

2019 RESEARCH COUNCIL ROSTER

COMMITTEE HISTORY: The Research Council was established in 1999 to discuss strategic planning and outcomes for research matters throughout the School.

GENERAL CHARGE: Priorities for 2019 include: planning strategic research initiatives and revenue strategies; developing early-career faculty; enhancing the connection of research to training, teaching, service; advising on research goals, objectives and metrics; conducting grant review processes for Gillings Innovation Labs and limited-submission opportunities; serving as a sounding board for the formulation of large research proposals; serving as “audience” for practice pitches and other strategic presentations; and providing feedback on new research information systems, communication tactics and other research tools. The Council meets 6-9 times a year and corresponds electronically to accomplish its tasks.

COMPOSITION: The Associate Dean for Research chairs the Research Council. Other members are faculty members, one from each department, one representing internal Centers/Institutes, one representing external Centers/Institutes and the Senior Director of Research and Innovation.
