

CURRICULUM VITAE

Saame 'Raz' Shaikh, Ph.D.

Cell Phone: (317) 409-9565
Email: shaikhsa@email.unc.edu

EDUCATION:

Postdoctoral Training in Immunology The Johns Hopkins University Department of Biology Advisor: Dr. Michael Edidin	2004 – 2008
Ph.D. Medical Biophysics Indiana University Dissertation: The Role for Docosahexaenoic Acid in Lipid Raft Phase Separation: Implications for Cellular Signaling Advisor: Dr. Bill Stillwell	2004
M.S. Biology Purdue University Thesis: Lipid Phase Separation in a Model Plasma Membrane	2001
B.S. - Biology (2 nd major) Purdue University	1998
B.S. - Psychology (1 st major) Purdue University	1997

PROFESSIONAL EXPERIENCE:

University of North Carolina at Chapel Hill, Gillings School of Global Public Health

- Professor of Nutrition 2022-
- Co-Director, Nutrition Research Obesity Center (NORC) 2021-
- Co-Director, Pilot & Feasibility Program, Nutrition Research Obesity Center 2020-2022
- Associate Chair for Research 2018-
- Associate Professor of Nutrition 2017-2022
- Co-Director, Animal Metabolism Phenotyping Core 2017-

East Carolina University, Department of Biochemistry, East Carolina Diabetes & Obesity Institute, Brody School of Medicine

- Adjunct Associate Professor of Microbiology & Immunology 2015-2017

- Associate Professor of Biochemistry & Molecular Biology
(early tenure granted 7/01/14) 2014-2017
- Assistant Professor of Biochemistry & Molecular Biology 2008-2014

HONORS:

American Society for Nutrition (ASN) Board of Directors (Director-at-Large for Basic Mechanisms)	2022-2024
International Society for the Study of Fatty Acids and Lipids (ISSFAL) Board of Directors	2021-2025
UNC Dept. of Nutrition Impact Award	2019
Mary Swartz Rose Young Investigator Award from American Society for Nutrition (ASN)	2018
ECU – University Scholar Award	2017
ECU Five-Year Achievement for Excellence in Research and Creative Activity Award	2016
Recipient of Early Career Award from ISSFAL	2012
President of Nutritional Immunology – Experimental Biology	2012-2013
USDA Advisory Panel on n-3 PUFAs – Human Health and Disease	2010-2016
Secretary of Nutritional Immunology – Experimental Biology	2010-2012
Howard Hughes Teaching Fellowship – Johns Hopkins University	2006
Avanti Lipids Founders Award for Best Abstracts	2001

PUBLICATIONS:

*indicates students or post-docs mentored by SR Shaikh

Articles in Review/Revision

84. Cavazos AT, *Pennington ER, *Dadoo S, Gowdy KM, Wassal SR, and **Shaikh SR**. OxPAPC stabilizes lipid raft-like domains in biomimetic membranes. *Biophys J*. In revision.

Research Articles

83. Dunigan-Russel K, Yaeger M, Hodge M, Kilburg-Basnyat B, Reece S, Birukova A, Guttenburg M, Novak C, Chung S, Ehrmann BM, Wallace ED, Tokarz D, Majumder N, Li X, Christman W, Shannahan J, Ballinger M, Hussain S, **Shaikh SR**, Tighe R, Gowdy KM. Scavenger receptor BI attenuates oxidized phospholipid-induced pulmonary inflammation. *Toxi Applied Pharmacol*. Accepted, 2023.

82. Psaltis CE, Fussner LY, Yaeger M, Aloor JJ, Reece SW, Kilburg-Basnyat BJ, Varikuti S, Luo B, Inks M, Sergin S, Schmidt CA, Neuffer PD, *Pennington ER, Fisher-Wellman KH, Chowdhury SM, Fessler MB, Fenton JI, Anderson EJ, **Shaikh SR**, Gowdy KM. The prohibitin complex regulates macrophage fatty acid composition, plasma membrane packing, and lipid raft-mediated inflammatory signaling. *Prostaglandins, Leukot, and Essent Fatty Acids*. In press 2023.

81. Sanders AE, E. Weatherspoon ED, Ehrmann BM, Soma PS, **Shaikh SR**, Preisser JS, Ohrbach R, Fillingim RB, Slade GD. Circulating polyunsaturated fatty acids and pain intensity in five chronic pain conditions. *J Pain*, accepted, October 13, 2022. PMID pending.
80. *Virk R, *Buddenbaum N, *Al-Shaer A, Armstrong M, Manke J, Reisdorph N, Sergin S, Fenton JI, Wallace ED, Ehrmann BM, Lovins HB, Gowdy KM, Smith MR, Smith GJ, Kelada SNP, and **Shaikh SR**. Obesity reprograms the pulmonary polyunsaturated fatty acid-derived lipidome, transcriptome, and gene-oxylin networks. *J Lipid Res* (2022) In press. PMID: 36028048
79. Green WD, Alwararawrah Y, *Al-Shaer AE, Shi Q, Armstrong M, Manke J, Reisdorph, N, Farrell TM, Hursting SD, MacIver NJ, Beck MA, and **Shaikh SR**. Inflammation and metabolism of influenza-stimulated PBMCs from adults with obesity following bariatric surgery. *J Infect Dis.* (2022) In press. PMID: 35975968
78. Sanders AE, E. Weatherspoon ED, Ehrmann BM, Soma PS, **Shaikh SR**, Preisser JS, Ohrbach R, Fillingim RB, Slade GD. Circulating polyunsaturated fatty acids, pressure pain thresholds, and nociplastic pain conditions. *Prostaglandins Leukot Essent Fatty Acids.* (2022) In press.
77. *Al-Shaer AE, *Pal A, Shi Q, Carson MS, Regan J, *Behee M, *Buddenbaum N, Drawdy C, Davis T, *Virk R, and **Shaikh SR**. Modeling human heterogeneity of obesity with diversity outbred mice reveals a fat mass-dependent therapeutic window for resolvin E1. *FASEB J.* 36(6) (2022) e22354.
76. Sanders AE, E. Weatherspoon ED, Ehrmann BM, Soma PS, **Shaikh SR**, Preisser JS, Ohrbach R, Fillingim RB, Slade GD. Circulating omega-6 and omega-3 polyunsaturated fatty acids in painful temporomandibular disorder and low back pain. *J Pain.* In press. (2022)
75. Sanders AE, Weatherspoon ED, Ehrmann BM, Soma PS, Shaikh SR, Preisser JS, Ohrbach R, Fillingim RB, Slade GD. Ratio of omega-6/omega-3 polyunsaturated fatty acids associated with somatic and depressive symptoms in people with painful temporomandibular disorder and irritable bowel syndrome. *J Pain.* (2022) in press.
74. *Al-Shaer AE, *Regan J, *Buddenbaum N, Tharwani S, *Drawdy C, *Behee M, Sergin S, Fenton JI, Maddipati KR, Kane S, Butler E, **Shaikh SR**. Enriched marine oil supplement increases specific plasma specialized pro-resolving mediators in adults with obesity. *J Nutr* 152 (2022) 1783-1791.
73. Masood S, Pennington ER, Simmons SO, Bromber PA, **Shaikh SR**, Rice R, Gold A, Zhang Z, and Samet J. Live cell imaging of oxidative stress in human airway epithelial cells exposed to isoprene hydroxyhydroperoxide. *Redox Biol.* 51 (2022) 102281.
72. *Al-Shaer A, *Pal A, and **Shaikh SR**. Resolvin E1-ChemR23 axis regulates hepatic whole genome and exon level metabolic/inflammatory variants in diet-induced obesity. *Front Nutr.* 8 (2022) 799492 (p. 1-12)

71. *Pal A, Sun S, Armstrong M, Manke J, Reisdorph N, Adams VR, Kennedy A, Zu Y, Moustaid-Moussa M, Carroll I, and **Shaikh SR**. Beneficial effects of eicosapentaenoic acid on the metabolic profile of obese female mice entails upregulation of HEPes and increased abundance of enteric *Akkermansia Muciniphila*. *Biochim Biophys Acta Mol Cell Biol Lipids*. 1867 (2022) 159059. (p. 1-13)
70. Green WD, *Al-Shaer AE, Shi Q, Gowdy KM, MacIver N, Milner J, Beck MA, and **Shaikh SR**. Metabolic and functional impairment of CD8⁺ T cells from the lungs of influenza-infected obese mice. *J Leukoc Biol* 111 (2022). 147-159. Green and Al-Shaer co-authors. (p. 1-9)
69. *Vander Ploeg M, Quinn K, Armstrong M, Manke J, Reisdorph N, and **Shaikh SR**. SPM pathway marker analysis of the brains of obese mice in the absence and presence of eicosapentaenoic acid ethyl esters. *Prostaglandins Leukot Essent Fatty Acids*. 175 (2021) 102360. (p. 1-6)
68. Reece SW, Yaeger M, Kilburg-Basnyat B, Hodge MX, *Pal A, Dunigan-Russel K, Luo B, You D, Bonner J, Spangenburg E, Tokarz D, Hanna J, Armstrong M, Manke J, Reisdorph N, Tighe RM, **Shaikh SR**, and Gowdy KM. Sex differences in pulmonary eicosanoids and specialized pro-resolving mediators in response to ozone exposure. *Tox. Sci* 183 (2021) 170-183. (p. 1-13)
67. Gowdy KM, Kilburg-Basnyat B, Hodge MX, Reece SW, Yermalitsk V, Davies SS, Manke J, Armstrong ML, Reisdorph N, Tighe RM, and **Shaikh SR**. Novel mechanisms of ozone-induced pulmonary inflammation and resolution, and the potential protective role of scavenger receptor BI. *Res Rep Health Eff Inst*. 204 (2021) 1-49. (p. 1-49)
66. Ferrara PJ, Rong X, Maschek JA, Verkerke ARP, Siripoksup P, Song H, Greene TD, Krishnan KC, Johnson JM, Turk J, Houmard JA, Lusi AJ, Drummond MJ, McClung JA, Cox JE, **Shaikh SR**, Tontonoz P, Holland WL, and Funai K. The Lands cycle modulates plasma membrane lipid organization and insulin sensitivity in skeletal muscle. *J Clin Invest* 131 (2021) 135963. (p. 1-13)
65. Armstrong M, Manke J, Nkrumah-Elie Y, **Shaikh SR**, and Reisdorph N. Improved quantification of lipid mediators in plasma and tissues by liquid chromatography tandem mass spectrometry demonstrates mouse strain specific differences. *Prostaglandins Other Lipid Mediat*. 151 (2020) 106483. (p. 1-8).
64. Allen ME, *Pennington ER, Perry JB, Dadoo S, Makrecka-Kuka M, Dambrova M, Moukdar F, Patel HD, Han X, Kidd GK, Benson EK, Raisch TB, Poelzing S, Brown DA, **Shaikh SR**. The cardiolipin-binding peptide elamipretide mitigates fragmentation of cristae networks following cardiac ischemia reperfusion in rats. *Commun Biol*. 389 (2020) 3(1). (p. 1-12)
63. *Pal A, *Al-Shaer AE, *Guesdon W, Torres MJ, Armstrong M, Quinn K, *Davis T, Reisdorph N, Neuffer PD, Spangenburg EE, Carroll I, Bazinet RP, Halade GV, Clària J, and **Shaikh SR**. Resolvin E1 derived from eicosapentaenoic acid prevents hyperinsulinemia and hyperglycemia in a host genetic manner. *FASEB J*. 34 (2020) 10640-10656. (p. 1-16)

62. Tourki B, Kain V, **Shaikh SR**, Leroy X, Serhan CN, Halade GV. Deficit of resolution receptor magnifies inflammatory leukocyte directed cardiorenal and endothelia dysfunction with signs of cardiomyopathy of obesity. *FASEB J.* 34 (2020) 10560-10573. (p. 1-13)
61. Perry JB, Davis GN, Allen ME, Makrecka-Kuka M, Dambrova M, Grange RW, **Shaikh SR**, and Brown DA. Cardioprotective effects of idebenone do not involve ROS scavenging: evidence for mitochondrial complex I bypass in ischemia/reperfusion injury. *J Mol Cell Cardiol.* (2019) 135:160-171. (p. 1-11)
60. Heden TD, Johnson JM, Ferrara PJ, Eshima H, Verkerke ARP, Wentzler EJ, Sigipoksup P, Narowski TM, Coleman CB, Lin C-T, Ryan TE, Reidy PT, de Castro Brás LE, Karner CM, Burant CF, Maschek A, Cox JE, Maschek DG, Kardon G, Boudina S, Zeczycki TN, Rutter J, **Shaikh SR**, Vance JE, Drummond MJ, Neufer PD, Funai K. Mitochondrial PE potentiates respiratory enzymes to amplify skeletal muscle aerobic capacity. *Sci Adv.* 5 (2019) eaax8352. PMID: 31535029. (p. 1-11)
59. *Crouch JM, *Kosaraju R, *Guesdon W, Armstrong M, Reidorph N, Jain R, Fenton J, and **Shaikh SR**. Frontline Science: A reduction in DHA-derived mediators in male obesity contributes toward defects in select B cell subsets and circulating antibody. *J Leukoc Biol.* 106 (2019) 241-257. **Featured article of the month.** (p. 1-16)
58. Ryan TE, Yamaguchi DJ, Schmidt CA, Zeczycki TN, **Shaikh SR**, Brophy P, Green TD, Tarpey MD, Karnekar R, Goldberg EJ, Sparagna GC, Torres MJ, Annex BH, Neufer PD, Spengenburg EE, McClung J. Extensive skeletal muscle mitochondriopathy distinguishes critical limb ischemia patients from claudicants. *JCI Insight.* 3 (2018) e123235 (cover of the journal). (p. 1-17)
57. *Pennington ER, *Sullivan EM, *Fix A, *Dadoo S, Zeczycki TN, DeSantis A, Schlattner U, Coleman RA, Chicco AJ, Brown DA, and **Shaikh SR**. Proteolipid domains form in biomimetic and cardiac mitochondrial vesicles and are regulated by cardiolipin concentration but not monolysocardiolipin. *J Biol Chem.* 293 (2018) 15933-15946. (p. 1-14)
56. Sanders AE, **Shaikh SR**, and Slade GD. Long-chain omega-3 fatty acids and headache in the U.S. population. *Prostaglandins Leukot Essent Fatty Acids.* 135 (2018) 47-53. (p. 1-6)
55. Wassall SR, Leng X, Canner SW, *Pennington ER, Kinnun JJ, Cavazon AT, *Dadoo S, Johnson D, Heberle FA, Katsaras J, and **Shaikh SR**. Docosahexaenoic acid regulates the formation of lipid rafts: A unified view from experiment and simulation. *Biochim Biophys Acta.* 1860 (2018) 1985-1993. (p. 1-8)
54. **Shaikh SR**, Shaver PR, and Shewchuk B. High fat diet dysregulates hypothalamic-pituitary axis gene expression levels which are differentially rescued by EPA and DHA ethyl esters. *Mol. Nutr. Food. Res.* 62 (2018) e1800219. (p. 1-10)
53. Kilburg-Basnyat, Reece S, *Crouch M, Luo B, Boone A, Psaltis C, Yaeger M, Hodge M, Hannan J, Armstrong M, Reisdorph N, Tighe R, **Shaikh SR**, and Gowdy K. Specialized pro-

resolving lipid mediators regulate ozone-induced pulmonary and systemic inflammation (2018). *Tox Sci.* 163 (2018) 466-477. (p. 1-11)

52. Leng X, Kinnun JJ, Cavazos A, Canner SW, **Shaikh SR**, and Wassall SR. All n-3 PUFA are not the same: MD simulations reveal differences in membrane organization for EPA, DHA, and DPA. *Biochim Biophys Acta.* 1860 (2018) 1125-1134. (p. 1-11)

51. *Sullivan EM, *Pennington ER, Sparagna GC, Torres M, Neufer PD, Harris M, Washington J, Anderson EJ, Zeczycki TN, Brown DA, and **Shaikh SR**. Docosahexaenoic acid lowers cardiac mitochondrial enzyme activity by replacing linoleic acid in the phospholipidome. *J Biol Chem.* 293 (2018) 466-483. (p. 1-17)

50. *Guesdon W, Kosaraju K, Brophy P, Clark A, Dillingham S, Aziz S, Moyer S, Wilson K, Dick JR, Patil SP, and **Shaikh SR**. Effects of fish oils on ex vivo B cell responses of obese subjects upon BCR/TLR stimulation: A pilot study. *J Nutr Biochem.* 53 (2018) 72-80. (p. 1-8)

49. Kinnun JJ, Bittman R, **Shaikh SR**, and Wassall SR. DHA modifies the size and composition of raft-like domains: a solid state 2H NMR study. *Biophys J.* 114 (2018) 380-391. **Featured article as new and notable.** (p. 1-11)

48. Torres MJ, Kew KA, Ryan TE, *Pennington ER, Kew KA, Lin C-T, Buddo K, *Fix AM, Smith CA, Gilliam LA, Karvinen S, Lowe DA, Spangenburg EE, Zezycki TN, **Shaikh SR**, and Nuefer PD. 17 β -Estradiol modulates mitochondrial membrane lipid packing and bioenergetic function in skeletal muscle. *Cell Metab.* 27 (2018) 167-179.e7. (p. 1-12)

47. Westerhold LE, Bridges LC, **Shaikh SR**, and Zeczycki TN. Kinetic and thermodynamic analysis of acetyl-CoA activation of staphylococcus aureus pyruvate carboxylase. *Biochemistry.* 56 (2017) 3492-3506. (p. 1-14)

46. Steagall RJ, Yao F, **Shaikh SR**, and Abdel-Rahman A. Estrogen receptor α activation enhances its cell surface localization and improves myocardial redox status in ovariectomized rats. *Life Sci.* 182 (2017) 41-49. (p. 1-8)

45. Kosaraju R, *Guesdon W, *Crouch MJ, *Teague HL, *Sullivan EM, Karlsson EA, Schultz-Cherry S, Gowdy K, Bridges LC, Reese LR, Neufer PD, Armstrong M, Reisdorph N, Milner JJ, Beck MA, and **Shaikh SR**. B-cell activity is impaired in human and mouse obesity and is responsive to an essential fatty acid upon murine influenza infection. *J Immunol.* 198 (2017) 4738-4752. (p. 1-14)

44. *Sullivan EM, *Fix A, Brown DA, Zeczycki T, Sparagna G, and **Shaikh SR**. Cardiac mitochondrial phospholipid acyl chains are remodeled in murine obesity models but are not accompanied by impaired supercomplex formation or respiration. *J Nutr Biochem.* 45 (2017) 94-103. (p. 1-9)

43. Wang L, DeMarco S, Sanderson MS, Maiorana-Boutilier AL, Chen J, **Shaikh SR**, Phillips CM, and Bridges LC. RAR α /RXR synergism induces expression and function of the

trafficking receptors integrin $\beta 7$ and chemokine C-C motif receptor 9 (CCR9) in cutaneous T cell lymphoma. *Exp Dermatol.* 26 (2017) 1004-1011. (p. 1-7)

42. Aziz S, Wuensch KL, Gasperson J, and **Shaikh SR**. Exploring the link between work and health: Workaholism and family history of metabolic diseases. *Int J Work Health Manag.* 10 (2017) 153-163. (p. 1-10)

41. *Pennington ER, *Fix A, *Sullivan EM, Brown DA, Kennedy A, and **Shaikh SR**. Distinct membrane properties are differentially influenced by cardiolipin content and acyl chain composition in biomimetic membranes. *Biochim Biophys Acta* 1859 (2017) 257-267. (p. 1-10)

40. Harris M, Kinnun JJ, Kosaraju R, Leng X, Wassall SR, and **Shaikh SR**. Membrane disordering by eicosapentaenoic acid in B lymphomas is reduced by elongation to docosapentaenoic acid as revealed by solid-state nuclear magnetic resonance spectroscopy of model membranes *J Nutr.* 146 (2016) 1283-1290. (p. 1-7)

39. Alleman RJ, Tsang AM, Ryan TE, Patteson DJ, McClung JM, Spangenburg EE, **Shaikh SR**, Neuffer PD, Brown DA. Exercise-induced protection against reperfusion arrhythmia involves stabilization of mitochondrial energetics. *Am J Physiol Heart Circ Physiol.* 310 (2016) H1360-1370. (p. 1-10)

38. *Teague H, Harris M, *Whelan J, Comstock SS, Fenton JI, and **Shaikh SR**. Short-term consumption of n-3 PUFAs increases murine IL-5 levels but IL-5 is not the mechanistic link between n-3 fatty acids and changes in B cell populations. *J Nutr Biochem.* 28 (2016) 30-36. (p. 1-6)

37. **Shaikh SR**, Boyle S. and Edidin M. A high fat diet containing saturated but not unsaturated fatty acids enhances T cell receptor clustering on the nanoscale. *Prostaglandins Leukot Essent Fatty Acids.* 100 (2015) 1-4. (p. 1-4)

36. Gurzell EA, *Teague H, Duriancik D, Clinthorne J, Harris M, **Shaikh SR**, and Fenton JI. Marine fish oils are not equivalent with respect to B-cell membrane organization and activation. *J Nutr Biochem.* 26 (2015) 369-377. (p. 1-8)

35. Zeczycki T, Whelan J, Hayden WT, Brown DA, and **Shaikh SR**. Increasing levels of cardiolipin differentially influence packing of phospholipids found in the mitochondrial inner membrane. *Biochem Biophys Res Comm.* 450 (2014) 366-371. (p. 1-5)

34. **Shaikh SR**, *Sullivan EM, Alleman RJ, Brown DA, and Zeczycki TN. Increasing mitochondrial membrane phospholipid content lowers the enzymatic activity of electron transport complexes. *Biochemistry* 53 (2014) 5589-5591. (p. 1-2)

33. *Teague H, Harris M, Fenton J, Alleman P, Shewchuk BM, and **Shaikh SR**. Eicosapentaenoic and docosahexaenoic acid ethyl esters differentially enhance B-cell activity in murine obesity. *J. Lipid Res.* 55 (2014) 1420-1433. (p. 1-13)

32. Anderson EJ, Thayne K, Harris M, **Shaikh SR**, Darden TM, Lark DS, Williams JM, Chitwood WR, Kypson AP, and Rodriguez E. Do fish oil omega-3 fatty acids enhance antioxidant capacity and mitochondrial fatty acid oxidation in human atrial myocardium via PPAR γ activation? *Antioxid Redox Signal*. 10 (2014) 1156-1163. (p. 1-7)
31. Brown DA, Hale SL, Baines CP, del Rio CL, Hamlin RL, Yueyama Y, Kijawornrat A, Yeh ST, Frasier CR, Stewart LM, Moukdar F, **Shaikh SR**, Fisher-Wellman KH, Neuffer PD, and Kloner RA. Reduction of early reperfusion injury with the mitochondria-targeting peptide Bendavia. *J Cardiovasc Pharmacol Ther*. 19 (2014) 121-132. (p. 1-11)
30. Teague H, Phaner CJ, Harris M, Duriancik DM, Reid GE, and **Shaikh SR**. N-3 PUFAs enhance the frequency of murine B cell subsets and restore the impairment of antibody production to a T-independent antigen in obesity. *J Lipid Res*. 54 (2013) 3130-3138. **Cover of the journal and accompanying press release**. (p. 1-8)
29. *Rockett BD, *Melton M, Harris M, Bridges L, and **Shaikh SR**. Fish oil disrupts MHC class II lateral organization on the B-cell side of the immunological synapse independent of B-T cell adhesion. *J Nutr Biochem*. 24 (2013) 1810-1816. (p. 1-6)
28. *Teague H, *Rockett D, Harris M, Brown DA, and **Shaikh SR**. Dendritic cell activation, phagocytosis, and CD69 expression on cognate T cells are suppressed by n-3 long chain polyunsaturated fatty acids. *Immunology*. 139 (2013) 386-394. (p. 1-7)
27. Whelan JT, Chen J, Miller J, Morrow RL, Lingo JD, Merrell K, **Shaikh SR**, and Bridges L. 9-cis-Retinoic acid promotes cell adhesion through integrin dependent and independent mechanisms across immune lineages. *J Nutr Biochem*. 24 (2013) 832-841. (p. 1-9)
26. Gurzell EA, *Teague H, Harris M, Clinthorne J, **Shaikh SR**, and Fenton JI. DHA-enriched fish oil targets B cell lipid microdomains and enhances in vivo and ex vivo function. *J Leukoc Biol*. 93 (2013) 463-470. (p. 1-7)
25. *Teague H, Ross R, Harris M, Mitchell D, and **Shaikh SR**. DHA-fluorescent probe is sensitive to membrane order and reveals molecular adaptation of DHA in ordered lipid microdomains. *J Nutr Biochem*. 188 (2013) 188-195. (p. 1-7)
24. Williams JA, Batten SE, Harris M, *Rockett BD, **Shaikh SR**, Stillwell W, and Wassall SR. Docosahexaenoic and eicosapentaenoic acids segregate differently between raft and non-raft domains. *Biophys J*. 103 (2012) 228-237. (p. 1-9)
23. *Rockett BD, *Teague H, Harris M, *Melton M, Williams J, Wassall SR, and **Shaikh SR**. Fish oil increases raft size and membrane order of B cells accompanied by differential effects on function. *J Lipid Res*. 53 (2012) 674-685. (p. 1-11)
22. *Rockett BD, Harris M, and **Shaikh SR**. High dose of an n-3 polyunsaturated fatty acid diet lowers activity of C57BL6 mice. *Prostaglandins Leukot Essent Fatty Acids*. 86 (2012) 137-140. (p. 1-3)

21. Anderson EJ, Thayne K, Harris M, Carraway K, and **Shaikh SR**. Aldehyde stress and up-regulation of Nrf2-mediated antioxidant systems accompany functional adaptations in cardiac mitochondria from mice fed n-3 polyunsaturated fatty acids. *Biochem J*. 441 (2012) 359-366. (p. 1-7)
20. *Rockett BD, *Franklin A, Harris M, *Teague H, *Rockett A, and **Shaikh SR**. Lipid raft organization is more sensitive to disruption by (n-3) PUFA than nonrafts of EL4 and B cells. *J Nutr*. 141 (2011) 1041-1048. (p. 1-7)
19. *Rockett BD, *Salameh M, Carraway K, *Morrison K, and **Shaikh SR**. N-3 PUFAs improve fatty acid composition, prevent palmitate induced lipoapoptosis, and differentially modify B cell cytokine secretion in vitro and ex vivo. *J Lipid Res*. 51 (2010) 1284-1297. (p. 1-13)
18. **Shaikh SR**, LoCascio DS, Soni SP, Wassall SR, and Stillwell W. Oleic- and docosahexaenoic acid-containing phosphatidylethanolamines differentially phase separate from sphingomyelin. *Biochim Biophys Acta*. 1788 (2009) 2421-2426. (p. 1-5)
17. **Shaikh SR**, *Rockett BD, Salameh M, and Carraway K. Docosahexaenoic acid modifies the clustering and size of lipid rafts and the surface expression and lateral organization of MHC class I of EL4 cells. *J Nutr*. 139 (2009) 1632-1639. (p. 1-7)
16. Fooksman D, **Shaikh SR**, Boyle S., and Edidin M. PI(4,5)P2 concentration at the APC side of the immunological synapse is required for effector T cell function. *J Immunol*. 182 (2009) 5179-5182. Fooksman/Shaikh co-first authors. (p. 1-3)
15. **Shaikh SR**, Boyle S, Hua J, Li Z, and Edidin M. In vivo test of the vertical phase separation hypothesis: the display of major histocompatibility complex (MHC) class I molecules on membranes of B cells from mice fed high fat diets. *Br J Nutr*. 101 (2009) 804-809. (p. 1-5)

Abstracts for Conferences (posters and oral presentations, including session chairs)

159. Lovins HB, Schott E, Varikuti S, Yeager M, Russell KD, Hutton G, Kilburg-Basnyat, **Shaikh SR**, Gowdy DKM. ChemR23 axis regulates ozone-induced lung inflammation and injury. Society of Toxicology, Nashville TN, March 19-23, 2023 (poster pending approval)

158. Lovins HB, Schott E, Varikuti S, Yaeger M, Russel KD, Hutton G, Kilburg-Basnyat B, **Shaikh SR**, and Gowdy KM. Chemerin/ChemR23 axis regulates ozone-induced lung inflammation and injury. Poster presentation at the Davis Heart and Lung Research Institute Annual Meeting, Columbus OH, October 19, 2022.

157. Yeager M, Virk R, **Shaikh SR**, and Gowdy KM. DHA and ozone-induced inflammation. Poster presentation at the Bioactive Lipids in Cancer, Inflammation and Related Diseases Conference. 17th International Conference, New Orleans LA October 30-November 2, 2022.

156. Lovins HB, Schott E, Varikuti S, Yaeger M, Russel KD, Hutton G, Kilburg-Basnyat B, **Shaikh SR**, and Gowdy KM. Chemerin/ChemR23 axis regulates ozone-induced lung inflammation and injury. Poster presentation at the Bioactive Lipids in Cancer, Inflammation and Related Diseases Conference. 17th International Conference, New Orleans LA October 30-November 2, 2022.

155. *Bathon B, Gray R, Reisdorph N, Armstrong M, Manke J, Gowdy K. and **Shaikh SR**. Eicosapentaenoic acid lowers pulmonary alveolar MH-S cell IL-6 secretion through a mechanism independent of 5-HEPE, 18-HEPE, and 17(18)-EpETE. Poster presentation at the Bioactive Lipids in Cancer, Inflammation and Related Diseases Conference. 17th International Conference, New Orleans LA October 30-November 2, 2022.

154. *Bathon B, Coleman MF, *Virk R, Tlsty E, Hursting SD, and **Shaikh SR**. Murine obesity reduces pulmonary markers of immunosurveillance and the concentration of leukotrienes upon mammary cancer tumor burden. Poster presentation at the Bioactive Lipids in Cancer, Inflammation and Related Diseases Conference. 17th International Conference, New Orleans LA October 30-November 2, 2022.

153. *Virk R, Armstrong M, Manke J, Reisdorph N, *Bathon B, Gowdy KM, and **Shaikh SR**. The loss of ALX/FPR2 dysregulates the pulmonary oxylipin signature related to pathways of inflammation initiation and resolution. Poster presentation at the Bioactive Lipids in Cancer, Inflammation and Related Diseases Conference. 17th International Conference, New Orleans LA October 30-November 2, 2022.

152. *Virk R, Armstrong M, Manke J, Reisdorph N, Smith GJ, Kelada SNP, Gowdy KM, and **Shaikh SR**. Obesity dysregulates the pulmonary polyunsaturated fatty acid-derived lipidome, transcriptome, and gene-oxylipin networks. Poster presentation at the Bioactive Lipids in Cancer, Inflammation and Related Diseases Conference. 17th International Conference, New Orleans LA October 30-November 2, 2022.

*Virk R selected by the organizing committee for the Christopher C. Harris Travel Award.

151. *Virk R, *Bathon B, Gowdy KM, and **Shaikh SR**. Loss of the murine ALX/FPR2 receptor dysregulates the concentration of pulmonary oxylipins of inflammation initiation and resolution. Poster presentation at the Fredrickson Lipid Research Conference. September 8-10, 2022. Durham NC.
150. *Virk R, Gowdy KM, and **Shaikh SR**. Obesity impairs polyunsaturated fatty acid-derived metabolism related to inflammation initiation and resolution. Poster presentation at the Fredrickson Lipid Research Conference. September 8-10, 2022. Durham NC.
149. *Bathon B and **Shaikh SR**. Eicosapentaenoic acid lowers IL-6 secretion from pulmonary alveolar macrophages through a potential mechanism mediated by downstream hydroxylated oxylipins. Poster presentation at the Fredrickson Lipid Research Conference. September 8-10, 2022. Durham NC.
148. *Buddenbaum N, *Al-Shaer A, Armstrong M, Manke J, Reisdorph N, Sergin S, Fenton JI, Wallace ED, Ehrmann BM, Lovins HB, Gowdy KM, Smith RM, Smith GJ, Kelada SNP, **Shaikh SR**. Obesity dysregulates the pulmonary oxylipin signature prior to and after acute lung injury. Poster presentation at the Interdisciplinary Nutrition Sciences Symposium. Chapel Hill, NC, July 21-22, 2022.
147. *Virk R, *Behee M, *Al-Shaer A, Armstrong M, Manke J, Reisdorph N, *Bathon B, Davis T, Vargas DM, Kelada SNP, Gowdy KM, and **Shaikh SR**. Knockout of the inflammation resolution receptor ALX/FPR2 dysregulates the murine pulmonary oxylipidome prior to injury. Poster presentation at the Interdisciplinary Nutrition Sciences Symposium. Chapel Hill, NC, July 21-22, 2022.
146. McNew ML, Munson CA, **Shaikh SR**, Smith SM, and Mooney SM. Mice lacking the inflammation-resolution receptor, ALX/FPR2, have worsened behavioral deficits after prenatal alcohol exposure. Alcoholism: Clinical and Experimental Research Suppl. 2022. Poster presentation at the Annual Meeting of the Research Society on Alcoholism Orlando Florida June 25-29, 2022.
145. *Virk R, Behee M, *Al-Shaer A, Armstrong M, Manke J, Reisdorph N, Gowdy KM, and **Shaikh SR**. Deficiency of ALX/FPR2 receptor dysregulates murine lipid mediators of pulmonary inflammation. Poster presentation at Southeastern Regional Society for Developmental Biology Conference. Chapel Hill, NC June 1-3, 2022.
144. Zu Y, Mikhael M, Scoggin S, *Pal A, **Shaikh SR**, Moustaid-Moussa. 8-Hydroxyeicosapentaenoic acid reduces adipogenesis and inflammation in 3T3-L1 adipocytes. American Society for Nutrition 2022, Online June 16, 2022.
143. *Buddenbaum N, *Virk R, *Al-Shaer A, *Behee M, Armstrong M, Manke J, Reisdorph N, Fenton JI, Wallace ED, Gowdy KM, and **Shaikh SR**. The pulmonary polyunsaturated fatty acid lipidome and transcriptome are dysregulated with diet-induced obesity. The American Thoracic Society Meeting, San Francisco, CA, May 1-3, 2022.

142. Yaeger MJ, Dunigan-Russell K, Lovins H, Hutton G, Rahman N, *Pal A, Manke J, Armstrong M, Reisdorph N, Basnyat-Kilburg B, Tighe RM, **Shaikh SR**, Gowdy KM. Docosaheptaenoic acid rich diet lowers pulmonary inflammation following ozone exposure differentially during acute and resolution phases of inflammation. Poster presentation for the Annual Society of Toxicology (SOT) Meeting. San Diego, CA, March 27-31, 2022.

141. *Pal A, *Virk R, Gowdy KM, **Shaikh SR**. Perfluorooctanoic acid targets B cell plasma membrane lipid raft organization and function. Poster presentation for the Annual Society of Toxicology (SOT) Meeting. San Diego, CA, March 27-31, 2022.

140. Cavazos AT, Wassall SR, *Pal A, **Shaikh SR**. A role for oxidized phospholipids in regulating membrane architecture? Poster presentation for the Annual Biophysical Society Meeting. San Francisco, CA. February 19-23, 2022.

139. **Shaikh SR**. Obesity drives a dysregulated specialized pro-resolving mediator signature: Implications for viral infection. The FASEB Nutrition, Immunity, and Inflammation Conference: From Model Systems to Human Trials (virtual, originally scheduled for Steamboat Springs, Colorado). July 27-29, 2021.

**Session Chair for Obesity: Impacts on Innate and Adaptive Immunity.

**Session Chair for Career Development Session for Early Career Scientists.

**Conference co-organizer.

138. *Virk R, *Buddenbaum N, *Al-Shaer A, Gowdy KM, **Shaikh SR**. Obesity dysregulates the pulmonary lipidome and transcriptome in a diet-dependent manner. Poster presentation at The FASEB Nutrition, Immunity, and Inflammation Conference: From Model Systems to Human Trials (virtual, originally scheduled for Steamboat Springs, Colorado). July 27-29, 2021.

137. Yaeger MJ, Dunigan-Russell K, Varikuti S, Lovins H, Hutton G, Rahman N, *Pal A, Manke J, Armstrong M, Reisdorph N, Kilburg-Basnyat B, Tighe RM, **Shaikh SR**, Gowdy KM. Docosaheptaenoic acid rich diet lowers pulmonary inflammation following ozone exposure differentially during acute and resolution phases of inflammation. Poster presentation at The FASEB Nutrition, Immunity, and Inflammation Conference: From Model Systems to Human Trials (virtual, originally scheduled for Steamboat Springs, Colorado). July 27-29, 2021.

136. Invited Panelist and Session Leader for “Specialized Pro-Resolving Mediators (SPMs) and Their Role in Actively Resolve Inflammation: Physiological Mechanisms and Immune-Nutrition Solutions for the Increasing Challenge of Inflammatory Health Conditions”. ASN Annual Meeting (Virtual) June 10, 2021.

135. **Shaikh SR**, Oestreich KJ, and Gowdy K. Specialized pro-resolving mediators are a missing link between obesity and impaired humoral immunity in the context of inflammation and influenza infection. Poster presentation at the Joint Conference of ISSFAL and The American Oil Chemists’ Society, May 10-14, 2021 (virtual, originally scheduled for Nantes, France).

134. **Shaikh SR.** Resolvin E1 has therapeutic potential for improving glucose homeostasis in a host-genome dependent manner. Invited speaker for the Joint Conference of ISSFAL and The American Oil Chemists' Society, May 10-14, 2021 (Virtual, originally scheduled for Nantes, France).

****Also session chair for Eicosanoids & Lipid Mediators Platform Session, May 10, 2021.**

133. Cavazos AT, Wassall SR, *Pal A, *Dadoo S, and **Shaikh SR.** Molecular organization of lipid rafts is modified by oxidized phosphatidylcholines. Poster presentation at The Annual Biophysical Society Meeting (virtual due to COVID). Feb 22-26, 2021.

132. **Shaikh SR.** Obesity drives a signature of impaired immunometabolism upon influenza infection. Talk and session chair for the Nutrition Obesity Research Center (NORC)/The Obesity Society Joint Symposium: Obesity and the Immune Response in the Age of COVID. Virtual Conference due to the COVID pandemic, The Obesity Society Meeting, November 6, 2020. **** also served as session organizer and chair.**

131. Varikuti S, Yaeger M, Stewart E, Kilburg-Basnyat B, *Pal A, Dunigan K, **Shaikh SR,** and Gowdy K. Chemerin/chemR23 axis regulates ozone induced lung inflammation and injury. Poster presentation at the Society of Toxicology Annual Meeting (virtual due to COVID). March 15-19, 2020.

130. Reece SK, Hodge MX, Browder EA, Kilburg-Basnyat BJ, Luo B, Armstrong M, Reisdorph N, Fenton J, Spangenburg EE, Hanna JL, Tighe RM, **Shaikh SR,** Gowdy KM. Sex differences in pulmonary eicosanoid metabolism in response to ozone exposure. Bioactive Lipids in Cancer, Inflammation and Related Diseases. Poster presentation at the 16th International Conference in St. Petersburg, Florida Oct. 20-23, 2019.

129. *Pal A, *Al-Shaer A, Armstrong M, Reisdorph N, and **Shaikh SR.** Eicosapentaenoic acid prevents hyperinsulinemia and hyperglycemia in obese mice through the host-genetic dependent effects of resolvin E1. Bioactive Lipids in Cancer, Inflammation and Related Diseases. Poster presentation at the 16th International Conference in St. Petersburg, Florida Oct. 20-23, 2019.

128. *Al-Shaer AA, *Crouch MJ, and **Shaikh SR.** Metabolites of the SPM family inhibit the enrichment of pro-inflammatory B cells in adipose tissue of obese mice. Bioactive Lipids in Cancer, Inflammation and Related Diseases. Poster presentation at the 16th International Conference in St. Petersburg, Florida Oct. 20-23, 2019.

127. **Shaikh SR** and *Crouch MJ. Obesity impairs humoral immunity in a sex-specific manner due to impaired production of lipid metabolites of the pro-resolving family. Oral presentation at the American Society for Nutrition Annual Meeting, June 8-11, 2019. Baltimore, MA.

126. *Pal A, *Guesdon W, and **Shaikh SR.** Eicosapentaenoic acid improves fasting insulin in murine obesity through the production of resolvin E1. Poster presentation at the 4th Annual Diversity in STEM conference. George Watts Hill Alumni Center, November 8, 2018. Chapel Hill, NC.

125. Allen ME, Pennington ER, **Shaikh SR**, Han X, and Brown DA. Preservation of mitochondrial structure-function with the cardiolipin-aggregating peptide Elamipretide. 20th European Bioenergetics Conference. August 25-30, 2018. Budapest, Hungary.
124. **Shaikh SR**. Obesity impairs B cell responses due to defects in the production of n-3 fatty acid derived mediators in a sex-specific manner. Invited oral presentation for FASEB Nutritional Immunology Conference. June 24-29, 2018. Leesburg, VA.
123. *Crouch MJ, *Guesdon W, and **Shaikh SR**. Docosahexaenoic acid-derived mediators regulate the B cell repertoire in murine obesity in a sex-specific manner. Poster presentation for FASEB Nutritional Immunology Conference. June 24-29, 2018. Leesburg, VA.
122. *Pal A, Armstrong M, Reisdorph N, and **Shaikh SR**. Eicosapentaenoic acid restores glucose and insulin homeostasis in obese mice: A potential role for the microbiome? Poster presentation for FASEB Nutritional Immunology Conference. June 24-29, 2018. Leesburg, VA.
121. *Pennington ER, Zeczycki T, DeSantis A, Brown DA, and **Shaikh SR**. Dietary docosahexaenoic acid remodels the cardiac mitochondrial phospholipidome and decreases respiratory enzymatic activity, which is rescued with linoleic acid. Poster presentation at the American Society for Nutrition Annual Meeting, June 8-11, 2019. Boston, MA.
120. Davis T, Dillingham S, Vannice G, and **Shaikh SR**. Palmitoleic acid levels are lowered in metabolically impaired humans and mice and dietary supplementation improves murine adipose inflammatory gene expression. Poster presentation at the American Society for Nutrition Annual Meeting, June 8-11, 2019. Boston, MA.
119. *Guesdon W, *Kosaraju R, Davis T, Dillingham S, Aziz S, Moyer F, Dick JR, Armstrong M, Reisdorph N, and **Shaikh SR**. B cell cytokine secretion and antibody production are modulated by fish oils in obese subjects. Poster presentation at the American Society for Nutrition Annual Meeting, June 8-11, 2019. Boston, MA.
118. *Pal A, *Guesdon W, Amorese AJ, Torres MJJ, Neuffer PD, Spangenburg EE, Armstrong M, Reisdorph N, and **Shaikh SR**. EPA-derived mediators are lowered in murine obesity and rescued with dietary intervention to improve glucose clearance. Poster presentation at the American Society for Nutrition Annual Meeting, June 8-11, 2019. Boston, MA.
117. *Crouch, MJ, Kosaraju R, *Guesdon W, Armstrong M, Reisdorph, and **Shaikh SR**. Docosahexaenoic acid-derived metabolites regulate bone marrow and splenic B cell populations in obesity in a sex-specific manner. Poster presentation at the American Society for Nutrition Annual Meeting, June 8-11, 2019. Boston, MA (*selected for additional 5-minute oral presentation given by SR Shaikh).
116. *Crouch, MJ, Kosaraju R, *Guesdon W, and **Shaikh SR**. Obesity drives an impaired B cell response in males but not females. Poster presentation at the American Society for

Nutrition Annual Meeting, June 8-11, 2019. Boston, MA (*selected for additional 5-minute oral presentation given by SR Shaikh).

115. *Crouch M, Kosaraju R, Armstrong M, Reisdorph N, and **Shaikh SR**. B cell subset frequencies and functional responses are impaired in human and mouse obesity in a sex-specific manner due to a potential decrease in specialized pro-resolving lipid mediators. Poster presentation at the International Society for the Study of Fatty Acids and Lipids (ISSFAL), May 27-31, 2018. Las Vegas, Nevada.

114. *Crouch M, *Guesdon W, Armstrong M, Reisdorph N, and **Shaikh SR**. Docosahexaenoic acid improves the decrement in antibody production of obese mice upon influenza infection through a mechanism mediated by 14-HDHA. Oral presentation at the International Society for the Study of Fatty Acids and Lipids (ISSFAL), May 27-31, 2018. Las Vegas, Nevada.

113. *Pal A, *Guesdon W, Amorese AJ, Torres MJ, Neufer PD, Spangenburg EE, Armstrong M, Reisdorph N, and **Shaikh SR**. EPA-derived mediators are lowered in murine obesity and rescued with dietary intervention to improve glucose clearance by potentially enhancing muscle force production. Poster presentation at the International Society for the Study of Fatty Acids and Lipids (ISSFAL), May 27-31, 2018, Las Vegas, Nevada.

112. *Pennington ER, Zeczycki T, DeSantis A, Brown DA, and **Shaikh SR**. Mitochondrial cardiolipin domains form in the presence of cytochrome c in biomimetic and cardiac mitochondrial vesicles in an acyl chain dependent manner. Poster presentation at the International Society for the Study of Fatty Acids and Lipids (ISSFAL), May 27-31, 2018. Las Vegas, Nevada.

111. *Pennington ER and **Shaikh SR**. Docosahexaenoic acid lowers cardiac mitochondrial respiratory enzyme activity by replacing linoleic acid in the phospholipidome. Oral presentation at the International Society for the Study of Fatty Acids and Lipids (ISSFAL), May 27-31, 2018. Las Vegas, Nevada.

110. *Pennington ER, *Sullivan EM, Sparagna G, Washington J, Zeczycki T, Brown DA, **Shaikh SR**. Docosahexaenoic acid lowers cardiac mitochondrial respiratory enzyme activity by replacing linoleic acid in the cardiolipin lipidome. Poster presentation at the International Society for the Study of Fatty Acids and Lipids (ISSFAL), May 27-31, 2018. Las Vegas, Nevada.

109. *Guesdon W, Kosaraju R, Davis T, Dillingham S, Aziz S, Moyer F, Dick JR, Armstrong M, Reisdorph N, and **Shaikh SR**. Fish oils exert immunomodulatory effects on B cell cytokine production and antibody production in obese subjects. Poster presentation at the International Society for the Study of Fatty Acids and Lipids (ISSFAL), May 27-31, 2018. Las Vegas, Nevada.

108. Davis T, Dillingham S, Vannice G, and **Shaikh SR**. Palmitoleic acid levels are lowered in metabolically impaired humans and mice and dietary supplementation improves murine

adipose inflammatory gene expression. Poster presentation at the International Society for the Study of Fatty Acids and Lipids (ISSFAL), May 27-31, 2018. Las Vegas, Nevada.

107. Perry JB, Sullivan EM, Allen ME, Bandara AB, Moukdar F, Stauffer BL, **Shaikh SR**, Brown DA. Supercomplex-dependent improvements in mitochondrial function with the mitochondria-targeting peptide elamipretide. Heart Failure 2018, May 26-29, 2018. Vienna Austria.

106. *Crouch MJ, *Pal A, Armstrong M, Reisdorph N, and **Shaikh SR**. Targeting pathways of inflammation resolution through precision nutrition to improve metabolic and immunological outcomes in obesity. Precision Nutrition Symposium, May 1-2, 2018. Kannapolis, NC.

105. **Shaikh SR**. Targeting inflammation resolution through precision nutrition to improve metabolic outcomes. Regional Diabetes Research Symposium. Oral 5 minute presentation on omega-3s and precision nutrition. North Carolina A&T State University, March 16, 2018.

104. Reece SW, Kilburg-Basnyat BJ, Hodge M, Psaltis C, Yaeger M, Juo B, Armstrong M, Reisdorph N, Spangenburg EE, Hanna JL, Tighe RM, **Shaikh SR**, Gowdy K. Sex differences in pulmonary eicosanoid metabolism in response to ozone exposure. Poster presentation at Society of Toxicology, March 11-15th, 2018; San Antonio, TX.

103. Basynat-Kilburg BJ, Reece S, Hodge M, Luo B, Yaegers M, Odom MR, Psaltis C, Armstrong ML, Hannan JL, Reisdorph N, Tighe RM, **Shaikh SR**, and Gowdy KM. Dietary DHA mitigates ozone induced pulmonary inflammation and reductions in specialized pro-resolving mediators. Society of Toxicology, March 11-15th, 2018; San Antonio, TX.

102. *Pennington ER, *Sullivan EM, Sparagna GC, Washington J, Anderson EJ, Zeczycki TN, Brown DA, and **Shaikh SR**. Docosahexaenoic acid remodels the cardiac mitochondrial phospholipidome and impairs respiratory enzymatic activity by disrupting lipid domain formation and lipid-protein binding. Poster presentation at Biophysical Society Annual Meeting, February 17-21, 2018. San Francisco, CA.

101. *Pennington ER, Sullivan EM, Brown DA, **Shaikh SR**. Cytochrome c-induced phase separation in biomimetic mitochondrial membranes and cardiac vesicles is dependent on cardiolipin concentration and acyl chain composition. Poster presentation at Biophysical Society Annual Meeting, February 17-21, 2018. San Francisco, CA.

100. Reisdorph, N, *Crouch MJ, Armstrong M, and **Shaikh SR**. Diet-induced obesity suppresses B cell development and impairs antibody production. NCI Metabolomics Workshop, October 2017, San Diego CA.

99. Basynat-Kilburg BJ, Reece S, Hodge M, Luo B, Yaegers M, Odom MR, Psaltis C, Armstrong ML, Hannan JL, Reisdorph N, Tighe RM, **Shaikh SR**, and Gowdy KM. Dietary docosahexaenoic acid mitigates ozone induced pulmonary inflammation and reductions in specialized pro-resolving mediators. North Carolina Society of Toxicology, Oct 30th, 2017, RTP, NC.

98. *Crouch M, *Guesdon W, Armstrong M, Reisdorph N, and **Shaikh SR**. Diet-induced obesity impairs murine B cell development and antibody production accompanied by a defect in production of SPMs. Immunology 2017 (AAI). May 12-17. Washington DC.
97. *Guesdon W, *Crouch M, Kosaraju R, Armstrong M, Reisdorph N, and **Shaikh SR**. Docosahexaenoic acid improves the decrement in antibody production upon influenza infection in murine obesity through the production of pro-resolving lipid mediators. Immunology 2017 (AAI). May 12-17. Washington DC.
96. *Guesdon W, *Crouch M, Kosaraju R, and **Shaikh SR**. B cell cytokine secretion and antibody production are impaired in human obesity upon anti-BCR/TLR9 stimulation in a sex-dependent manner. Immunology 2017 (AAI). May 12-17. Washington DC.
95. *Guesdon W, *Crouch M, Kosaraju R, Armstrong M, Reisdorph N, and **Shaikh SR**. Docosahexaenoic acid improves the decrement in antibody production upon influenza infection of obese mice through the production of pro-resolving lipid mediators. Experimental Biology Annual Meeting, April 22-26, 2017. Chicago IL.
94. Kosaraju R, *Guesdon W, and **Shaikh SR**. B cell cytokine secretion and antibody production are impaired upon BCR/TLR9 stimulation in obese subjects. Experimental Biology Annual Meeting, April 22-26, 2017. Chicago IL.
93. *Crouch MJ, Kosaraju R, *Guesdon W, and **Shaikh SR**. Obesity suppresses B cell development and impairs antibody production upon antigen challenge. Experimental Biology Annual Meeting, April 22-26, 2017. Chicago IL.
92. *Sullivan EM, *Fix A, Sparagna GC, Zeczycki TN, Brown DA, and **Shaikh SR**. Cardiolipin remodeling through dietary intervention is associated with impaired formation of cardiac mitochondrial supercomplexes and enzyme activities. Experimental Biology Annual Meeting, April 22-26, 2017. Chicago IL.
91. *Pennington ER, *Fix A, *Sullivan EM, Kennedy A, Brown DA, Zeczycki TN, and **Shaikh SR**. Cardiolipin content has a stronger influence than acyl chain composition on select membrane properties of biomimetic mitochondrial membranes. Experimental Biology Annual Meeting, April 22-26, 2017. Chicago IL.
90. Kilburg-Basnyat BJ, Reece SW, Hodge M, Armstrong ML, Hannan JL, **Shaikh SR**, Gowdy KM. Alterations in pulmonary and systemic specialized pro-resolving lipid mediator production after ozone exposure. Society of Toxicology Annual Meeting, March 12-16, 2017. Baltimore, MD. (oral presentation).
89. Kilburg-Basnyat , Reece SW, *Crouch MJ, Luo B, Hodge M, Armstrong ML, Hannan JL, **Shaikh SR**, Gowdy KM. Alterations in pulmonary and systemic specialized pro-resolving lipid mediator production post-ozone exposure. Center for Human Health and the Environment Symposium, NC State, February 16, 2017. Raleigh, NC.

88. Kinnun JJ, Leng X, Johnson D, *Pennington ER, Meador A, **Shaikh SR**, Wassall SR. Raft-like domains are driven together by PUFA. Biophysical Society Annual Meeting. February 11-15, 2017, New Orleans, LA (oral presentation).
87. Ferrara PJ, Hedan TD, *Sullivan EM, **Shaikh SR**, Houmard JA, and Funai K. Lysophospholipid metabolism as a potential mediator for the pathogenesis of skeletal muscle insulin resistance. Poster presentation at Keystone Symposia: Diabetes/Obesity and Adipose Tissue Biology. January 22-26, 2017, Keystone CO.
86. Kilburg-Basnyat BJ, Reece SW, Hodge M, Armstrong ML, Hannan JL, **Shaikh SR**, Gowdy KM. Alterations in pulmonary and systemic specialized pro-resolving lipid mediator production after ozone exposure. North Carolina Society of Toxicology Annual Meeting, October 25, 2016, Research Triangle Park, NC.
85. *Crouch M, *Guesdon W, Kosaraju K, Armstrong M, Reisdorph N, and **Shaikh SR**. B-cell activity is impaired in human and mouse obesity and improved with docosahexaenoic acid in a murine model of influenza infection. Poster presentation. FASEB Immunological Aspects of Obesity. July 31- August 5, 2016, Big Sky, MT.
84. Gabor KA, Madenspacher JH, Wassif CA, **Shaikh SR**, Bushel PR, Porter FD, and Fessler MB. Smith-Lemli-Opitz syndrome reveals requirement for sterol biosynthesis in the innate immune response. AAI meeting, May 3-17. Seattle Washington 2016.
83. *Guesdon W, *Teague H, *Crouch M, Kosaraju K, Armstrong M, Reisdorph M, and **Shaikh SR**. Docosahexaenoic acid improves the decrement in antibody production associated with murine obesity upon influenza infection through the production of CD138⁺ cells. Lipidomics Impact on Metabolic, Cancer, Cardiovascular, and Inflammatory Diseases. May 17-18, La Jolla, CA. 2016.
82. *Crouch M, Kosaraju K, *Guesdon W, Armstrong M, Reisdorph N, and **Shaikh SR**. Obesity is associated with impaired B cell activation and antibody production in humans upon TLR9 plus BCR stimulation. Lipid MAPS Annual Meeting. Lipidomics Impact on Metabolic, Cancer, Cardiovascular, and Inflammatory Diseases. May 17-18, La Jolla, CA. 2016.
81. **Shaikh SR**. DHA improves the decrement in antibody production associated with murine obesity upon influenza infection. The 12th FACS conference: From genes to human physiology. October 25-27th, 2015, Toronto, Canada. *oral presentation and co-organizer with R. Bazinet.
80. **Shaikh SR**, Beck MA, Bridges L, Gowdy K, and *Teague H. Docosahexaenoic acid ethyl ester enhances antibody levels upon influenza infection in murine obesity accompanied by a reduction in circulating resolvin D1. The 48th Annual Meeting of the The Society for Leukocyte Biology "Immunity in Health and Disease". September 27-29, 2015. Raleigh, NC. Poster presentation.

79. *Sullivan EM, *Fix A, Brown DA, and **Shaikh SR**. Lipid microdomains containing supercomplexes are enriched with multiple phospholipids including cardiolipin: A detergent extraction study. August 10-13, 2015, Greenville, NC. Poster.
78. **Shaikh SR**, *Teague H, Bridges L, and Harris M. N-3 polyunsaturated fatty acids disrupt lipid rafts and enhance the B cell activity in murine obesity upon influenza infection. FASEB Nutritional Immunology. July 26-31, 2015, Lisbon, Portugal. Oral presentation.
77. Tsang AM, Alleman RJ, **Shaikh SR**, Brown DA. Protection of post-ischemic mitochondrial bioenergetics by targeting cardiolipin-dependent membrane fluidity. 2015 Mitochondrial Physiology School Meeting March 24-28, 2015 Cape Town, South Africa. Poster.
76. Kinnun, JJ, Williams JA, Stillwell W, Bittman R, **Shaikh SR**, and Wassall SR. DHA disorders raft-like domains as revealed by solid state ²H NMR. Biophysical Society Annual Meeting, Baltimore MD 2015, February 7-11th, 2015 . Poster.
75. **Shaikh SR**, Moukdar F, Alleman RJ, Lark DS, Neufer PD, and Brown DA. The cardiolipin-targeting peptide Bendavia improves post-ischemic mitochondrial energetics by sustaining native respiratory protein complexes. American Heart Association Meeting, November 15-19, 2014, Chicago IL. Oral.
74. Brown DA, Moukdar, F, Alleman RJ, Lark DS, Neufer PD, and **Shaikh SR**. The cardiolipin-targeting peptide Bendavia preserves post-ischemic mitochondrial energetics by sustaining respiratory supercomplexes. Mitochondrial Physiology Society Meeting, Obergurgl, Austria, September 8-12, 2014. Oral
73. Brown DA, Moukdar ME, Sullivan M, Sloan RC, Alleman RJ, Patel DH, Lark DS, Neufer P, and **Shaikh SR**. The mitochondria-targeting peptide Bendavia restores mitochondrial function in diabetic hearts by normalizing cardiolipin content. European Society of Cardiology Meeting, August 30- September 3, 2014, Barcelona, Spain. Oral.
72. Brown DA, Moukdar F, Alleman RJ, Lark DS, Neufer PD, and **Shaikh SR**. The cardiolipin-targeting peptide Bendavia improves post-ischemic mitochondrial energetics by sustaining native respiratory supercomplexes. AHA Basic Council on Cardiovascular Sciences Meeting, July 14-17, 2014 Las Vegas, NV.
71. **Shaikh SR**, Moukdar F, Harris M, Patel HD, and Brown DA. The cardiolipin-targeting peptide Bendavia restores mitochondrial function by augmenting mitochondrial membrane fluidity. United Mitochondrial Disease Foundation 2014. June 4-7, Pittsburg, PA.
70. *Teague H, Harris M, and **Shaikh SR**. Eicosapentaenoic and docosahexaenoic acid differentially enhance humoral immunity in murine diet-induced obesity. International Society for the Study of Fatty Acids and Lipids Meeting, Stockholm June 28-July 2nd, Stockholm Sweden, 2014. Oral presentation.
69. Brown DA, Patel HD, Moukdar F, **Shaikh SR**, Harris M, Fisher-Wellman KH, Neufer PD, Hale SL, Dai A, and Kloner RA. Cardioprotective efficacy of the cardiolipin-targeting peptide

Bendavia. Wellcome Trust Conference on Mitochondrial Disease: Translating biology into new treatments; Cambridge UK 2013.

68. Brown DA, **Shaikh SR**, Harris M, He Q, and Sabbah HN. The mitochondria-localizing peptide Bendavia improves myocardial bioenergetics in heart failure and diabetes by targeting cardiolipin. Cachexia Conference, Kobe Japan 2013.

67. Brown DA, Harris M, Moukdar F, Patel HD, and **Shaikh SR**. The mitochondria-localizing peptide Bendavia reduced cardiac injury by targeting cardiolipin. AHA Basic Council on Cardiovascular Sciences Meeting, July 22-25, 2013 Las Vegas, NV. (poster)

66. *Teague H, Gurzell E, *Rockett BD, Fenton J, and **Shaikh SR**. EPA and DHA do not exert equivalent effects on B lymphocyte plasma membrane organization: implications for developing biomarkers of fish oil for targeting B cell immunity. Poster presentation at Experimental Biology, Boston MA, April 20-24, 2013

65. *Rockett BD, *Melton M, *Teague H, Harris M, and **Shaikh SR**. Fish oil disrupts B cell MHC class II lateral organization in the murine immunological synapse. Poster presentation at Experimental Biology, Boston MA, April 20-24, 2013.

64. *Teague H, Harris M, *Rockett BD, and **Shaikh SR**. Fish oil differentially regulates B cell and dendritic cell activation in response to a T-independent antigen. Poster presentation at Experimental Biology, Boston MA, April 20-24, 2013.

63. Brown DA, Hale SL, Del Rio C, Hamlin R, Frasier CR, Stewart LM, Patel HD, Collins MC, Muller-Borer BJ, **Shaikh SR**, Harris M, Fisher-Wellman KH, Neuffer PD, and Kloner RA. Bendavia, a mitochondria-targeting peptide, reduces reperfusion injury and reactive oxygen species levels through a mechanism independent of direct oxygen radical scavenging: A multicenter study. American Heart Association (November 2012 in LA).

62. **Shaikh SR**. N-3 fatty acids and membrane microdomains. From model membranes to lymphocyte function. Early Career Award Talk at the International Society for the Study of Fatty Acids and Lipids Meeting, Vancouver Canada, May 26-30, 2012. (All expenses paid).

61. **Shaikh SR**. Fish oil disrupts B cell lipid microdomain organization accompanied by differential effects on function. Invited seminar at the International Society for International Society for the Study of Fatty Acids and Lipids Meeting, Vancouver Canada, May 26-30, 2012.

60. *Teague H, *Rockett H, Harris M, Ross R, Mitchell D, and **Shaikh SR**. DHA-labeled fluorophores is sensitive to membrane phase behavior and ordered domains. Poster presentation at the International Society for Fatty Acids and Lipids Meeting, Vancouver Canada, May 26-30, 2012.

59. *Rockett BD, *Teague H, *Melton M, Harris M and **Shaikh SR**. N-3 PUFAs increase cholera toxin induced lipid raft size in vitro and ex vivo. Poster presentation at the

International Society for Fatty Acids and Lipids Meeting, Vancouver Canada, May 26-30, 2012.

58. Wang L, Whelan JT, Chen J., Miller J, Morrow RL, **Shaikh SR**, Bridges LC. Retinoic acid promotes cell adhesion through distinct mechanisms across immune lineages. Oral presentation at Experimental Biology Annual Meeting, San Diego, CA, April 21-25, 2012.

57. Whelan JT, Chen J, Morrow RL, Miller J, Merrell KS, Lingo JD, **Shaikh SR**, Bridges LC. 9-cis-Retinoic acid induces integrin-independent immune cell adhesion. Poster presentation at Experimental Biology Annual Meeting, San Diego, CA, April 21-25, 2012.

56. *Rockett BD, *Teague H, Harris M, and **Shaikh SR**. n-3 Polyunsaturated fatty acids reorganize B cell membrane rafts and molecular order accompanied by differential effects on B cell function. Experimental Biology Annual Meeting, San Diego, CA, April 21-25, 2012 (oral presentation by D. Rockett).

55. **Shaikh SR**, *Rockett D, *Teague H, Williams J, and Wassall SR. Connecting model membrane experiments to in vivo studies: DHA acyl chains incorporate into raft-like membranes more than EPA in model membranes, in vitro, and in vivo. Annual Biophysical Society Meeting Feb 25-29, 2012 San Diego, CA.

54. Stottrup B, Ly Nathan, Anderson J, and **Shaikh SR**. A systematic investigation of the phase behavior of Langmuir monolayers containing polyunsaturated fatty acids. Poster presentation by the Stottrup lab the Annual Biophysical Society Meeting, Feb 25-29, 2012. San Diego, CA.

53. **Shaikh SR**, *Rockett BD, *Teague H, Williams J, and Wassall SR. Connecting model membrane experiments to in vivo studies: DHA acyl chains incorporate into raft-like membranes more than EPA in model membranes, in vitro, and in vivo. Poster presentation by the Wassall lab on behalf of Shaikh lab the Annual Biophysical Society Meeting, San Diego, CA, Feb 25-29, 2012.

52. **Shaikh SR**. Fish oil manipulates B cell function accompanied by membrane domain remodeling. Invited speaker at 10th Fatty Acids and Cell Signaling (FACS) Meeting "Docosahexaenoic Acid in Translational Medicine" (by invitation only, all expenses paid). New Orleans, LA, November 6-9, 2011.

51. **Shaikh SR**. N-3 polyunsaturated fatty acids selectively disrupt the spatial distribution of lipid rafts: An in vitro and ex vivo imaging study of EL4 and B cells. FASEB Nutritional Immunology: Role in Health and Disease. Carefree Arizona, July 10-15, 2011.

50. Anderson EJ, Thayne K, Harris M, Carraway K, and **Shaikh SR**. Adaptation of mitochondrial function and glutathione status in hearts of mice fed n-3 PUFA's is dependent on time. Poster presentation at NHLBI Mitochondrial Symposium, May 16-17, 2011. Washington DC.

49. *Rockett BD, *Franklin A, Harris M, *Teague H, Williams J, Wassall SR, Nguyen AH, Stottrup BL, and **Shaikh SR**. EPA and DHA modify non-raft organization on the micrometer and nanometer scale by increasing cell size and avoiding molecular interactions with surrounding lipid rafts. Poster presentation at Experimental Biology Annual Meeting, Washington DC, April 9-13, 2011. (Rockett BD received Poster Award from Nutritional Immunology RIS).
48. *Rockett BD, Harris M, *Teague H, and **Shaikh SR**. Mixed fish/flaxseed oil diets promote body weight gain by lowering whole body energy expenditure in a dose-dependent manner. Poster presentation at Experimental Biology Annual Meeting, Washington DC, April 9-13, 2011.
47. *Rockett BD, *Franklin A, Harris M, *Teague H, Williams J, Wassall SR, Nguyen AH, Stottrup BL, **Shaikh SR**. N-3 polyunsaturated fatty acids disrupt micron and nanometer scale non-raft organization by increasing cell size and minimizing molecular interactions with surrounding rafts. Poster presentation at Annual Biophysical Society Meeting, Baltimore, MD, March 5-9, 2011.
46. Williams JA, Batten SE, McCabe A, Stillwell W, **Shaikh SR**, and Wassall SR. EPA and DHA interact differentially with cholesterol: Solid state ²H NMR of PUFA-containing phospholipids in mixtures with lipid raft molecules. Poster presentation at Annual Biophysical Society Meeting , Baltimore, MD, March 5-9, 2011.
45. *Rockett BD, *Morrison K, Carraway K, and **Shaikh SR**. An n-3 PUFA diet lowers liver triglycerides but increases weight gain and triggers some pro-inflammatory responses. Poster presentation at the 9th Congress of the International Society for the Study of Fatty Acids and Lipids, Maastricht, Netherlands, May 29-June 2, 2010.
44. *Rockett BD, Carraway K, *Franklin A, and **Shaikh SR**. EPA and DHA differentially modify the organization of non-raft and raft domains of immune cells. Poster presentation at the 9th Congress of the International Society for the Study of Fatty Acids and Lipids, Maastricht, Netherlands May 29-June 2, 2010.
43. **Shaikh SR**, Carraway K, and *Rockett BD. High fat diets enriched in n-3 polyunsaturated fatty acids do not suppress B cell activation but increase spleen size and accumulation of adipose tissue and lower liver triglycerides. Poster presentation at Experimental Biology Annual Meeting, April 24-28, 2010, Anaheim, California.
42. *Rockett BD, Carraway K, and **Shaikh SR**. Docosahexaenoic acid disrupts lipid raft clustering and enhances proliferation and survival of EL4 lymphomas. Poster presentation at Experimental Biology Annual Meeting, April 24-28, 2010, Anaheim, California.
41. William JA, **Shaikh SR**, LoCascio DS, Gogulu ST, Heerklotz H, Stillwell W, and Wassall SR. α -Tocopherol and polyunsaturated fatty acid membrane domains. San Francisco, California (National). Biophysical Society Annual Meeting, Poster presentation. Feb 20-24, 2010.

40. *Rockett BD, Carraway K, and **Shaikh S.R.** N-3 PUFA incorporates directly into lipid rafts to disrupt domain clustering and MHC lateral organization of antigen presenting cells. Biophysical Society Annual Meeting, San Francisco, CA, Feb 20-24 2010. Oral presentation.
39. **Shaikh SR.** Biophysical properties of docosahexaenoic acid, non-raft domains, and lymphocyte function. Invited speaker, The Ninth Fatty Acids and Cell Signaling Meeting (FACS) July 13-16, 2009, Keble College, Oxford, UK.
38. **Shaikh SR** and Edidin M. High fat diets increase nano-scale clustering of the T cell receptor. Experimental Biology, New Orleans, LA 2009.
37. **Shaikh SR**, Li M, Schneck J, and Edidin M. Lipid overload with saturated and monounsaturated fatty acids has differential effects on MHC class I antigen presentation. Experimental Biology, April 5-9, 2008. San Diego CA. Oral presentation.
36. **Shaikh SR**, Carroll E, Li M, Schneck J, and Edidin M. Differential effects of saturated and monounsaturated fatty acids on antigen presentation. 42nd Annual Southeastern Regional Lipids Conference, Cashiers, NC, November 7-9, 2007. Oral presentation.
35. **Shaikh SR.** Oral presentation - Lab meeting at the NIH Laboratory of Membrane Biochemistry and Biophysics. October 2007.
34. **Shaikh SR** and Edidin M. Dietary Fatty Acids Downregulate Antigen Presentation: Implications for Obesity and Inflammation. Poster presentation at FASEB Meeting: Nutritional Immunology. July 28-August 2, 2007. Tucson, Arizona.
33. **Shaikh SR**, and Edidin M. Elevated free fatty acids inhibit MHC class I antigen presentation to T lymphocytes. Poster presentation at Gordon Conference: Molecular and Cellular Biology of Lipids. August 2007.
32. **Shaikh SR**, and Edidin M. Antigen presenting cells modified with polyunsaturated fatty acids evade T cell mediated lysis by extracellular release of lipids. Poster presentation at 2007 AAI Meeting, Miami Beach, FL. May 2007
31. **Shaikh SR**, and Edidin M. MHC class I antigen presentation is downregulated by polyunsaturated fatty acids. 2007 Experimental Biology Meeting, Washington D.C. FASEB. J. 21(5) A63. April 28-May 2, 2007. Oral presentation
30. **Shaikh SR**, and Edidin M. Polyunsaturated fatty acids downregulate antigen presentation to T cells: Implications for adjuvant immunotherapy. Biophysical Society Meeting, Baltimore, MD Biophys. J. Supl.S. 197A. March, 2007. Oral presentation.
29. **Shaikh SR**, and Edidin M. Polyunsaturated Fatty Acids Downregulate MHC Class I Antigen Presentation: A Potential Drawback for Immunotherapy. Poster presentation at 41st Annual Southeastern Regional Lipids Conference, Cashiers, NC, November 1-3, 2006.

28. **Shaikh SR** and Edidin M. Downregulation of immune responses with polyunsaturated fatty acids: Consequences for Immune Therapy. Poster presentation at FEBS Special Meeting: New concepts in lipidology: from lipidomics to disease. Noordwijkerhout, Netherlands, October 21-25, 2006.
27. **Shaikh SR**, and Edidin M. Polyunsaturated fatty acids lower B cell susceptibility to CTL lysis and HLA class I surface expression levels. Poster presentation at 2006 AAI Meeting, Boston, MA. May 12-16, 2006 J. Immunol. 176 S66.
26. **Shaikh SR**, and Edidin M. Omega-3 and omega-6 polyunsaturated fatty acid-containing phosphatidylcholines have equal effects on membrane microviscosity, expression of a surface protein, and antigen presentation to T lymphocyte. Poster presentation at Biophysical Society Meeting, Salt Lake City, UT. February, 2006.
25. LoCascio DS, **Shaikh SR**, Wassall SR, and Stilwell W. PEs containing docosahexaenoic acid and oleic acid differentially phase separate from lipid raft molecules: A DSC study. Poster presentation at Biophysical Society Meeting. Long Beach, CA. Feb 12-16, 2005 88(1): 71A.
24. Soni SP, LoCascio DS, **Shaikh SR**, Liu YD, Bittman R, and Wassall SR. A role for docosahexaenoic acid (DHA) in lipid raft separation: A solid state H-2 NMR study of [H-2(31)]palmitoyl sphingomyelin in phosphatidylethanolamine/cholesterol mixtures. Poster presentation at Biophysical Society Meeting. Long Beach, CA. Feb 12-16, 2005 88(1):78A-79A.
23. **Shaikh SR**, Cherezov V, Soni SP, Caffrey M, Stilwell W, and Wassall SR. Cholesterol solubility and orientation in phosphatidylethanolamine membranes: Degree of acyl chain unsaturation may modulate lipid raft phase separations. Poster presentation at Biophysical Society Meeting. Long Beach, CA. Feb 12-16, 2005.

11. Naumann C, Deverall M, **Shaikh, SR**, Ke PC. Hindered diffusion of proteins and lipids in a model membranes studied at the single molecule level. Poster presentation at American Physical Society Meeting, Indianapolis, IN, March 2002.

10. **Shaikh SR**, Stillwell W, and Naumann C. Single molecule lateral mobility and membrane organization in DMPC/cholesterol mixtures. American Physical Society Meeting, Indianapolis, IN, March 2002. Oral presentation.

9. **Shaikh SR**, Stanley M, Stillwell W. and Naumann C. Lateral diffusion of DMPC/cholesterol mixed monolayers as observed by single molecule fluorescence imaging. Biophys. J. (82) 153a. Poster presentation at 2002 Biophysical Society Annual Meeting, San Francisco, CA, February 2002.

8. **Shaikh SR**, Brzustowicz MR, Stillwell W, and Wassall SR. Solid state ^2H NMR study of 'lipid raft' model membranes. *Biophys. J.* (82) 153a. Poster presentation at 2002 Biophysical Society Annual Meeting, San Francisco, CA, February 2002.
7. **Shaikh SR**, Brzustowicz MR, Wassall SR, and Stillwell W. Docosahexaenoic acid involvement in membrane domains. 36th Annual Southeastern Regional Lipids Conference, Cashiers, NC, November 2001. Oral presentation.
6. **Shaikh SR**, Brzustowicz MR, Dumaual AC, Stillwell W, and Wassall, S.R. Docosahexaenoic Acid Involvement in Membrane Structure. Graduate Student Symposium, October 2001. Oral presentation.
5. **Shaikh SR**, Brzustowicz MR, Wassall SR, Dumaual AC, Jenski LJ and Stillwell, W. Docosahexaenoic acid involvement in membrane structure. Poster presentation at Cellular and molecular aspects of omega-3 fatty acids and cancer, Breckenridge, CO, June 2001.
4. **Shaikh SR**, Brzustowicz MR, Wassall SR. and Stillwell W. (2001) Solid state ^{31}P NMR detection of cholesterol-induced lipid microdomain formation in mixed sphingolipid/phospholipid bilayers. *Biophys. J.* (80) 517a-518a. Poster presentation at 2001 Biophysical Society Annual Meeting, Boston, MA, February 2001.
3. **Shaikh SR**, Dumaual AC, Jenski LJ and Stillwell W. Lipid phase separation in a model plasma membrane. *Biophys. J.* (80) 521a. Poster presentation at 2001 Biophysical Society Annual Meeting, Boston, MA, February 2001.
2. Engleman EA, McBride WJ, Wilber AA, **Shaikh SR**, Eha RD, Lumeng L, Li T-K, and Murphy JM. Ethanol drinking experience potentiates the increase in extracellular dopamine (DA) in alcohol-preferring (P) rats. *Alcoholism: Clinical and Experimental Research*, 23(5), 48A. Annual Meeting of the Research Society on Alcoholism, Santa Barbara, CA, July, 1999.
1. Engleman EA, McBride WJ, Wilber AA, **Shaikh SR**, Eha RD, Lumeng L, Li T-K, and Murphy JM. Reverse microdialysis of dopamine (DA) uptake inhibitors into the nucleus accumbens of alcohol preferring rats: effects on extracellular DA levels and ethanol intake. *Society for Neuroscience Abstract* 24(2) 478. Poster presentation at Society for Neuroscience Annual Meeting, Los Angeles, CA, November, 1998.

Seminars (University, Industry, Government)

(invited talks associated with specific conferences are listed above under Abstracts)

32. Resolving chronic inflammation in obesity by enhancing production of specialized pro-resolving mediators: Moving from mouse models to human trials. Seminar series in Human Nutrition, Bloomberg School of Public Health, The Johns Hopkins University. November 8, 2022. Online.
31. Eicosapentaenoic acid ethyl esters prevent obesity-driven impairments to glucose homeostasis through the biosynthesis of downstream hydroxylated metabolites. Invited

keynote for Bioactive Lipid Mediators and Nutritional Availability Session at American Oil Chemists Society (AOCS) Annual Meeting, Atlanta May 1-4, 2022 (in person).

30. Eicosapentaenoic acid and its metabolites improve glucose homeostasis in a host-genome dependent manner. Department of Psychiatry, Columbia University, February 14, 2022. Online.

29. The eicosapentaenoic acid-resolvin E1 axis is a lead for preventing obesity-driven impairments to glucose homeostasis. Division of Pulmonary, Critical Care, and Sleep Medicine. College of Medicine. Ohio State University. November 5, 2021. Originally scheduled in Columbus, OH but shifted to virtual due to COVID.

28. The EPA-resolvin E1 axis prevents obesity-driven impairments to glucose homeostasis in a host genome dependent manner. Skaggs School of Pharmacy and Pharmaceutical Sciences, University of Colorado Anschutz Medical Campus. October 21, 2021. Originally scheduled in Aurora, CO but shifted to virtual due to COVID.

27. Activation of the EPA-ChemR23 axis improves glucose homeostasis in a host genome and fat mass-dependent manner. Department of Nutritional Sciences. PUFA-interest group. University of Toronto. October 15, 2021.

26. Obesity drives a signature of SPM precursor deficiency: Implications for viral infection and glucose homeostasis. Invited seminar speaker to the monthly "International Seminar Series" of the International Society for the Study of Fatty Acids and Lipids". April 21, 2021. Conducted virtually.

25. Omega-3 fatty acid derived metabolites control inflammatory, infectious, and metabolic outcomes in obesity. Invited seminar for the Department of Molecular and Structural Biochemistry, NC State, Raleigh NC. November 12, 2020. Virtual seminar due to the COVID pandemic.

24. Unresolved inflammation, chronic diseases, and dietary intervention. Durham-Chapel Hill Dietetic Association. March 18, 2020. Chapel Hill, NC.

23. Inflammation resolution is orchestrated by ω -3 fatty acid-derived metabolites. Department of Endocrinology. February 27, 2020. Chapel Hill, NC.

22. The mitochondrial phospholipidome is a target for therapeutic intervention. Mitochondrial Interest Group of Virginia Tech and Mitochondrial Solutions LLC. Blacksburg VA. December 12, 2019.

21. Specialized pro-resolving lipid mediators improve metabolic and inflammatory outcomes in obesity. Environmental Protection Agency, NC. September 10, 2019.

20. The current state of omega-3 fatty acids and their metabolites for clinical outcomes. Department of Family Medicine, University of North Carolina at Chapel Hill. April 10, 2019. Chapel Hill, NC.

19. The pro-resolution metabolome in obesity: A tale of omega-3 derived metabolites, infection, and inflammation. March 29, 2019 Catalyst Symposium at the Nutrition Research Institute. Kannapolis, NC.
18. A tale of two lipid families in metabolic disorders: Pro-resolving metabolites and the mitochondrial phospholipidome are therapeutic targets. Center on Diabetes, Obesity, and Metabolism. Wake Forest School of Medicine. May 20, 2019. Winston Salem, NC.
17. A tale of two lipid families in metabolic disorders: Pro-resolving metabolites and the mitochondrial phospholipidome are targets for therapeutic intervention. Fraternal Order of Eagles Diabetes Research Center. University of Iowa. March 3-5, 2019. Iowa City, IA.
16. N-3 polyunsaturated fatty acids improve the decrement in antibody production associated with murine obesity. Department of Nutrition. December 7, 2015. Chapel Hill, NC.
15. N-3 polyunsaturated fatty acids disrupt lipid raft formation and enhance B cell activity in murine obesity upon influenza infection. Nutritional Sciences. University of Michigan. September 9, 2015. Ann Arbor, MI.
14. Developing therapies for the treatment of complications associated with obesity. Invited speaker on behalf of the Brody Brothers Foundation to the select members of the General State Assembly. Brody School of Medicine. East Carolina University. June 12, 2015. Greenville, NC.
13. N-3 polyunsaturated fatty acids enhance immunity in lean and obese mice. Department of Pediatrics. West Virginia University School of Medicine. July 25, 2014, Morgantown, WV.
12. N-3 polyunsaturated fatty acids, lipid microdomains and B cell function in lean and obese mice. Laboratory of Membrane Biochemistry and Biophysics. NIAAA, NIH, September 30, 2014. Bethesda, MD.
11. Insane in the membrane – How studies on membrane biophysical organization led to experiments on obesity, influenza, and mitochondria. Department of Chemistry, East Carolina University, February 27, 2013. Greenville, NC.
10. Developing n-3 fatty acids for simultaneously suppressing inflammation and boosting humoral immunity. Microbiology and Immunology. September 11, 2013 Wake Forest School of Medicine. Winston-Salem, NC.
9. Developing n-3 fatty acids for simultaneously suppressing inflammation and boosting humoral immunity. Department of Nutrition, UNC Chapel Hill, August 13, 2013. Chapel Hill, NC.
8. Developing omega-3 fatty acids for suppressing inflammation and boosting humoral immunity. Department of Comparative Medicine. East Carolina University, December 10, 2013. Greenville, NC.

7. Fish oil manipulates B cell function accompanied by an increase in lipid raft size and order. Department of Food Science and Human Nutrition. Michigan State University. December 6, 2011. East Lansing, MI.
6. N-3 polyunsaturated fatty acids disrupt lipid raft clustering in vitro and in vivo. Membrane Interest Group, Department of Physics. Indiana University-Purdue University Indianapolis. July 24, 2011. Indianapolis, IN.
5. Development of fish oil as a nutraceutical for suppressing inflammation. College of Health and Human Performance. East Carolina University. March 18, 2011. Greenville, NC
4. Development of n-3 polyunsaturated fatty acids as adjuvant treatment for inflammation. March 8, 2011. Grand Rounds, Department of Surgery, Pitt County Community Hospital. Greenville, NC.
3. Effects of a fish/flaxseed oil diet on immunity and metabolism. Nestle Purina. Division of Animal Studies. June 22, 2010. St. Louis, MO.
2. Development of fish oil as a nutraceutical for suppressing inflammation. May 5, 2010. Department of Anatomy and Cell Biology, East Carolina University. Greenville, NC.
1. Testing the biophysical model of omega-3 fatty acid modification of MHC class I membrane organization: How fats modify immunity. Department of Microbiology and Immunology. April 16, 2009. Greenville, NC.

TEACHING EXPERIENCE:

UNC Chapel Hill (courses)

1. Course co-director for Nutrition 880 Elements of Being a Scientist (2021-) Co-directed the course with Drs. Gordon-Larsen and Mayer-Davis in 2021. Co-directing with Dr. Mayer-Davis in 2022. Review assignments, direct readings, administer lectures, facilitate discussions, grade assignments, and participate in mock study sections. Total number of students for 2021 is 16 and 9 for 2022.
2. Guest lectures for Nutrition 600 Human Metabolism: Macronutrients (2021). Administer two lectures related to inflammation resolution and provide questions for the exam. Total number of students for 2021 was 50.
3. Guest lecture for Nutrition 705 Human Nutrition (2021-). Administer a lecture and in-class activities related to omega-3 fatty acids and their metabolites. Total number of students (MPH) for 2021 was 20.

4. Course director for Nutrition 600 Human Metabolism: Macronutrients (2018-2020). Direct the course (write/grade exams, develop in class exercises, group assignments, meet with students) and administer lectures on carbohydrate and lipid metabolism. Number of students for this class has ranged from 50-74. There were also additional students that audited the course.
5. Guest lecture for Nutrition 845 Nutrition Metabolism (2018, 2020): Nutritional Lecture given on obesity and dietary fatty acids to graduate students. Graded an assignment on lipidomic analyses.
6. Director for Nutrition 695 (2018-): Nutrition Research (MPH). One MPH student is currently being mentored (Zachary Kudro).
7. Director for Nutrition 910/993/994 (2017-): Nutrition Research (PhD). Directed this for two PhD students in the laboratory (Anandita Pal and Abrar Al-Shaer) from 2017-2021. Rafia Virk and Brooke Bathon are being mentored since 2021.
8. Nutrition 295 (2017-): Undergraduate Research Experience in Nutrition. On average, 1-2 students are mentored per year.

East Carolina University (courses)

1. Graduate Biochemistry I (2012-2017): Lectures given on lipid metabolism and thermodynamics.
2. Graduate Biochemistry II (2009-2017): Lectures and discussion of literature pertaining to membrane structure, immuno-metabolism, and nutrition.
3. Research Proposal Strategies & Preparation (2013-2017): Lectures given on developing the approach section for an NIH grant.
4. Medical Biochemistry (2008-2017): Lectures given to 1st year medical students on proteins, overview of metabolism, prostaglandins, and nutrition. Also facilitated small group clinical conferences.
5. Course Director for Topics in Nutrition Elective for 4th year medical students (2009-2010).

Johns Hopkins University (courses)

1. Instructor for 'All Fats Are Not Created Equal: An Introduction to the Structure and Function of Biological Membranes' (2006). (Funded by a Howard Hughes Teaching Fellowship).
2. Guest lecturer on 'Evolutionary Perspectives, Lipid diversity, and Membrane Structure' (2006) for Graduate Advanced Cell Biology.

Indiana University (courses)

Guest lecturer on 'Lipid Rafts and Implications for Cellular Signaling' (2003, 2004) for Graduate Course on Biomembranes.

Mentoring of Graduates, undergraduates, and post-doctoral fellows:

Ph.D. Students in the Shaikh lab at UNC Chapel Hill

- Rafia Virk (2021-present). Department of Nutrition.
- Brooke Bathon (2021-present). Department of Nutrition.
- Abrar Al-Shaer (2018-2021). Department of Nutrition.
- Anandita Pal (2017-2021). Department of Nutrition.
- Miranda Crouch (2017-2019). (ECU student who finished her lab work as a visiting scholar at UNC)
- Ross Pennington (2015-2018). (ECU student who finished his lab work at UNC)

*Rosemary Gray (currently volunteer, starting summer or fall 2023), Department of Nutrition.

M.S. Students in the Shaikh lab at UNC Chapel Hill

- Nari Beatty (2022-). Department of Nutrition. Chair: Raz Shaikh
- Nicole Buddenbaum (2020-2021). Department of Nutrition. Chair: Raz Shaikh

Medical Students in the Shaikh lab at UNC Chapel Hill

- Sahil Dadoo (2019-2022). Department of Nutrition.

MPH Students in the Shaikh lab at UNC Chapel Hill

- Zachary Kadro (Nutrition 695, fall 2020, spring 2021, summer 2021, fall 2021).

Undergraduate Honor's Thesis Students in the Shaikh lab at UNC Chapel Hill

- Reva Kodre (2022-). Department of Nutrition. Co-Chair with Dr. Justin Miler (Department of Microbiology and Immunology).
- Zijian Li (2021-2022). Department of Nutrition. Chair: Raz Shaikh is chair of undergraduate honors thesis.
- Madeline Behee (2019-2021). Department of Biology. Chair: Raz Shaikh is chair of undergraduate honors thesis.
- Jennifer Regan (2020-2021). Department of Nutrition. Raz Shaikh is Chair of SURF recipient.

M.S. Student Committees at UNC Chapel Hill

- Lydia Eisenbeis (2020-2021). Department of Nutrition. Chair: Steve Hursting
- Jakob Hamilton (2020-2021). Department of Nutrition. Chair: Erik Klett
- Alyssa Ho (2020-2021). Department of Nutrition. Chair: Steve Hursting

Undergraduate Honor's Thesis Committees at UNC Chapel Hill

- Nivetha Senthil Ramasamy (2023). Department of Nutrition. Chair: Steve Hursting (Shaikh:reader)

- Alex Pfeil (2020-2021). Department of Nutrition. Chair: Steve Hursting (Shaikh:reader)
- Willow Liu (2019-2020). Department of Nutrition. Chair: Ian Carroll (Shaikh:reader)
- Morgan Cody (2022). Department of Nutrition. Chair: Steve Hursting (Shaikh:reader)

Ph.D. Dissertation Committee Member at UNC Chapel Hill

- Meredith Carson (2023-). Department of Nutrition. Advisor: Steve Hursting
- Joyce Tzeng (2022-). Department of Nutrition. Advisor: Damaris Lorenzo.
- Emily Devericks (2021-). Department of Nutrition. Advisor: Steve Hursting.
- Syed Masood (2021-). Department of Environmental Sciences and Engineering. Advisor: Avram Gold & Jim Samet (EPA)
- Laura Smith (2019-2020). Department of Nutrition. Advisor: Steve Hursting.
- Melissa Orenduff (2019-2020). Department of Nutrition. Advisor: Steve Hursting.
- Evan Paules (2019-present). Department of Nutrition. Advisor: Steve Zeisel.
- Shannon Bruce McDonell (2019-present). Department of Nutrition. Advisor: Steve Hursting.
- Will Green (2018-2020). Department of Nutrition. Advisor: Melinda Beck.
- Liyang Zhao (2017-2018). Department of Nutrition. Advisor: Rosalind Coleman.

Three-person Committee Member for Doctoral Exams at UNC Chapel Hill

- Hannah Malian (2022). Department of Nutrition. Advisor: Steve Hursting.
- Meredith Carson (2021). Department of Nutrition. Advisor: Steve Hursting.
- Frank Muntis (2021). Department of Nutrition. Advisor: Beth Mayer-Davis
- Ashely Aguilard (2021). Department of Nutrition. Advisor: Damaris Lorenzo
- Emily Devericks (2020). Department of Nutrition. Advisor: Steve Hursting.
- Laura Smith (2018). Department of Nutrition. Advisor: Steve Hursting.
- Will Green (2017). Department of Nutrition. Advisor: Melinda Beck.

Awards to Ph.D. Students/Visiting Scholars in the Shaikh lab at UNC

- Bioactive Lipids in Cancer, Inflammation, and Related Diseases travel award for 3-minute talk winners (Rafia Virk, 2022)
- FASEB Nutritional Immunology Poster Abstract Award (Rafia Virk, 2021)
- ISSFAL travel award (Anandita Pal, 2018)
- ISSFAL travel award (Miranda Crouch, visiting scholar, 2018)
- ISSFAL travel award (Ross Pennington, visiting scholar, 2018)
- FASEB Nutritional Immunology travel award for best abstract presentation (Anadita Pal, 2018)

Undergraduate students in the Shaikh lab (credit, not Honor's thesis) at UNC Chapel Hill

- Jenifer Regan (2020-2021)
- Nicole Buddenbam (2019-2020)
- Kathy Chan (2017-2019)
- Sahil Dadoo (2017-2019)

Rotating Ph.D. students at UNC Chapel Hill

- Matthew Vander Ploeg (2021) - BBSP
- Meredith Carson (2020) - Nutrition
- Stephanie Anne Brock (2019) - BBSP
- Anandita Pal (2017) - Nutrition

MPH/RD Masters Paper Advisor at UNC Chapel Hill

- Lauren Fiabane (2020) – EPA and DHA exert differential effects on membrane structure.
- Sheng-Luen Shikh (2020) – The role of oxidized phospholipids on lipid raft formation of lymphocytes
- McKenzie Caldwell (2018) – The Jovanovic diet for gestational diabetes: a review of its biochemical function and discussion of the psychological impacts of a restrictive diet on expectant mothers during pregnancy.
- Ella Heathman Stephan (2018) – The role of lipid mediators in systemic inflammation and type 2 diabetes.
- Ridley Stewart Zook (2017) – Early referral and the role of the dietitian in alcoholic liver disease.

Post-doctoral advisor at UNC Chapel Hill

- Dr. Ross Pennington (2018-2019). Department of Nutrition.

Mentoring committee at UNC Chapel Hill

- Dr. Kathleen Walter (2021-). Postdoctoral fellow in Dr. Sandra Mooney's lab

External Mentoring committee for physician-scientist at Ohio State University

- Dr. Laura Leuenberger (2022-), Medical Fellow of Pulmonary and Critical Care Medicine

External Ph.D. Dissertation Committee Member for student at Ohio State University

- Michael Yaeger (2021-). Division of Pulmonary, Critical Care and Sleep Medicine, College of Medicine, Ohio State University. Advisor: Dr. Kym Gowdy
- Hannah Hartzler Lovins (2022-). Division of Pulmonary, Critical Care and Sleep Medicine, College of Medicine, Ohio State University. Advisor: Dr. Kym Gowdy

Ph.D. and M.S. Theses/Dissertations Chaired at ECU

- Miranda Crouch (2015-2019). Department of Biochemistry & Molecular Biology. Ph.D. Dissertation: The role of pro-resolving metabolites in regulating humoral immunity in obesity.

- Ross Pennington (2015-2018). Department of Biochemistry & Molecular Biology. Ph.D. Dissertation: Discriminating between cardiolipin concentration and acyl chain composition on membrane biophysical organization.
- Madison Sullivan (2013-2017). Department of Biochemistry & Molecular Biology. Ph.D. Dissertation: The influence of dietary fatty acids on cardiac mitochondrial phospholipids and respiratory function.
- Heather Teague (2009-2014). Department of Biochemistry & Molecular Biology. Ph.D. Dissertation: N-3 polyunsaturated fatty acids differentially enhance B-cell mediated immunity in lean and obese mice.
- Mark Melton (2010-2013). Department of Biochemistry & Molecular Biology. M.S. Thesis: Using TIRF microscopy to analyze stimulated and basal state B-cell MHC II clustering in response to aging and dietary fish oil.
- Benjamin Drew Rocket (2009-2012). Department of Biochemistry & Molecular Biology. Ph.D. Dissertation: Fish oil disrupts B cell plasma membrane lateral organization and immunological synapse formation.

Awards to Ph.D. Students in Shaikh lab at ECU

- ISSFAL award for research presentation and runner-up for best talk (Ross Pennington 2018)
- Carol F. Volkman Award for excellence in research presentation (Ross Pennington 2018).
- Best Nutritional Immunology Abstract at Experimental Biology Annual Conference Heather Teague, 2013).
- Best Nutritional Immunology Abstract at Experimental Biology Annual Conference (Drew Rockett 2011 & 2012)

Ph.D. Dissertation Committee Member at ECU

- Patrick Ferrara (2017). Department of Kinesiology
Advisor: Dr. Katsu Funai.
- Tony Verkerke (2017). Department of Kinesiology
Advisor: Dr. Katsu Funai.
- Jordan Johnson (2017). Department of Kinesiology
Advisor: Dr. Katsu Funai.
- Rick Alleman (2012-2016). Department of Physiology.
Advisor: Dr. David Brown.
- Lei Wang (2011-2015). Department of Biochemistry & Molecular Biology.
Advisor: Dr. Lance Bridges.
- Alan Curtis (2011-2015). Department of Microbiology & Immunology.
Advisor: Dr. Mark Mannie.
- Lalage Katunga (2011-2015). Department of Pharmacology & Toxicology.
Advisor: Dr. Ethan Anderson.
- Eman Soliman (2011-2014). Department of Pharmacology & Toxicology.
Advisor: Dr. Rukiyah Van Dross.
- Fatiha Moukdar (2011-2014). Department of Physiology.
Advisor: Dr. David Brown.
- Anusha Penumarti (2011-2014). Department of Pharmacology & Toxicology.

Advisor: Dr. Abdel Abdel-Rahman.

- Michelle Robinson (2009-2015). Department of Biochemistry & Molecular Biology. Advisor: Dr. David Cistola.
- Todd Weber (2009-2012). Department of Kinesiology. Advisor: Dr. Joe Houmard.

M.S. Thesis Committee Member at ECU

- Jessica Viscomi (2013-2016). Department of Biochemistry & Molecular Biology. Advisor: Dr. Tonya Zeczycki.
- Jennifer Worley (2011-2012). Department of Kinesiology. Advisor: Dr. Carol Witczak.

Post-doctoral advisor at ECU

- Dr. Heather Teague (2014). Department of Biochemistry & Molecular Biology
- Dr. William Guesdon (2015-2017). Department of Biochemistry & Molecular Biology.

LEADERSHIP TRAINING:

- Peer Coaching Groups, 2021-2023
- Faculty Leadership Training Course With Certification, 2020-2021
- Faculty Professional and Leadership Skills Series Session One: Listening and Giving/Receiving Feedback. October 24, 2019
- Faculty Professional and Leadership Skills Series Session Two: Managing Conflict Effectively. Nov 21, 2019

FUNDING:

Pending Research Support

NIAID, R21AI177316

07/01/2023 – 06/30/2025

CD8+ T cell mitochondrial bilayer-protein organization and influenza infection in obesity. This high risk/high reward study investigates how obesity disrupts the biophysical organization of the T cell inner mitochondrial membrane. Role: PI

Total: \$275,000 (direct dollars)

NIAID, R21AI177249

07/01/2023 – 06/30/2025

Adipose tissue antibodies and DHA-derived metabolites in obesity. This high risk/high reward study investigates how key metabolites control adipose tissue inflammation in obesity. Role: PI

Total: \$275,000 (direct dollars)

NIEHS, R21ES034458-A1

04/01/2023 – 03/31/2025

PFOA targets B cell lipid raft organization and function. This high risk/high reward study investigates how PFOA controls naïve B cell plasma membrane lipid raft formation and function. Role: PI

Total: \$275,000 (direct dollars) Impact score 30, 14th percentile, awaiting funding decision

NIDDK, R01DK132096-A1

07/01/2023–06/30/2028

Preventing impairments to glucose homeostasis with EPA ethyl esters. This MPI application tests the provocative hypothesis that EPA in the absence of DHA improves murine glucose homeostasis through oxylipin production and increased abundance of *A. muciniphila*. Role: MPI (Shaikh/Carroll)

Total: \$2,500,000 (direct dollars)

Impact: 28th percentile (40 impact score)

Research Support to be Resubmitted

NIAID, R21AI173994

TBD

The role of obesity driven specialized pro-resolving mediator deficiencies in COVID-19. This MPI application aims to determine if oxylipins of inflammation resolution are decreased in patients that were admitted into the ER for SARS-CoV-2 infection. Role: MPI (Gowdy/Shaikh/Sonal)

Total: \$275,000 (direct costs)

Impact score: 56 (to be resubmitted spring or summer 2023).

Ongoing Research Support

NIDDK, U24 DK132715-01

04/01/22 – 03/31/27

North Carolina Consortium for Diversity Career Development in Nutrition, Obesity, and Diabetes Research. This project will build a pipeline of investigators from under-represented groups in science for NIDDK. Role: MPI (Mayer-Davis, Onger, Shaikh)

Total: \$4,147,798 (direct dollars)

NIDDK, P30DK056350-22S1

09/01/22 – 08/31/23

NORC Supplement to Expand NORC Central. This supplement is for expanding the NORC Central. Role: MPI (Mayer-Davis/Shaikh)

Total: \$32,680 (direct dollars)

R13AI172267-01

07/13/22 – 06/30/23

Interdisciplinary Nutrition Sciences Symposium: Diet and Chronic Unresolved Inflammation: Implications for Obesity-Associated Complications. Role: MPI (Shaikh/Gordon-Larsen)

Total: \$5000 (direct dollars)

NIH Office of Dietary Supplements

07/01/22 – 06/30/23

Supplement to R01ES031378

EPA mitigates pulmonary inflammation through the ChemR23 axis. This study teases apart the role of the EPA-ChemR23 axis on pulmonary inflammation. Role: MPI (Gowdy/Shaikh)

Total: \$48,501 (direct dollars)

NIAID, R03AI159308

01/28/21 – 12/31/22 [NCE 12/31/23]

SPMs, linoleic acid, and antibody levels in obesity. This pilot study investigates the hypothesis that those humans that have poor antibody levels to the influenza vaccine have

diminished levels of SPMs and elevated levels of linoleic acid. This study sets the basis for future precision nutrition clinical trials focused on SPMs and linoleic acid. Role: PI.

Total: \$149,560 (direct+indirect)

NIEHS, R01ES031378

05/20/20 – 02/28/25

Dietary DHA mitigates ozone induced pulmonary inflammation. This proposal tests the hypothesis that DHA can improve murine pulmonary inflammation in response to ozone through the reorganization of macrophage lipid rafts and the biosynthesis of SPMs. Role: MPI (Gowdy/Shaiikh)

Total: \$2,777,567 (direct+indirect)

NIDDK, P30DK056350

04/01/21 – 03/31/26

Nutrition Obesity Research Center (NORC). This center provides a critical resource to investigators within and outside of UNC. The NORC contributes toward public health by providing a framework, tool, and expertise needed to engage in interdisciplinary research to improve health outcomes as they relate to obesity and nutrition. Role: MPI

Total: \$5,610,260 (direct+indirect)

Organic Technologies

05/01/19 – 11/30/22

Effects of palmitoleic acid on C-reactive protein in humans. This project is a phase I double-blind placebo controlled clinical trial that will test the effects of two doses of palmitoleic acid in humans. Role: PI

Total: \$342,595.38 (direct+indirect)

NHLBI, R01HL143885

04/01/19 – 03/31/23

Leveraging multi-omics approaches to examine metabolic challenges of obesity in relation to cardiovascular diseases. This project proposes that metabolic pathways may underlie genetic and epigenetic influences on CVD risk factors and downstream sequelae and that obesity may stress some of these critical metabolic pathways, thus accelerating CVD risk. Role: Co-I from 04/01/22 – 03/31/22).

Total: \$21,152 (direct costs)

Completed Research Support

NIAID, R13AI161942

05/01/21 – 04/30/22

FASEB's The nutrition, immunity, and inflammation conference: From model systems to human trials. This grant supports a FASEB conference on nutrition and immunity organized by Dr. Shaikh. Role: PI.

Total: \$17,525 (direct costs)

NIDCR, R21DE029746

07/08/20 – 06/30/22

Potential mechanisms underlying a relationship between long-chain polyunsaturated fatty acids and overlapping pain conditions in adults. This study investigates the relationship between fatty acid biochemistry and several chronic pain conditions including temporomandibular disorder. Role: co-I.

Total: \$426,250 (direct+indirect)

UNC TraCS Award 550KR242033 02/01/21 – 01/31/22
 Bioavailability of SPMs in humans with obesity. This is a pilot clinical study using ‘SPM Active’ to test the bioavailability of select SPMs in circulation of humans with obesity. Role: PI.
 Total: \$36,563 (direct costs)

NIDDK, NIH R01DK107397 02/01/17 – 01/31/22
 PE methylation in skeletal muscle energy efficiency. This project investigates the role of phosphatidylethanolamine methylation on skeletal muscle respiratory capacity using tissue-specific knockout mouse models. Role: Co-I.
 Total: \$1,796,553 (direct+indirect)

NCCIH, NIH R01AT008375 NCE 12/31/21 04/01/15 – 12/31/21
 Suppressing inflammation and boosting humoral immunity with n-3 PUFAs. The objective of this proposal is to test the hypothesis that n-3 polyunsaturated fatty acids enhance humoral immunity as a consequence of suppressing inflammation in lean and obese mice in response to varying antigens including influenza infection. Role: PI.
 Total: \$1,807,823 (direct+indirect)

UNC Center for Environmental Health and Susceptibility 05/01/20 – 04/30/21
 Membrane-mediated mechanism by which PFOA impairs antibody levels and mitigation with DHA. This project investigates the mechanism by perfluorooctanoic acid (PFOA) lowers antibody levels upon influenza infection and the potential for dietary docosahexaenoic acid to reverse the effects of PFOA. Role: PI.
 Total: \$30,000 (direct)

NIH NIDDK P30DK056350 04/01/20 – 03/31/21
 UNC NORC Pilot & Feasibility Program Supplement to Support URM Investigators and HBCUs. The project is a supplement award to the NIDDK funded NORC for developing pilot and feasibility awards that facilitate collaboration between UNC and HBCUs. Role: co-I.
 Total: \$145,777 (direct+indirect)

NIH Office of Dietary Supplements, P30DK056350 04/01/19 – 03/31/21
 Using DO mice to establish inter-individual differences with pure EPA and DHA. This project is a supplement award to the NIDDK funded NORC (Zeisel PI) that investigates how EPA and DHA regulate the microbiome and whole body metabolism in response to variation in host genetics. Role: PI of the supplement.
 Total: \$145,800 (direct+indirect)

TTSA022P1 04/01/18-11/19/19
 UNC School of Medicine & TraCS Translation Team Science Award & CTSA UL1TR002489. Mechanisms by which gastric-bypass surgery improves lymphocyte immunometabolism. The objective of this grant is to determine how adipose tissue in response to gastric-bypass surgery influences T cell mitochondrial function and underlying lipid metabolism. Role: MPI.
 Total: \$50,000 (no indirect dollars)

NHLBI, NIH R01HL12364701 NCE 06/30/21

07/01/15 – 06/30/19

Mitochondrial respirasomes in acute coronary syndromes. This project addresses how respiratory supercomplexes form in response to ischemia reperfusion injury in a rat model.

Role: MPI

Total: \$1,369,883 (direct+indirect)

Office of the Director, NIH R01AT008375

04/01/18 – 03/31/19

Gender differences in B cell responses. This supplement award for the parent R01AT008375 was in response to PA-16-066 from NCI. The proposal tests the novel hypothesis that female mice are protected from impairments in their B cell responses in obesity due to changes in lipid metabolism. Role: PI.

Total: \$57,062 (direct+indirect)

Office of the Director, NIH R01AT008375

09/12/16 – 09/11/17

B cell metabolomics in diet-induced obesity. This supplement award for the parent R01AT008375 was in response to PA-16-005. The proposal tests the novel hypothesis that lymphocyte metabolism is modified by diet-induced obesity. Role: PI.

Total: \$161,244 (direct+indirect)

Alaskomega Organic Technologies

04/15/16 – 07/14/17

Regulating insulin sensitivity, infection, and inflammation with novel fatty acids. This proposal tested several novel fatty acid formulations on murine endpoints of infection and inflammation. Role: PI.

Total: \$22,500 (direct+indirect)

NIDDK, R03DK109888

07/01/16 – 06/30/17

Skeletal muscle mitochondrial phospholipids and aerobic capacity. This proposal investigated the role of mitochondrial phospholipid biosynthesis on skeletal muscle respiratory capacity and whole-body metabolic health. Role: co-I.

Total: \$147,500 (direct+indirect)

Caroline Raby Award

07/01/16 – 06/30/17

B cell activation in the metabolically unhealthy. This pilot grant from a private donor supported research on how B cell responses are impaired in metabolically unhealthy males and females. Role: PI.

Total: \$20,000 (direct only)

NHLBI, R15HL12292201

05/01/15 – 06/30/17

Treatment of cardiac reperfusion injury by optimizing the mitochondrial membrane environment. The objectives of this grant were to determine how ischemia-reperfusion injury disrupted the biophysical organization of the cardiac inner mitochondrial membrane and how a mitochondria-specific peptide rescued the decrement in membrane organization. Role: PI.

Total: \$442,500 (direct+indirect)

NIGMS, NIH K25GM100480

10/01/12 – 09/30/17

Label-free RF imaging of cell membrane heterogeneity in liquid. This grant developed an RF scanner that would ultimately measure the impact of fatty acids on membrane lipid rafts. Role: co-I.
Total: \$723,514 (direct only)

Alaskomega Organic Technologies 08/01/15 – 11/01/16
Omega-3 fatty acids and B cell activation in obese humans. This proposal addressed the influence of dietary supplementation with select omega-3 fatty acid on B cell activation ex vivo. Role: PI.
Total: \$35,000 (direct only)

Stealth BioTherapeutics 03/01/16 – 07/31/16
Mitochondrial effects of novel cell-permeable peptides. This proposal addressed how select peptides have therapeutic effects on mitochondrial function in the context of disease. Role: co-I. (5% salary coverage under a master research agreement)

NIAAA, NIH R01AA014441 07/01/11 – 06/30/16
Mechanisms for estrogen-dependent myocardial depressant effect of ethanol. This grant elucidated how estrogen transforms ethanol-evoked cardio-protection into cardio-depression in a female animal model. Role: co-I.
Total: \$1,943,442 (direct+indirect)

Brody Brothers Endowment Grant 11/01/14 – 05/01/16
Targeting B cell dietary fatty acids in obese humans to improve humoral immunity. This foundation grant determined how B cell activation differed between lean and obese humans. Role: PI.
Total: \$35,000 (direct only)

Methylation Sciences 02/15/15 – 10/14/15
Microglial activation and SAME. This proposal investigated how s-adenosylmethionine (SAME) suppressed pro-inflammatory cytokine secretion from microglial cells. Role: PI.
Total: \$17,710 (direct+15%only indirect)

Brody Brothers Endowment Grant 11/01/14 – 10/31/15
Biophysical organization and kinetics of cardiolipin microdomains in ischemia-reperfusion injury. This foundation grant addressed how cardiolipin microdomains were disrupted in a model of heart disease. Role: PI.
Total: \$40,000 (direct only)

NHLBI, NIH R56HL123647-01 09/01/14 – 08/31/15
Mitochondrial respirasomes in acute coronary syndromes. This bridge grant addressed how respiratory supercomplexes form in response to ischemia reperfusion injury in a rat model. Role: MPI
Total: \$295,000 (direct+indirect)

Methylation Sciences 03/01/14 – 09/30/14

Targeting macrophage inflammation with SAME through membrane reorganization. This proposal elucidated how s-adenosylmethionine (SAME) regulated macrophage inflammation by targeting membrane molecular organization. Role: PI.
Total: \$34,122 (direct+indirect)

The North Carolina Translational & Clinical Sciences Institute 12/01/13 – 05/31/15
Award 550KR51320 under the National Center for Advancing Translational Sciences (NCATS) NIH 1UL1TR001111. Developing n-3 fatty acids for enhancing immunity in the obese upon viral infection. This pilot proposal determined how n-3 polyunsaturated fatty acids at a 3:2 ratio could be developed to boost antibody production upon influenza infection. Role: PI.
Total: \$50,000 (direct only)

Brody School of Medicine Seed Grant Program 04/01/14 – 12/31/14
Protecting the myocardium by targeting lipid-dependent mitochondrial respirasomes. This proposal investigated how cardiolipin levels regulated mitochondrial respirasome activity in primary myocytes from humans. Role: co-I.
Total: \$25,000 (direct only)

Stealth BioTherapeutics 12/15/11 – 03/31/14
Effects of MTP-131 on inner mitochondrial membrane fatty acid composition. This grant determined how mitochondrial targeted peptides improved myocardial function by manipulating the function of cardiolipin in rat models of type I diabetes and ischemia-reperfusion injury. Role: PI (D. Brown, lead PI).
Total: \$239,157 (direct+indirect)

NCCAM, NIH R15AT006122 05/01/10 – 09/30/13
N-3 PUFAs and antigen presenting cells. This proposal investigated how n-3 PUFAs disrupted lipid microdomain and MHC organization on the surface of antigen presenting cells, ultimately suppressing the formation of the immunological synapse. Role: PI.
Total: \$435,000 (direct+indirect)

GlaxoSmithKline 12/01/09 – 12/01/12
Mitigating the mitochondrial dysfunction and apoptosis in hypertrophied left atrium of patients with severe mitral valve regurgitation via short-term Lovaza treatment prior to surgery. This proposal investigated how Lovaza administered to patients with severe mitral valve regurgitation improved mitochondrial function through changes in the biophysical organization of mitochondrial membranes. Role: MPI (Anderson/Shaiikh).
Total: \$157,518 (direct+indirect)

East – West Collaboration Award, East Carolina University 01/02/13 – 01/01/14
The use of differential scanning calorimetry for quantifying the impact of dietary intervention on cellular membranes. This pilot project award developed differential scanning calorimetry for quantifying thermodynamic changes in plasma membranes upon dietary intervention with high fat diets. Role: PI.
Total: \$10,000 (direct only)

East Carolina Diabetes & Obesity Institute 07/01/11 – 06/30/13
MHC I – Insulin receptor clusters as regulators of glucose uptake in adipocytes. This grant was an award through the East Carolina Diabetes and Obesity Institute. The aim here was to determine how knocking down MHC class I with siRNA impacted glucose uptake in 3T3L1 adipocytes in order to determine the potential role of MHC class I molecules on the molecular organization of the insulin receptor and GLUT4. Role: PI.
Total: \$25,000 (direct only)

Start-up Funds 07/01/08 – 06/30/11
Supported by East Carolina University, Brody School of Medicine.
Funds supported the general mission of the East Carolina Diabetes and Obesity Institute. The specific aims were to establish functional and mechanistic studies on how dietary fatty acids modify immune responses.
Total: \$560,000 (direct only)

Shared Resources Award 10/01/08
Office of the Associate Dean for Research and Graduate Studies, Brody School of Medicine, East Carolina University. Funds supported the acquisition of a gas chromatograph for fatty acid analysis. Role: PI.
Total: \$20,000 (direct only)

NIH training grant (5T32 AI07247 to Mark Soloski) 08/01/04 – 07/31/07
Johns Hopkins School of Medicine Competition for Postdoctoral Position (internal Hopkins review). The project aimed to elucidate the effects of dietary fatty acids on B cell mediated antigen presentation and T cell responses through changes in MHC class I lateral organization and trafficking in vitro and ex vivo.
Total: \$120,000 (direct)

Conference Organizer at UNC

Lead organizer for the FASEB Nutritional Immunology Across the Lifespan Conference. July 30-August 3, 2023, Melbourne, FL

Co-organizer for 4th Annual Interdisciplinary Nutrition Sciences Symposium (INSS). Obesity and the Brain Across the Life Course. Date to be determined. Chapel Hill, NC

Co-organizer for 3rd Annual Interdisciplinary Nutrition Sciences Symposium (INSS). Diet and Chronic Unresolved Inflammation: Implications for Obesity-Associated Complications. July 20-21, 2022. Chapel Hill, NC

Co-organizer for 2nd Annual Interdisciplinary Nutrition Sciences Symposium (INSS). Heterogeneity in obesity: Implications for cancer and related obesity-associated outcomes. June 21-22, 2021 Chapel Hill, NC

Co-organizer for the FASEB Nutritional Immunology Conference for 2021, July 25-29, Virtual (originally scheduled to be Colorado). PI of the NIAID R13 for this conference.

Co-organizer for 1st Annual Interdisciplinary Nutrition Sciences Symposium (INSS). Synergizing animal and human obesity research. July 24-25, 2019 Chapel Hill, NC.

Fundraising Chair for the FASEB Nutritional Immunology Conference, June 24-29, 2018. Leesburg, VA.

Conference Organizer at ECU

Co-organizer for The 12th Fatty Acids and Cell Signaling (FACS) conference: From genes to human physiology. October 25-27th 2015 Toronto, Canada.
