Co-hosted the 1 <sup>st</sup> Annual Plant-based Nutrition of Chronic Disease Conference at UNC Asheville (non-profit)	November 2014

My early career has been focused on promoting nutrition literacy and bringing research and information on the relationship between healthy eating styles and disease prevention and wellbeing through books, reports, articles, media, and web content to a general audience. All of the larger grants and contracts I have received or helped bring in are for practice-focused projects especially in the areas of healthy aging, college health, and developing and advocating for health and nutrition policy.

My work has been almost uniformly collaborative from the scholarship of teaching and learning work that I engaged in with 7 UNC Asheville colleagues from a variety of disciplines who developed cross course learning opportunities for student studying food, food systems and culture to the networking, evidence-based program implementation and training and technical support work we do at the NC Center for Health and Wellness at UNC Asheville.

Over the last 5 years, I have worked on collaborative public health practice projects with NCHHS Division of Aging and Adult Services, the Injury and Violence Prevention Branch, Department Public Health, WNC regional health directors, NC Institute of Public Health, Foundation of Health Leadership and Innovation, UNC Health Sciences at MAHEC, and NC Council of Government leaders and several foundations including Dogwood Health Trust, WNC Bridge Foundation and Kate B Reynolds Charitable Trust.
