additional

Demographic Questions were gathered on the program staff's gender, years of schooling, race/ethnicity, age, parental status, age of children, length of time in and proximity to place of employment, and zip code.

Documentation: Report on the use of the PQ can be found in a number of state-level technical reports by J. Telfair such as **Telfair, J.** and Dodson, J. , Community-based Perinatal Grant Initiatives Final Evaluation Report, 1999-2000. Technical report prepared for the State of Alabama Bureau of Family Health Services, Division of Women's and Children's Health - Women's Health Branch, Alabama, December 2000 and in the publication **Telfair, J.** (2003) An Evaluation of State Perinatal Community-based Programs in Alabama: Overview. Public Health Reports, 118:484-486.

Use: The PQ as an evaluation tool is designed to be used both cross-sectionally and longitudinally to provide a service program with a baseline and intermittent assessment of their progress in meeting four

Maternal and Child Health core principles. To date work is in progress to use of the cumulated data of over 100 agencies and programs representing more than 400 staff person who completed the PQ and over 160 who have completed it twice. The plan is to look at programs by type - referral/screening (low contact) and service provision (high contact) - and nature (specific program/service groupings e.g., child care, mental health, etc.) to determine if, why and how important is the assessment and relationship of the core principles (e.g., cultural competence, family centeredness, etc.) by type and nature of the program.

4. Scholarly Products

1. International Public Health Program Planning and Evaluation Course (2009)

The International Public Health Program Planning and Evaluation course was developed specifically for the South Asia Consortium's Masters in Public Health (MPH) program. The consortium is a partnership between Manipal University (India, Malaysia and Sri Lanka), Agra Khan University (Pakistan) and University of Alabama at Birmingham (USA). Building on a successful mentoring and training program for faculty, advance graduate students and health workers from the consortium countries the curriculum for an MPH was developed. As part of this curriculum a request was made to include the basic Program planning and evaluation methods workshop as a core course. The focus of the course is on methods applied to the challenges inherent in the development of skills associated with community/service-based participatory evaluation of health promotion programs. The goal of the course is achieved by focusing on skills and methods associated with community/service-based evaluation research. At the end of this course, are able to: 1) Develop important questions in community/agency/program evaluative research; 2) Formulate a research study to answer community/agency/program evaluative research questions; 3) Construct measures of variables affecting important public and community/agency/program health outcomes, or select from among existing measures for evaluative research purposes; 4) Manage the data collection, organization, cleaning, analysis, and reporting functions in an evaluative research project; 5) Assess which ethical principles apply to a research project; and 6) Appraise the quality and appropriateness of evaluative research done by others through a peer-reviewed process.

The course is taught by faculty from each of the consortium sites. Between the spring of 2009 and fall of 2010, Dr. Telfair conducted a series of 3-5 day train-the-instructor sessions for planned instructors. In addition, follow-up discussions and site visits to ensure implementation fidelity were conducted.

The intent of the course is not only to allow students to build new knowledge and skills, but to also build on knowledge and skills already possessed by the students. Thus within the course, students are exposed to: 1)The process of developing and writing evaluative research, scientific and technical papers and reports; 2) The Integrated Model of Community-Based Evaluation (IMCBE), and the type of communities and community-based health and human service agencies, groups and programs for which it is applicable; 3) Multi-disciplinary and multi-level approaches to the care of diverse populations in communities and community-based settings; 4) The breadth of issues involved in conducting participatory evaluation research with groups, programs, practices and community/service-based service delivery systems design serving diverse populations; 5) The complexity and public health significance of the link between practice and evaluation research specific to a variety of agencies, programs and groups serving diverse populations; and 6) The process of integrating evaluation research into the development of health promotion programs at the community/agency/program level.

The coursework is covered over sixteen sessions that includes: 1) Fundamentals Of Case Review, Critical Thinking; 2) Assessment and Problem-Solving; 3) Foundational principles and concepts underlying practice and evaluation with communities; 4) Pre-requisite Issues of Community Evaluation: The Evaluator; 5) Evaluation Approaches (2 parts); 6) Promising/Best/Evidence and Science-based Practice/Evaluation; 7) Utilization-Focused Evaluation; 8) Social Capital And Asset Assessment; 9) Performance Monitoring and Appraisal; 10) Quantitative Research and Evaluation Methods (2 parts); 11) Qualitative Research and Evaluation Methods (2 parts); 12) Planning For Analysis - Data Review, Analysis And Interpretation; 13) Report Development and Utilization; and 14) Student Class Presentations. **Students are expected to complete assigned work** that includes demonstration of: 1) critical thinking skills (Critical Questions); 2) scholarly writing skills (Literature review and summation); 3) scholarly discussion and speaking skills (class presentation and discussion); and 4) comprehensive understanding of course content (completion of an evaluation Research proposal or critical paper).

- The International Public Health Program Planning and Evaluation course started in the Spring of 2010.
- The International Public Health Program Planning and Evaluation course will be replicated in Kuala Lumpur, Malaysia in collaboration with Manipal University, India in the Spring of 2011.

2. **PUBH 7991/7530 Integrative Experience-Capstone Course (2014, 2017)**

CEPH Integrative Experience Requirement: *each student shall acquire skills and experience in the application of basic public health concepts and of specialty knowledge to the solution of community health problems and demonstrate integration of knowledge through a culminating experience.* This course is for students nearing completion of their MPH or MHA degree in fulfillment of the requirement for an integrative cumulative capstone experience. The focus of the course is two fold: case analyses and professional development.

This course has been designed to fulfill the requirement that all Master of Public Health degree candidates have the opportunity, as defined by the Council for Education on Public Health (CEPH), “to synthesize and integrate knowledge acquired in course work and other learning experiences and to apply theory and principles in a situation that approximates some aspect of professional practice”. All MPH students, regardless of program affiliation, can choose this option for the purpose of fulfilling the CEPH requirement in order to graduate. Though it is preferred that this course be completed during the final term of enrollment (generally in the Spring), any MPH candidate who has completed the entire core curriculum (PUBH 5520G; PUBH 6532; PUBH 6533; PUBH 6534; PUBH 6535; PUBH 6541; PUBH 7790) OR *Completion of all core MPH courses (or concurrent enrollment in remaining core courses) and graduating in the semester in which this course is taken.* The course is offered every term to accommodate the varying graduation schedules of MPH students. *Students enrolled in other degree programs (MHA) are invited and encouraged to enroll in this course though enrollment preference is granted to MPH students.*

Focus and Objectives of the course included: Case Analyses: Lectures on the case analysis method and the art and science of case writing will provide important background knowledge and skills preparing students to complete two main assignments: the analysis of a case and the development of a new written case. Through the analysis of actual cases from the annals of public health practice and the development of a new case from current and emerging areas of critical interest to public health, students working in multi-disciplinary groups will demonstrate a) their ability to apply the general and specific public health knowledge they have learned through their courses of study; and b) effectively apply that knowledge across disciplines to the effective resolution of a public health problem. **Professional Development:** Professional knowledge and skills development will allow the student to engage in activities designed to enhance lessons learned from course work. The objectives for the Professional Development activities include: a) identification of and addressing of the student’s personal strengths and weaknesses in the required competencies - overall and in each of the core public health disciplines; b) application of public health knowledge and principles in a health planning and evaluation process designed to address specific identified areas of weakness; c) identification, access and analyzes of public health data and information needed to develop a public health program plan; and d) demonstration of effective written and verbal communication skills. **Overall Competencies - Course focuses on the integration of the following:** a) Define Public Health and articulate the elements in the public health approach to ensuring the health of our public; b) Explain the historical developments of the field; c) explain the core public health functions; d) Explain how the core public health functions are operationalized at the global, national, state and local levels; e) Describe the Public Health infrastructure within the USA and beyond (global); f) Define the five core knowledge areas of public health: biostatistics, environmental health sciences, epidemiology, health policy and management, and social and behavioral sciences; g) Explain how state and local governmental public health agencies ensure availability of the ten essential services; h) Describe the history and current status of the interactions between medicine and public health; i) Explain the status of the public health workforce and efforts to expand and ensure the quality and diversity of this workforce; and j) articulate the current issues within the field.

Dr. Telfair was the chief developer of all aspects of this course. He along with the Senior Associate Dean of Academics taught this course as a pilot in the Fall of 2014. Evidence of the course (assessment data and input by pilot students) presented to the college’s leadership and faculty resulted the course being adopted and required for all MPH or MHA degree students in fulfillment of the requirement for an integrative cumulative capstone experience.

2. Database Development project Jiann-Ping Hsu College of Public Health (In-progress)

Focus of the project is the strategic, outcome-based development of an integrated data system for use in reporting and decision-making for the college administration, faculty and staff. The project involves both a small working group and faculty assessment committee. The work in progress has involved review of all existing data sources, review of reporting mechanisms and requirements (such as to accrediting bodies and the university) and capacities – needed and available – to development and sustainment of the end product. Four PDSA cycles are planned. The first cycle involves Student Learning (SLOs) involving efforts to identify, define, operational linked discipline specific and college-level competencies, courses, assessment tools/methods and anticipated functional adjustments (policy, by-laws, syllabi, faculty staff training, student engagement) that are required.

The remaining cycle will focus on faculty, administrative and open (emerging) data, as well as providing ongoing data for Council on Education for Public Health (CEPH), The Southern Association of Colleges and Schools (SACS) and related academic certification requirement and assessment efforts.

(Start HERE 1 August 2017) 4. Teaching and Advising

My approach to and purpose for teaching and advising are based on four core principles: 1) teaching and student advising is one of the primary responsibilities and functions of academia; 2) the environment in which teaching and advising takes place should be one where excellence is expected and one that promotes and nurtures the desire to learn, to acquire and/or refine knowledge and skills; 3) teaching and advising must be grounded in sound scientific evidence, coupled with and/or tempered by practice-based experience; and 4) the outcome of teaching and advising is the student’s ability to integrate knowledge and skills, that is, apply what was learned to meet challenges in and outside of academia. For adult learners, **innovation and the pursuit of new ideas and opportunities** in the dissemination of information such as teaching and the use of other media **is critical**. Sometimes the **innovations** work and sometimes they do not; that is the **risk of taking such an approach**. However, I believe the efforts are worth it since important lessons are learned, many benefit and opportunities are created.

4A. Teaching Expertise And Areas Of Interest

- Qualitative research methods and techniques
- Grant Writing – Special emphasis on writing for practice-based, community and participatory research and evaluation projects
- Children, Adolescents and Adults with Chronic Conditions and their Families
- Public Health practice.
- Application of Cultural and Linguistic Competence in Public Health Practice
- Participatory research and evaluation.
- Health Services Research - grant writing, implementation, data development and practice.
- Professional and lay persons health education and training – Domestic and International
- Public Health Leadership, Administration and Mentoring

4B. Teaching: University Coursework

1. Course Taught at Georgia Southern University (GSU) 2013- present

Quantitative ratings by students of the overall quality of the course and instructor range from 5 = ‘Excellent’ to 1 = ‘Poor’

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

- 5/1999 **Telfair, J.** “Overview of Key Issues for the Evaluation of SCHIP for States and Localities”, **lecture**, presented at the Maternal and Child Health Leadership Skills Training Institute: Planning, Implementing and Evaluating Programs, Scottsdale, Arizona, May 25, 1999
- 3/1999 **Telfair, J.** “Basics of Applied Social Science Data Assessment Methods for MCH Practitioners” - **workshop** at the 1999 Pre-Annual Meeting Skills Building Session of the Association of Maternal and Child Health Programs (AMCHP), Washington, DC March 13, 1999.
- 3/1999 **Telfair, J.** “Evaluating Community-based Programs Using the IMCBE” - **workshop** at the 1999 Pre-Annual Meeting Skills Building Session of the Association of Maternal and Child Health Programs (AMCHP), Washington, DC March 14, 1999.
- 1/1999 **Telfair, J.**, “Overview of Data Collection and Evaluation Issues of SCHIP for States and Localities” invited **workshop** panel paper and discussion presented at the Association of Maternal and Child Health Programs (AMCHP) State Child Health Insurance and Quality Assurance Action Learning Lab, Tallahassee, FL., January 12, 1999.
- 3/1998 **Telfair, J.** “Applied Social Science Data Assessment Methods for MCH Practitioners” - **workshop** presented at the 1998 Pre-Annual Meeting Skills Building Session of the Association of Maternal and Child Health Programs (AMCHP) Setting the Agenda for Quality: New Environments, New Needs, Washington, DC March 7-8, 1998.
- 9/1997 **Telfair, J. (Chair and Presenter)**, “Transition to Adult Care for Adolescents with SCD”, **workshop panel** - Sickle Cell Disease in the 21st Century, the 25th Anniversary Meeting of the National Sickle Cell Program, Washington, DC. September 18, 1997.
- 6/19/96 **Telfair, J.** “Developing and Sustaining Collaborative Relationships in Communities” **workshop** presented at the Second Annual Conference of the National Assembly on School-Based Health Care: Promoting Partnerships for the Future of Our Youth, Baltimore, MD, June 28, 1996.
- 6/1995 **Telfair, J.** “Public Health Social Work and the Community: Rediscovering Our Roots” **Keynote Address** - Bi-Regional Conference jointly sponsored by the University of South Carolina College of Social Work and the U.S. Bureau of Maternal and Child Health. June 12, 1995.
- 6/19/95 **Telfair, J.** “Community Public Health Social Work: Developing Strategies” invited **workshop** and discussion - Bi-Regional Public Health Social Work Conference jointly sponsored by the University of South Carolina College of Social Work and the U.S. Bureau of Maternal and Child Health. Columbia, South Carolina, June 12, 1995.
- 6/1992 **Telfair, J. & Nash, K.B.**, "Attitudes and Behaviors Impacting the Delivery of Services to African-Americans", roundtable **lecture** presentation at 4th National Forum on Cardiovascular Health, Pulmonary Disorders, and Blood Resources, National Heart, Lung, Blood Institute, Washington, DC., June 1992

4. International

- 3/2017 **Telfair, J.**, “A Brief Overview of the Delivery, Teaching and Use of Continuing Professional Development (CPD)/Continuing Education (CE) in the UNITED STATES” **Invited lecture**, National Forum on CPD in Higher Education, at University of Kelaniya, Ragama, Sri Lanka, March 02, 2017.
- 8/2015 **Telfair, J.** “Use of Program Monitoring and Evaluation (M & E) in Research – Overview of Concepts and Methods” **Research Seminar presentation** at University of Kelaniya, Ragama, Sri Lanka, August 13, 2015.
- 9/2012 **Telfair, J.** “Basics of Evaluation in Public Health Practice Seminar - Basic Framework for Reporting and Using Evaluation Data”, **leadership seminar** presentation at the Institute for Health Management –in collaboration with the Malaysian Ministry of Health, Kuala Lumpur, Malaysia, September 28, 2012

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

- 9/2012 **Telfair, J.** “Basics of Evaluation in Public Health Practice Seminar - Introduction to Data Triangulation and Analyses – Linking Multi-type and Multi-Level Monitor and Evaluation Data” **leadership seminar** presentation at the Institute for Health Management –in collaboration with the Malaysian Ministry of Health, Kuala Lumpur, Malaysia, September 28, 2012
- 9/2012 **Telfair, J.** “Basics of Evaluation in Public Health Practice Seminar - Selected Issues of Design and Linked Methods – Challenges and Proposed Solution” **leadership seminar** presentation at the Institute for Health Management –in collaboration with the Malaysian Ministry of Health, Kuala Lumpur, Malaysia, September 27, 2012
- 9/2012 **Telfair, J.** “Basics of Evaluation in Public Health Practice Seminar - Basics of Qualitative Evaluation Methods (Introduction)” **leadership seminar** presentation at the Institute for Health Management –in collaboration with the Malaysian Ministry of Health, Kuala Lumpur, Malaysia, September 27, 2012
- 9/2012 **Telfair, J.** “Basics of Evaluation in Public Health Practice Seminar - Basics of Quantitative Evaluation Methods” **leadership seminar** presentation at the Institute for Health Management –in collaboration with the Malaysian Ministry of Health, Kuala Lumpur, Malaysia, September 26, 2012
- 9/2012 **Telfair, J.** “Basics of Evaluation in Public Health Practice Seminar - Program/Participatory Evaluation Relevant Approaches” **leadership seminar** presentation at the Institute for Health Management –in collaboration with the Malaysian Ministry of Health, Kuala Lumpur, Malaysia, September 25, 2012
- 9/2012 **Telfair, J.** “Basics of Evaluation in Public Health Practice Seminar - Basics of Conceptual Modeling/Framework Development and Building Evidence” **leadership seminar** presentation at the Institute for Health Management –in collaboration with the Malaysian Ministry of Health, Kuala Lumpur, Malaysia, September 25, 2012
- 9/2012 **Telfair, J.** “Basics of Evaluation in Public Health Practice Seminar - Overview and Basic Concepts”, **leadership seminar** presentation at the Institute for Health Management –in collaboration with the Malaysian Ministry of Health, Kuala Lumpur, Malaysia, September 25, 2012
- 8/2011 **Telfair, J.** “Monitoring and Evaluation for Health Management”, **seminar** presentation at the Universidad Peruana Cayetano Heredia, in collaboration with the Peruvian Ministry of Health, Lima Peru August 15, 2011
- 8/2011 **Telfair, J.** “Conceptual Logical Framework & Building Evidence for Practice”, **research seminar** presentation at the Universidad Peruana Cayetano Heredia, in collaboration with the Peruvian Ministry of Health, Lima Peru August 16, 2011
- 8/2011 **Telfair, J.** “Program Monitoring and Evaluation – Indicators “, **research seminar** presentation at the Universidad Peruana Cayetano Heredia, in collaboration with the Peruvian Ministry of Health, Lima Peru August 17, 2011
- 10/2007 **Telfair, J.** “Health Care Transitions for Adolescents with Special Health Care Needs”. Invited Lecture at Workshop and Seminar at Annual Sickle Cell and Thalassemia Course, St Thomas' Hospital, London, United Kingdom, London, United Kingdom. October 1, 2007
- 10/2007 **Telfair, J.** “Self-efficacy, Adjustment and Self-reported Sickle Cell Disease Symptoms”. Invited presentation at Workshop and Seminar at Annual Sickle Cell and Thalassemia Course, St Thomas' Hospital, London, United Kingdom, London, United Kingdom. October 3, 2007
- 10/2007 **Telfair, J.** “Academic and Non-Government Organization (NGO) Partnerships for Research”. Invited presentation at Workshop and Seminar at Annual Sickle Cell and Thalassemia Course, St Thomas' Hospital, London, United Kingdom, London, United Kingdom. October 4, 2007

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

- 2/2007 **Telfair, J.** “Basics of Qualitative Research Writing and Report Development” **research seminar** presentation at the Tuberculosis Research Center, Indian Council on Medical Research, Chennai, India, February 17, 2007.
- 2/2007 **Telfair, J.** “Applications of Qualitative Research Methods - Qualitative Interviewing” **research seminar** presentation at the Tuberculosis Research Center, Indian Council on Medical Research, Chennai, India, February 16, 2007.
- 2/2007 **Telfair, J.** “Analysis and Interpretation of Focus Group Data” **research seminar** presentation at the Tuberculosis Research Center, Indian Council on Medical Research, Chennai, India, February 15, 2007.
- 2/2007 **Telfair, J.** “Basics of Qualitative Data Analyses” **research seminar** presentation at the Tuberculosis Research Center, Indian Council on Medical Research, Chennai, India, February 14, 2007.
- 10/2006 **Telfair, J.** “Qualitative Research Methods” **research seminar** presentation at the Makerere University, Kampala, Uganda, October 25, 2006.
- 10/2006 **Telfair, J.** “Basics of Qualitative Data Analyses” **research seminar** presentation at the Makerere University, Kampala, Uganda, October 26, 2006.
- 10/2006 **Telfair, J.** “Applications of Qualitative Research Methods” **research seminar** presentation at the Makerere University, Kampala, Uganda, October 27, 2006.
- 3/2006 **Telfair, J.** “Basics of Field Observation Research Methods” **research seminar** presentation at the Makerere University, Kampala, Uganda, March 20, 2006.
- 3/2006 **Telfair, J.** “Basics of Qualitative Research Methods” **research seminar** presentation at the Makerere University, Kampala, Uganda, March 21, 2006.
- 3/2006 **Telfair, J.** “Applications of Qualitative Research Methods” **research seminar** presentation at the Makerere University, Kampala, Uganda, March 22, 2006.
- 3/2006 **Telfair, J.** “Introduction to Community-based Participatory Research Methods” **research seminar** presentation at the Makerere University, Kampala, Uganda, March 23, 2006.
- 2/2006 **Telfair, J.** “Basics of Field Observation Research Methods” **research seminar** presentation at the Sindh AIDS Control Program/Aga Kahn University/BRIDGE NGO, Karachi, Pakistan, February 28, 2006.
- 2/2006 **Telfair, J.** “Basics of Qualitative Research Methods” **research seminar** presentation at the Sindh AIDS Control Program/Aga Kahn University/BRIDGE NGO, Karachi, Pakistan, March 1, 2006.
- 2/2006 **Telfair, J.** “Applications of Qualitative Research Methods” **research seminar** presentation at the Sindh AIDS Control Program/Aga Kahn University/BRIDGE NGO, Karachi, Pakistan, March 2, 2006.
- 6/2005 **Telfair, J.** “Overview and Practical Application of Community-based Participatory Research Methods” **research seminar via Teleconference** presentation to the Diabetes Research Center, Indian Council on Medical Research, Chennai, India, June 21, 2005.
- 3/2005 **Telfair, J.** “Monitoring and Evaluating the Research Process” **research seminar** presentation at the National Pirogov Memorial Medical University, Vinnysta, Ukraine, March 23, 2005.

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

- 3/2005 **Telfair, J.** “Research and Evaluation Design: Qualitative Methods” **research seminar** presentation at the National Pirgov Memorial Medical University, Vinnytsta, Ukraine, March 22, 2005.
- 3/2005 **Telfair, J.** “Grant Writing for the NIH II: Developing Your Research Proposal” **research seminar** presentation at the National Pirgov Memorial Medical University, Vinnytsta, Ukraine, March 22, 2005.
- 2/2005 **Telfair, J.** “Basics of Qualitative Research Methods” **research seminar** presentation at the Tuberculosis Research Center, Indian Council on Medical Research, Chennai, India, February 17, 2005.
- 2/2005 **Telfair, J.** “Basics of Participatory Research Methods” **research seminar** presentation at the Tuberculosis Research Center, Indian Council on Medical Research, Chennai, India, February 16, 2005.
- 2/2005 **Telfair, J.** “Basics of field observation research methods” **research seminar** presentation at the Tuberculosis Research Center, Indian Council on Medical Research, Chennai, India, February 15, 2005.

5. Additional Training/Workshops

- 2007 – 2011 (Once per year) – Developed and Led **HRSA Grants MOCK STUDY SECTION** - Annual Grant Writing Institute, Memorial Hospital System, Fort Lauderdale, Florida.
- 2007 – 2011 (Once per year) – Developed and Led **Practice and Community Research Grants Mentored** group Sessions - Annual Grant Writing Institute, Memorial Hospital System, Fort Lauderdale, Florida. Type of grants covered Mentored Career and Minority Development Awards (K-series) - K99/R00, K01, K08, K23, K25; Basic and Clinical Research Grants - R21, R01; Health Service Research U38, R40; and Community Research - HRSA, Robert Wood Johnson CDC Grants
- June 8, 2011 – Developed and Conducted **Webinar** titled ‘Publishing- Examining your data with a critical eye and determining how it informs the field’ for grantees of the DHHS/OPH/Office of Adolescent Pregnancy Programs (OAPP).
- March 2017 (**entire month**) Developed and conducted a set of Public health practice and research modules for medical students, undergraduate and graduate health students at **University of Kelaniya, Ragama, Sri Lanka as a Visiting Faculty**. The modules taught were: a) Monitoring and Evaluation Course for the MPH program; b) Undergraduate Seminar on Planning Health Programs; c) Monitoring your research workshop; d) Staff and faculty mentoring on health research and undergraduate teaching; e) Community organization and mobilization for Undergraduates; f) Basics Of Field Observation Research Methods; g) Evaluating the Surveillance Process; h) Overview of the Family-Centered Care Approach: Children/Youth with Special Health Care Needs (CYSHCN) and their Families; i) Importance of Conducting Research for Health Practitioners; and j) Conducting as assigned MD Community Medicine Program teaching.

4E. Student Advising Activities**1. Doctoral Student Advisees/Dissertation Committees – Maternal and Child Health, Public Health Education, Health Policy, Environmental Health and Community Health**

Name	Degree Type	Advising Period	Institution
Gemma Skuraton	DrPH	2017-present	GSU
Rakhi Trivedi	DrPH	2016 - present	GSU
Anne Odusanya	DrPH	2015- present	GSU
Jessica Sapp	DrPH	2015 - 2017	GSU
Daniella R. Thorne	DrPH	2015 - present	
Baily Jeffers	Ed.D	2015 - 2017	GSU
Fadzai Moreblessing Punungwe	DrPH	2015- 2017	GSU
Gauri Shevatekar	DrPH	2014 - present	GSU
Aida Sawadogo	DrPH	2014-2017	GSU
Shericka T. Harris	DrPH	2013- present	GSU
Valamar Reagon	DrPH	2013 - present	GSU
Tempest Hill	DrPH	2013- 2015	GSU

Gisselle Lancaster	MPH	1995 – 1996	UNC-CH
Jodell Decker	MPH	1994-1995	UNC-CH
Tara Nutley	MPH	1994-1995	UNC-CH
Sandra Diehl	MPH	1993-1994	UNC-CH
Susan Coleman	MPH	1993-1994	UNC-CH

3. Dual Degree (MSW/MPH) Students

Name	Degree Type	Advising Period	Institution(s)
Anna M Bloom	MSW/MPH	2006 - 2006	UAB/Univ..of Alabama
Christian L Bullock	MSW/MPH	2006 - 2006	UAB/Univ..of Alabama
Karen LaCasse	MSW/MPH	2005 - 2006	UAB/Univ..of Alabama
Cheryl Stacy	MSW/MPH	2005 - 2006	UAB/Univ..of Alabama
Pamela McGhee	MS/WMPH	2004 – 2006	UAB/Univ..of Alabama
Savannah Weaver	MSW/MPH	2003 – 2004	UAB/Univ..of Alabama
Janice Cooke	MS/WMPH	2003 - 2004	UAB/Univ..of Alabama
Adam Brush	MSW/MPH	2002 - 2003	UAB/Univ..of Alabama
Amanda Mackey	MS/WMPH	2002- 2003	UAB/Univ..of Alabama
Meredith Roberts	MSW/MPH	2002- 2003	UAB/Univ..of Alabama
Ana Lyn Witt	MS/WMPH	2002 - 2003	UAB/Univ..of Alabama
Melinda Boulton	MSW/MPH	1999 – 2000	UAB/Univ..of Alabama
Allison Nowlin	MS/WMPH	1999 - 2000	UAB/Univ..of Alabama
Kelley Rhodes	MSW/MPH	1999 - 2000	UAB/Univ..of Alabama
Laura Kirby	MS/WMPH	1995 – 1996	UAB/Univ..of Alabama
Jennifer Pauk	MSW/MPH	1995 - 1996	UNC-CH
Eleanor Locklin	MS/WMPH	1995 - 1996	UNC-CH
Andrea Manson	MSW/MPH	1994 - 1995	UNC-CH
Sarah Verbiest	MS/WMPH	1994 - 1995	UNC-CH
Ginger Bethune	MSW/MPH	1993 – 1994	UNC-CH
Meredith Moss	MS/WMPH	1993 - 1994	UNC-CH
Laura Oberkirker	MSW/MPH	1993 – 1994	UNC-CH
Patrick Loeb	MS/WMPH	1993 - 1994	UNC-CH

4. Independent Study Advisees

Name	Degree Type	Advising Period	Institution(s)
Mekia Barclift	DrPH – Public Health Ed	2008 & 2009	Univ. NCG
Jaunita Cuffee	MPH – Public Health Ed	2007-2008	Univ. NCG
Laura Hitchcock	PhD – Social Work	2005 – 2006	Univ. of Alabama
Kai Stewart	PhD – Health Education	2004 - 2006	UAB/Univ..of Alabama
Joan Thomas	M.Sc – Social Psychology	2003 – 2006	Univ. West Indies at Mona
Stephanie Miller	MD/PHD - Medicine	2002 – 2006	Meharry Medical School
Kimberly McCall	PhD – Health Education	2002	UAB/Univ..of Alabama
Brandi Renfro	MSW/MPH	2002	UAB/Univ..of Alabama
Yael Friedman	PhD - Epidemiology	2000- 2001	U. Toronto, Canada
LaTonia McGinnis	MPH - MCH	2001	UAB/Univ..of Alabama

Curriculum Vitae / Joseph Telfair, Dr.PH, MSW-MPH

Jacqueline Wiltshire	PhD – Health Services Research	2002 - 2003	UAB
Laura Fahey	MPH – Health Care Policy	1999 – 2000	UAB
Cathy Taylor	DrPH - MCH	1998	UAB
Amanda Liddle	DrPH - MCH	1998	UAB
Crystal Spivey	DrPH - MCH	1998	UAB
Pattie Tucker	DrPH - MCH	1998	UAB
Sudeshna O'Brien	MPH – MPH	1995	UNC-CH
Patrick Loeb	MSW/MPH – MCH	1994	UNC-CH
Cheryl Marcri	MPH - MCH	1993	UNC-CH

5. Student Pre Graduate Minority Student Experience Program (SPRGE) Advisee

Name	Degree Type	Advising Period	Institution
Cynthia Dickey	BA - Sociology	1993	UNC - CH

6. Doctoral Curriculum Committee Advisees

Name	Degree Type	Advising Period	Institution
Warner McGee	DrPH	2008 - 2010	UNCG
Chad Schaben	DrPH	2007 - 2009	UNCG
Gladys Robinson	PhD	2006 – 2008	NC A & T
Pam Noel	Dr.PH	1994 - 1996	UNC-CH
Cindy Fair	Dr.PH	1994 - 1995	UNC-CH
Harlee Ballard	Dr.PH	1994 – 1995	UNC-CH
Niki Cotton	DrPH	1993 – 1995	UNC-CH
Kristen Catherall	DrPH	1993 – 1994	UNC-CH

7. Additional Doctoral Dissertation Committees

Name	Degree Type	Advising Period	Institution(s)
Angela Boy	DrPH – MCH	2007-2010	UAB
Kai Sewart	PhD – Health Education	2004 – 2007	UAB/ Univ. of Alabama
Quin Li	DrPH – MCH	2005-2006	UAB
Nieika Geeter Parks	PhD – Health Education	2004 – 2006	UAB/Univ. of Alabama
Carol Danielson	DrPH – MCH	2003 – 2005	UAB
Kimberly Clay	PhD – Health Behavior	2003 - 2005	UAB
Coretta Dorsey (Jenerette)	PhD - Nursing	2001 - 2004	Univ. So. Carolina
Phyllis Bazen	PhD - Nursing	2000- 2005	University of Rochester
Jacqueline Wiltshire	PhD – Health Services Research	2000- 2004	UAB
JoAna Dodson	PhD – Health Behavior	2000 - 2004	UAB
Elsi Colecraft	DrPH - MCH	1998 – 2002	UAB
Kimber Murphee	DrPH - MCH	1998 - 2004	University of Alabama
Fausto Patino	PhD - Epidemiology	1997 - 2001	UAB
Donna Rickert,	DrPH - MCH	1996 – 1998	UAB
Chris Risley	DrPH - MCH	1996 - 1998	UAB
Margaret Snivley	DrPH - MCH	1996 - 1998	UNC-CH
Cindy Fair	DrPH - MCH	1995 - 1996	UNC-CH
Deborah Covington	DrPH - MCH	1995 - 1996	UNC-CH

8. Thesis Committee (outside MCH)

Name	Degree Type	Advising Period	Institution
Dawn Erickson	MSN	1994 – 1995	UNC - CH

9. Special Graduate Program Advisees

Name	Degree Type	Advising Period	Institution	Program
Phillip Graham	Dr.PH	1994 - 1995	UNC – CH - MCH	Patricia Harris Minority Student Grant Program
Bertha French	MPH	1994 – 1995	UNC – CH - MCH	Patricia Harris Minority Student Grant Program
Angela Black	Dr.PH	1994 - 1995	UNC – CH - MCH	Patricia Harris Minority Student Grant Program
Martha Crowther	PhD	2001 – 2003	UAB - SOM	Post-Doctoral Minority Supplement

10. Pre/Post-Doc, Formal Mentees Research Committee Advisees

Name	Advising Period	Institution	Program
Holly C. Sienkiewicz, MA	2012- 2015	UNCG	Pre-Doc – HRSA and Other sources - cultural integration and immigrant and refugee health outcomes; global health and community-based participatory research
Anya Griffin, PhD	2012 - 2014	Children’s Healthcare of Atlanta	Post-Doc Fellowship – NHLBI- Programs to Increase Diversity Among Individuals Engaged in health related research (PRIDE)
Lori Crosby, PhD	2010 - 2012	University of Cincinnati School of Medicine	K-Award – NHLBI - Patient-Provider Interventions to Improve Transition to Adult Care in SCD
Lisa A. Schwartz, PhD	2010 - 2014	University of Pennsylvania School of Medicine	R21 – NCI - Transition Readiness of Adolescent and Young Adult Survivors of Childhood Cancer
Kari M Eddington, PhD	2010- 2014	UNCG	R21 – NIMH - An ESM Study of Psychotherapy for Depression

5. Professional Service

5A. Committees and Workgroups

1. Department

Dates Served	Committee Name	Affiliation	Designation & Position
09/2016-5/2017	Department Chair Search	GSU	Member
8/2015 – 2016	Faculty Search Committee (ENVH)	GSU	Member/ Chair
6/2014-8/2014	Instructor Search Committee (CBHE)	GSU	Member/ Chair
8/2013-present	Faculty Search committee (CHBE)	GSU	Member/ Chair
8/2007-7/2009	Doctoral Program Committee	HHP UNCG	Member
8/2006 – 7/2008	Tenure and Promotion Committee	HHP UNCG	Member/ Chair (2008)
8/2006 – 7/2008	Graduate Program Committee	HHP UNCG	Member/ Chair (2008)
1/2001 – 12/2003	Admissions and Graduation Committee	SOPH UAB	Member
1/1998 – 12/2000	Masters Degree Program/Curriculum Committee DMCH	SOPH UAB	Committee Chair

2. School

Dates Served	Committee Name	Affiliation	Designation & Position
6/2014 - present	Undergraduate (BSPH) Committee	GSU - JPHCOPH	Member
1/2014 - present	College Reaccreditation Committee	GSU - JPHCOPH	Member
10/2013 - present	Academic Affairs Committee	GSU - JPHCOPH	Member
10/2013 - present	Faculty P & T and Process Assessment Committee	GSU - JPHCOPH	Committee Chair
10/2013 - present	Academic Assessment Committee (Includes SACS and CEPH work)	GSU - JPHCOPH	Committee Chair and member
8/2013 - present	Faculty Research Committee	GSU - JPHCOPH	Member
8/2013 - present	Faculty leadership Committee	GSU - JPHCOPH	Member
8/2013 - present	Curriculum Committee	GSU - JPHCOPH	Member
8/2007-3/2008	Chair Search Committee Department of Public Health Education	UNCG HHP	Member
12/2004 – 4/2006	Chair search committee - Department of Maternal and Child health	SOPH UAB	Member
10/2001 – 10/2004	Diversity and Affirmative Action Advisory Committee	SOPH UAB	Committee Chair
1/1998 – 12/2000	Masters Degree Program/Curriculum Committee MCH	SOPH UAB	Committee Chair
7/2001- 7/2003	Admissions and Graduation Committee	SOPH UAB	Member
3/99- 4/99) & (3/2000-4/2000	Alumni of the Year	SOPH UAB	Member
9/1999- 3/2000	CEPH Service Criteria Subcommittee	SOPH UAB	Member
8/1997 - 5/2001	Faculty Affairs Committee	SOPH UAB	Member
10/1999 – 7/ 2006	Advisory Committee (to the Dean) on Information Technology	SOPH UAB	Member
6/1999	University Wide Grant Application Review Committee	SOPH UAB	Member
5/1998-8/1998	Chair search committee - Department of Maternal and Child health	SOPH UAB	Member
4/1997- 3/1998	Future of Public Health Professional Strategic Planning Workgroup	SOPH UAB	Member
