

Teaching yourself about structural racism will improve your machine learning

Whitney Robinson, PhD
Duke University School of Medicine

In this talk, Dr. Robinson will forth the following argument: Anyone conducting machine learning in a health-related domain in the US should educate themselves about structural racism. Structural racism is a critical body of knowledge needed for accuracy, equity, and transportability of algorithms in almost all domains of health research

Thursday September 15, 2022, 3:30-4:30 PM Eastern

133 Rosenau Hall
