

# COMMUNITY AND GLOBAL PUBLIC HEALTH, NEW GILLINGS UNDERGRADUATE MAJOR

Are you passionate about making a difference in the world? Do you want to **work in partnership with local and global communities** to identify, assess, and address health problems to achieve health equity? Look no further than our exciting new BS in Public Health (BSPH) program in Community and Global Public Health!

## Training Future Public Health Leaders

Our program builds knowledge and skills to prepare students for either entry-level positions at public health or related organizations (e.g., non-profits, community-based organizations, government) or for advanced degree programs (e.g., graduate school, medical school).

## Hands-On Experience

Gain practical experience through internships, research projects, and fieldwork opportunities. Our partnerships with local and global health organizations ensure you have real-world experience before you even graduate.

## Faculty Expertise

Learn from renowned experts in the field who are passionate about mentoring the next generation of public health leaders. Our faculty bring a wealth of experience with longstanding research partnerships in communities across the world.

## Curriculum

All majoring students need to complete 42 major credits:

- 13 credits (4 classes) of public health core coursework
- 17 credits (5 classes) of health behavior (HBEH) coursework
- 3 credits (1 class) of additional specified public health coursework
- 9 credits (3 classes) of additional approved electives
- Optional 6 credits (2 classes) of independent honors research

This is a junior entry application-based major with prereqs.
