## Summary

*"Felix is a genius for convincing the most skeptical legislator of the eminent reasonableness of the sustainable development case."*

**RT. Hon. JOHN GUMMER, MP, former UK Secretary of State for the Environment**

*"Felix has been a passionate campaigner for people's involvement in the central challenges of our time – how to balance our consumption of natural resources with the earth's capacity, at the same time as addressing global inequality and poverty. He has enormously enriched the global intellectual debate on sustainability issues, and has been a 'thought leader' of his age."*

**Dr. CRISPIAN OLVER, former South African Director General for the Department of Environmental Affairs and Tourism**

*"Felix has been a true global leader, a unique person with the capacity to define global issues, based on an in-depth understanding of the concerns and priorities of stakeholders at all levels. Such a breadth of vision is rare, and we feel privileged to have been able to work so closely with Felix throughout the Rio+20 processes."*

**PAULA CABALLERO GOMEZ, Director, Directorate of Economic, Social and Environmental of Ministry of Foreign Affairs, Republic of Columbia**

*"I couldn't dare to admit to which extent Felix has influenced international sustainable development policy."*

### Interests

I love to write. I am working on my next project, 'Bigfoot and the Sustainable Development Goals Adventure'. In addition to the political books, I hope to write in other fields, having completed my first co-authoring of a comic 'Santa's Green Christmas' for UNICEF in 2016. I am investigating if this could be produced into a film.

In sports, my interests include gym, cycling, tennis and swimming. I enjoy music, theatre and films. This includes going twice a year to film festivals such as San Sebastian, Sarasota, Humphry Bogart, and Palm Springs Film Noir Festivals.
