c. Other works (e.g. technical papers and other deliverables)

- Tolleson-Rinehart, S. 2000. *Plan for the Dissemination and Implementation of the Evidence Report on the Efficacy of Interventions to Modify Dietary Behavior Related to Cancer Risk*. Sue Tolleson-Rinehart. Prepared with the assistance of Kathleen Lohr, Anne M. Jackman, Donna Curasi and Cristina Garces of the RTI-UNC Evidence-based Practice Center. Submitted in partial fulfillment of EPC Contract No. 290-97-0011 (Lohr, Carey, Principal Investigators) to the Agency for Healthcare Research and Quality, 18 July 2000.

Tolleson-Rinehart, S. 2000. *Dissemination and Implementation of the Evidence Report on Management of Preterm Labor*. Sue Tolleson-Rinehart. Prepared with the assistance of Kathleen Lohr and other members of the RTI-UNC Evidence-Based Practice Center. Submitted in partial fulfillment of EPC Contract # 290-97-0011 (Lohr, DeFriese, Principal Investigators) to the Agency for Healthcare Research and Quality, 10 January 2000.

Technical Report No. 52, 1994. *The Reliability, Validity, and Scalability of the Indicators of Gender Role Beliefs and Feminism in the 1992 American National Election Study* (with Douglas R. Davenport, Terry L. Gilmour, M.V. Hood III, William R. Moore and Kurt Shirkey). Ann Arbor: InterUniversity Consortium for Political and Social Research; report available (among alphabetized list by first author) at http://www.electionstudies.org/resources/papers/technical_reports.htm (last accessed 8 September 2009).

Other Memos to the National Election Study Board of Overseers: "New Indicators for Gender Equality and Gender Consciousness," 1991; "A Justification for Retaining the Group Closeness Items," 1987; "Justifications for Restoring the Equal Roles Question to Future American National Election Studies," 1986.

Teaching Activities

I. Course Director

a. Courses for which I have sole responsibility (I design and teach the courses and supervise all student work):

PUBH 706 (formerly PUBH 600), The U.S. Health Care System, taught in Summer II and Fall Semesters to each new cohort of MD-MPH students (numbers range from approximately 32 to approximately 56 depending on size of cohort each year. Starting Summer 2017, the course number changes to PUBH 706. The entire MD-MPH cohort takes this course. I am the sole instructor and do not have a teaching assistant.

PUBH 763, Data Creation, Analysis, and Curation for High Value Care, taught in Spring to MD-MPH students and others (numbers typically range from 6 to 14). I am the sole instructor.

PUBH 992, Master's Paper. I am the faculty preceptor and first master's paper reader for MD-MPH students who wish to complete policy research projects for their master's papers. (numbers depend on my number of advisees but generally range between 8 and 18 each year).

b. Courses for which I have shared responsibility

PUBH 749, HC&P "Year and Career" Professional Development Seminar, taught in Fall and Spring to MD-MPH Students. (numbers include entire cohort, from 32 to 56 students per year depending on year).

Social and Health Systems Science 5, taught 4th year medical students (Sarah Smithson MD, course director). I teach current health policy and health reform during the students' course orientation (2015-2019).

II. Additional structured pedagogic activities

a. Additional lecturing:

Capstone Lecture, UNC School of Medicine (each spring): *Health Capital: The 'Currency' Patients Need to Keep Up With You – What it Means and How Patients Acquire It (2014-2017)*

b. Grand Rounds

I have often been asked to present Grand Rounds lectures on health reform, the Affordable Care Act, and other large health policy questions. In recent years, I have presented Grand Rounds on health reform and the Affordable Care Act to the Division of Nephrology in the Department of Medicine, the Department of Pediatrics, and the Department of Psychiatry.

c. Continuing Medical Education

I was the Principal Investigator of *PEDS: Pediatric Education for Drug Safety*, a web-based Continuing Medical Education program funded by the Attorneys General Prescriber and Consumer Education Grant Program. The grant is described in **II. Prior Funded Research** in the **Grants** section below, and the three evidence-based education modules emerging from the project are described in **V. Other unrefereed works, Section a. Original Articles**, in the Bibliography, above. The modules are actively awarding Category I CME Credits from the UNC Office of Continuing Medical Education at the time of this submission. The modules can be found at <http://pedscme.unc.edu/>.

III. Graduate Supervision

As I have noted above, it is my privilege to co-direct the “Population Health for Clinicians” MD-MPH program (formerly known as Health Care and Prevention), located in the Public Health Leadership Program in the Gillings School of Global Public Health, with Dr. Cynthia Feltner (who is also an alumna of the program and one of my former advisees). For my own advisees, I am generally – almost always -- the principal mentor and first reader of the master’s paper. In the table beginning below I present the names of my own advisees, their current positions, and the titles of their master’s papers from 2005 to the present in reverse chronological order, beginning with the most recent MPH graduates (who have usually completed their MPH during medical school, residency, or fellowship). In some rare cases below, the master’s paper is not available in the Carolina Digital Library either because it is embargoed while undergoing peer review or because of gaps in the digital collection (many papers were uploaded by UNC, not by the student, after the digital library had begun.) I also list 3 advisees who never completed the degree.

NB: the remainder of my c.v. begins on p. 31, following the table of advisees below.

2020	Current position	Master's paper
Melissa Brown MD MPH	PGY 1, Emergency Medicine, UCLA	<u>Food Insecurity Screening Among Patients in the Emergency Department</u>
Matthew Case DO MPH	Occupational and Environmental Physician, United States Navy, Bremerton, Washington	<u>A Program Plan and Evaluation of an mHealth Tool for Documentation of Vaccinations of a Large Health System</u>
Keren Eyal MD MPH	PGY 1, Pediatrics, University of Colorado	<u>"But She Notices": Parent-Child Communication About Anti-Latino Discrimination</u>
Anna Jones MD MPH	PGY 1, Pediatrics, University of Utah	<u>Understanding the Effectiveness of Contraceptive Handouts in An Adolescent Audience: A Research Proposal</u>
Benjamin Kaplan MD MPH	PGY 1, Family Medicine, UNC	"I know me:" A pilot feasibility study using photovoice to foster dialogue with complex care patients [embargoed to protect patient data while under peer review]
Jessica Leuchtenburg MD MPH	PGY 1, Medicine, University of Maryland	<u>Syncope Care Standardization: Study Protocol for the Development and Validation of a Patient Education Tool for the Emergency Department</u>
Charles McLendon MD MPH	PGY 1, Anesthesiology, Loyola University	<u>A Feasibility Study to Measure the Efficacy of a Pediatric Anesthesiology Preoperative Clinic</u>
Tam Nguyen MD MPH	PGY 1, Obstetrics and Gynecology, SEAHEC, Wilmington NC	<u>Non-emergent use of obstetrical triage for women during pregnancy: A research design</u>
Enioluwafe Ojo MD MPH	PGY 1, Psychiatry, UNC	<u>Ethnic Variations in Pathways to Care in North Carolina, United States</u>
Krishan Sivaraj MD MPH	PGY 1, Medicine, UNC	<u>Epidemiology and Outcomes of Aortic Stenosis in Acute Decompensated Heart Failure</u>

Hunter Smith MD MPH	PGY 1, Pediatrics, Northwestern	<u>INFLUENZA VACCINATION RATE IMPROVEMENT INTERVENTIONS IN PEDIATRIC PULMONOLOGY PATIENTS</u>
Kelly Jo Tackett MD MPH	PGY 1, Dermatology, UNC	<u>Bleach vs Bubbles: Assessment of the Effect of Bathroom Environment on Pediatric Atopic Dermatitis</u>
Emily Trambert-Kystra MD MPH	PGY 1, Family Medicine, UNC	Developing and implementing a workshop to empower medical students to respond to bias and mistreatment in the clinic and on wards. [embargoed while it is undergoing peer review]
Nelly Weledji MD MPH	PGY 1, Obstetrics and Gynecology, Emory University	<u>Focused assessment ultrasonography as a post-operative screening tool for obstetric and gynecologic surgeries: A Research Design</u>
Alana Zeitany MD MPH	PGY 1, Emergency Medicine, Wake Forest University	<u>Assessment of Suicide Prevention Through Lethal Means Counseling in North Carolina Emergency Departments: A Preliminary Report</u>

2019	Current position	Master's paper
Marie Anderson MD MPH	PGY 2, Emergency Medicine, Atrium Health, Charlotte, NC	<u>Children with Special Health Care Needs and Food Insecurity: A Systematic Review</u>
Megan Barnes MD MPH	PGY 2, Medicine-Pediatrics, Loyola	<u>The Association Between a History of Adverse Childhood Experiences and Current Parenting Beliefs and Attitudes</u>
Benjamin Brown MD MPH	PGY 2, Interventional Radiology, UNC	<u>Point of Care Ultrasound Training in a Rural and Underserved Clinic in North Carolina: A Model for Future Collaborative Program Development</u>
Catherine Bernstein MD MPH	PGY 2, Pediatrics, UNC	<u>Pediatric Residents' Readiness to Address Adverse Childhood Experiences</u>

Emma Bick MD MPH	PGY 2, Medicine-Pediatrics, UNC	<u>Developing a Curriculum for the End-of-Life at the University of North Carolina at Chapel Hill</u>
Matthew Case DO MPH	PGY 5, Occupational Health, Duke University	<u>A Program Plan and Evaluation of an mHealth Tool for Documentation of Vaccinations of a Large Health System</u>
Katherine Davis MD MPH	PGY 2, Ob-Gyn, Maine Medical Center, Portland	<u>Care Transitions of Incarcerated Women</u>
Zainab Farzal MD MPH	PGY 5, Otolaryngology, UNC	<u>CONCEPTUALIZATION AND DEVELOPMENT OF THE UNC CHRONIC RHINOSINUSITIS PATIENT AND PROXY-REPORTED OUTCOME MEASURES</u>
Kate Garner MD MPH	PGY 2, Family Medicine, University of Colorado - Denver	<u>Assessment of Physical Health Outcomes in an Enhanced Primary Care Model: Weight and BMI Outcomes for Patients with Severe Mental Illness at WakeBrook Primary Care Clinic</u>
Sian Lewis-Bevan MD MPH	PGY 2, Emergency Medicine, Carillion, Virginia	<u>Reducing Medication Administration Errors with Verbal Checklists: Examining the Efficacy of a Training Program for the Medication Administration Cross Check</u>

IV. Other Supervision

I frequently serve as a member of the Scholarship Oversight Committees of Pediatric Fellows. In the past several years, I have served on the committees of Dr. Sheri Carroll, presently a neonatologist at the Wilmington AHEC, Dr. Rachel Ammons Troy, now a neonatologist with Fairfax Neonatal Associates in Fairfax Virginia, and Sofia Aliaga MD MPH, now an Assistant Professor of Pediatrics, Department of Neonatal-Perinatal Medicine at UNC, who also earned her MPH under my direction, and Gina Abelli Geis, now an Assistant Professor of Pediatrics at Tufts University, and Dr. Ivy Pointer, who completed her PICU Fellowship at UNC, who is also one of my MPH advisees. Recent Fellows who are also my MPH advisees include Krystle Perez MD and Jackie Patterson MD, both in Neonatal-Perinatal Medicine, and Aliya Wilson MD, a Preventive Medicine Resident who is now an Assistant Professor of Medicine at The University of Virginia. I have also assisted the research development of Pulmonology Fellows Elisabeth Dellon, now Professor of Pediatrics at UNC, and Dr. Adam Shapiro, Assistant Professor of Pediatrics at McGill University in Montreal, Quebec, CA, among others.

V. Prior teaching experience in political science at UNC, Texas Tech University, and elsewhere.

Professor, Texas Tech University, 1994 - 1998.

Associate Professor, Texas Tech University, 1988 - 1994.

Assistant Professor, Texas Tech University, 1985 - 1988.

Undergraduate courses taught: American Government and Politics (500-student sections);
Women and Politics; Introduction to Political Analysis; Political Psychology.

Graduate courses taught: Research Design; Data Analysis; Survey Research; The U.S.
Congress; American Political Systems; Gender Politics; Political Psychology; Political
Behavior; Interest Groups and Political Parties.

Visiting Professor, The University of North Carolina at Chapel Hill, Spring, 1997

Courses taught: American Government; Congress, The President, and Public Policy

Visiting Associate Professor, the University of Virginia, Spring, 1992.

Course taught: Gender Politics.

Visiting Associate Professor, the University of North Carolina at Chapel Hill, Spring, 1991.

Courses taught: American Government and Politics.

Visiting Assistant Professor, The University of North Carolina at Chapel Hill, 1988.

Courses taught: Honors Thesis Research Design Seminar; The President, Congress and Public Policy;
Women and Politics.

Visiting Assistant Professor, University of South Carolina, 1983-1985. Various courses.

Grants

I. Active funded research

Co-Investigator. TraCS Institute: The UNC Clinical and Translational Science Award (CTSA; Carey/Buse, PIs), TR001111-03, 09/26/13-04/30/18.: Co-investigator and Research Navigator in the "Governance" core; 15% effort, FY Total Cost for the prime award in 2015-16: \$7,277,026 (not including supplements). Funding Agency: National Center for Research Resources.

Co-Investigator. Improving Rural Pediatric Emergency Care Through Tele-Simulation., Jessica Katznelson (PI), Johns Hopkins University. 1R18 HS24220-01A1; 7/1/2016-6/30/2021; 5% effort. \$248,035. Agency for Healthcare Research and Quality.

II. Prior funded research (last 15 years)

Principal Investigator. Training In Primary Care Medicine-Interdisciplinary and Interprofessional Graduate Joint Degree Health Resources and Services Administration (Viera, former PI), T85HP24470-01-00.: 10% effort. FY Total cost for award period 8/01/2012 – 7/31/2017 \$955,906. Health Resources and Services Administration, Department of Health and Human Services.

Co-Investigator, "Proxy-reported Pulmonary Outcomes Scale (PRPOS)," Price, Project Leader. 3U11RR025747-02S3 (Runge, PI) A09-1113-006I, National Institutes of Child Health and Human Development; responsible for overseeing instrument development methods. 1 October 2009 to 30 April 2011, received no cost extension through 30 April 2012. \$343,830 direct costs. 10% effort.

Principal Investigator, UNC subcontract. Developing a Guideline for Juvenile Idiopathic Arthritis (Beukelman, University of Alabama, PI), 1 January 2009 – 31 December 2009, \$17,652. 10% effort. American College of Rheumatology.

Principal Investigator. PEDS: *Pediatric Education for Drug Safety*. (Tolleson-Rinehart, Principal Investigator). 10/1/2006 – 9/30/2008, \$386,120 direct costs, 25% effort. Agency number not assigned. Attorney General Consumer and Prescriber Grant Program (a program funded by the Neurontin settlement of the 50 states' Attorneys Generals and Pfizer, Inc).

Co-Principal Investigator and Program Administrator. *Rationalizing Therapeutics for the Pediatric Population, the UNC Center for Education and Research on Therapeutics*. Campbell, PI (1999-2003)/Guess, PI (2003-2006), Stiles, PI(2006-2008). Number U18 HS10397; Agency for Health Care Policy and Research. 10/1/99 – 9/30/08 (including no-cost extension), \$4.1 million direct costs in second phase of funding, 50% effort.

Co-Investigator and Administrator. *Development of a Series of On-line Snapshots of the Quality of Health Care in the United States*, Leatherman, PI. Agency Number 20040673, The Commonwealth Fund, 01/01/05 – 09/30/06. \$245,000 direct costs. 5% effort.

Principal Investigator. AccessCare, Inc. Research Development. Grant Number not assigned. AccessCare, Inc. of North Carolina (Primary Care Managed Care for North Carolina Medicaid Recipients.) 10/18/2004 – 4/17/2005, \$12,933 direct costs. 10% effort.

Co-Investigator and Program Administrator. *The UNC Program on Health Outcomes*. Grant number not assigned; The Glaxo Wellcome Foundation. Roper, Pl. 10/1/99 – 12/05/05, \$1,508,312 direct costs, 32% effort.

Dissemination of the Evidence Report on Pharmacotherapies for Alcohol Dependence. Sue Tolleson-Rinehart. Prepared with the assistance of Kathleen Lohr and other members of the RTI-UNC Evidence-Based Practice Center. Submitted in partial fulfillment of EPC Contract # 290-97-0011 TO # 1 (Lohr, DeFriese, Principal Investigators) to the Agency for Health Care Policy and Research, 19 May 1998.

Professional Service

I. Selected service to the research and service communities, broadly, including both my disciplines

Chairperson, Selection Committee,, Leonard S. Robiins Award for the Best Paper on Health Politics and Policy presented to the 2020 American Political Science Association, 2020-2021.

Treasurer, Southern Political Science Association, 2015-2018.

Chairperson, American Political Science Association Frank J. Goodnow Award Committee, 2015.

Executive Council (Elected Member), Southern Political Science Association, 2012-2015.

Chairperson, Ad Hoc Committee on Professionalism. Southern Political Science Association, 2011-2013.

Book Review Editor and Associate Editor, *Politics & Gender*, 2010-2013.

President, Organized Section for Health Politics and Policy Research, American Political Science Association, 2009-2010.

President-elect and Division Program Chair, Organized Section for Health Politics and Policy Research, American Political Science Association, 2008-2009.

Facilitator, creation of Organized Section for Health Politics and Policy Research, American Political Science Association, 2008 (led the petition and application process to obtain approval of the creation of this Organized Research Section; petition approved by the APSA Executive Council on April 5, 2008).

Chairperson, AcademyHealth General Poster Abstract Selection Committee, for 2005 Meeting.

Responsible for organizing process of reviewing submitted abstracts, meeting as committee to discuss abstracts, and selecting those to be presented as posters at AcademyHealth Annual Meeting, June, 2005, Boston. Committee work done in February and March, 2005.

Member, Marian Irish Award Committee, Southern Political Science Association, 2005 (postponed by Hurricane Katrina; award given in Jan, 2007); 2006 (award given in Jan, 2007).

Member, Local Planning Committee, Agency for Healthcare Research and Quality Town Hall Meeting, September 15, 2005, Friday Center, UNC Campus.

Member, Knowledge Transfer RFP Peer Review Committee, Agency for Healthcare Research and Policy (AHRQ), September-October, 2003

Member, National Science Foundation *POWRE* Study Section, 2000 - 2001.

Chairperson, APSA Victoria Schuck Award Committee to select the best book on women and politics/gender politics published in 1993. 1994.

Editor, *Women/Politics*, APSA Organized Section for Women and Politics Research Newsletter. 1989 - 1994 (Vols 1-6).

Proposal Reviewer, National Science Foundation, Political Science Directorate. 1993 – 2004.

Member, Editorial Board. *American Journal of Political Science*. 1991 - 1994.

Member, Editorial Board. *Journal of Politics*. 1988 - 1997.

Member, Editorial Board, *Women & Politics*. 1986 - 1998.
Member, Executive Council. Southern Political Science Association. 1989 - 1992.
Chair, Executive Council Committee on Dual Career Professional Couples, Southern Political Science Association. 1991 - 1993.
Chair, Editorial Board Search Committee for Selection of New Editor, *Women & Politics*. 1989-1990.
Member, Executive Council, APSA Organized Section for Women and Politics Research. 1989 - 1990.
Member, Committee on the Status of Women in the Profession, American Political Science Association, 1989 - 1992.
President, Women's Caucus for Political Science: South. 1984 - 1985.
Manuscript Referee: *American Political Science Review*; *Journal of Politics*; *Women & Politics*; *American Journal of Political Science*; *Political Research Quarterly*; *American Politics Quarterly*; *Comparative Politics*; *Social Science Quarterly*; *Canadian Journal of Political Science*; *Political Psychology*; commercial and university presses.

II. Selected service to the university community

a. Service to The University of North Carolina at Chapel Hill

Member, Student Services Advisory Committee, 2016-2020 (appointed by President of the Faculty Senate Bruce Cairns)
Elected Member, UNC School of Medicine Education Committee, 2016-2019.
Member, Advisory Board, UNC Center for Faculty Excellence, 2016-2019.
Member, Committee on Copyright, UNC Chapel Hill, 2016-2019 (appointed by Chancellor Carol Folt)
Chair, Health Sciences Library Advisory Committee, 2014-2017
Member, Administrative Board of the Library (all UNC Libraries), 2014-2017
Immediate Past President, President, President-elect, Member, Executive Committee, UNC School of Medicine Academy of Educators, 2013-2017.
Health Sciences Library Advisory Committee, Representative for the Gillings School of Global Public Health, 2010-2012, 2012-2014.
Member, Education Programs Subcommittee, LCME Self-Study Committee, UNC School of Medicine, 2010-2011 (this subcommittee was a part of the larger entity charged with preparing the School of Medicine's Self-Study Report prior to its Re-Accreditation visit and evaluation in 2011-2012.)
Member, Preventive Medicine Residency Advisory Council, UNC School of Medicine, 2009-present.
Assistant Chair for Faculty Development, Department of Pediatrics, UNC School of Medicine, 2008-present.
Associate Director, Health Care and Prevention MD-MPH concentration, UNC Gillings School of Global Public Health, 2007-present.
Committee Member, Graduate Program Review, Public Health Leadership, UNC Gillings School of Global Public Health, 2006-2007.

b. Service to Texas Tech University, 1985 - 1996

Chairperson, Dean's Special Advisory Committee in the matter of a faculty grievance, Texas Tech University, 1995
Chairperson, College of Arts and Sciences Sexual Harassment Grievance Committee, Texas Tech University, 1994 - 1995.
Chairperson, Vice-Provost's Ad Hoc Committee to Investigate a Charge of Misconduct in Research, Texas Tech University, Spring, 1994.

Director of Graduate Studies, Department of Political Science, Texas Tech University,
1989 - 1990.

Member, Dean's Political Science Chair Search Committee, 1989 - 1990.

Provost's Ad Hoc Committee on Dual Career Couples, Texas Tech University, 1988-1989.

Member (representing the College of Arts and Sciences), Texas Tech University Affirmative Action
Committee, 1988 - 1989.

Member, Faculty Senate. Texas Tech University. 1987 - 1990.

c. Other

External Advisor, Creighton Research Infrastructure Program to Create Sustainability, SUSTAIN Grant
funded by the Agency for Healthcare Research and Quality, Creighton University Health Services
Research Program, Kimberly A. Galt, PhD, Principal Investigator. 2009 – 2014.

Research Statement

What is a political scientist doing in a Department of Pediatrics, serving as its Assistant Chair for Faculty Development? How did she come to be co-directing an MD-MPH joint degree program, when she holds neither degree? What is she doing as the Social Science and Child Health Research Navigator in the NC TraCS Institute? Why has she been advanced for promotion to Research Associate Professor, when she had already climbed the academic ladder, reaching the rank of Professor (with tenure) in 1994? My second career, and the transition from my first scholarly life to my present endeavors, is not always easy to explain. Sometimes I try to defuse bewilderment with a small joke, by saying "Well...Political Science, Pediatrics, Public Health: they all begin with 'P,' you see?"

Besides starting with the letter P, what Pediatrics, Political Science, and Public Health share is their call to us to join an intense, unceasing mission to improve the human condition. In all three of the disciplines, some of my most satisfying moments have been those in which I have helped others to advance their research skills and capacities, and their research agendas, in order to contribute to the concatenation of human knowledge that is our surest route to improvement in human wellbeing. In recent years, I have had the pleasure and privilege of helping students, fellows, residents, and colleagues at all faculty ranks develop and execute projects so varied that I marvel at the range of creativity I have seen each day at UNC. That has been my job: to facilitate the research of my students, my colleagues, and my scholarly community as a whole.

The simple, practical reason for my career transition is that my husband (who died in 2006) and I had commuted for many years, from his first postdoctoral fellowship at Yale, and my first academic job at the University of South Carolina in 1983, through the years during which I became a senior member of the faculty at Texas Tech University, during which time Cliff was a research scientist at UNHC. In 1996 I determined to stop commuting by finding new and meaningful work to do in Chapel Hill. Although my graduate degrees are in political science, my earlier training had been in biology, and I had worked my way through college as what was then called a "nurses' aide" on an orthopaedics and neurosurgery ward in a large Atlanta hospital. I had been a Medical Technologist briefly after college, as my husband and I worked, saved, and aspired to graduate school. By that time, I had realized that my calling was in understanding, teaching, and adding to our knowledge of political behavior. I had come to think of political science as the biology of human interaction: engaging in politics is the quintessentially defining human activity, and our only means of conflict regulation short of violence. Politics is the thing to which

humans resort to answer the hardest questions. I loved and still love the study of political behavior and public policy, at the same time that I have never lost my love of science and medicine. I have been gratified by my success as a political science scholar. Upon moving to Chapel Hill, given my earliest experiences, and a loving partnership with a molecular biologist, it seemed natural to try to find a new career direction as a political scientist working in Health Affairs, especially if I could find productive ways to link politics, policy, and health.

In 1997, I took the first step of this second career when I became the Associate Director of a small pharmaceutical outcomes research center in what is now the Eshelman School of Pharmacy. That position quickly led to a move to public health, where I ran the UNC Program on Health Outcomes (PHO) for Dr. William L. Roper, while he was Dean of Public Health. One of our major federally funded PHO programs was the Center for Education and Research on Therapeutics, or CERTs; the UNC CERTs was the only one of 9 CERTs programs at the time to devote itself to pediatric therapeutics. Our pediatric CERTs activities opened the way for a strong collaborative partnership with Dr. Alan Stiles and a number of my pediatric colleagues. These partnerships, in turn, led to my faculty position in Pediatrics. Dr. Stiles paid me the compliment of believing that my considerable past academic and professional experience could enable me to be useful to junior faculty members in Pediatrics, and I have relished helping to build the department's mentorship, now working very closely with Dr. Terry Noah.

I believe I have been particularly able to use my extensive social science training and research experience to help colleagues engage in the use of new research methods, especially in survey research, qualitative methods, and policy analysis. As a North Carolina TraCS Institute Research Navigator, I have helped over 50 people in recent years from every school in Health Affairs, the School of Social Work, and the College of Arts and Sciences develop proposals and pursue funding for a broad range of translational research projects. I was one of many investigators who contributed to the writing of the Child Health Core portion of the original TraCS proposal and I have continued to be listed as a co-investigator in subsequent renewal applications.

My own research interests remain focused on health politics and health policy, but my strongest research focus, at this stage of my career, is aiding and developing the research of others.
[CITI training refresher course on human subjects protections passed on 8 April 2021, expiring 7 April 2024.]

Teaching Statement

I am honored to have been a Fellow of the UNC School of Medicine Academy of Educators since 2008, its President-elect in 2014-2015, and its President in 2015-2016.

The vast majority of my teaching, advising, and research supervision at UNC in recent years is with the MD-MPH students in the Health Care & Prevention program, of which I am Associate Director (Anthony Viera MD MPH, Director).

The Health Care & Prevention MD-MPH program is one of the nation's oldest, largest program developed explicitly to train medical students and physicians in the population sciences. Approximately 20% of each MS3 cohort at UNC will enter the MPH program between the 3rd and 4th years of medical school; the program also includes a very small number of MS2s, medical students from Duke University and other medical schools across the nation, and postgraduate physician fellows and residents in all fields. The

program's particular areas of emphasis are prevention, evidence-based practice, quality of care, and health outcomes, but beyond this special focus, it meets all certification requirements for the Master of Public Health degree. I teach a core course, an elective, and a practicum in the program, and I am the advisor for approximately a quarter of our cohort, or about 12 to 15 students, each year. Please see the list of my advisees since 2005 above.

The rest of this teaching narrative provides detailed information on my teaching responsibilities in the program and elsewhere in the School of Medicine; it also lists my past teaching experience. At all times, the goal of my teaching is simultaneously to impart substantive knowledge of a subject, facility with the technical research skills that engender knowledge, and an understanding of, and commitment to, the best academic practices through which we assure the transparent integrity of knowledge creation.

I realized several years into my career transition that I missed the classroom keenly. Thus, when Drs. Linda Kinsinger, Russell Harris, and William Sollecito asked whether I could begin teaching the core, required health systems class in the Health Care & Prevention MD-MPH program in the mid-1990s, I was a bit daunted but intrigued. I told them that I could not teach the class from a "small s" system management perspective, but would have to try to teach the "large S" U.S. Health System perspective, with an emphasis on how the system has made the critical political choices it has made. That initial summer course, "The Politics of the U.S. Health Care System," grew to both a summer and fall version, to accommodate all the students in what is the nation's oldest and largest dedicated joint MD-MPH program. Soon I was teaching another elective course in the spring, "Policy Issues in Health Outcomes and Quality of Care," and by the mid-2000s I was being asked by students to supervise them in policy research for their required master's papers – something that the MD-MPH students had not done before.

I am now the Associate Director of the program, working closely with its Director, Cynthia Feltner MD MPH (Department of Medicine), who was my advisee when she herself earned the degree. I had in the past been a Director of Graduate Studies, and I have been grateful to have the chance to put what I learned about graduate education then at the service of our superb MD-MPH program now.

Today, I am the advisor and "first reader" – the master's paper supervisor – for usually more than a quarter and sometimes as much as half of the MD-MPH cohort (see the advisee tables in the Teaching Record section above), who seek to do their master's research in one of numerous health policy areas. I have never found my teaching to be more deeply gratifying than it is to work with these students. Our "practical idealists" take time from medical school or fellowship residency to earn their Master of Public Health degree because they believe that, in addition to the individual care they will provide to each patient, they need to understand population health. I love teaching them about the political system and how not just economics, but politics, shapes the system in which they will practice. I love watching the blossoming sophistication with which they learn to connect their individual training experiences to larger system phenomena. Because I believe many of them will go on to be system leaders, I feel especially privileged to be able to create a space in which they can stretch their analytical wings, scrutinizing political systems' effects on health. I relish guiding them as they originate and execute fine research designs that, although they are usually done on a shoestring (if that), nonetheless hew to best research practices. Their projects are small in scope but large in quality. I know that I have helped them engage in the kind of intense research experience in which they have owned every part of the process. It is a training lesson they will never forget and always use.

I want to help create a space in which learners can stretch their wings. One of the most exhilarating parts of my current teaching is to convince students fresh from the pre-clinical years and their first clinical rotations that they can learn equally well in a more self-directed, somewhat less focused, Socratic context. My courses are true graduate seminars, for which the required readings and resources become the

launching platform. The students' "problem-based learning," in this context, is not exactly what they are used to in their med school small groups, but they quickly find their way. This approach does not suit all students, as I well recognize, but even those for whom free seminar discussion is not the most comfortable format demonstrate to me, via their writing, that they are learning the fundamentals of health politics and health policy.

An equally powerful part of my teaching philosophy is my zeal to guide the students toward better writing. I tell them that they may seldom encounter anyone who cares quite so much about their writing – about giving them the tools and the constructive, critical feedback they need for improvement. I tell them that the very large amount of writing I require from them is vital practice for the execution of their master's papers, perhaps the longest single document any of them has written to this point. I tell them that, because I know they will be physician leaders, it is even more important that they can present their ideas with elegant clarity and completeness. My course websites are full of writing resources for them and, I am delighted to say, they return to me for writing advice and feedback even after they are no longer my students. I believe they understand that I do all this because their scholarly and professional development is so important to me.

Diversity, Equity, and Inclusion Statement

I entered Georgia Tech in 1968 as a 16-year old freshman (I turned 17 during that first Fall Quarter) and I entered an overwhelmingly male world. I found myself one of about 100 women, from first years to doctoral students, among about 8500 men, many of them older than traditional college-aged students because they were "coop" students, in class one quarter and then working the next, or because they were Vietnam veterans.

My parents, who had not had the opportunity to attend college, and I thought we were seizing a marvelous educational opportunity – and it truly was – but neither they nor I could have contemplated that I was beginning life as an "only." I was the only woman – though still very much a girl! – in most of my classes. I was often the only female presence to be seen as I walked to class. Georgia Tech had not thought to provide women's restrooms in many buildings (women students gratefully cultivated the friendship of department secretaries, who often let us use their own little bathrooms), nor would it allow the women students to use recreational facilities. Georgia Tech gave context and an everyday, practical meaning to my blossoming feminism.

When I entered graduate school in political science, my "only-ness" continued. Political science was even more male-dominated than was economics. I was usually not the only woman in class, though we were greatly outnumbered. When I began teaching, I faced an often striking lack of acceptance on the part of both male and female students: could I really be the political science professor? Wasn't I just the teaching assistant? I will be grateful forever to my mentor, Roberta S. Sigel, who had forged an even lonelier path. She taught me, as a model even more than as an explicit teacher, how to be a woman in an overwhelmingly male environment.

I used every lesson imparted by Roberta and by my own experience to make me the most competent professional and scholar I could be, and the best advocate for others, as being "the only..." continued. I found myself the only tenured woman in my department, the only Full Professor in my department...and on and on. This status had burdens, but it also brought opportunities. My feminism had brought me to political science, and it motivated my scholarship, but it also framed my presentation of myself as a professional and as an advocate for all women, everywhere, every day.

My experience as “the only woman” – not being seen, or on the other hand “sticking out,” being expected to be a representative of all my sex but also being expected to “fit” into the then dominant culture, trying sometimes gently and sometimes not so gently to get male colleagues to broaden their own perspectives – has made me keenly aware of all the other “only ones” – all the other people who embody the astonishing diversity of humanity. They bring a beautiful kaleidoscope of rich color and pattern to our world, but they also pay the “minority tax,” as I did. I don’t want anyone to have to pay a “minority tax” ever. That is my hope for our world, and that is the way I approach my work. I want to be one of the weavers of a tapestry for my students, my colleagues, and our community that shows what each person brings to the world.

Service and Engagement Statement

From the time of my first career in political science through my current work in health affairs has created an entirely new and most welcome opportunity to use my training, and to develop as a health politics and policy scholar, in addition to my established expertise in political behavior and gender politics, and to put my second focus on health policy, health politics, and health systems at the service of my community.

Fifteen years ago, recognizing that health politics scholars lacked sufficient professional infrastructure, I set about convincing colleagues that we needed to establish an Organized Section (virtually the equivalent of a specialty society) for Health Politics and Policy Research in the American Political Science Association, the premier political science professional organization (not just for U.S. political scientists, but for political scientists all over the world). By 2009 I had succeeded in establishing the Section, and it continues to be an organized intellectual home for researchers in health politics and policy.

Ten years ago, I completed a two-year effort with my colleague Mark A. Peterson at the University of California at Los Angeles to co-edit a four-volume “master work” series in Health Politics and Policy. These volumes, published by SAGE in 2011 (see Section I.a. “Books” in my Bibliography, above) are the first attempt ever to assemble a canon of the most important literature in health politics, and the construction of the volumes was a challenging and rewarding intellectual exercise. As you see, I list this here in Service and Engagement because, although it involved exhaustive research of the canon, its most important contribution is to serve the community by organizing its literature. At the same time as I was at work on the four volume series, I was one of the principle authors of a new clinical practice guideline for the management of Juvenile Idiopathic Arthritis, sponsored by the American College of Rheumatology. The guideline (Beukelman et al. 2011) was published in *Arthritis Care & Research*, and posted on the ACR website, on April 1, 2011. I think few scholars have such breathtakingly different opportunities to contribute to the scholarly community as I have been privileged to have.

Recently, I have had the great honor and privilege of serving the School of Medicine’s education mission by contributing to its Academy of Educators, first as a faculty Fellow, then as a member of the Executive Committee, and finally as a former President. My engagement with the Academy of Educators has led me to new opportunities to serve the school and its students and trainees. I have recently concluded a term as an Elected Member of the School of Medicine’s Education Committee, where I relished the opportunity to serve our educational mission.

In my role as Associate Chair for Faculty Development, I have had growing opportunities to work with Vice Chair Terry Noah to contribute to the development of an environment in which our colleagues can flourish. The present work climate taxes physicians’ ability to balance their professional and personal demands, and to feel that they are fully supported to work “at the top of their license.” I am humbly grateful to

have the chance to work with Dr. Noah and the leadership of Pediatrics and the School to improve that climate.

My career has certainly been an unusual one, as I have climbed the academic ladder twice. While I hope I will never stop creating my own scholarship, I want to continue to spend the rest of my working life doing what I am doing now: helping colleagues and students everywhere expand their capacity to create and concatenate knowledge to put to the service of the civic community – to help the academy continue its betterment of the human estate. This aspiration continues to move me.
