CHROMIUM

Percent of Samples Above NC 2L in NC Private Well Water, 1998-2019

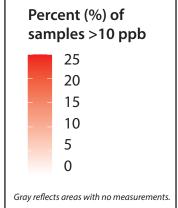

The NC 2L for chromium is 10 ppb.

NC 2L Groundwater: Set by NC DEQ as the highest levels of contaminants allowed in groundwater,* which may be tolerated without creating a threat to human health or which would otherwise make the groundwater unsuitable for its intended best usage, such as a drinking water.

Parts per billion (ppb): Unit of measurement. Equal to µg/L (micrograms per liter).

Map shows percentages across geographic locations. For number of wells tested in each county, refer to county table.

*Well water quality is not regulated in North Carolina.
