

UNC's Institute for the Environment, Carolina Seminars, Carolina Climate Change Scientists, and Carolina Hazards Resilience Planners present the Keynote Lecture for UNC's 6th Climate Change and Resilience Symposium:

Global Climate Change: Implications for U.S. National Security

BRIGADIER GENERAL STEPHEN A. CHENEY, USMC (RET.)

Friday, April 12

11:30AM–1:00PM

133 Rosenau Hall

**Lunch will be provided
following the event**

Brigadier General Stephen A. Cheney, USMC (Ret.) is Chief Executive Officer of the American Security Project. He is a former Marine who was closely involved in several Department of Defense reports on climate change. He has appeared widely discussing climate change, including on CNN, Fox, BBC, and NPR, and was recognized by The Weather Channel as a member of the Climate 25 for his leadership in identifying climate change as a national and global security issue. He previously served as Deputy Executive Secretary to Defense Secretaries Cheney and Aspin.
